So actually, he's right. Jobs -are- flowing overseas faster than water from
Lake Erie is going over the Niagara Falls. ;)

I gather a lot of spy equipment was battery operated, or ran off the
AC line.

The real puzzle about the equipment in Hogan's POW camp should be
how they weren't tracked down every time they transmitted. Since it
was a fixed location, it would be much easier to direction find them than
if they moved each time they transmitted. If the germans didn't catch
them one time, they'd have the generally area and each subsequent
transmission would help to pin down the location.

3212. Good News! -- Jesus Christ Went To The Cross So You Can Go To Heaven

Newsgroup: rec.radio.shortwave
Date: 2005-02-06 22:04:33 UTC
From: Good_News_For_You_All@yahoo.com
Message-ID: <1107727473.145586.286610@z14g2000cwz.googlegroups.com>
Source record: 7210

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

Have a great day!

Howard, you can't be this stupid, can you? The problem with so many people on this NG is that they won't even take a minute to research the details before they write. Just as I have said, we essentially are all becoming morons. When a large percentage of American kids can't even find the U.S. on a globe, we are indeed in trouble. Everybody, including myself, such as my original post, has opinions, but many people offer blatantly incorrect information without making even the slightest attempt to verify it.

Here Howard, I have made it easy for you to see the dynamics of the water flow. You have proven just how stupid people can be. Kindly explain to me how the water jumps up in the air from Lake Ontario to enter Lake Erie. Putz.

http://techalive.mtu.edu/meec/module08/GreatLakesFlow.htm

If you have any questions, such as how to spell the word "if", feel free to write back.

For all you know I was agreeing with you. No matter how you look at what you said, it could be argued that your statement was correct. If the water flows as you said, then your point stands although it can be debated. But if the water flows as Howard said, you're absolutely in the right. And -I'm- the stupid one?

Of course, the two have nothing to do with each other. But being called fat by netizens that have never seen me has about as much effect on me as being called queer. IOW, none. Especially since I'm neither. And I'm thinking neither are you.

> I'll love Honus
> like he has never been loved before.

Alright! A competition between you and Mrs. Honus. No matter what happens, the -real- winner will be...ME!

(LOL) Laugh out loud, how ironic. Did you intend to be ironic, or was it just the same affliction of which I wrote?

If Canadians had any brains, they would preclude Americans from moving to Canada. Unfortunately, since Americans don't have brains, we allow any sick, diseased, indigent person to migrate unchecked from Mexico into this country.

I trust that you are proud of the degeneracy that has run rife throughout this country? Do you extol freedom of speech when it comes to pornography yet support the non-existent separation of church and state? Is it "just" (as in fair) to say that any artistic expression, regardless how vile, is protected under the 1st Amendment, but that a high school graduating class cannot say the word God during commencement?

Did you know that "Separation of Church and state" are not even in the Constitution? Probably not.

Go ahead, laugh away. Laugh your rights away, laugh your freedoms away, laugh your dignity away. Try your damndest to get amused responses from other posters to this NG, no doubt it will be easy. But what will you really have gained? A nit wit entertaining nit wits.

Soliloquy.

First off, relax a bit. As to why my statement, I have been there and
seen the falls and also checked the map: the Niagara River shows to
run between Lake Ontario and Lake Erie and the falls are between the
two lakes. Well, it seems I remembered the direction of water travel
backward and I made a public mistake. Had you not been so irate in
your response you would have received a public apology. Perhaps your
calling me a putz made you feel better, from the level of vitriole in
your posts today sounds like you need a little relief and thankfully I
was here to provide it for you.

I noticed that you simply left your reply as a premise, offering you a way out either way. Take a side, don't leave it dangle. If you feel that it could be debated, it sways the issue to indicate that you actually didn't agree with my post anyway, leaving it open to the distinct possibility that you were unaware of the flow direction. At least DXAce replied (Huh?) under Howard's assertion that the flow was reversed. DXAce goes on to counsel me on a move to Canada.

Major apologies if your post was in agreement with mine. I suspect that it wasn't though, and that you are fishing for a way out of your ignorance.

Did you see "The Princess Bride"?

http://www.imdb.com/title/tt0093779/quotes

Look at this quote from the movie, depicting a dizzying series of logic reversals.

You would have to see the movie to appreciate the following. It concerned a sequence with a supposedly intellectual man. The gist was that one goblet of wine was to be poisoned, the other not. The intelligent man would be offered his choice of goblet, not knowing which one contained the poison.

"Vizzini: Now, a clever man would put the poison into his own goblet, because he would know that only a great fool would reach for what he was given. I am not a great fool, so I can clearly not choose the wine in front of you. But you must have known I was not a great fool, you would have counted on it, so I can clearly not choose the wine in front of me.

Vizzini: You only think I guessed wrong - that's what's so funny. I switched glasses when your back was turned. Ha-ha, you fool. You fell victim to one of the classic blunders, the most famous of which is "Never get involved in a land war in Asia", but only slightly less well known is this: "Never go in against a Sicilian, when *death* is on the line.". Hahahahahah.

[Vizzini falls over dead] "

And look, we are back to laughing again. How ironic.

Soliloquy

Howard <mensch90249@yahoo.com> wrote in
news:au7d01l15aboctjnqr93jgl94jugckdbon@4ax.com:

Hey Howard, no problem buddy. Oddly enough, while watching Sherlock Holmes the other day, they used the word "vitriol". I knew of its use in language, but it was thrown onto a man's face for revenge of a similar crime from years before. (hell hath no wrath like a woman scorned, and it applied in the Sherlock Holmes episode). Anyway, a quick look to the Webster's Online Dictionary revealed the following.

Main Entry: oil of vitriol
: concentrated sulfuric acid

You learn something new every day.

Regards.

KAS,
.
I would have to agree with you that the FCC Shortwave
Broadcasting Regulations are Artificial; and designed
to protect the AM/MW and FM Radio Station Licensees.
.
I would be my preference that FCC require each Clear Channel
AM/MW Broadcaster had to carry non-syndicated 'original'
On-the-Air-Talent / Programming from 8PM to 4AM local time
each night.
http://www.fortunecity.com/tinpan/bluenote/706/namrp/amradio.htm
http://www.fortunecity.com/tinpan/bluenote/706/namrp/freq.htm
.
I would like to see the FCC require that One (1) Clear Channel
AM/MW Broadcaster in each of the 25 Largest Metro Urban
Areas of the USA be required to have a Night Time Programming
SIMUCASTED on a specified Shortwave Radio Band using 5KW
of power and Digital Radio Mondiale [DRM]. They could use their
existing AM/MW Antenna as a simple multi-wavelength vertical
Antenna; or set-up a separate single element Vertical SW Antenna.
.
Designate the 41 Meter Shortwave Band as the USA Nation Wide
{HomeLand Security} Broadcasting Band : 7100 kHz - 7600 kHz
Require all 'new' AM/FM Radios (Home and Auto) to have full
DRM Coverage of the 41 Meter Shortwave Band.
.
It's simple a matter of Public Policy in the National Interest.
.
if . . . i ruled the world ~ RHF

Absolutely right - but then you wouldn't have had a hit TV show.
Televison/movie/theatre require that you "suspend you belief" as a basic
premise most of the itme. Like Gilligan's Island - as the old joke

runs: If the professor was smart enough to make a radio out of a
coconut, why couldn't he fix a hole in a boat? :>)

Tony

Firstly, I happen to know the meaning of the word you use for a handle; I didn't want to intrude. ;) Of course, your speech -was- made in public, so I'll fall back on "secondly", which is this:

I very rarely take sides, especially in such off-topic political pissing matches. Anyone who's been paying attention, however, would note that I -do- make "attaboy" posts whenever I see someone (most recently Brenda) pointing out that there are idiots and well-meaning people on both sides of the aisle. However, if it'll make you feel better, I'll take a position on all of the topics in your first paragraph. Time doesn't allow for further comment. Here we go:

> Stooopid.

Yes, it was. But it made me laugh, at least a little. Pies in the face are stupid, but they sometimes make me laugh as well. Lighten up. You'll live longer.

> I am looking for an Amish family to adopt me.

Now -that- is stupid. That, by the way, is how it's spelled. Spelling it as you did makes you look like an idjit. Get it? ;)

> America is being
> flushed down the shit tubes,

I disagree. We're flushing ourselves down the shit tubes. I believe that's an important distinction. We're responsible.

> elections are rigged,

I agree. I live in Seattle, and I'm living through it as we speak.

> jobs flow overseas
> faster than the water from Lake Erie over the Niagara Falls,

That depends. How do you quantify the two in comparable terms? One gallon per minute of flow equals one job lost? Or one gallon per hour? Or am I at liberty to take this as a figure of speech? In that case, I would tend to agree although I really don't know for sure. I do hear quite a bit on the

news about it, but you know how that goes.

> moronic
> "reality" shows dominate the television,

That's one of the reasons that I very rarely watch TV. So, I agree.

> and we continue with the asinine
> skits such as this one.

It was a prank call from a radio station that got you overly wound up. It did lean towards asinine, but so what? I'm about to watch an old silent Keyston Kops movie with my little girl. Bite me if you disapprove.

> I would have thought that it was funny at one
> time, but endless laughter is indicative of a deranged mind.

I'm pretty sure that the recipient of that call isn't laughing anymore, and so I'm not worried about his state of mental health. Sometimes things strike me as funny, and I laugh harder on those days than I would on others. BFD.

There you go. Are you happy now, or are you that desperate for some more "support" that you want me to go through your entire post? You'll have to wait...I'm going out for dinner. Mexican food, too. Hmmmm.

> If you feel that
> it could be debated, it sways the issue to indicate that you actually
> didn't agree with my post anyway, leaving it open to the distinct
> possibility that you were unaware of the flow direction.

Oh, I absolutely had and still have no idea where the water that goes over the falls comes from. It's part of the Great Lakes system; that's all I know. My comment was a joke, and it was meant to be taken exactly as I explained it to you. Either way you cut it, based on what the two of you said, you could still be correct. Even though he was correcting you, he wasn't necessarily correcting you. It was an excercise in irony. And for his edification, I wasn't busting his chops. It was a joke.

> At least DXAce
> replied (Huh?) under Howard's assertion that the flow was reversed. DXAce
> goes on to counsel me on a move to Canada.

Don't lump me in with him. You've already called me an asshole, which was wholly unwarranted. Don't compound your offenses.

> Major apologies if your post was in agreement with mine. I suspect that
> it wasn't though, and that you are fishing for a way out of your
> ignorance.

Well. I hope my position is clearer now. I gleefully admit my ignorance on this point of geography; it's peripheral to my point.

> Did you see "The Princess Bride"?

Watch it all the time. It's one of my wife's favorite movies.

> http://www.imdb.com/title/tt0093779/quotes
>
> Look at this quote from the movie, depicting a dizzying series of logic
> reversals.

<snip of one of my favorite parts>

I really liked the part where Inigo finally meets up with the man who killed his father. The Count Rugen's reaction to Inigo's challenge busts my family up everytime. And of course, the repartee between Andre the Giant and Inigo throughout the movie is priceless. It'd be an -awesome- movie if they had a hotter chick in it playing Buttercup, and if they'd used some other actor for the role of Wesley. Everytime I see that guy, I get this unreasonable urge to just bitch slap him. I don't know why.

> And look, we are back to laughing again. How ironic.

Which brings us right back to the skit...some people think it's funny, some don't. I think that for all of your points, you read too much into the phone call. If it was just an excuse to vent about some things, as I suspect, you didn't need it. Just vent. Everyone else around here does.

Quoth "Stinger" <contact@newsserveronly.com> in news:4uvNd.23866
$3W3.7598@bignews4.bellsouth.net:

> It's all about ratings, and Air America's are dismal.

It's all about making money for the stations carrying your
programming, which makes money for you, and Air America is doing it.

And AAR programming is getting respectable ratings as well,
considering how young they are, and the poor quality of signals they
are on in most of the country.

Talk radio ratings take time to grow. And AAR is growing them in
desirable demographic markets Limbaugh and Hannity can't touch.

Glad you used the term buddy, was beginning to think my erroneous
response ignited "Usenet War MCVIII". I shouldn't have relied on a
long ago memory and a map, or at least looked at a topo map which
would've given me the right answer. Anyway, it's off to see at
least some of the Superbowl so the Committe of Un-American Behavior
doesn't start chasing after me. Heard part of an interview with "Sir"
Paul McCartney the other day during which he indicated we need not
worry about any "wardrobe malfunctions" during his half-time
performance 8-}

See ya in future posts,
Howard

Snip!

Dickheadtionary Definition:

GODERRHEA (noun)

A mental venereal disease characterized by a dickhead oozing his/her religious dogma in endless dribbles on Usenet. As with the clap being cured with a good shot of penicillin, so can "the Crap" be cured with a good shot of a .357 magnum, directly to the dickhead's head. Repeat as necessary. If sysmtoms persist, shoot again in the morning.

You are certainly an exception and up to about 20 years ago marriages usually worked. But you folks know as well as I do how many shit the bed in the past 20 years. You all know PLENTY of them.

I hope it lasts 20 more.

> transmitters. Can't have that!

You know that is BS. That law is older than both of us. It was put in place
long before any "large media". The sole purpose was to PREVENT large media

from controlling the airwaves. It was thought that it would be far more beneficial to have small, reasonably local stations that would reflect the view of local communities and provide a voice for differing points of view. It is the same reason that you need federal approval to buy a media outlet such as radio stations, TV stations and newspapers. It was thought, and they were correct, that diversity of views was a good thing and having a few giant companies controlling the media would be counterproductive. You are right in that the FCC seems to be more and more attracted to the money but that is a relatively recent thing, counter to the old rules under discussion.

Subject: FW: MRE Dinner Date
Importance: Low

This was from a grunt whose date unwittingly asked him to cook for her.
Anyone who has had to eat MREs--or for we graybeards, C-Rats--for months
during deployments will appreciate this.

I made a typo on the title,what I have is the 400 professional.
what I could find on it was not readable after translation.
anyway,sync or no sync on this model?

The World Ends Tomorrow and YOU MAY DIE!!!

Well, no, probably not...but whatever you do, just keep reading!

ARE WE CONTROLLED BY SECRET FORCES?
ARE ALIEN SPACE MONSTERS BRINGING A STARTLING NEW WORLD?
DO PEOPLE THINK YOU'RE STRANGE?
DO YOU??
...THEN YOU MAY BE ON THE RIGHT TRACK!

"Unpredictables" are not alone and possess amazing hidden powers of
their own!
Are You Abnormal?
YES! YOUR KIND SHALL TRIUMPH!

If you are what they call "different" --
If you think we're entering a new Dark Ages --
If you see the universe as one vast morbid sense of humor --
If you are looking for an inherently bogus religion that will condone
superior degeneracy and tell you that you are "above" everyone else --
If you can help us with a donation --

could save your sanity!

"You'd PAY to know what you REALLY think." --Dobbs 1961
FEELING LIKE THERE'S JUST NO SLACK?
You may have 'Snapped' already from the information disease! ("The
sleep of reason begets monsters.")
The Church of the SubGenius recognizes the programming!
Look to the High Unpredictables of the Church of the SubGenius for
pancultural deprogramming and resynchronization!
Perfect your subliminal vision -- edit your memory -- relive your
reincarnality! SYNC UP!

This is the original Time Control program that has helped thousands
to fear no longer the STARK FIST of REMOVAL.

Become PHYSICALLY ATTRACTIVE -- overnight!

Now you, too, can speak to benevolent aliens at the Alter of X-ist
Contact. Learn Frame Straightening, Body Repair, Gripe Elaboration,
FunKQu, Frenzy Techniques, Excremeditation, the Essentials of Survival
and TIME CONTROL. Attettd End O' The World Drills and Chance Labs.
Learn to 'Tenlike. Evaluate the so-called "accidents" and
"coincidences" in your timestream. Perform long, complicated rites of
initiation and rituals of Communionication. Accullate yourself to the

Church, where you will be isolated, given a new diet, a new set of habits, and an altered label and appearance. The new void in your bran-pan will be refilled with corrected info and subconsciously implanted ritual experiences. Follow your FOLLIES and COMPULSIONS and become rich like us.
Explore the "Zen" of stupidity! Channel chronic procrastination into life-saving paranoia and precise anatityl MAKE WASTE!!
Find out who your Personal Saviors may be and who are the False Prophets in your life!

YES, YOU MAY BE THE SUBGENIUS, MASTER OF THE STOOGLEY ARTS! Perform the Salute!

The most 'NO WAY' new wage religion of them all!!
Brain-trust of our species!!

Using SubGenius secrets of BULLDADA and MOREALISM you can now MIRACULOUSLY ELIMINATE COMPULSIVE URGES such as smoking, lethargizing, overeating, insomnia, the inability to take drugs, constipation, old age, sex and money problems, baldness, illness, the Work Instinct, assouliness, and painful shortage of SLACK!

This is a certified religion of scorn and vengeance directed at all of THEM, the enemies of us Outsiders. It is "self-help" thorugh scoffing and blaspheming, frenzied fornication and the Tumping of Graven Images. The Church provides answers and miracles in the service of SUREAVOLUTION.
"Ignore the man behind the curtain" -- Oz
The Church of the SubGenius is the ultimate secret order, the superior brain cult for those who "know better" but who demand in the LUST for GRINS a spectacular, special-effects-laden belief system -- a 'stuporstition.'

This religion, devised by precise mathematical formulae, weirder than the most obscure UFO/Atlantis cults, is invaluable to all superior renegades who, at any time, are justifiably on the edge of insanity and can be made whole only by developing a seventh sense of BLUDGEON HUMOR.

You found out the secret!

How the hell else are you going to last a long time with someone if they are not your friend. Besides being friends the only other thing required is that you both share the expectations of the marriage like kids, money and who does what.

Maybe yes and maybe no.

In the good old days of analog that could be true as long as you did
not use someone's specifically patented circuitry. There were other
ways of building circuits to perform the same operation.

No one has had to worry about that for a long time since all the basic
patents have long expired but now through the magic digital encoding
the method becomes intellectual property again. Even if you design a
different circuit that performs the same decoding the decoding itself
is part of the property and so you will violate it.

Yes it was pretty good today. I had some fading on the usually
excellent signal from Radio Netherlands from both the antilles and
Sackville. Signal levels throughout the 2 hours moved from +20 to S6,
which is about 40 dB.

They had a very good program on aging trends in different countries and
the social programs that take care of them. The real shock was the
indication from them that Bush was doing the right thing by making
changes in social security now rather than later where the Democrats
want to do nothing.

Another very good program was on the chinese "Art of War" book. If you
did not hear them this weekend maybe these will be repeated this week.

>>reasons, of course) was a desire on the part of large media
>>corporations to protect their big investments in mediumwave networks
>>from competition from lower-expense shortwave upstarts, who could
>>easily have covered the nation with a couple of 50,000-Watt
>>transmitters. Can't have that!
>
>
> You know that is BS. That law is older than both of us. It was put in place
> long before any "large media".

Sure, the law was put over before even I was born (though they did
still make Packards in 1956). But the big networks were well in
place by the 1930s.

> The sole purpose was to PREVENT large media
> from controlling the airwaves. It was thought that it would be far more

> beneficial to have small, reasonably local stations that would reflect the
> view of local communities and provide a voice for differing points of view.

I doubt your assertion. That's the argument that was made, of course, but like practically everything else that comes from the mouth of a bought politician, it was just a screen for the real reason.

The presence of regional stations on shortwave programmed for a domestic audience would have had essentially zero impact on people wanting to hear local programs about the doings in Punkin Holler or Peoria. And the local advertisers would have known that and kept their dollars flowing to the small local stations.

But domestic shortwave would definitely have reduced the revenues of the big networks. It would have let low-expense competition cut in on the national accounts. _That_ was intolerable. Hence the law.

The goal of the law wasn't to freeze out the mom-and-pop AM stations. That would have been too blatant -- and really bad PR, too. Mom and Pop posed little threat to the big chains -- in fact, in time they would almost be forced to join them in one way or another.

The law's real goal was to squelch the possibility of new entrepreneurs with big ideas popping up and challenging the big networks, which looked awful easy to do as the incredible propagation of shortwave began to be understood and exploited.

The money-men got their way. The law was enacted. So anyone wanting to start a national chain had to go the very expensive and difficult route of buying or signing up hundreds of stations -- a very high bar to competition. The big guys like it behind that kind of bar. They _hate_ leveling the playing field. That's why they like IBOC.

It's a parallel situation to big corporations, their "foundations," and the tax system.

The super-rich love the "progressive" tax system that is sold to the boobs as "soaking the rich."

Why? Because 1) their bought "liberal" and kosher "conservative" politicians make them so many exemptions and writeoffs that it takes volumes the size of the _Encyclopaedia Britannica_ merely to record them (probably no one person has even read them all); 2) a tax system that ratchets up the rates the higher your income (a so-called "progressive" system) makes it harder -- and this is the key -- for new people (who can't yet play the fancy accounting and writeoff games) to rise into the ranks of the super-wealthy and powerful; and 3) a complex tax system that requires the serfs to report all their economic activity to Big Brother makes people easier to control -- and easier to indict and jail if they miss some jot or tittle of the law, as practically everyone has.

What they _don't want_ is too many people (there will always be some
who succeed nevertheless, of course) who own a few million and a
factory or business or two to be able to rise the next step up the
ladder to the level of the super-rich and powerful. That might be
bad for "stability."

And they certainly don't want the old American upper middle class,
which once had a degree of real financial independence and the
ability to create and fund new political movements, to regain that
independence. (Now this class has been reduced mainly to being
glorified employees of the corporations.)

[...]

And exactly how would keeping religious zealots and Timtron and me
off U.S. shortwave stations help "diversity of views" on the airwaves?

With every good wish,

Kevin.

> view of local communities and provide a voice for differing points of
view.

There was only a small fraction of the stations on the air before WW2 as there are now. In the 30s and 40s, radio was centered in the big cities. Nearly all stations had to run network programming in order to survive.

There was very little local radio programming before WW2. Local programming, such as it was, developed in the 50s, after the networks turned their interest to television.

> It is the same reason that you need federal approval to buy a media
outlet
> such as radio stations, TV stations and newspapers. It was thought, and
they
> were correct, that diversity of views was a good thing and having a few
> giant companies controlling the media would be counterproductive.

Giant companies such as NBC, CBS and Mutual controlled radio. Well, they did split NBC.

> You are
> right in that the FCC seems to be more and more attracted to the money but
> that is a relatively recent thing, counter to the old rules under
> discussion.

>
>

Then why did the network backed stations get the best frequencies, the clear channels and the highest power limits?

Why were the school affiliated stations ghettoized?

1. I'm 26, a radio nut, and single.
2. I do have female friends who 'spin out' out my hobby.
3. I don't watch TV or listen to domestic radio
4. I agree with the majority of posts that say one accepts thier wife/gf's hobby and they accept yours
5. If this guy lost all his baseball (perhaps he should play cricket) stuff and it came to this he never really had a true relationship with his wife.
6. It's a sad world today, where most guys my age in VK, make sure they have assets listed with lawyers in thier own right before they ever move in with a girl, hence the reason that all-without exception-my mates still live at home with thier parents.
7. He obviously never read the Amateur's Code "never place hobby above work, family and other commitments"

Is that little Sony radio really all that good for AM band? And
WalGreens sells them too? There are a bunch of WalGreens stores in my
area and two of them are about five miles or less from me.I think today
I will drive over to one of the stores and see if they have the radios
in stock and I will buy one.If I really like the radio,I just might go
back later on and buy another one too.As for as FM is concerned,all of
the FM stations around here come in loud and clear on my radios.

I did catch part of the program on aging and it was very interesting.

Don't know if anyone heard it, but Radio Ukraine also had an excellent
program on a jazz acapella group based in Kiev. Not the sort of music I
typically listen to, but they were really good! They did a version of
"Sometimes I Feel Like a Motherless Child" that was second to none.
Also did some Georgian and of course Ukrainian folk songs.

Steve

>>B.H.
>>
> Guess that was a Looooooooooooooooooooong T!

Most of the time Canadian beacons transmit a long dash after their ID (sometimes called DAID) as opposed to long silence as in the US beacons. QG carrier transmits on 353kHz with a tone of 400Hz that's why it appears to be near 353.5kHz. QG with a DAID sounds like QG long T.

Listening to beacons can be a form of DX in itself. So far I have 489 beacons logged consisting of 30 US states, 46 Canadian, and a total of 17 countries. My furthest beacon is IPA, Isla de Pascua (Easter Island), Chile on 280kHz, 3,990 miles away. They have a 3kW transmitter so they are a rather easy copy. Most NDBs (non directional beacons) are under 25 watts of power.

Don't get sucked into listening for NDBs or you will be up all night listening to, as my wife calls it, strange beep beeps.

Amendment 1: "Congress shall pass no law... respecting an establishment of religion, nor prohibiting the free exercise thereof."

This and some of the Founding Fathers' intentions has been upheld by the US Supreme Court as being a separation of church and state. Without separation of church & state, you have a theocracy. If we didn't have a separation of church & state, it would be possible for any religious group to take control of the government and pass laws requiring everyone to follow that particular religion. You cannot have freedom of religion without having a separation of church and state.

If you want to practice your religion, then fine, do it. Just don't require anyone else to do it to. This is what the Founding Fathers wanted and this is what the First Amendment states, and has been upheld by our highest court.

Leading Shiite cleric says new Iraq must embrace Islamic law
By Steven Komarow, USA TODAY

BAGHDAD ï¿½ A high-ranking Shiite cleric who helped a coalition of religious parties to apparent victory in Iraq's elections eight days ago said Sunday that the new constitution must embody Islamic law.

Iraqi Shiite Muslims chant religous slogans as they celebrate their preliminary success in the countryï¿½s historic elections.
Wathiq Khuzaie, Getty Images

"We will accept no compromise," said a statement by Grand Ayatollah Mohammed Ishaq al-Fayad, one of the three top Shiite clerics who serve beneath the most senior religious leader, Grand Ayatollah Ali al-Sistani. Al-Fayad said separation of religion and state must be "completely rejected."

Vice President Cheney, on Fox News Sunday, cautioned against jumping to conclusions about what kind of document Iraq's Transitional National Assembly will write. He indicated the United States plans a hands-off approach. "We need to step back a bit now," Cheney said. "The bottom line for everybody to remember here is, this is not going to be, you know, an Iraqi version of America. This is going to be Iraqi."

Cheney predicted Iraqis would try to avoid recreating what they've seen next door in Iran: "a religious theocracy that has been a dismal failure."

Ballot counting is expected to take several more days. Partial tallies show a coalition of Sistani-backed political parties will be the largest bloc and could capture a majority in Iraq's new assembly. The 275-member assembly is to appoint a temporary government and write a constitution.

Leaders of the coalition stressed during the campaign that the Shiites would seek a broad-based government including members of the rival Sunni Muslim sect that ruled under Saddam Hussein. Despite Shiite assurances, fear of an Iranian-style theocracy has been a factor driving the insurgency by Arab Sunnis.

Sixty percent of Iraq's 26 million people are Shiites. Many Arab Sunnis, 20% of the population, boycotted the vote. Kurds, who are mostly Sunni, represent nearly 20% but were enthusiastic about voting.

The Iraqi Islamic Party, the largest Sunni political group, said it will play no role in the new government or assembly but said Saturday that it still plans to help draft the constitution. Also Sunday:

ï¿½ Insurgents attacked a police station south of Baghdad under cover of darkness, killing 22 Iraqi police officers and soldiers. Fourteen attackers also died.

ï¿½ The main group monitoring the election in Iraq said its observers had found irregularities, including voter intimidation in some districts. Overall, it said, the election was well run. The group did not rule on whether the vote was fair.

ï¿½ Four Egyptian telephone workers were abducted. Also, a statement on the Web signed by the Jihad Organization said an Italian journalist seized last week in Baghdad was facing possible execution.

ï¿½ The U.S. military said one soldier was killed and two seriously injured Sunday by a roadside bomb just north of Baghdad. It also reported that a Marine was killed Saturday in fighting south of Baghdad. No details of either incident were released.

ï¿½ The interim Iraqi government said it had arrested a Saddam-era general, Khamis Masin Farhan Ugaydi, 51, on Dec. 20 in the oil refinery town of Beiji, an insurgent stronghold. He was helping finance insurgent attacks, a government statement said.

ï¿½ Defense Secretary Donald Rumsfeld, on CNN's Late Edition, said he doubted Iraq would become an Islamic government. "But look, Iraq is for the Iraqis. It's not for Americans. We're not going to decide what kind of a country they're going to have."

Iraq's ayatollahs have pressed for Islamic law. Early in the U.S. occupation, they demanded that all women be required to wear head coverings. The U.S.-appointed interim government ignored the demand and said women would have equal rights.

Er um what does this have to do with a Jean Shepherd marathon/begathon
on WBAI?

True WBAI/Pacifica followers probably would have gone for Nader or
someone further left.

But if someone posts something about Jean Shepherd on WBCQ is the
follow-up going to be about some of the dubious programming WBCQ has?

The leading sports station in the NYC area (WFAN) is the originating
station for Imus in the morning. (who has survived a few changes of
ownership and format from the WFAN days)

Do you think the averages sports fan listening to WFAN gives a used
piece of toilet paper about arguments over Imus?

A quick Google search says it's a 250hz cw filter for radios with a 455khz IF.

I didn't see any an indication of if it's a crystal or mechanical filter, or
what the shape factor should be.

From <http://www.washtimes.com/upi-breaking/20050203-051616-5199r.htm>:

Gabe Hobbs, Clear Channel Radio vice president of programming,
news/talk/sports, told United Press International progressive talk
is experiencing vigorous growth, largely because the recent round
of the format's expansion took place during the contentious
election year of 2004.

"People had a heightened interest in electoral politics," he said,
"and we used that opportunity to fill a need and launch a new
format."

Hobbs said talk stations typically take 18 months to two years to
become established, but progressive talk is connecting considerably
faster for Clear Channel.

"Our stations are getting there in 30 to 90 days," he said. "That's
remarkable considering most of the talent, no one knows who they
are."

It is not discontinued. You will be hard pressed to find an on-line order
form
for most Sony products because Sony does not authorize the advertisement of
on-line prices. So you must make a call to a Sony dealer to order in most
cases.

This guy is being paid by academia to speak. <

This does not take away from what Brenda Ann said at all. She is
absolutely right.

Intelligent people will look at both sides, carefully consider what
they say and do, do their best to separate truth from fiction, and then
write letters and vote accordingly. With such polarity and gross
misinformation out there, it is hard, I believe for the average
American to decide how to cast his/her vote...but it is our obligation
to try. This last election, I saw no good candidate. I almost didn't
vote in protest. I am not represented by any candidate anymore...but I
did what I had to do anyway.

Bruce Jensen

Isn't that what the Sunni Moslems in Iraq are trying to do? They boycott the vote,
then demand representation.

That's extremely interesting to me.

3325. Successor to KWZ30???

Newsgroup: rec.radio.shortwave
Date: 2005-02-07 18:21:01 UTC
From: sdaniel13@nyc.rr.com
Message-ID: <1107800461.291112.108270@c13g2000cwb.googlegroups.com>
Source record: 7371

Has anyone heard anything at all about the successor to the Kneisner and Doering KWZ30? I wrote to them about eight months ago and they suggested that the successor might be ready sometime in 2005, but since then I've not heard a peep about it. At the time I wrote to them, they said it would probably already have appeared were it not for more urgent things that kept demanding their attention.

The good news, I guess, is that they do appear to mean business about a successor. My sense is that they're in it for the passion, not the bucks.

Steve

Wow, Betz -- you're even stupider than I thought -- and that's really saying
something!

Perhaps this audio link from what is sure to be a trusted source for you
(NPR), entitled "Money Woes for the Air America Radio Network" will give you
a reality check:
http://www.npr.org/templates/story/story.php?storyId=1911057

As for the "demographics" that Rush and Hannity can't touch, that would mean
what? Academia? Mental Hospital Inpatients? Ha!

They've been 'meaning business' for a number of years. I was interested in a KWZ30 at one time, but then when I checked out the specs I dropped the idea.

You don't expect that idiot Bushite sheep to keep in touch with reality,
do you? Reality is against his religion. No, he'd rather cling to
someothing somebody told him a long time ago that made him feel good
about himself, like a hillbilly heroin addict who just can't recapture
that beautiful first high again, no matter how big a dose he snorts.

I'm almost ashamed of the schadenfreude I experience watching these
sheeple make fools of themselves over and over and over again, as they
continue to bang their heads against reality.

Not sure where you're going with this exactly, and I don't think the analogy is a close one, but it seems safe to say that the situation here in the US is quite different than it is in Iraq. As much as we here in the US point out the polarization between the two leading sides, it is an order of magnitude less than that in Iraq, where a lot more is at stake.

In Iraq, you have three basic factions and many other fragments thrown together in one nation cobbled together from feudal states around a century ago - and the ethnic groups still inhabit their original territories and still do not get along. The Sunni alomost certainly think they should have their own nation and government; likewise the Shiites and Kurds. Frankly, it may better that way *for them*, and I probably don't have to explain why that could be so. At the same time, where the Sunni felt as though an election in the lopsided Shiite stronghold would not help them no matter how they voted (and that might be correct), they still feel as though they deserve not to be treated as dirt (and they're right - people deserve to be treated with respect provided the treatment is mutual).

If they don't get representation, whether they voted or not, internal conflict may soon come about. That's just the way the world works. The pragmatic leader of any party, who is interested in peace and national well-being, will sit down and talk with the other party to find common ground and ways to reconcile differences before it comes to this.

This situation doesn't really exist in the US, first off. No matter who is in power, most people are going to be able to function fairly well and be able to make a living without fear of reprisals from government extremists. Second, we have a pragmatic form of government as an institution, contained in the "balance of power" inherent in the Constitution - and except for the U.S. Civil War, it has served fairly well over the decades.

Third, a protest vote of "no confidence in either major candidate" does not make a voter a nonparticipant or less engaged - it makes him an active withholder of support. That does not take away his or her right to be represented.

Whether my guy in Congress is a Republican, a Democrat, or a Whig, he still represents my District - and me. If I were in that position, no matter what I ran as and gained office as, I would be obliged to consider the needs and positions of all of my people, even the ones that did not vote. I would still be their servant. This is not to say that I would oppose the majority position (presumably upon which I was elected, as long as it is basically ethical), but I would also work to be certain that nobody else's rights were being trounced. It is unfortunate that so few in government see that relationship these days.

And as you may have noted in my original post, I implied that I voted for a President anyway, and it was with strong misgivings. Despite my vote, as I said, it wouldn't matter much which gained power, because neither candidate fairly represented my views. If I can't gain representation by voting, then why vote? Being a sheep is certainly no better than trying to register an opinion by withholding a vote.

Interestingly, this Guayaquil station was booming in here in California on 3810 early AM (UTC) on February 6. First time I'd heard it (I used to hear another, I believe, Ecuadorian on 60 meters a few years back). *Very potent signal* for (apparently) 1 kW. Oddly, it seemed to function much as CHU does, in which it is audible on AM and LSB but not USB (broadcast in LSB with carrier reinserted for AM reception).

I miss VNG :-(

My, my -- we've got the condescending tone down to a science now, don't we?
How DARE someone refute MY opinion, huh? (Which is ironically, basically
the same problem with the asinine content at Air America, too)

Well, how's this for up-to-date AND real? Let's see how it's doing in the
ratings in NEW YORK CITY! (That would be the flagship lib spot on the map,
wouldn't it?) I quote:

" AIR AMERICA' RATINGS TURBULENCE IN NY CITY: Surprising many observers who expected it to shine during election season, all-liberal upstart WLIB (1190 AM) -- base station for Al Franken and Janeane Garofalo -- actually headed south, shedding 15% of its summer audience to finish fall at 24th place in just-released ARBITRONS... "

Schadenfreude that, you condescending liberal twits!

A couple of years back I talked with an AAC radioman at
Horsetraders in New Hampshire who'd spent some time as an unwilling
guest of the third reich in a POW camp near the Polish border. He'd
built a two tube regen RCVR with tubes he bought from a Polish radioman

in another section of the camp. The price of a radio tube was three
full sized rats...captured, dressed, cooked and ready to eat. Guys in
his barracks made a real game of getting the rats cuz they'd rather have
the radio than eat the "money" themselves.

I rather doubt that a simple terrestrial storm would influence propagation,
other than the static from thunderstorms.

Like Stewart, I'm in So Cal too and have been noticing excellent reception over the last couple days, but I thought it was due to a better random wire that I installed on Saturday. I'm getting AIR on 9425 at S9, which has never happened before.

I don't know if it's applicable here, but some high end companies are VERY
conservative with specs.

Folks who have the KWZ30 seem to rave about it's performance.

I wouldn't hold my breath for the new model they've been talking about though -
the first time I heard of it, it was supposed to be out in 2001.

Their real business is making stuff for cars. The radio is apparently something
they'd like to do when they have time.

3352. : : : Good News! -- Jesus Christ Went To The Cross So You Can Go To Heaven :

Newsgroup: rec.radio.shortwave

Source record: 7395

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

Have a great day!

Well, these were not 'company' specs, and that combined with the price = no go.

I remember them being rather spendy too and reviews kind of iffy. I think the Germans were trying to pull a fast one again :)

What's simple is -you-. The question went clean over your head.

I don't need to be told the answers. I want to know if HE can explain it, or is he sycophant 100% of the time. And I know the answer to that as well.

Not only that, your answer is pure, unadulterated bullshit. I can just see some G.I. over in Iraq being asked that question by one of the locals, and him giving the answer that you just gave. He'd deserve the time in the stockade that he'd hopefully get. Yeah, that's a great way to drum up support and win people over. Take your sanctimony, and shove it up your ass. You think you're a true patriot; you're nothing of the kind.

3371. question about canadian to US customs

Newsgroup: rec.radio.shortwave
Date: 2005-02-08 01:26:38 UTC
From: mike maghakian <maghakian@comcast.net>
Message-ID: <XJudndfNF_3QiJXfRVn-hw@comcast.com>
Source record: 7317

I bought a radio for $215 from someone in canada a few weeks ago and today I got a bill from the carrier (purolator) company.

the main items were:

estimated customs $15
brokerage fee $18
surety bond fee $30
disbursement of funds $5
FCC filing $15

total was $85 on a $215 radio

for those that have experience with this matter, or actually KNOW what they are talking about, I have some questions.

Am I being taken for a ride ?
I didn't sign anything so why should I pay over $50 in fees to these crumbs ?
Is there a way to fight this ?

thanks

Yes. I remember some being on eBay, can't recall the price they fetched, but it was high. They seem to be a rarity.

This sounds awful smelly to me. I've bought and sold radios from Canada with no problems at all other than filling out the standard customs slip when shipping from here. My advice would be to just not pay it.

Did they phone you and get your approval in advance for the amount? Verbal
authorization is just as good as written.

If not, I would tell them you did not authorize them and ask for their
instructions on how to return the radio and get a full refund of all charges.

If they did phone you and got you to approve the amount, then it is partly your
own fault for agreeing.

Contact the shipper and ask them to help sort it out.

For future reference, Fed Ex does not charge for customs brokerage betwen the
U.S. and Canada (but please double check).

I think Purolater is terible for this kind of thing.

Or ask the shipper to use the Post Office (it can still be shipped express).

I have bought radios Canada and from Jacky's in the UAE and never paid a cent
of duty.

> an economy this "ruined"!

usual republican misdirection
the -economy- doesnt have to send children to school
the -economy- doesnt have to put food on the table
the -economy- doesnt have to put gas in the car
the -economy- doesnt have to try to pay higher medical costs each month

almost all the profits are going to a very small number of people
they are doing very well

the vast majority of people are getting no share of the profits
and are instead facing increasing prices and costs
they are doing poorly

guess what happens when they give up and stop consuming?

Purolator did not ask for my permission to process customs
the seller shipped purolator because he said FedEx wanted $150 when
purolator wanted $30 to ship to the US.

the seller did not seem to know anything about purolator going to charge me.

Excellent - then they were not authorized to represent you and I would call
them and tell them that you are refusing the shipment now taht you have found
out about the unathorized charges.

The customs broker represents you, not the shipper, for the import,

>the seller shipped purolator because he said FedEx wanted $150 when
>purolator wanted $30 to ship to the US.

>the seller did not seem to know anything about purolator going to charge me.

If it is a store then they should have known and maybe they can get Purolator
to rescind the charges.

If ii its a private individual it will be tougher.

The Sony AN-LP1 is a good portable antenna from reports I have read in
the news group. I own a SW7600G but not that antenna. I have been
thinking about picking one of these up though.

I once emailed an online SW store about lengthening the AN-LP1 feedline and the reply was that would detune the antenna.

As long as you can reach a window with 12 feet it looks like a good match for the radio.

I wrote the letter following "Jew Boy..." the day a single complaint arrived to the radio station, with the threat that the ADL would soon be contacted. The letter was provided in advance of the next day, of the time scheduled for the complainant to return for a recording of the questionable broadcast. The station manager refused to give the complainant my letter, and insured me that I would no longer be allowed to produce a show for our community. Is this fair to our Jewish brothers and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong, would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask how my afternoon recorded broadcast went, and to discuss the new week's tentative guest spot with an update regarding the falsely maligned, Mr. And Mrs. Benderman. The station manager informed me my phone number had been misplaced, and was managing with stress trying to put together an apology letter to a single individual, who came into the station, while the interview was still running, to demand action be taken regarding the anti-Semitic broadcast that he was certainly going to report to the ADL about. I told her the Felton interview itself was about bigotry through the demonization of the innocent, what the Jews of world war II suffered through, and, that I was a huge defender of religious Jewish teaching. I told her, to offer the individual a chance to publicly speak regarding the issue, with me, or by himself regarding Felton, to try getting specifically to what has got him so much, by himself, upset about allowing my voice heard defending Jewish rights within our community. She told me that she would likely, none the less, have to let me go to appease the sole

complainant, for what if a lawsuit should result? I told her to consider her options, reminded her that it was only one single individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

---

http://radio.indymedia.org/uploads/big-package.mp3

Greg Felton : "The fear is necessary for two reasons. And the principle reason has nothing to do with Iraq. it has to do with the government itself. The bush government is criminal. [...] The problem is: how do you keep people from paying attention to this? You keep them focused on an external enemy. [..] so they forment this fascistic hatred of a definable group

of people. So, the war on terrorism so called, is not much a way for the United States to protect itself against it's enemy, it is a way for it to create enemies, to justify the kind of repressive measures that would otherwise be intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment, in not allowing what I should have gave: an immediate re-dress regarding, 'who is the Zionist label?', or 'What Holocaust are you referring to?', during the broadcast of January 31st. (bet you we can't get two Christians that agree on everything.) However, I can offer perhaps a show centralized on a chance to exercise your personal views, be they pro or con on where you think we should go from here, or whatever may have you regarding said interview. Or, if you would like, you may wish to do only, or else include, a written work that I promise, will reach as far as the original broadcast. So, actually, this could be a prime moment to have a dialog regarding racism, bigotry, and intolerance. I confess, I may be unaware, and still have much to learn, when it comes to communicating well with all others. But, I know I'm getting better, and I'll tell you, the Justice-Freedom thing, sure seems to be our ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be considered controversial, (as every show I've ever done always has), although I wasn't prepared to hear criticism against the show as being defamatory to a group, or groups of people. As certainly that was not my intent, but however was the difficult subject addressed within the interview. The fundamental teachings of Law, as it pertains to justice and freedom, along with every legitimized religion, is that all free people should be thought of as equals to each other in vigilant protection. And by doing so, one would be serving G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could become a proponent by understanding Jihad). Thereby insuring\realizing that a just intelligent life force rules our chaotic timeless universe in service ultimately to ourselves individually. Giving us in the Torah of Moses, ``all people are created in God's image'' teaching all peoples are Sacred. And as such, would be so in God's interests to defend as the innocent. While in eternal pursuit of happiness and prosperity for all through just means. Under Greg's definition as being a "Zionist" conspiracy, negates the failure of himself personally to recognize the public connotation is too vague, and that Hitler's Nazi Germany, like Bush's America, is politically expressing an inability to represent ourselves with

respect as truly worthy of fair deliberations amongst ourselves. Sacred, every-one. (Or as in, to rise to the defense of those we know to be irrationally victimized as the godly and innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk about because, it's not really understood. It's preached at us like a sermon. We're suppose to accept at face value what we're told about it, as if to, criticize it, is some how disrespectful. Much of what we know about the Holocaust has been propagated by the Zionists, and can be shown quite untrue"

I replied shortly later "One thing about the whole situation is that innocent people were targeted for murder. End of story. That's what the war was. All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an apparent bigotry expressed, and as such, was too narrowly defining the larger established history of the Holocaust, as being the struggle of the human species in halting, the demonization and then subjugation of the innocent millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg to blankly criticize Greg's false construct of what is publicly understood about the Holocaust, is to deny that much for sorrow and suffering took place against the whole of Humanity, especially, of those who held the practiced Jewish faith. To think the nazi regime would have the gas chambers and the ovens, while the whole of humanity were not strong enough to communicate the unjustness of it all to the German people while it was happening. I have read of a recent documentary that provides film footage of nazi soldiers committing the worst war crimes imaginable to god loving Jews, interspersed with film from the same dated period where, the German people were living civilized lives, left unaware of the atrocities that were being committed against God in their names. Same as America and Canada today, with Fallujah's 300,000 People being, the undeniable example. Or, are you too, a convinced denier of that which is fully documented? (Needless and irrational was the indiscriminate murder of the people of Fallujah, but for to have more American soldiers sacrificed in a conflict created by an unjust as immoral totalitarian dictate.) The Holocaust deniers are those the same of today, who refuse our Humanity to nationally communicate those screams of mercy, or for justice regarding the People of Iraq to be served in our true interests as legitimate. More

than ten million Russians died fighting the evil eugenic scourge of the "superior" nazi regime, and like those in Poland, Britain and France, as elsewhere testified our established history, (albeit only later), the sadistic ungodly as lawless barbarity that Nazism inflicted upon the general masses, went largely undeterred from our "informative" television and radio broadcasts. The same, almost word for word, and action for action, can be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit, Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to accepting without our objection, to the victimizing of Iraqis collectively as an indiscriminate act of criminality, like murder. As like in the policies of Ariel Sharon, where an innocent, haven't committed an accused crime in their life Christian Palestinian, is denied the earned home they worked and paid for, on a parcel of land shared up until recent times for countless millennia. My personal struggle has been to inform the public on the forgotten" importance of established evidence, being the only requirement to convince ourselves on who is a bigot, tyrant, a criminal, or a murderer. Will you not therefore, as a fellow humanitarian of this shared world, speak against those you know of, who victimize the innocent to thieve from? Sure you would, if you knew as much for certain about God and this universe, or the under reported, freed to go General Ahmad, funding the mastermind ring leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity ever learn? Well, my plan is to search for guests to speak with, that I'll try not to offend early on. Greg knows, like the Pope knows, as every legitimate police officer worth their grain of salt knows, as so too does include a great many Jewish Jews, George W. Bush used absolutely no evidence to substantiate his therefore, false accusations in our names against bin Laden, while then ardently with Cheney, worked to close outstanding criminal investigations regarding their extremely suspicious behavior. All according to his official publicly documented plan. And speaking the news as thus, does not make anyone anti-Semitic, anti-American, or anti-Human, but pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost wholely human like even. Not of a long gone as lost and forgotten religious dogma, but for now as it always has been found, a mutual respect for all life as we find ourselves being part of. Or, so we would for Atheists, argue in all likelihood to get to the same reasoned to be, just political decision, to this or any another life and death matters matter. Because the unjustified criminal war actions of George W. Bush are our shared documented history, others, with an ulterior agenda to propagate their weakness through bigotry or racism, will arbitrarily blame a subjective grouping of people, instead of

demanding by godly individual might, the arrest of specific individuals who are actually responsible according to the established as public evidence. So, now who's fault is that? We live in difficult times. To admit weaknesses regarding our corporate news control content decisions, is to seek a better world for our lives through stronger open communications.

I believe the defense of the Jewish faith is found in the indivisible properties of Creation, and who's central belief is made simpler than any other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What is hateful to you do not do to your neighbor. That is the whole Torah. The rest is commentary -- go and learn it." So my challenge in defense of the Jewish faith during the interview, was that those who practice criminal misdeeds, are therefore found by the official definition taught by Hillel, to be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced by the religion's recognized ancient oratator.) By calling alleged criminal actions, the conduct of an entire people, faith, or branch thereof, is to fall into the fascist minutia of bigotry, or racism, held by those who judge us "others" unfairly. After re-hearing the interview, I did find the allegations made by Greg, regarding the Holocaust being blanketed by falsehoods, generally, a failure on his part to recognize the true horror of what that war wrought. And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say. While I, perhaps wasn't thinking along those conceived lines, where at that time, I had just left the thought of: the struggles of the Jewish faith, are the same struggles all young adults go through by naturally establishing our associative identities. Who are you I truly ask? How many news channels even allow us as Humanity to know about the absent reason for the bombing of the Jews of Samara? The Jews of Fallujah? The torturing of completely innocent People to death, as in Guantanamo? Or still unaddressed publicly: the willful lawless criminality implemented by the, therefore tyrannical Bush Administration in suffering God's Iraq? (See missing ``Development Fund of Iraq'', or private mercenaries discipling for Bush as deemed un-accountable to every conceived ``natural'' law? [see the entire Bible for the judgment call on that one...] or, Bush's declarative, he magically owns everything in stolen Iraq now, [where did it go?] and I can't say anything because he signed his John to 13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview with me, along with your own impressions of our world. Or, if you prefer, you can do a solo written piece, or a recorded statement for the station. I look forward to finding common ground with your concerns. I hope I have got

you wondering more, about what trying to save our world from injustice and slavery, in whatever way we can is all about for me really. In these words I can say, I apologize to you, for a resulted perception, that wasn't with better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the broadcast package. So I do thank you for bringing up your important view, that otherwise, would have gone farther without this opportunity, that I offer as a starting point for deliberation, or argument regarding my foolishness. Thanks for speaking, and I hope I have met most of your concerns with a positive light on where I'm trying to come from.

John.

We Israeli Military Reservists REFUSE To Abuse, Starve, Maim And Kill Palestininians

http://www.tampaindymedia.org/bin/site/templates/default.asp?area_2=imc/open%20newswire/2005/Feb/44942.3515625.dat

We Israeli Military Reservists REFUSE To Abuse, Starve, Maim And Kill Palestininians

---

http://radio.indymedia.org/uploads/benderman.mp3

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of suffering and misery against all of Humanity as US being the innocent. The innocent in our entirety, is my "God" that I love with all I can will. I am compelled as a living human being to defend America to the last bush supporter praised if need be. I fight

the enemy of God and Humanity with reason, understanding, Akeido, and a conviction that our justice system must prevail for me to be truly myself really.

"He explained to "60 Minutes," "I was told in basic training that, if I'm given an illegal or immoral order, it is my duty to disobey it. And I feel that invading and occupying Iraq is an illegal and immoral thing to do."

The war was declared "illegal" by the U.N.. Why? Because Saddam wasn't found in breach of the internationally agreed upon resolution 1441, (Saddam did EVERYTHING POSSIBLE that was asked of Iraq by the bush administration, and then some Mr. Bush refused to even take him up on. Like national Iraqi television broadcasts.) despite the lies quoted by corporate news America. There was no need for the conflict to begin with as was so reported internationally on march 7th, 2003. U.N. inspectors had complete unrestricted access to go anywhere without delay, and known stock piles of WMD were burned, so could not possibly be completely accounted for by evidential findings due to the fact that they were destroyed beyond recognition. American soldiers were put in harms way to be sacrificed for no better good, but for to allow as has happened, the misappropriation, or as some have alleged, the criminal theft of Iraqi resources, including monies of the Iraqi Development Funds through Presidential decree 13303. Which include the unappropriated, desperately needed, humanitarian aid provisions still denied innocent Iraqis, such as potable drinking water and food stuffs. Democratic principles are DENIED the Iraqis by the neo-con military forces, such as holding all individuals equally accountable to a rule of law. The outlawing of torture, or the outlawing of false imprisonment has not been professed as the action of the neo-con "liberating" force. Mercenaries are not obliged to obey any laws for example. And, "Dr. Germ", and "Dr. Anthrax" are held solely for the fact that they know of the scientific hazards of depleted uranium, and may have warned the uninformed sacrificing American GI, if not held illegally against their wills by the enemy. Commanders such as irrational war criminal Sattler, forbade all men and boys between 15 to 50 from leaving the city of Fallujah, while refusing to negotiate with anyone, (because as so was openly

confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.
Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

--

I know we're all expected to be selfish, in helping out those
others who cry out for our help, but I beg you, I can't do this
alone. My show did make a positive difference. I need your
help in asking I face my accuser, and politely, with reason,
using communication, and understanding, bring about a better
world.

World Productions.

> http://la.indymedia.org/uploads/somebody.mp3

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged only through the public witness of shared mutual experiences, simple, yet, the bushite strategy implemented continually on behalf of the enemy forces in Iraq have been to divide the nation's people with different "legal" definitions, while speaking for typical bushite bigotry, by then offering distinctions of human value between US some from "others". Not freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment,

and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate

newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law. God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the crimes scene leads for nine/eleven, arresting those

responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a

thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege.

So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

Johnny Wizard

Chow.

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our
Mr. bush Jr., along with his treasonous evil cabal of
anti-semitic Palestinian Christ haters. A compassionate,
"conservative", war mongering cabal whos warring of
America is done to secretly steal further from the
innocence of God in silence. Without a honest to
Johnny, bushite killin' God-Man to speak on the nature
of reality itself from living Creation's time-less

prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John

Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind control, who refuse to allow anyone to state THAT FACT, for, the enemy bushite would be exposed, and America would be hunting them down with the Law as the traitors to freedom they clearly are.

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's
not too much to ask for our vote to count." \ \

--

/ / Colonel Ron Johnson "If I could have an Iraqi
security force guy who's honest, reliable and
dependable, it's worth five Marines," \ \

--

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I
cannot understand at all, why the US Army soldiers speak
broken English!! \ \

/ / During the five days, while the count was yet
conducted, more than three thousand wounded passed
through our hospital. These were the people who lived
nearby. The people who could be delivered to us.
Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it
was an Iraqi town with its regular for centuries Arabic
life. Boling bazaars, noisy streets. And here I am
going through the empty dead city, between the ugly
"pyramids" of destroyed buildings, broken streets, whole
quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know? (nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment

of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade, complained that they had been "besmirched"

The soldiers said that the commander had fired two shots at the girl from close range as she lay on the ground.. \ \

Will all Jews join me in calling for the public World trial of crimes against God's Humanity, done by these truly godless fascist nazi enemies of the Holy Jewish faith? Or, will the anti-Jewish Ariel Sharon crowd again, march more Jews silently to their graves, refusing to speak for the Bible's Word that all people are created in God's loving image?

Victimizing the innocent to steal from, is not acts becoming of a religious person or a truly "democratic" government.

--

http://www.topplebush.com/article54_recpres.shtml

/ / Musil said the [rumsfeld's] Pentagon's effort to draw a distinction between the weapons was outrageous.

"It's Orwellian. They do not want the public to know. It's a lie," he said. \ \

--

/ / Hammad said he had seen elderly women carrying white flags shot by U.S. soldiers. ''Even the wounded people were killed. The Americans made announcements for people to come to one mosque if they wanted to leave Fallujah, and even the people who went there carrying white flags were killed.'' \ \

--

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that the media's adamant refusal to address the very real irregularities of the 2004 vote is a deliberate act of psychological warfare. [...]

"if the USA's honor can go along with these tactics . . . then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid' (fighter for the faith) derives, has always been, because of an anti-Islamic prejudice that dates from the Crusades, taken in the Christian West in a limited and restrictive sense. It is taken as a symbol of religious aggressiveness. This interpretation is rendered absurd by the very fact that Islam is tolerant, and the respect of religions, in particular Judaism and Christianity, is one of its fundamental precepts, something which, in fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task
Americans can perform to restore progressive priorities
and our respect in the world. We have passed the point
for graceful exit strategies. Our policy is to go on
mechanically killing people unless they vote in January
for us to keep on killing people. \ \

/ / Ohio Secretary of State Ken Blackwell, a Republican,
issued a directive to election officials to turn away
such voters if they arrived at the polls to cast regular
ballots. \ \

TREASON.

--

/ / UN officials, at U.S. request, placed a curtain
over a tapestry of Picasso's Guernica, located at the
entrance to the Security Council chambers. As a TV
backdrop, the anti-war mural would contradict the
Secretary of State's case for war in Iraq. \ \

/ / In August, US National Guardsmen discovered and
sought to stop the torture of detainees in a Baghdad
prison by Allawi's new interior ministry police, but
were ordered by US commanders to leave the victims in
the hands of their tormentors. \ \

--

/ / The leak about the money and the rigged election
apparently came from technicians who were promised to be
paid a certain amount for their work but the Bush
campaign interlocutors reneged and some of the
technicians are revealing the nature of the vote rigging
program. \ \

Yawn. Yet another act of high treason by the enemy
bushite, that should warrant prosecution under American
law, but look!, CNN and CBC couldn't care less about the
legitimacy of US elections, or our freedoms and the
irrational sacrifices of life made by cowardly and

soulless teen-age disciples of the true enemy evil
anti-Christ. Why bother to arrest those who committed
MASSIVE fraud during the election, the crime is over,
and corporate amerikkka have already declared themselves
our enemies of freedom, as committed, to kill, or have
killed, America for stolen gains without virtue.
Besides, what is such a charge in amerka know-a-daze?,
"fifth degree felony"? Why even bother. Reading is for
the stupid people, and math is even quackier, har har.

--

/ / I retired in 1999 as a lieutenant colonel with 30
years total service. I am now also a 60% disabled vet
due to combat wounds which have worsened over the years.

At the same time my day job was as a police officer. I
served 26 years with the Tulsa PD, working uniform,
plain clothes, SWAT, bomb squad and finally as a police
helicopter pilot for 3600 hours of flight time. I
received the department's Medal of Valor, two Chief's
Medals, and the Department Commendation Medal. Not
exactly the profile of a terrorist suspect, eh?

My sin, evidently, was using the First Amendment. \ \

--

"Word on high is, "Dream-Job", is the doorway to miracles. Wow! The
beginning has begun!"

D-R-E-A-M - J-O-B

http://houston.indymedia.org/uploads/somebody.mp3

/ / Mr. bush is sending them into these military
conflicts, to create more hostility for them to die
over. So bush can rob ever more, from the undefended
American People left back home there, still, victimized
without repremand to those who ripped them off for their
pensions as example. \ \

Dream job. The future now looks like something worth
fighting for. Please, pass this recording to our news
agencies. I do not have the ability to do this job of
ours all by myself, I need Your help. Please do US this
small favor, and I'm sure this Universe will thank you
for it. Word on high is, "Dream-Job", is the doorway to
miracles. Wow! The beginning has begun!

Love and kisses,

Johnny Wizard

--

/ / It wasn't enough to force a surrender and have The
Ba'athists cooperate with the Coalition. Israel demanded
that everyone in power who ever thought anti-Israel thoughts
must be removed, even though the resulting chaos has cost
untold lives and billions of dollars. \ \

> Word of Advice
> A, one of a kind broadcast, for all our great Johnny Wizard fans.

> http://la.indymedia.org/news/2004/11/119355.php

--

God is Great

A person accused in our name(s) of a criminal offence,
needs to be established somehow to be as such, and the
only way to do that, is to present evidence that formed
your/our conclusion. Without evidence our accused is
ourselves as the innocent, being falsely imprisoned,
tortured, or murdered. Murdered, as the Allawi and the
bushite nazi forces did to our friends and family in
Falluja, to please the demon liar, lawless George Bush
Jr. as their central thief system of dishonor and
betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without
evidence needed to form a conclusion, or when he just
told you for no reason possible, why American soldiers
are DYING, "Saddam wouldn't let inspectors in", the
bushmob thieves plundered in our "lost" confusion. All
the while bush always seeking to close America's
on-going criminal investigations, by causing even more
have nots among US. So, as a free person, to side for
the, bush wars America, God, and Johnny issue, you would
seek out to find for Yourself beholding likewise as We
all are: bush is actually super fuking evil, like
personified or incarnate even, and Johnny's almost like
a stranger Messianic figure who just wants to be known
as a semi-normal average GUY/god fellow. (Sheesh.. We
gotta bring ourselves everywhere we go) I "hate" bush
for being so not himself stupid to think there was no
actual walking, talking, godly Persons from the
outer-reaches coming in to get him for the crimes he has
committed ourselves to. Corporate news dictate without
a human presence, doesn't rule this world of
communication, we do. (Jesus wasn't buying Satan's
misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE
RIGHTiOUS!!..! Just ignore the misconceptions others
have, and join the party!!! The Time is Now, and man,

do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we want to live in a freedom bound for glory, not a hell hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with 9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is

here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will, guaranteed, freak you out. REMEMBER: Mr. bush Jr. should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in

Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America who blindly targets our residential communities to enrich the UN-AMERICAN demon anti-Christ bushite thieves further? That, as bushite nazi grunt, they die for? Paleeze.

America is dying to prosper their false-deity war criminal demon anti-Christ, Our Mr. bush Jr, the same responsible for the nine eleven travesty, who attempts escape only through fascist americans who willfully betray America by condoning the furthering of bushite censorship for tyranny. Is America the cesspool of

corruption and greed, without a People person present willing to make a stand for God and Country? BUSH IS EVIL. Let's arrest'em, or kill'em for committing high treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this universe over, I am proclaiming, a war against the liar George Bush Jr., the vilest contempt for mankind this World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because Saddam wouldn't let inspectors in; the media has treated this as not really a lie because it's so obviously untrue. \ \

America is a coming to kill the truly evil George Bush Jr.,

Johnny Wizard

--

The King Commands

/ / Rumsfeld replied to a direct question yesterday as to whether he knew Zarqawi was in Fallujah with the answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's sons and daughters, Johnny's brothers and sisters. "No idea" rumsfeld states while his private partners cash in the blood checks for everything but the funeral services. I ask sacrificing soldiers to help grant me space to debate bush and rumsfeld on international radio. We gotta take away Art Bell's turn off button to thank him for all the enlightenment he has been a part of in America, but that these life death top priority issues of ours, he hasn't the right to censor communication on. This is your World that I wish to play servant of. As my subject; I promise a fight to return Justice through freedom for all. How? By believing in you to do as you should, demanding the immediate arrest or execution of bush, rumsfeld, and condi for the crimes of 9/11. Demanding the return of all stolen Iraqi assets, made by those who personally profited off the criminal transactions. Demand the arrest or execution of Allawi for the bombing campaign of Samara, along with bushite military commanders who organized the satanic attack. Why would America do this? To free the dying lives of their bushite nazi whored, dying grunt savage slave population. .or perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas: ``We're ready to go. I'm just ready to get this done. I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is

that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't

want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of

Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three

or more, before December 25th, there will be an extra
something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll
ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while
sacrificing weak and stupid American teens in the
process,)

See? Evil bushite kill "other" bushite to steal our
freedoms and money, and US true freedom fighters would
kill'em too to defend our innocent families. Like I
said, un-principled nazi facist savages is the
un-American enemy bushite without contention but for
lifeless corporate censorship on our core values.
Demand our voices be heard, or die not trying to do any
greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some
enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme
measures to protect the Iraqi people from these killers
and to liberate residents of Fallujah so they can return
to their homes." \ \

American Patriot Warriors, kill Allawi as our number
one, Iraqi People killer. Thanks in advance my friend.

In Fallujah, U.S. Declares War on Hospitals, Ambulances
http://newstandardnews.net/content/index.cfm/items/1208

snpd

Or, is it another of those, why bother-who cares?-fifth
degree felony things?

--

/ / Despite this, the Bush administration denies any
responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to rob the pro-Iraqi central bank. It's just more American deaths as dumfuk sacrifices for the evil anti-Christ, like bush and rumsfeld committed as stolen from America on 9/11. Who cares about America Limbaugh would quietly trumpet, he's making a killing like Art Bell and O'Reilly do, keeping US masses PORTRAYED uninformed and ignorant beyond belief. Did you hear? Mr. bush is the most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out

irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr. bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over

billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the first time to the Al-Qaqaa story, President Bush said that John Kerry, in using the story as he has, was ``denigrating the actions of our troops and commanders in the field.'' \ \

It was the actions of rummy and franks, not the mindlessly obeying war crime instigators as iliterately

truly stupidly dying bushite dumfuk nazi grunt teen
soldiers.

--

/ / How many more thousands will have to die before God
will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons of (now missing) explosives "was not high on U.S. commanders' list of sites to guard." What was high on that list? Spokesman Scott McClellan said we had to "make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and kids and our young American forces are being shot at from weapons stolen from the ammo dumps that this president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction funds distributed by the U.S.-managed Development Fund for Iraq cannot be accounted for, according to an audit commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the tanks rolled, for imposing a new regime of low taxes on big business, and quick sales of Iraq's banks and bridges-in fact, "ALL state enterprises"-to foreign operators. \ \

Big deal. To the war mongering mass murdering thieves go the stolen spoils., as the bushite's devolving american new century would say.

/ / The American public is told that this butchery is part of keeping up pressure in the war on terror. All these terrorist brides and grooms and terrorist kids rushing round in party clothes ; all the terrorist musicians and the terrorist wedding guests, by God, they have to pay for 9/11 because (as millions of Americans still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the vast majority of those believe Saddam Hussein was behind the Sept. 11 terrorist attacks, and that freedom by justice through understanding is too complicated and wordy, ...yeah. and so corproate news control is lying to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and

practically defenseless as betrayers to God, freedom and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes, but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts. Leaderless degenerates that any real human would destroy to protect their innocent families. Innocent families the bushite bombers commanding from Florida murder for no good reason but get more soulless bushite teens rightly killed, all done so to put more stolen money in the pockets of their ungodly satanic cult. Solution: hunt to kill those left un-arrested who willfully, criminally, ordered the needless bombing of Samara to get killed the bushite grunts for the further thievings of the bush backer traitors who bask in your stolen expenses.

Support calls for open dialog.

snpd

Is It Just?

/ / Is it just coincidence that 9/11 is also bush's "acceptable" reason for warring, (planned TOP SECRETLY prior by several days of 9/11, and confessed to US already as fully implemented by the Whitehouse) Afghanistan with a FALSE ALLEGATION [n o - e v i d e n c e] to heroin push, [is still leaving] ..the STOLEN American soldier pension money [...] sitting in the Cayman Islands? \ \

I guess perhaps I wasn't so clear previous, but listen: How's bush and rumsfeld's Afghan plan, gonna go down, if there is to be no surprising 9/11, nor any evidence, (not a scintilla,) gathered for public inditement against Laden for shoplifting? (No advisement from Tenent, nor Richard Clark?) Would bush start a war against life itself, by just simply stating, we don't need no evidence of our suffering?, with him demanding an innocent family to be crucified?, to save Enron? Again, bush is the for real antiChrist of all biblical folklore, hated this entire timeless universe more over than anything else Johnny cares to mention. George bush's naked treason as an enemy of Humanity is hidden from no one. A true soulless degenerate George W. Bush is, whom is purposefully attempting to destroy Your freedom as humanity with his utter contempt for our flying fricken flag. If a person has no evidence to substantiate an allegation as personal opinion on the

advocation of perpetrating senseless bushite barbarity against those understood as US innocent, then your blind faith in evil bush as bushite, not lies with your God, your nation, your family, your neighbor, OR YOURSELF, but as the willing to be sacrificed for the ungodly bushite war crimes as enemy of everyone. Listen: Jesus..., KILL BUSH INSTEAD.

Kill un-arrested bush and rumsfeld for murdering the good American People thought left undefended by corporate edict as the still unjustly dying and near forgotten, and you'll be respected by this universe as truly honorable and courageous, in these of God and Humanity's, most troubling of times under the criminal dictates of Our evil Mr. bush Jr..

Those evil brethren of the bushite clan intend, through censorship, to allow the demon bush cabal our rights to leave, but where does the brethren of the bushite clan think bush is a gonna flee himself from, eh? We, The People are a' coming to get you George W. Bush for almost escaping our police protections. For, when the bush brethren clan wake up to the plan, that they'a have'a been'a deceived, the last think anyone would want, is to be without police protection... (Can you believe, the war monger thief and liar, Our Mr. bush Jr. actually banks for Christian fundamentalism, thinking he's gonna ride them bible belting for all he's worth?)

Again, America needs to wake up, load up, and go out to freely bag US some un-American bush and rumsfeld, all to save the lives of the leaderless dumfukked bush-teens, who are prodded criminally as cowards to die for the enemy. Those who would murder innocent Americans as bushite, then further publicly advocate as enemies to freedom, the victimization of God as the innocent elsewhere, should be turned against instead, questioned, arrested granted full legal rights through public due process, or hunted down to be destroyed by US real Patriots of this world as God's great believers. I'd destroyed any un-arrested proud bushite for warring America by indiscriminately dropping toxic cluster bombs on our friends and family, to get rightly killed more leaderless cowardly soldiers with Grand parents they leave undefended in bush's evil amerka. Who doesn't hate bushite I ask you to think as you should?

You kill bush because, we had unrestricted access to do anything bush pleased throughout Iraq, prior to sacrificing any good for nothing, cowardly bushite nazi

dumfuk whore.

Now, because truly, the Iraq bushite war is illegitimately premised without any actual cause, the humans are faced with two questions that have no legitimate answer.

1: What can the ungodly and evil demon bushites do now in Iraq, that they couldn't prior to murdering one child, but for to rob from America by towing his bushwhore nazi coward soldiers to commit criminal acts to rob freedom from all of US as Humanity?

(Kill an proud to be evil bushite, and all day long you'll have the thanks of every surviving American police officer, and a nod from all the American pensioners who are promised that maybe bush's america can learn for next time while the bushites just walk away with the stolen loot laughing.)

2: What could Saddam do, that he wasn't asked for?, to stop the senseless first degree murder of our friends and family?

Saddam provided the sites where all bremer's WMD was destroyed, the documents, the personnel, and so on, but corporate america won't let the facts be delivered without their bias of, who cares neutrality. A refusal to report for American interests regarding the sacrifice of American lives for the un-arrested criminals hiding inside Enron, Dutch-Shell, five dollar a day Bechtel, or double billers, commi Halliburton. Example: soldiers could have more effectively went into Iraq unarmed to search wherever, for there were no restrictions placed upon rational behavior, but just no money for the bushites to steal from America. The proud dumbfuk bushite soldier is coward and betrayer to America and God, by not, for America's America, killing bush and rumsfeld for near escaping the murder scene of 9/11 in New York City. Instead, they attack the defenseless and innocent with cluster bombs laced with toxic waste they happily eat themselves to die as the ungodly soulless bushite traitors. You get your gun Patriot, and instead of punishing a town, city, or state, bag yourself some individual evil bushite, and be respected by all true loyal Americans as a real freedom fighter. With the God of every religion by your side rooting you on for the home team, You'll be loved by all. At least until, we or me, can make the national news programs to communicate. Again, the management and news desk staff of CBC and CNN know, that the American FBI contend: bush's business partner, the un-arrested in retirement

General Ahmad, funded Atta, the 9/11 mastermind. (While no evidence was established against bin as connected, to justify the Afghanistan war crimes. Nothing.)

CNN and CBC, in our names, are with malicious intent, refusing to allow justice to be our interest in protecting always.

snpd

New Recruit

Destroying enemy bushite is a gift to Humanity, it is saying you care for the lives of the innocent a bush bitch nazi grunt freely confesses to targeting for murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given. All the while, labeling themselves, "pro-Iraqi". The mindlessly evil attack against the Turks recently with an ordered bombing campaign that actually murdered people, sighted yet another, example of the bushite's idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me

as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here

make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

snpd

Again, none of any words world wide bare contention against the facts we've brought to our attention. The

traitors to America, Our Mr. bush Jr. and rotten rumsfeld don't mention the willingness of American Soldiers to aprehend general Ahmad as the principle terrorist funder of Atta, because this general is also responsible for developing the bushmob strategy of killing Americans in New York City from Washington. A strategy of blaming bin Laden without any evidence to bomb Afghanistan for Enron. (The Dahbol Working Group.) Then closing criminal investigations, as it's not important to know who personally was responsible for the insider trades, or the contacting of only Odigo. Never mentioned by CNN as top priority to American soldier concerns, who are expected by Blitzer and Hemmer to throw away their lives in sacrifice unthinking to bush, america's false deity, super evil anti-Christ. While bush and cheney threaten to murder more dumb Americans who would dare to articulate the demand for Justice as our own, like Laden has, while demanding American Patriots coware in fear of the sadistic savage mass murdering death squad leader, tommy franks, or the anti-Christ going out to kill their family too as not represented by corporate policy, while American soldier families are continually disrespected as unworthy. (Generally, they are pretty damn stoopid, but certainly, if they're not knowingly commiting first degree murders for the anti-Christ as pure nazi filth, they should be allowed to learn, instead of having their own undefended families robbed then slaughtered for American traitor, nazi puke terrorist, tommy franks, or for Monsanto's rotten rumsfeld. Do you notice corporate America continues to show outdated footage of those two demons standing near smiling armed American soldiers, who as a mass of dumfuks, aren't intelligent enough to destroy them instantly as established ememies of America as terrorists? Well, that is going to change. I have yet to find ANY American Soldier who is literate, who disagrees WE have some very important questions that need immediate answers before the bushmob murders more Americans in Our name. See for yourself through Google if you don't believe in Christ as the Redeemer.

As for the doubting American Soldier, LOOK, CNN will continue as cult members in their dying madness of just even lamer excuses, to convince US, we are alone in our concerns for Freedom as Justice instills for US all. This moment of History requires you to stand strong for only yourself to be represented truly among the stars. Evil stupid people can't make heads or tails of this, but, as evil bush does truly from his dark shallow existence, will continue by open piracy, to publicly

advocate in Our names the further robbing and murder of your own family American Patriot, so too, will more american nazi dumfuks die to the tune of their own cowardice to protect themselves as garnered fairly. This is why rotten rumsfeld forbids the death tally of American soldiers to be made public to the ready for enlistment as the too dumb to know better. Life is life, and sorry to say american dumfuks, Christ on the cross is you too as a true dying American Patriot, and your already politically sitting in the position of hatred and injustice against Humanity, and myself honestly as.. THE SON OF MAN! (The god of God's life/death guy, with a score to settle on behalf of the infinite Universe and True brave Soldiers everywhere. KILL AMERICAN COP KILLER BUSH NOW BEFORE HE MURDERS MORE IN OUR NAME AS THE INNOCENT COWARDS!)

CNN is not interested in working for American interests by asking why, as there is little of any money in just doing good for your neighbor, like saving a living, as we would wish to be helped for ourselves, if we were bound just the same to be equals at being. Mr. Blitzer and Bill Hemmer, as americans, wouldn't give a dollar of your time, to speak on human rights to be of their own concern, (they're rich!) or to save the life of an innocent poor victim, if it meant they would therefor, be compelled to honestly report on their false deity bush, the super evil criminal to ourselves as Humanity, the unelected dictator, American cop killing anti-Christ in person!, that they so leave to see Americans sacrificed as ignored to be robbed from as their profit margin increases. Do less for America, The People, and get payed more in collateral damages paid for by doubting Patriots, too slow to stand for the American flag in protection for their own living as lost to the wind. Mr. bush, tommy, rumsfeld, cheney and blair give no evidence, but for to show themselves as the criminals who openly harbor terrorist activity against our communities, and WE, as Humanity, according to CNN, are expected to go out and kill our friends in cowardice, instead of standing up to destroy the demon bush instead to save our own selves.

God, or no God, I hate that murderer bush as much as any real man would to care for his own life as family.

I have no idea about Canada to the US, but many a times people have complained
of ordering something from the US, and getting stuck with a brokerage
fee. It has everything to do with the the courrier company.

The complaints in the local "consumer action" column usually eventually
resulted in the charges being dropped, but that was likely a goodwill thing.
I don't think this is ever spelled out, and the only way you know it will
happen is because you've heard of it happening before.

Not that I order much from the US, but I'd always check how they ship.
Regular post office shipping never gets those brokerage fees.

I believe you are being hosed (to use the Cdn expression). NAFTA (N. Amer free trade agreement) says you can be charged sales tax on locale where you take charge of the package but radios (amateur, SW) are customs exempt b/n the 2 countries. Period. I had a fight with UPS from the USA to Canada where they thought I should pay a brokerage fee. To get delivery I had to pay it and then appealed through Canada customs. I was refunded the amount. UPS threatened me several times before the appeal went through. I just ignored them and forwarded their correspondence to customs. I only buy things now shipped by postal service, which frankly takes usually only an extra day or two and avoids this sort of extortion. The US and Cdn postal services do an excellent job of cross border shipping in my experience doing this with 4 radios, 3 computers and various other things like books and parts. And they are cheaper for basic shipping costs.

I think the shyster courier companies think they can make a buck from you by standing there with the package and saying they won't deliver unless you fork out. I don't do business with any company who won't ship the way I want it.

So hold your ground and complain. Refuse to pay. If you never use purolator again, they can't hold a package for future extortion.

It is a crystal filter. That is marked on the case. I picked one up at the local flea market, but need to figure out if it is useable in my radio.

There are 5 pins per side. The ground and signal lines are obvious, but that's about it.

Is there a decent portable antenna that will cover the full (or a larger percentage) of the spectrum?

Also, anyone know of a place that has the AN-LP1 for sale online?

3396. Your mind (or lack of) and the Government

Billions of people on this planet, millions of people probably have access to this group, but only 30 or so people ever post here. Of the 30 or so, most of the posters obviously have an idiotic bend, and are determined to appease the others in their genre by posting uncritical material for the "yuks".

Odd how we have so accepted being programmed over the years, just like Pavlov's Dogs. (look it up, do the research for once on your own, Pavlov is spelled correctly, go to Google, enter (without the quotes) "Pavlov's Dogs", and read. I know that it's somewhat harder (pardon the pun) than looking at pictures of nude women (and for a few of you guys, I would guess that it should read "pictures of nude men").

Below are some quotes concerning the gullibility of a previous generation of people:

The size of the lie is a definite factor in causing it to be believed, for the vast masses of a nation are in the depths of their hearts more easily deceived than they are consciously and intentionally bad. The primitive simplicity of their minds renders them a more easy prey to a big lie than a small one, for they themselves often tell little lies, but would be ashamed to tell big lies.
--Adolf Hitler

"Of course the people don't want war. But after all, it's the leaders of the country who determine the policy, and it's always a simple matter to drag the people along whether it's a democracy, a fascist dictatorship, or a parliament, or a communist dictatorship. Voice or no voice, the people can always be brought to the bidding of the leaders. That is easy. All you have to do is tell them they are being attacked, and denounce the pacifists for lack of patriotism, and exposing the country to greater danger."
-- Herman Goering at the Nuremberg trials

What do you think the quotes should be from the current U.S. administration, something similar?

Stalin knew about the ineffectiveness of elections:

"Those who cast the votes decide nothing. Those who count the votes decide everything."
- Joseph Stalin

Always remember the following:

They that give up essential liberty to obtain a little temporary safety deserve neither liberty nor safety.

Benjamin Franklin

Soliloquy.

(I won't read responses to this, in the spirit of "Soliloquy", I need not know your feelings).

"Main Entry: so&#65533;lil&#65533;o&#65533;quy
Pronunciation: s&-'li-l&-kwE
Function: noun
Inflected Form(s): plural -quies
Etymology: Late Latin soliloquium, from Latin solus alone + loqui to speak
1 : the act of talking to oneself
2 : a dramatic monologue that gives the illusion of being a series of unspoken reflections"

I personally think it makes no sense and just holds black culture back from moving forward. It promotes violence, drug use and lack of respect for women. Even the rappers own mothers are put down.

Not sure about your situation, but I know we get hit for the same sort of stuff when it comes the other way via courier. I got hit once and since then make a point of checking the shipping method. Post Office seems OK with a $5 (at least that's what it was last time) flat fee.

Couriers add a variety of charges just for crossing the border. They don't seem to advertise it, but if you ask they are quite willing to list the charges which seem to be based on a percentage of the value of the shipment in my experience.

I have an HP computer which HP US is quite prepared to service, but absolutely will not have anything to do with shipping it across the border southbound; so I assume it is common practice.

It helps in the sense that I now know the impedance is 2000 ohms,
assuming the InRad filters are the same impedance as the other
kenwoods. With equal impedances (sort of what I expected), I assume
that input and output can be interchanged..

--
I wrote the letter following "Jew Boy..." the day a single complaint arrived to the radio station, with the threat that the ADL would soon be contacted. The letter was provided in advance of the next day, of the time scheduled for the complainant to return for a recording of the questionable broadcast. The station manager refused to give the complainant my letter, and insured me that I would no longer be allowed to produce a show for our community. Is this fair to our Jewish brothers and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong, would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask how my afternoon recorded broadcast went, and to discuss the new week's tentative guest spot with an update regarding the falsely maligned, Mr. And Mrs. Benderman. The station manager informed me my phone number had been misplaced, and was managing with stress trying to put together an apology letter to a single individual, who came into the station, while the interview was still running, to demand action be taken regarding the anti-Semitic broadcast that he was certainly going to report to the ADL about. I told her the Felton interview itself was about bigotry through the demonization of the innocent, what the Jews of world war II suffered through, and, that I was a huge defender of religious Jewish teaching. I told her, to offer the individual a chance to publicly speak regarding the issue, with me, or by himself regarding Felton, to try getting specifically to what has got him so much, by himself, upset about allowing my voice heard defending Jewish rights within our community. She told me that she would likely, none the less, have to let me go to appease the sole

complainant, for what if a lawsuit should result? I told her to consider her options, reminded her that it was only one single individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

---

http://radio.indymedia.org/uploads/big-package.mp3

Greg Felton : "The fear is necessary for two reasons. And the principle reason has nothing to do with Iraq. it has to do with the government itself. The bush government is criminal. [...] The problem is: how do you keep people from paying attention to this? You keep them focused on an external enemy. [..] so they forment this fascistic hatred of a definable group

of people. So, the war on terrorism so called, is not much a way for the United States to protect itself against it's enemy, it is a way for it to create enemies, to justify the kind of repressive measures that would otherwise be intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment, in not allowing what I should have gave: an immediate re-dress regarding, 'who is the Zionist label?', or 'What Holocaust are you referring to?', during the broadcast of January 31st. (bet you we can't get two Christians that agree on everything.) However, I can offer perhaps a show centralized on a chance to exercise your personal views, be they pro or con on where you think we should go from here, or whatever may have you regarding said interview. Or, if you would like, you may wish to do only, or else include, a written work that I promise, will reach as far as the original broadcast. So, actually, this could be a prime moment to have a dialog regarding racism, bigotry, and intolerance. I confess, I may be unaware, and still have much to learn, when it comes to communicating well with all others. But, I know I'm getting better, and I'll tell you, the Justice-Freedom thing, sure seems to be our ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be considered controversial, (as every show I've ever done always has), although I wasn't prepared to hear criticism against the show as being defamatory to a group, or groups of people. As certainly that was not my intent, but however was the difficult subject addressed within the interview. The fundamental teachings of Law, as it pertains to justice and freedom, along with every legitimized religion, is that all free people should be thought of as equals to each other in vigilant protection. And by doing so, one would be serving G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could become a proponent by understanding Jihad). Thereby insuring\realizing that a just intelligent life force rules our chaotic timeless universe in service ultimately to ourselves individually. Giving us in the Torah of Moses, ``all people are created in God's image'' teaching all peoples are Sacred. And as such, would be so in God's interests to defend as the innocent. While in eternal pursuit of happiness and prosperity for all through just means. Under Greg's definition as being a "Zionist" conspiracy, negates the failure of himself personally to recognize the public connotation is too vague, and that Hitler's Nazi Germany, like Bush's America, is politically expressing an inability to represent ourselves with

respect as truly worthy of fair deliberations amongst ourselves. Sacred, every-one. (Or as in, to rise to the defense of those we know to be irrationally victimized as the godly and innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk about because, it's not really understood. It's preached at us like a sermon. We're suppose to accept at face value what we're told about it, as if to, criticize it, is some how disrespectful. Much of what we know about the Holocaust has been propagated by the Zionists, and can be shown quite untrue"

I replied shortly later "One thing about the whole situation is that innocent people were targeted for murder. End of story. That's what the war was. All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an apparent bigotry expressed, and as such, was too narrowly defining the larger established history of the Holocaust, as being the struggle of the human species in halting, the demonization and then subjugation of the innocent millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg to blankly criticize Greg's false construct of what is publicly understood about the Holocaust, is to deny that much for sorrow and suffering took place against the whole of Humanity, especially, of those who held the practiced Jewish faith. To think the nazi regime would have the gas chambers and the ovens, while the whole of humanity were not strong enough to communicate the unjustness of it all to the German people while it was happening. I have read of a recent documentary that provides film footage of nazi soldiers committing the worst war crimes imaginable to god loving Jews, interspersed with film from the same dated period where, the German people were living civilized lives, left unaware of the atrocities that were being committed against God in their names. Same as America and Canada today, with Fallujah's 300,000 People being, the undeniable example. Or, are you too, a convinced denier of that which is fully documented? (Needless and irrational was the indiscriminate murder of the people of Fallujah, but for to have more American soldiers sacrificed in a conflict created by an unjust as immoral totalitarian dictate.) The Holocaust deniers are those the same of today, who refuse our Humanity to nationally communicate those screams of mercy, or for justice regarding the People of Iraq to be served in our true interests as legitimate. More

than ten million Russians died fighting the evil eugenic scourge of the "superior" nazi regime, and like those in Poland, Britain and France, as elsewhere testified our established history, (albeit only later), the sadistic ungodly as lawless barbarity that Nazism inflicted upon the general masses, went largely undeterred from our "informative" television and radio broadcasts. The same, almost word for word, and action for action, can be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit, Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to accepting without our objection, to the victimizing of Iraqis collectively as an indiscriminate act of criminality, like murder. As like in the policies of Ariel Sharon, where an innocent, haven't committed an accused crime in their life Christian Palestinian, is denied the earned home they worked and paid for, on a parcel of land shared up until recent times for countless millennia. My personal struggle has been to inform the public on the forgotten" importance of established evidence, being the only requirement to convince ourselves on who is a bigot, tyrant, a criminal, or a murderer. Will you not therefore, as a fellow humanitarian of this shared world, speak against those you know of, who victimize the innocent to thieve from? Sure you would, if you knew as much for certain about God and this universe, or the under reported, freed to go General Ahmad, funding the mastermind ring leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity ever learn? Well, my plan is to search for guests to speak with, that I'll try not to offend early on. Greg knows, like the Pope knows, as every legitimate police officer worth their grain of salt knows, as so too does include a great many Jewish Jews, George W. Bush used absolutely no evidence to substantiate his therefore, false accusations in our names against bin Laden, while then ardently with Cheney, worked to close outstanding criminal investigations regarding their extremely suspicious behavior. All according to his official publicly documented plan. And speaking the news as thus, does not make anyone anti-Semitic, anti-American, or anti-Human, but pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost wholely human like even. Not of a long gone as lost and forgotten religious dogma, but for now as it always has been found, a mutual respect for all life as we find ourselves being part of. Or, so we would for Atheists, argue in all likelihood to get to the same reasoned to be, just political decision, to this or any another life and death matters matter. Because the unjustified criminal war actions of George W. Bush are our shared documented history, others, with an ulterior agenda to propagate their weakness through bigotry or racism, will arbitrarily blame a subjective grouping of people, instead of

demanding by godly individual might, the arrest of specific individuals who are actually responsible according to the established as public evidence. So, now who's fault is that? We live in difficult times. To admit weaknesses regarding our corporate news control content decisions, is to seek a better world for our lives through stronger open communications.

I believe the defense of the Jewish faith is found in the indivisible properties of Creation, and who's central belief is made simpler than any other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What is hateful to you do not do to your neighbor. That is the whole Torah. The rest is commentary -- go and learn it." So my challenge in defense of the Jewish faith during the interview, was that those who practice criminal misdeeds, are therefore found by the official definition taught by Hillel, to be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced by the religion's recognized ancient oratator.) By calling alleged criminal actions, the conduct of an entire people, faith, or branch thereof, is to fall into the fascist minutia of bigotry, or racism, held by those who judge us "others" unfairly. After re-hearing the interview, I did find the allegations made by Greg, regarding the Holocaust being blanketed by falsehoods, generally, a failure on his part to recognize the true horror of what that war wrought. And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say. While I, perhaps wasn't thinking along those conceived lines, where at that time, I had just left the thought of: the struggles of the Jewish faith, are the same struggles all young adults go through by naturally establishing our associative identities. Who are you I truly ask? How many news channels even allow us as Humanity to know about the absent reason for the bombing of the Jews of Samara? The Jews of Fallujah? The torturing of completely innocent People to death, as in Guantanamo? Or still unaddressed publicly: the willful lawless criminality implemented by the, therefore tyrannical Bush Administration in suffering God's Iraq? (See missing ``Development Fund of Iraq'', or private mercenaries discipling for Bush as deemed un-accountable to every conceived ``natural'' law? [see the entire Bible for the judgment call on that one...] or, Bush's declarative, he magically owns everything in stolen Iraq now, [where did it go?] and I can't say anything because he signed his John to 13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview with me, along with your own impressions of our world. Or, if you prefer, you can do a solo written piece, or a recorded statement for the station. I look forward to finding common ground with your concerns. I hope I have got

you wondering more, about what trying to save our world from injustice and slavery, in whatever way we can is all about for me really. In these words I can say, I apologize to you, for a resulted perception, that wasn't with better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the broadcast package. So I do thank you for bringing up your important view, that otherwise, would have gone farther without this opportunity, that I offer as a starting point for deliberation, or argument regarding my foolishness. Thanks for speaking, and I hope I have met most of your concerns with a positive light on where I'm trying to come from.

John.

We Israeli Military Reservists REFUSE To Abuse, Starve, Maim And Kill Palestininians

http://www.tampaindymedia.org/bin/site/templates/default.asp?area_2=imc/open%20newswire/2005/Feb/44942.3515625.dat

We Israeli Military Reservists REFUSE To Abuse, Starve, Maim And Kill Palestininians

---

http://radio.indymedia.org/uploads/benderman.mp3

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of suffering and misery against all of Humanity as US being the innocent. The innocent in our entirety, is my "God" that I love with all I can will. I am compelled as a living human being to defend America to the last bush supporter praised if need be. I fight

the enemy of God and Humanity with reason, understanding, Akeido, and a conviction that our justice system must prevail for me to be truly myself really.

"He explained to "60 Minutes," "I was told in basic training that, if I'm given an illegal or immoral order, it is my duty to disobey it. And I feel that invading and occupying Iraq is an illegal and immoral thing to do."

The war was declared "illegal" by the U.N.. Why? Because Saddam wasn't found in breach of the internationally agreed upon resolution 1441, (Saddam did EVERYTHING POSSIBLE that was asked of Iraq by the bush administration, and then some Mr. Bush refused to even take him up on. Like national Iraqi television broadcasts.) despite the lies quoted by corporate news America. There was no need for the conflict to begin with as was so reported internationally on march 7th, 2003. U.N. inspectors had complete unrestricted access to go anywhere without delay, and known stock piles of WMD were burned, so could not possibly be completely accounted for by evidential findings due to the fact that they were destroyed beyond recognition. American soldiers were put in harms way to be sacrificed for no better good, but for to allow as has happened, the misappropriation, or as some have alleged, the criminal theft of Iraqi resources, including monies of the Iraqi Development Funds through Presidential decree 13303. Which include the unappropriated, desperately needed, humanitarian aid provisions still denied innocent Iraqis, such as potable drinking water and food stuffs. Democratic principles are DENIED the Iraqis by the neo-con military forces, such as holding all individuals equally accountable to a rule of law. The outlawing of torture, or the outlawing of false imprisonment has not been professed as the action of the neo-con "liberating" force. Mercenaries are not obliged to obey any laws for example. And, "Dr. Germ", and "Dr. Anthrax" are held solely for the fact that they know of the scientific hazards of depleted uranium, and may have warned the uninformed sacrificing American GI, if not held illegally against their wills by the enemy. Commanders such as irrational war criminal Sattler, forbade all men and boys between 15 to 50 from leaving the city of Fallujah, while refusing to negotiate with anyone, (because as so was openly

confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.
Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged only through the public witness of shared mutual experiences, simple, yet, the bushite strategy implemented continually on behalf of the enemy forces in Iraq have been to divide the nation's people with different "legal" definitions, while speaking for typical bushite bigotry, by then offering distinctions of human value between US some from "others". Not freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment,

and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate

newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law. God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the crimes scene leads for nine/eleven, arresting those

responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a

thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege.

So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

Johnny Wizard

Chow.

--

/ / ``The Pentagon and the CIA have asked the White House to decide on a more permanent approach for potentially lifetime detentions, including for hundreds of people in military and CIA custody whom the government does not have enough evidence to charge in courts,'' the Post reported. \ \

Not enough for you?

--

/ / Is this satire? Or is this why the US has contracted to build massive prisons to house those they will never charge due to lack of evidence, but hold however long they please? See Dana Priest, Washington Post, January 2 \ \

--

/ / ..said William Winkenwerder Jr, assistant secretary of defence for health affairs "We have no evidence of maltreatment by physicians, or of physicians participating in torture or torturous activity," he said. "We just do not have evidence of that." \ \

What world does William Winkenwerder Jr think we live in anyway?

It was the revelations that the signed sqiggles on the bogus death cetificates weren't made by the actual medical practicioners on charge in Guantanamo. Now, there might have been one or two involved, as has been confessed, HOWEVER, we do know that the death certificates were forgeries to cover up the crimes of bushite nazi enemies. So, count the forgeries, and you'll count the actions of the truly unjust and evil.

--

/ / No one is able to define the mission of the troops in Iraq, or for how long this mission will last. No one at all, including George W. Bush, can explain the US strategy in Iraq. This is because there is no strategy. With the Iraqi resistance raging, it is not clear why the US is occupying this country and why the US is so willing to sacrifice its soldiers there. \ \

Well the strategy is to cash in on the bushite war criming thieves spree actually. Cowardly soldier's die in Iraq, and the bushite fat cats lounge in the lap of our stolen luxuries through the leverage of the mallable dying amerkan mind.

--

/ / U.S. troops targeted by a roadside bomb have
mistakenly killed two Iraqi policemen and two bystanders
hours after an American warplane bombed the wrong
house[..]

An unnamed bushite quote It expressed deep regret for
the "loss of possibly innocent lives". \ \

Wouldn't you kill the traitor who spoke such contempt
for Humanity? The rewards of indiscriminate murders
against the unknown innocents in bushite amerka's
ungodly name, gets yet another lowly forsaken bushite
rightly killed for bad wordcrafts on a make believe
sound stage they think they only have us party to.

--

/ / "In the exercise of his power to use military force,
'the president's decisions are for him alone and are

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our
Mr. bush Jr., along with his treasonous evil cabal of
anti-semitic Palestinian Christ haters. A compassionate,

"conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind control, who refuse to allow anyone to state THAT FACT, for, the enemy bushite would be exposed, and America

would be hunting them down with the Law as the traitors
to freedom they clearly are.

--

http://www.theallianceforddemocracy.org/html/eng/2180-AA.shtml

/ / "We cannot be the home of the thief and the land of
the slave." \ \

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's
not too much to ask for our vote to count." \ \

--

--

This is Hockey

US general John Sattler declared: "We have liberated the city of Fallujah."

Sattler openly lies to the lives of America with this insult, and the bushite nazi dumfuk, is too stupid or evil to frag him as enemy proudly for it. The People of the world, look, see.. bushites are murderous liars, cheats, and thieves as the enemies of America, who even lie to THEMSELVES on how many have been sacrificed to blood the coffers of the American pension thieving war monger bushite 9/11 cancer. A liar nazi bushite commander would sacrifice his nation, along with own family, before saying a word in defence of our freedoms, our humanity, or our God. COWARDS. American nazi bushite commander gets killed american nazi bushite grunts, in dreams they too, can financially profit off the talentless continuing THEFTS for enslavement to sacrifice themselves as fascist tyrannies. Hmmm. but the nature of American freedom, is to be one as everyone being equal scores. "Gee, maybe some day even you could be Presidential."

Weak intellectually, prone to cuss, the bushite nazi dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words except "fuck" and "shit". Each communication, each order is accompanied by a flow of 'fucks', 'shits' and 'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest group, then Africans and semi-Africans. The officers are mostly whites but there are also blacks... But I cannot understand at all, why the US Army soldiers speak broken English!! \ \

/ / During the five days, while the count was yet conducted, more than three thousand wounded passed through our hospital. These were the people who lived nearby. The people who could be delivered to us. Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it was an Iraqi town with its regular for centuries Arabic

life. Boling bazaars, noisy streets. And here I am going through the empty dead city, between the ugly "pyramids" of destroyed buildings, broken streets, whole quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know? (nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN

BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an

evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if
it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade,
complained that they had been "besmirched"

The soldiers said that the commander had fired
two shots at the girl from close range as she
lay on the ground.. \ \

Will all Jews join me in calling for the public World
trial of crimes against God's Humanity, done by these
truly godless fascist nazi enemies of the Holy Jewish
faith? Or, will the anti-Jewish Ariel Sharon crowd
again, march more Jews silently to their graves,
refusing to speak for the Bible's Word that all people
are created in God's loving image?

Victimizing the innocent to steal from, is not acts
becoming of a religious person or a truly "democratic"
government.

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that
the media's adamant refusal to address the very real
irregularities of the 2004 vote is a deliberate act of
psychological warfare. [...]

"if the USA's honor can go along with these tactics . .
. then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid'
(fighter for the faith) derives, has always been,
because of an anti-Islamic prejudice that dates from the

Crusades, taken in the Christian West in a limited and restrictive sense. It is taken as a symbol of religious aggressiveness. This interpretation is rendered absurd by the very fact that Islam is tolerant, and the respect of religions, in particular Judaism and Christianity, is one of its fundamental precepts, something which, in fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task Americans can perform to restore progressive priorities and our respect in the world. We have passed the point for graceful exit strategies. Our policy is to go on mechanically killing people unless they vote in January for us to keep on killing people. \ \

--

God is Great

A person accused in our name(s) of a criminal offence, needs to be established somehow to be as such, and the only way to do that, is to present evidence that formed your/our conclusion. Without evidence our accused is ourselves as the innocent, being falsely imprisoned, tortured, or murdered. Murdered, as the Allawi and the bushite nazi forces did to our friends and family in Falluja, to please the demon liar, lawless George Bush Jr. as their central thief system of dishonor and betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without evidence needed to form a conclusion, or when he just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", the bushmob thieves plundered in our "lost" confusion. All the while bush always seeking to close America's on-going criminal investigations, by causing even more have nots among US. So, as a free person, to side for the, bush wars America, God, and Johnny issue, you would seek out to find for Yourself beholding likewise as We all are: bush is actually super fuking evil, like personified or incarnate even, and Johnny's almost like a stranger Messianic figure who just wants to be known

as a semi-normal average GUY/god fellow. (Sheesh.. We gotta bring ourselves everywhere we go) I "hate" bush for being so not himself stupid to think there was no actual walking, talking, godly Persons from the outer-reaches coming in to get him for the crimes he has committed ourselves to. Corporate news dictate without a human presence, doesn't rule this world of communication, we do. (Jesus wasn't buying Satan's misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE RIGHTiOUS!!..! Just ignore the misconceptions others have, and join the party!!! The Time is Now, and man, do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we want to live in a freedom bound for glory, not a hell hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with

9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will, guaranteed, freak you out. REMEMBER: Mr. bush Jr. should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial

amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the

anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America

who blindly targets our residential communities to
enrich the UN-AMERICAN demon anti-Christ bushite thieves
further? That, as bushite nazi grunt, they die for?
Paleeze.

America is dying to prosper their false-deity war
criminal demon anti-Christ, Our Mr. bush Jr, the same
responsible for the nine eleven travesty, who attempts
escape only through fascist americans who willfully
betray America by condoning the furthering of bushite
censorship for tyranny. Is America the cesspool of
corruption and greed, without a People person present
willing to make a stand for God and Country? BUSH IS
EVIL. Let's arrest'em, or kill'em for committing high
treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this
universe over, I am proclaiming, a war against the liar
George Bush Jr., the vilest contempt for mankind this
World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because
Saddam wouldn't let inspectors in; the media has treated
this as not really a lie because it's so obviously
untrue. \ \

America is a coming to kill the truly evil George
Bush Jr.,

Johnny Wizard

earlier appeal \ \

--

The King Commands

/ / Rumsfeld replied to a direct question yesterday as
to whether he knew Zarqawi was in Fallujah with the
answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's
sons and daughters, Johnny's brothers and sisters. "No
idea" rumsfeld states while his private partners cash in
the blood checks for everything but the funeral
services. I ask sacrificing soldiers to help grant me
space to debate bush and rumsfeld on international
radio. We gotta take away Art Bell's turn off button to
thank him for all the enlightenment he has been a part
of in America, but that these life death top priority
issues of ours, he hasn't the right to censor
communication on. This is your World that I wish to
play servant of. As my subject; I promise a fight to
return Justice through freedom for all. How? By
believing in you to do as you should, demanding the
immediate arrest or execution of bush, rumsfeld, and
condi for the crimes of 9/11. Demanding the return of
all stolen Iraqi assets, made by those who personally
profited off the criminal transactions. Demand the
arrest or execution of Allawi for the bombing campaign
of Samara, along with bushite military commanders who
organized the satanic attack. Why would America do
this? To free the dying lives of their bushite nazi
whored, dying grunt savage slave population. .or
perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas:
``We're ready to go. I'm just ready to get this done.

I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents

in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see

how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly

American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three or more, before December 25th, there will be an extra something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,)

See? Evil bushite kill "other" bushite to steal our freedoms and money, and US true freedom fighters would kill'em too to defend our innocent families. Like I said, un-principled nazi facist savages is the un-American enemy bushite without contention but for lifeless corporate censorship on our core values. Demand our voices be heard, or die not trying to do any greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme measures to protect the Iraqi people from these killers and to liberate residents of Fallujah so they can return to their homes." \ \

American Patriot Warriors, kill Allawi as our number one, Iraqi People killer. Thanks in advance my friend.

The biggest most best Johnny Wizard international broadcast ever! Don't wait! Get your own copy today! While supplies last...

In Fallujah, U.S. Declares War on Hospitals, Ambulances
http://newstandardnews.net/content/index.cfm/items/1208

snpd

Or, is it another of those, why bother-who cares?-fifth degree felony things?

--

/ / Despite this, the Bush administration denies any responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to rob the pro-Iraqi central bank. It's just more American deaths as dumfuk sacrifices for the evil anti-Christ, like bush and rumsfeld committed as stolen from America on 9/11. Who cares about America Limbaugh would quietly trumpet, he's making a killing like Art Bell and O'Reilly do, keeping US masses PORTRAYED uninformed and ignorant beyond belief. Did you hear? Mr. bush is the most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN

Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr.

bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the
first time to the Al-Qaqaa story, President Bush said
that John Kerry, in using the story as he has, was
``denigrating the actions of our troops and commanders
in the field.'' \ \

It was the actions of rummy and franks, not the
mindlessly obeying war crime instigators as iliterately
truly stupidly dying bushite dumfuk nazi grunt teen
soldiers.

--

/ / How many more thousands will have to die before God
will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons
of (now missing) explosives "was not high on U.S.
commanders' list of sites to guard." What was high on
that list? Spokesman Scott McClellan said we had to
"make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and
kids and our young American forces are being shot at
from weapons stolen from the ammo dumps that this
president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction
funds distributed by the U.S.-managed Development Fund
for Iraq cannot be accounted for, according to an audit
commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the
tanks rolled, for imposing a new regime of low taxes on
big business, and quick sales of Iraq's banks and
bridges-in fact, "ALL state enterprises"-to foreign
operators. \ \

Big deal. To the war mongering mass murdering thieves
go the stolen spoils., as the bushite's devolving
american new century would say.

/ / The American public is told that this butchery is
part of keeping up pressure in the war on terror. All
these terrorist brides and grooms and terrorist kids
rushing round in party clothes ; all the terrorist
musicians and the terrorist wedding guests, by God, they
have to pay for 9/11 because (as millions of Americans
still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the
vast majority of those believe Saddam Hussein was behind
the Sept. 11 terrorist attacks, and that freedom by
justice through understanding is too complicated and
wordy, ...yeah. and so corproate news control is lying
to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and practically defenseless as betrayers to God, freedom and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes, but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts. Leaderless degenerates that any real human would destroy to protect their innocent families. Innocent families the bushite bombers commanding from Florida murder for no good reason but get more soulless bushite teens rightly killed, all done so to put more stolen money in the pockets of their ungodly satanic cult. Solution: hunt to kill those left un-arrested who willfully, criminally, ordered the needless bombing of Samara to get killed the bushite grunts for the further thievings of the bush backer traitors who bask in your stolen expenses.

Support calls for open dialog.

snpd

Is It Just?

/ / Is it just coincidence that 9/11 is also bush's "acceptable" reason for warring, (planned TOP SECRETLY prior by several days of 9/11, and confessed to US already as fully implemented by the Whitehouse) Afghanistan with a FALSE ALLEGATION [n o - e v i d e n c e] to heroin push, [is still leaving] ..the STOLEN American soldier pension money [...] sitting in the Cayman Islands? \ \

I guess perhaps I wasn't so clear previous, but listen: How's bush and rumsfeld's Afghan plan, gonna go down, if there is to be no surprising 9/11, nor any evidence, (not a scintilla,) gathered for public inditement against Laden for shoplifting? (No advisement from Tenent, nor Richard Clark?) Would bush start a war against life itself, by just simply stating, we don't need no evidence of our suffering?, with him demanding an innocent family to be crucified?, to save Enron? Again, bush is the for real antiChrist of all biblical

folklore, hated this entire timeless universe more over than anything else Johnny cares to mention. George bush's naked treason as an enemy of Humanity is hidden from no one. A true soulless degenerate George W. Bush is, whom is purposefully attempting to destroy Your freedom as humanity with his utter contempt for our flying fricken flag. If a person has no evidence to substantiate an allegation as personal opinion on the advocation of perpetrating senseless bushite barbarity against those understood as US innocent, then your blind faith in evil bush as bushite, not lies with your God, your nation, your family, your neighbor, OR YOURSELF, but as the willing to be sacrificed for the ungodly bushite war crimes as enemy of everyone. Listen: Jesus..., KILL BUSH INSTEAD.

Kill un-arrested bush and rumsfeld for murdering the good American People thought left undefended by corporate edict as the still unjustly dying and near forgotten, and you'll be respected by this universe as truly honorable and courageous, in these of God and Humanity's, most troubling of times under the criminal dictates of Our evil Mr. bush Jr..

Those evil brethren of the bushite clan intend, through censorship, to allow the demon bush cabal our rights to leave, but where does the brethren of the bushite clan think bush is a gonna flee himself from, eh? We, The People are a' coming to get you George W. Bush for almost escaping our police protections. For, when the bush brethren clan wake up to the plan, that they'a have'a been'a deceived, the last think anyone would want, is to be without police protection... (Can you believe, the war monger thief and liar, Our Mr. bush Jr. actually banks for Christian fundamentalism, thinking he's gonna ride them bible belting for all he's worth?)

Again, America needs to wake up, load up, and go out to freely bag US some un-American bush and rumsfeld, all to save the lives of the leaderless dumfukked bush-teens, who are prodded criminally as cowards to die for the enemy. Those who would murder innocent Americans as bushite, then further publicly advocate as enemies to freedom, the victimization of God as the innocent elsewhere, should be turned against instead, questioned, arrested granted full legal rights through public due process, or hunted down to be destroyed by US real Patriots of this world as God's great believers. I'd destroyed any un-arrested proud bushite for warring America by indiscriminately dropping toxic cluster bombs

on our friends and family, to get rightly killed more leaderless cowardly soldiers with Grand parents they leave undefended in bush's evil amerka. Who doesn't hate bushite I ask you to think as you should?

You kill bush because, we had unrestricted access to do anything bush pleased throughout Iraq, prior to sacrificing any good for nothing, cowardly bushite nazi dumfuk whore.

Now, because truly, the Iraq bushite war is illegitimately premised without any actual cause, the humans are faced with two questions that have no legitimate answer.

1: What can the ungodly and evil demon bushites do now in Iraq, that they couldn't prior to murdering one child, but for to rob from America by towing his bushwhore nazi coward soldiers to commit criminal acts to rob freedom from all of US as Humanity?

(Kill an proud to be evil bushite, and all day long you'll have the thanks of every surviving American police officer, and a nod from all the American pensioners who are promised that maybe bush's america can learn for next time while the bushites just walk away with the stolen loot laughing.)

2: What could Saddam do, that he wasn't asked for?, to stop the senseless first degree murder of our friends and family?

Saddam provided the sites where all bremer's WMD was destroyed, the documents, the personnel, and so on, but corporate america won't let the facts be delivered without their bias of, who cares neutrality. A refusal to report for American interests regarding the sacrifice of American lives for the un-arrested criminals hiding inside Enron, Dutch-Shell, five dollar a day Bechtel, or double billers, commi Halliburton. Example: soldiers could have more effectively went into Iraq unarmed to search wherever, for there were no restrictions placed upon rational behavior, but just no money for the bushites to steal from America. The proud dumbfuk bushite soldier is coward and betrayer to America and God, by not, for America's America, killing bush and rumsfeld for near escaping the murder scene of 9/11 in New York City. Instead, they attack the defenseless and innocent with cluster bombs laced with toxic waste they happily eat themselves to die as the ungodly soulless bushite traitors. You get your gun Patriot, and instead of punishing a town, city, or state, bag yourself some

individual evil bushite, and be respected by all true loyal Americans as a real freedom fighter. With the God of every religion by your side rooting you on for the home team, You'll be loved by all. At least until, we or me, can make the national news programs to communicate. Again, the management and news desk staff of CBC and CNN know, that the American FBI contend: bush's business partner, the un-arrested in retirement General Ahmad, funded Atta, the 9/11 mastermind. (While no evidence was established against bin as connected, to justify the Afghanistan war crimes. Nothing.)

CNN and CBC, in our names, are with malicious intent, refusing to allow justice to be our interest in protecting always.

snpd

New Recruit

Destroying enemy bushite is a gift to Humanity, it is saying you care for the lives of the innocent a bush bitch nazi grunt freely confesses to targeting for murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given. All the while, labeling themselves, "pro-Iraqi". The mindlessly evil attack against the Turks recently with an ordered bombing campaign that actually murdered people, sighted yet another, example of the bushite's idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just

where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed

enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top

notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

snpd

Again, none of any words world wide bare contention against the facts we've brought to our attention. The traitors to America, Our Mr. bush Jr. and rotten rumsfeld don't mention the willingness of American Soldiers to aprehend general Ahmad as the principle terrorist funder of Atta, because this general is also responsible for developing the bushmob strategy of killing Americans in New York City from Washington. A strategy of blaming bin Laden without any evidence to bomb Afghanistan for Enron. (The Dahbol Working Group.) Then closing criminal investigations, as it's not important to know who personally was responsible for the insider trades, or the contacting of only Odigo. Never mentioned by CNN as top priority to American soldier concerns, who are expected by Blitzer and Hemmer to throw away their lives in sacrifice unthinking to bush, america's false deity, super evil anti-Christ. While bush and cheney threaten to murder more dumb Americans who would dare to articulate the demand for Justice as our own, like Laden has, while demanding American Patriots coware in fear of the sadistic savage mass murdering death squad leader, tommy franks, or the anti-Christ going out to kill their family too as not represented by corporate policy, while American soldier families are continually disrespected as unworthy. (Generally, they are pretty damn stoopid, but certainly, if they're not knowingly commiting first degree murders for the anti-Christ as pure nazi filth, they should be allowed to learn, instead of having their own undefended families robbed then slaughtered for American traitor, nazi puke terrorist, tommy franks, or for Monsanto's rotten rumsfeld. Do you notice corporate America continues to show outdated footage of those two demons standing near smiling armed American soldiers, who as a mass of dumfuks, aren't intelligent enough to destroy them instantly as established ememies of America as terrorists? Well, that is going to change. I have yet to find ANY American Soldier who is literate, who disagrees WE have some very important questions that need immediate answers before the bushmob murders more Americans in Our name. See for yourself through Google if you don't believe in Christ as the Redeemer.

As for the doubting American Soldier, LOOK, CNN will continue as cult members in their dying madness of just even lamer excuses, to convince US, we are alone in our concerns for Freedom as Justice instills for US all. This moment of History requires you to stand strong for only yourself to be represented truly among the stars. Evil stupid people can't make heads or tails of this, but, as evil bush does truly from his dark shallow existence, will continue by open piracy, to publicly advocate in Our names the further robbing and murder of your own family American Patriot, so too, will more american nazi dumfuks die to the tune of their own cowardice to protect themselves as garnered fairly. This is why rotten rumsfeld forbids the death tally of American soldiers to be made public to the ready for enlistment as the too dumb to know better. Life is life, and sorry to say american dumfuks, Christ on the cross is you too as a true dying American Patriot, and your already politically sitting in the position of hatred and injustice against Humanity, and myself honestly as.. THE SON OF MAN! (The god of God's life/death guy, with a score to settle on behalf of the infinite Universe and True brave Soldiers everywhere. KILL AMERICAN COP KILLER BUSH NOW BEFORE HE MURDERS MORE IN OUR NAME AS THE INNOCENT COWARDS!)

CNN is not interested in working for American interests by asking why, as there is little of any money in just doing good for your neighbor, like saving a living, as we would wish to be helped for ourselves, if we were bound just the same to be equals at being. Mr. Blitzer and Bill Hemmer, as americans, wouldn't give a dollar of your time, to speak on human rights to be of their own concern, (they're rich!) or to save the life of an innocent poor victim, if it meant they would therefor, be compelled to honestly report on their false deity bush, the super evil criminal to ourselves as Humanity, the unelected dictator, American cop killing anti-Christ in person!, that they so leave to see Americans sacrificed as ignored to be robbed from as their profit margin increases. Do less for America, The People, and get payed more in collateral damages paid for by doubting Patriots, too slow to stand for the American flag in protection for their own living as lost to the wind. Mr. bush, tommy, rumsfeld, cheney and blair give no evidence, but for to show themselves as the criminals who openly harbor terrorist activity against our communities, and WE, as Humanity, according to CNN, are expected to go out and kill our friends in cowardice, instead of standing up to destroy the demon bush instead to save our own selves.

God, or no God, I hate that murderer bush as much as any
real man would to care for his own life as family.

3407. Re: question about canadian to US customs

Newsgroup: rec.radio.shortwave
Date: 2005-02-08 05:05:33 UTC
From: mike maghakian <maghakian@comcast.net>
Message-ID: <5aydnf6vbbIB1ZXfRVn-ow@comcast.com>
Source record: 7255

thanks for the insight, in my case they delivered the package and LATER
mailed the bill !

I will be calling purolator tomorrow and putting the pressure on them. I
will mention they are illegally collecting customs and fraudulently trying
to collect excesssive fees.

>
> I believe you are being hosed (to use the Cdn expression). NAFTA (N. Amer
> free trade agreement) says you can be charged sales tax on locale where
> you
> take charge of the package but radios (amateur, SW) are customs exempt b/n
> the 2 countries. Period. I had a fight with UPS from the USA to Canada
> where they thought I should pay a brokerage fee. To get delivery I had to
> pay it and then appealed through Canada customs. I was refunded the
> amount. UPS threatened me several times before the appeal went through. I
> just ignored them and forwarded their correspondence to customs. I only
> buy things now shipped by postal service, which frankly takes usually only
> an extra day or two and avoids this sort of extortion. The US and Cdn
> postal services do an excellent job of cross border shipping in my
> experience doing this with 4 radios, 3 computers and various other things
> like books and parts. And they are cheaper for basic shipping costs.
>
> I think the shyster courier companies think they can make a buck from you
> by
> standing there with the package and saying they won't deliver unless you
> fork out. I don't do business with any company who won't ship the way I
> want it.

Neither of those is completely true actually.

I would concentrate on the fact that you did not approve it if you want to get
results.

I'll know more about customs in a day or two, as I've got a telescope arriving from Germany tomorrow or Wednesday.

The German courier charged $200 for insured shipping and it weighs just over 30 pounds.

It'll be delivered by Fedex, and they required me to fill out a CBP Form 5106 before they could get it released from customs, but my impression is the only thing I'll be billed for is the actual duty imposed by customs.

I remember one seller saying something to the effect you'd think we were at war when it comes to importing radios between the USA and Canada.

I've also noticed some Canadian radio sellers hand carry radios across the border to ship to US customers.

MM,
.
Blame it on the Canadian Seller.
.
For 'used' electronic equipment that are bought at Auction.
There is no US Customs Duty for items costing less than $800.
However, if the Canadian Seller does not specifically Declare
(Write Down) that the item is 'used' electronic equipment; or
Declares that the the Item is NEW Electronic Equipment then
you, the Buyer, are stuck with paying the Bill for their mistake.

MSH,
.
I have had two Canadian Sellers that wanted regular
USPS Money Orders to Cash at the USPS Post Office
on the US Side of the Border and Mailed the Radio and
the Antenna at the same USPS Post Office in the USA.
.
They both claimed that this process saved them 22%
Combined Canadian Sales Taxes; and eliminated the
Canadian / US Customs hassles and fees.
.
it worked for me ~ RHF

I have heard many stories from Canadian Hams who have been charged these kind of fees by the courier companies. UPS has come in for strong criticism from this group.
Canada Post/Customs charges a $5.00 handling fee on shipment sent via US Post plus whatever Sales taxes apply. Some Canadian Hams who live near the border rent Post Office boxes in US border towns. They take their radio purchases through the Customs shack at the border, pay the proper customs charge (if any) and avoid the extortion mentioned above.

I've gotten stuff from Germany, England, Portugal, Canada and Latvia and NEVER have I been charged a customs fee. This includes several ham rigs and never even HEARD of an FCC filing fee.

Very wise words, from someone who understands human interaction. Too
often one person or the other in a couple thinks they can "reform" the
other person's bad habits. This only leads to misery and an eventual
breakup. When you sign up to the "for better or worse" deal, that
means you take the whole package, not just the parts you like. My wife

had to deal with my radios, and I had to deal with her smoking (Which fortunately she gave up when she was pregnant). That's is the nature of compromise. You compromise because underneath those surface differences, there is a greater bond of affection which should transcend those surface differences. But it should be everything in moderation. If important things in life are being postponed to address a specific hobby, then it's time for a little introspection.

I'm kinda fond of Monitoring Times<grin>...

Seriously, it depends to some degree on what your listening interests are. I think Monitoring Times offers a pretty good shortwave program guide and a variety of interesting feature articles. Plus you get a bunch of regular columns on other aspects of radio - scanning, building & repairing equipment, utility/domestic BC/pirate stations, etc..

If you have a radio store in your town you should be able to find single copies of some or all of these you can check out before making a decision.

On a $200.00 radio? Doesn't make sense. I bought one watch from
Canada for $250.00 and the customs broker fee was around $30.00 from
UPS. Call them...I think they made a mistake.

I am listening to RCI on 9515Khz this morning, (02/08/2005) at about 9am. There is a regular crunching sound comming across every 10 seconds or so. Almost sounds like an arcing in the transmitter. Checked dual freq 13.655Khz. Same thing. Moved off freq and the sound went away. Never heard that type of thing before.

3426. TV Parts Shortwave Listener's Antenna for a 'portable' AM/FM Shortwave Radios

Newsgroup: rec.radio.shortwave
Date: 2005-02-08 14:38:12 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1107873492.265178.322460@f14g2000cwb.googlegroups.com>
Source record: 7274

KYSTRE51,
.
Reference - TV Parts Shortwave Listener's Antenna for
the Sony ICF-SW7600GR AM/FM/SW Radio
http://groups.yahoo.com/group/7600GR/message/762
* TV Parts Shortwave Listener's Antenna for 'portable'
AM/FM Shortwave Radios
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/2184
.
Consider buying some simple TV Antenna Parts to use in
making a Low Noise Shortwave Listener (SWL) Antenna to
use with your Sony ICF-SW7600GR AM/FM Shortwave Radio.
.
First with many 'portable' AM/FM Shortwave Radios that
have an External Antenna Input; a very long (really long)
so called Longwire {Random} Antenna of 80 Feet to 100
Feet or more is not the best choice.
.
TIP - The better 'choice' is a medium length, 35 Feet
to 75 Feet long, Random Wire Antenna for an External
Shortwave Listener (SWL) to use with a 'portable'
AM/FM Shortwave Radio.
.
HOW TO DO IT - The basic layout of this Shortwave
Listener's Antenna made from TV Parts is:
.
1. A Horizontal [Flat] Antenna Wire Element : This can
be a piece of Insulated Copper Stranded "Hook-Up Wire"
that is about 35 Feet to 75 Feet long that is strung
between two points; and about 10 Feet to 25 Feet High
off-the-ground. -Or- An Inverted "L" Antenna that starts
at ground level and goes up Vertically 10 Feet to 25 Feet
and then out Horizontally 35 Feet to 75 Feet.
.
2. The Grounding Point : Find an 'outside' Cold Water
Pipe that is coming out of the ground. Clean about One
Inch all around the Surface of the Pipe near Ground Level
with some Steel Wool. Strip about One Foot of Insulation
from a piece of Hook-Up Wire. Fold the 'bare' Wire over
in One Inch Sections to give you 12 Sections of exposed
Copper Wire. Use a Stainless Steel Hose Clamp to compress
the spread-out 'bare' Wire folds against the Cold Water
Pipe and form a solid Electro-Mechanical Connection.

-Or- Install a Ground Rod and Ground Wire Clamp with a
Ground Wire.
.
3. The Matching Transformer : The TV 'type' Matching
Transformer has two Wire Terminal Leads on one end and
an "F" Connector on the other end. Connect (Solder)
the Wire Antenna Element to one of the Wire Terminal
Leads. Next Connect (Solder) the Ground Wire to the
other of the Wire Terminal Leads. Then Connect one end
of the Coax Cable using and "F" Connector to the "F"
Connector end of Matching Transformer.
.
4. The Coax Cable Feed-in-Line : Use 75 Ohm TV 'type'
Coax Cable as the Antenna's Feed-in-Line from the Matching
Transformer to your a 'portable' AM/FM Shortwave Radio.
.
5. The External Antenna Input Connection :
Most 'portable' AM/FM Shortwave Radios use a 1/8" Mono
Jack for their External Antenna Input. Using a Standard
Right-Angle "F" Adapter and "F" Jack to 1/8" Plug Adapter
will make the 'connection' and provide "Strain-Relief"
for the Radio's 1/8" External Antenna Input Jack.
.
NOTE - Use the TV type 3.5" Wood Screw Standoffs with
insulators to Rig and Route the Antenna Wire Element
and the Coax Cable.
.

Toward the end of its run, the HF-150 was manufactured not by Lowe but by South Midlands Communications. Does anyone know if South Midlands Communications manufactured *both* the standard HF-150 and the HF-150E? I know they manufactured the former, but am not sure whether they produced any Europa units.

Exactly right, dimwit -- the rating DID go from 2.4 (miniscule) to 2.2
(microscopic) for a 15% DROP to 24th.

They LOST 15% of their already TINY audience in NYC.

So, where on earth could they have gone?

Uh oh -- Rush found 'em!

Youth Audiences Help Rush Limbaugh's Ratings Grow!
Wednesday January 12, 5:37 pm ET
New York City Adults 18-49 Years Old, Up More Than 50% in Arbitron

LOS ANGELES, Jan. 12 /PRNewswire/ -- Rush Limbaugh received a great birthday
gift today from his New York City listeners -- Arbitron, the official
monitoring service of broadcast radio, reports that listening Adults 18-49
years old grew more than 50 percent over the last year. As the ratings roll
out nationally from city to city, New York's WABC-AM numbers are out first,
demonstrating the following overall gains for The Rush Limbaugh Show: Adults
18-34 are up 25 percent, Persons 12+ are up 35 percent, and Adults 25-54 are
up 47 percent. (source: Arbitron MSA)

Read it and weep, shit-for-brains.

Ron

Same thing here. I reduced the AGC delay setting and it then is heard as a quick noise without any blanking of the receiver as happens with the longer time constant setting.

The KWZ30 was rated highly in terms of SSB intelligibility, better than the AR7030. Not that surprising with phase linear filters. (No ringing in CW.) The interface generally got less good marks (too few keys for the number of functions), but the rx is said to be built like the proverbial tank - you do notice that K&D makes industry electronics. It's too bad there still is no successor, apparently there has been little time for this hobby project.

It was awkward sentence construction - I was tired.

The package arrived with a sticker saying they'll bill me for any import duty.

The form I had to fill out seemed to be designed for a business, so even though I included a cover note indicating it's a personally owned scope, I expect I'll be getting a bill.

> > The German courier charged $200 for insured shipping and it weighs just

I thought so too, but the box was about 5 cubic feet, and I know a friend paid about $275 to send an 8 cubic foot box with a 60 pound radio worth about 1/3 of the value of the scope to England.

So I'm guessing it's volume, weight, and then value.

If you frequently use the rx on batteries and/or receive stuff on 60,
definitely do that. My 7600G is weaker than the old SW7600 sensitivity
wise on a number of bands when run off batteries, and the AN-LP1 will
help signal levels significantly. Due to its band filters it also
reduces the effect of images from 49m on 60m (which had been annoying me
in the past) to the point where they become insignificant vs. real
signals. And last but not least, it's a very portable antenna solution
for what it does, and it works with a number of portables out of the box
without needing any fancy adapters.

In my opinion, Montoring Times is far better than Popular Communications. I started reading Pop'Comm back in the early 1990's and it was a fine publication, however after about 10 years it really started going downhill. It's still an OK magazine, but a few years ago I began subscribing to Monitoring Times and found it to be superior.

If the UK magazine you're referring to is Shortwave Magazine, it's also a very good publication. I haven't read it in a long time but back when I was in England I used to read it often.

If you're interested in reading about ham radio, Worldradio is a good publication.

No, Big Radio Media was big, but not that big.

It's worth remembering that the 50kW clear channel stations were broadcasting to a large part of the country during the evenings If the government was actually interested in discouraging a national radio media, they never would have developed the clear channels.

3445. The Definitive Chord & Scale Bible - Literally EVERY chord and scale!

Newsgroup: rec.radio.shortwave
Date: 2005-02-08 17:26:18 UTC
From: Kind of Blue221 <createbeforeyouhate@itsjustabook.com>
Message-ID: <20050208092618210007%createbeforeyouhate@itsjustabookcom>
Source record: 7292

Finally it exists!! IF YOU PLAY GUITAR, YOU NEED THIS BOOK!! Listen to my story:

In the process of teaching myself guitar, I went looking for a book that simply had the all the chords, scales and modes, and nothing else. I was totally surprised to find that such a book didn't exist. There are plenty of places to find this information, but it tends to be spread out over the coarse of a long book or in a poorly organized workbook. I found some of it on the web in the form of calculators and such, but that wasn't helpful since I wanted to practice away from my computer. That is why I created THE ULTIMATE GUITAR RESOURCE, which has LITERALLY EVERY CHORD, SCALE and MODE in an easy to download and print document. Its a full 37 pages for only $3.99! (hardcover is available)

What makes this guide even better is that you don't need to read music to use it, so it can help every player at any level. I guarantee you'll use this guide for years!

For way less than you spent on lunch, you'll learn:
-EVERY CHORD (in every position)
-EVERY SCALE, including the jazz and blues scales
-ALL THE MODES
-LITERALLY EVERYTHING YOU NEED TO KNOW - solo and play chords without reading music today.

A free sample is available at:

<http://keystone-music.com/>
<http://keystone-music.com/>
<http://keystone-music.com/>

Good luck and God Bless!

p.s. I apologize if this message annoys, aggravates, miffs, disturbs, bugs or angers you. I'm actually just a dude who wrote a book that hundreds of people are using and apparently liking very much. While this may fall into a spam-like category, (since I am selling something, and you didn't ask for this message), I think that its not totally over that line since I'm not pitching a porn site, a refinance loan or a cock enlargement.
Peace!

.
And for those in the UK "Shortwave magazine" and
"Practical Wireless", the former oriented towards SWL,
the latter towards the transmitting ham.
.
Both are good.
As the International editor of WRTH (www.wrth.com),
I have to recommend that for the broadcast radio enthusiast!

'Monitoring Times' is good for beginners but eventually you'll out grow
the magazine by using the Net for more detailed information.

I payed about $25 for customs and brokerage on a 'boatanchor' from
Vancouver. I think you got taken on those other charges.

I once had this problem when I bought an item from seller in the US.
After I emailed him and told him what happened he just faxed the courier
and told them that the selling price was much lower eg. $20 and he put
a higher value for insurance purposes. After they received his fax they
delivered the product with no additional charges

Well, the fact that contributors to monitoring times and the handbook
(which I already bought) use these forums has to be worth something.
Guess I'm going to subscribe to monitoring times! Anyone know of any
good subscription deals?

0.2 in Arbitron is way, way inside the margin of error. A 2.4 is a 2.2 is a
2.0 is a 2.6. In other words, no change.
>
> They LOST 15% of their already TINY audience in NYC.

They have a sizable audience considering thier more limited signal. They are
doing far better than anything on 1190 has done for decades.
>

Something To Think About . . .
.
Air America -=Verses=- National Public Radio (NPR)
[LIBERAL -v- Liberal]
.
Air America's 'biggest' Competitor is not Rush Limbaugh
or any other so called Conservative Talk Radio personality
... but all that good Liberal Programming that is being
pumped-out via the Tax Free (therefore Taxpayer Supported)
Public Radio Stations (NPR/PRI).
.
* Yes in NPR/PRI - Air America has a Rival who has
had a monopoly on the Liberal Agenda
.
"The Voice of Liberalism to the so called Educated ELITE."
.
* An Audience that has been buying the same Brand of
Liberal News and Information {TALK} Radio for over 50 Years.

* A Listener Base that is 'conditioned' to PAY (Donate)
for their Brand of Liberal Radio.

* Plus all those Liberal "Down For The Cause" FREELOADERS: Who Listen
and NEVER send in a Dime to Support what they
Claim that they 'believe-in'.
.
Lets Give It Up For NPR -Air America's Public Enemy # 1
.
something to think about ~ RHF
.
.

Well, we can go by public opinion polls, which show that Bush supporters
have a skewed view of reality.

In some markets, where AA has competitive signals, it is happening. The
margin, especially in 25-54, is close in some places, far off in others.
Just as Rush has 5 or 6 shares in some places, 2 to 3 shares in others.
>

I have been doing Arbitron analysis for the last 35 years, and make a living
with the "simple math" of statistics.

Your response shows you know nothing about how radio ratings work.

Obviously, one thing the people of Nepal need right now is outside news via shortwave.

http://www.nytimes.com/2005/02/08/international/asia/08nepal.html

February 8, 2005
Nepal's King Cracks Down on Politics and News Media
By AMY WALDMAN

KATMANDU, Nepal, Feb. 7 - Instead of the usual spicy mix of current affairs and politics, the subject of Radio Sagarmatha's talk show on Saturday night was as bland as rice.

In fact, the subject was rice: the differences, as explained by a scientist, between golden, wild and other varieties. That was the only topic the independent Nepali FM station felt safe to discuss.

"Normally I don't do that kind of program," a 31-year-old journalist at the station said, laughing nervously as a soldier listened. When the soldier - one of six lounging around the station - moved off, the smile fell away.

"Our hands are tied," the journalist said.

Six days ago Nepal's king ended the country's 15-year experiment with democracy and took power for himself, imposing a state of emergency and suspending a host of civil liberties, including freedom of expression. Nepalis have been facing something between fear and a farce since then, adjusting to a combination of royal rule and martial law. Those in politics and the news media feel particularly under siege.

In a televised address last Tuesday morning, King Gyanendra said he was taking power for three years because the country's fractious political parties had failed to hold elections or bring Maoist rebels to peace talks. As he spoke, phone lines and Internet connections were being cut, political and student leaders were being detained and soldiers were arriving at news organizations' offices to take on their new role as censors.

Nepalis now have no freedom of assembly, expression or opinion; no right to information, property or privacy; and no protection from preventive detention. The government has banned any criticism of the king's action for six months, and any public comment that could affect the morale of the security agencies.

[...]

All of the community radio stations that sprang up in the 1990's are locked up, playing only music or discussing things like rice. The BBC's popular Nepali news service has been stopped, and Netra K. C., its reporter in the western city of Nepalganj, has been detained, according to human rights activists. Newspapers have been reduced to editorializing about safely banal subjects, like the weather or clean socks, or resorting to metaphor to make their case.
[...]

I know that Air America in NY underperforms because the 5 mv/m signal barely
covers 40% of the market's population. If one retabulates the nubmers for
the city-grade coverage area, WLIB actually is very close to WABC in key
sales demos. In some markets, like Portland, it beats the conservative
talker. In San Diego, AA is on a vastly inferior signal, yet comes very
close to KOGO in 25-54. In most other markets, the format is way too new to
make any conclusion at all.

> Must all liberals resort to condescending tones to pretend that they know
> a deeper truth than the facts right in front of their noses?

I am not a liberal. In fact, in the last election I voted for the Partido
Nuevo Progresista, which is conservative. Being conservative does not, as a
rule, require divorcing oneself from reality.
>
> For what it's worth, I put myself through college working at radio

Set the radio for SSB reception .

Try LSB for frequencies below 10 MHz or USB for frequencies above 10 MHz .

Tune in the SSB station

Set the radio tuning steps for best resolution i.e., slow tuning

Slowly adjust the main tuning dial for a natural sound or at least best
intelligibility

Actually, this screed from this leftist, leftist-supported organization doesn't say that. And you missed the part about the Kerry supporters who believe the 9/11 hijackers were Iraqis.

Any organization funded by the Tides Foundation (Kerry's wife's little ultraleftist funding project) had damn well better please leftists. From your glee it appears they've succeeded.

And then there's Kerry, who said both that Saddam was a threat and that Saddam was not a threat, in the second debate:

KERRY: Well, let me tell you straight up: I've never changed my mind about Iraq. I do believe Saddam Hussein was a threat. I always believed he was a threat. Believed it in 1998 when Clinton was president. I wanted to give Clinton the power to use force if necessary.

then, about five minutes later:

KERRY: I don't think you can just rely on U.N. sanctions, Randee. But you're absolutely correct, [Iran] is a threat, it's a huge threat. And what's interesting is, it's a threat that has grown while the president has been preoccupied with Iraq, where there wasn't a threat.

Again, although I posted this in my previous reply. WLIB puts a 5 mv/m over less than 40% of the NY MSA. Most broadcasters today understand that heavily populated urban areas with thick buildings and lots of man made interference require as much as 10 to even 15 mv/m of field strength. WABC has such a signal over the entire MSA. WLIB, when plotted against a 10 mv/m covers around 30% of the population.

A 2.2 against 30% indexes as a 6.5 against the entire maket... meaning that in areas where both stations cover well, the two are very, very close to each other.

Studies of AM Arbitron diary returns show that more than 80% of listening is inside the "hightly listenable" interference free countour... in Los Angeles, this is 15 mv/m... with very little outside this zone.
>
> If THEY won't listen to that crap, who will? Maybe Cuba?? -- Edildo, see
> if you can translate for them!

AA is obviously doing well, or Clear Channel, a notoriously pro-Republican and pro-Bush company, would not have committed nearly 20 major market stations to the liberal talk format, based on AA's offering and one show from Jones / Media America. Clear Channel just switched a 50 kw AM in Cincy, and another in LA to AA. They also have moved AA onto a more limited signal in DC (where every AM in the market is limited) and several other markets. Clear Channel AM talk VP of Programming Gabe Hobbs recently stated that liberal talk was on a strong, long term growth trend and said he anticipated dedicating more stations to liberal talk formats in the future.

Remember, also, that talk is generally a long-term growth format and seldom has the amazing initial spikes of AA. Usually, talk formats take several years to develop, with ones like WABC, WLS and KFI taking 4 to 6 years to break into consistent Top 10 performers (see Duncan's "An American Radio Trilogy Vol. 1" for a 25 year trending of major talk conversions of the last two and a half decades).

This only works for amateur radio stations. Almost all utility stations
that use SSB use USB. And the few 60 meter amateur channels on 5MHZ are USB
only.

You presume too much again. I wasn't an intern -- I was on-air talent (I still do commercials in my spare time). It was a great way to pay the bills while I went to graduate school.

And you can bitch about the signal all you want, but it doesn't change the fact that Air America's numbers are not growing, and appear to have actually fallen in their flagship market. Sure, if they broadcast in Berkely, they might pick up a couple of listeners, but the fact is that they have very little chance of surviving as a commercially viable network outside of a very limited number of markets.

Blah, blah blah blah BLAH.

The fact is, if Air America had better ratings, they could land a blowtorch. But they don't, so that's why they're not on one.

The difficulties you speak of that WLS and others had with switching to talk formats had much more to do with finding the right talent than finding the right format (as you should know). Nobody wanted to hear a nobody discussing traffic, weather, and sports all day. It took them that long to find the right talent -- and when they did, the results were there fairly quickly.

For instance, Stern and Limbaugh have gone from zip to number one in plenty of markets within one year. Believe me, Clear Channel, Infinity, or any number of other groups would be all over Air America if they thought people were actually going to listen -- they're not about ideology, they're about audience numbers and demographics. They make more money when more of the right people listen to their stations (or did they forget to print that in An American Radio Trilogy Vol. 1?) Well, there's always room for volume 2, isn't there?

there is a seller on eBay that is selling a 30 DVD sets of Godzilla movies. they are ALL copies. he seems to have many sets,
I have reported him several times over the past few weeks since he keeps selling them. he is getting big money. one set went for close to $400. His cost is probably about $50, since they are all copies.
Ebay doesn't seem to care unless a company like Sony does the complaining ! that implies to me that they are not protecting the public but watching their butt from getting sued !

Am I mistaken but don't they have some responsibility when they have been notified that illegal activities are going on ?

A 2.4 to a 2.2 is not a "fall" but, in radio terms, a "wobble." What it
looks like is that two things happened. First, there was more sample outside
the WLIB signal (this also affected the ethnic stations, with all Spanish
stations being off as a group). Second, there was lighter than average talk
listening in 25-54, which affected both WABC and WLIB.

In other markets, where AA had been on for at least part of Summer, the
programming did very well in Fall across the nation. Considering the format
debut on signal-impaired facilities, it really performed better than is
obvious. It is a very viable format, as shown by Clear Channel's commitment
to a score of AA stations.

> Sure, if they broadcast in Berkely, they might pick up a couple of

It is far, far more viable than that.

All I have to do is look at Bush backing down from stupid proposal
after stupid proposal, and to see more and more real Republicans
finally disassociating themselves from the Neocon agenda every day,
and I am no longer concerned about my schadenfreude.

Bush is daily solidifying his record as the Worst President Ever,
ensuring that the American body politic will be sufficiently
inoculated against the fascist Neocon virus by 2006 to solidly
restore checks and balances to our tripartite government for many
decades to come.

There are no blowtorches available right now in NY. However, markets like LA, Denver, Portland, Seattle, Miami, Cincy, etc. have true "blowtorch" signals. More are coming since AA can no be more discriminating in its station relations.

660, 710, 770, 880, 1010, 1050, and 1130 are the only bolowtorch or semi-blowtorch signals. All are in the hands of major broadcasters and are either cash flowing in major proportions or part of a national strategy, like ESPN. 1190 is probably as good as it will get for AA in NY for some time.

> The difficulties you speak of that WLS and others had with switching to

> fairly quickly.

Not true. The stations grew as listeners became accustomed to talk radio as a first priority, first preference listening choice. In smaller markets, it still takes a while to make a talker work, even when 100% of the talent is proven, syndicated material.

I have done a number of local live talkers, in markets ranging from 4 million to over 18 million. In the three recent startups I have done, no talent was changed over the first 18 to 24 months, but audience gains were slow until well into the second year. I had the talent... what I did not have was habit, and that formed as the station proved, in each case, to be useful to listeners over time.

> For instance, Stern and Limbaugh have gone from zip to number one in
> plenty of markets within one year.

I have worked with the guy who put Stern on in Philly (first market outside NY) for Mel, and in LA afterwards. It took well into two years for it to work well. Same with Rush until he was so well known that he got instant recognition. Other than those two, there are not a lot of talents with the

ready-made star quality to do instant leaps.

> Believe me, Clear Channel, Infinity, or any number of other groups would
> be all over Air America if they thought people were actually going to
> listen -- they're not about ideology, they're about audience numbers and
> demographics.

Clear Channel has about 20 AA affiliates, with more coming.

"Clear Channel Communications is announcing today that its KXTA-AM (1150) will switch to "progressive talk" on Feb. 3 and carry the network whose lineup includes comedians Al Franken and Janeane Garofalo, as well as left-leaning hosts from other syndicates. "We have the Rush Limbaughs and the Sean Hannitys now, who have moved pretty far to the right. So there's all this constituency to the left of that," said Gabe Hobbs, vice president of news, talk and sports programming for Clear Channel, which owns eight stations locally and more than 1,200 nationwide. "To me, there's a hole big enough to drive a truck through."

> They make more money when more of the right people listen to their
> stations (or did they forget to print that in An American Radio Trilogy
> Vol. 1?) Well, there's always room for volume 2, isn't there?

Vol. 2 is not the ratings trending part.

And, again, AA has gone to nearly 100 affiliates in its first year. This is more than Rush did in his first year. And the largest supporter, Clear Channel, has just committed a $100 million dollar 50,000 watt LA station to the format, along with other stations in about 20 markets... many with great signals. In Portland, where AA is on the markets best signal, KPOJ is in a tie with conservative KEX in 25-54. On equal signals, or in geographic breaks based on signal parity, AA is very close to conservative talk, despite not being a mature service.

| > Revolution.

| Nah, you're just a moronic 'tard boy.

| You just can't seem to get a grip on the facts.

| Now go take those meds, before your day gets totally screwed up.

1) - The advice to "adjust one's meds" is so old that an exhibit of the first time it was used was just recently installed in the Smithsonian

2) - If you were to go visit this hallowed shrine to glib, droll wit, you might want to visit the National Archives, where you can look at the Declaration of Independence, the Consitution and the Bill of Rights. Of course, you can look at them on the web, too, at http://www.archives.gov/national_archives_experience/charters/declaration_transcript.html, http://www.archives.gov/national_archives_experience/charters/constitution_transcript.html and http://www.archives.gov/national_archives_experience/charters/bill_of_rights_transcript.html, respectively. You might want to read what the contemporaries of Paine and Franklin (and Jefferson and Monroe) wrote. Believe it or not (but I'd wager the latter, given your earlier response) they're your heroes.

3) - One of the reasons they'd be your heroes is because, despite the fact that they'd disagree with your attitude, tone and content, they'd still advocate your right to say these rude, clueless and downright vile things. And while disagreeing with you, they wouldn't even resort to calling you "a moronic 'tard boy" (or any other insult of the day). You see, they were civil and enlightened, and hoped to provide people like you the same opportunities. Your actions are an affront to everything they fought for. Your ignorance undermines the very foundations that the United States was built on.

So, here's the question. Will you get educated, and defend the Constitution and what it stands for? Or will you continue your ignorance, disgrace the

country you (so you claim) love, and cause further damage to the reputation and security of the United States? The fate of the U-S is in your hands. Don't blow it.

Hiya...

That is a great choice if you prefer to shell out some loot on an "out of the box solution". It is also an option to spend next to nothing for some standard hook up wire and apply some imagination.

I have a 7600gr and I use it off the whip for strong signals. At times, I've also use it with my outdoor roof antenna. When I've use it with one of the two antennas I have on the roof, I always use it with my pre-selector too to help prevent overload and I apply some attenuation via the 7600gr's adjustable attenuator. It is a great radio but it is still a portable that wasn't intended to use with so much wire. So... I came up with a new solution.

I've been using a new make shift antenna set up that has been working just great. I have a mercury light pole in my bedroom that is colored black. I took fifty feet of 22 gauge solid core wire with black insulation and I wrapped it around the light pole. It is like doing a "broomstick" antenna using the light pole as the broomstick. You can hardly notice the wire against the light pole which is a plus. I soldered a jack to the end of the wire that I plug into the external antenna hook up on the 7600gr. I've got the other end of the wire insulated. It is really doing a respectable job.

So... I dont think you need to spend money for the AN LP1. If you are going to use it as a semi-portable indoor home antenna, you can do quite well for little money by constructing a basic wire antenna. It is also lots of fun to experiment with antenna construction. If you want something to travel with that you can deploy and then put away cleanly, the AN-LP1 is the better option. It is also the better option if you dont want to fuss with making your own antenna. If you do decide to buy the AN-LP1, you'll get very good results with it above 4.000. It looks neet too. :-)

David is not a liberal, if you've been paying attention, twit. Or is it
(like most conservative thought processes work) that David must be a liberal
because he disagrees with you?

| For what it's worth, I put myself through college working at radio
stations,
| and I know my way through a book.

You obviously didn't learn anything while you were there. Must have been
sweeping the newsroom floor, would be my guess. You must have worked with
the the writer who did this PR piece you quote, to wit:

"LOS ANGELES, Jan. 12 /PRNewswire/ -- Rush Limbaugh received a great birthday
gift today from his New York City listeners -- Arbitron, the official
monitoring service of broadcast radio, reports that listening Adults 18-49
years old grew more than 50 percent over the last year. As the ratings roll
out nationally from city to city, New York's WABC-AM numbers are out first,
demonstrating the following overall gains for The Rush Limbaugh Show: Adults
18-34 are up 25 percent, Persons 12+ are up 35 percent, and Adults 25-54 are

up 47 percent. (source: Arbitron MSA)"

It's not possible for demographic segments to gain less than 50%, yet in aggregate grow ":more than 50 percent". Please note, too, that each demographic segment overlaps the others, so the increase itself is double-stated.

It sucks when a furry friend dies.
My wife nursed an abandoned kittnen who turned
out be the best four legged frined either of had
ever meet. Strangest cat I ever saw, he would come after youy
water chestnut crouching and crying. He also loved grape
stems. But he was a great foot warmer and would sit on the side
of the bath tub and, time after wet time, pounce on the whirlpool.
The only way to cope with the loss is to find another friend.
When you least expect it, a golden opurtunity will arise.
Terry

And, talk stations generally do poorly in under-55 demos, so a tiny change in number of listeners can result in an impressive percentage. Two listeners is 100% more than one. Air America is looking at far better under-55 growth in number of listeners than Rush. Both must be subjected to the "election year" filter before total credibility is given... and the recent elections were such fine examples of content over form (insert sarcasm smiley here).

```
Good News!

Do you know how simple it is to go to Heaven after this
life has ended?

The good news is that God came from Heaven to earth
in the person of Jesus Christ over 2000 years ago and
died for our past, present and future sins(misdeeds).
He was born in the land of Israel supernaturally to a
virgin Jewish woman named Mary. He lived a sinless life
for thirty-three years and then sacrificed His sinless
blood and died on a cross to pay the death penalty for
our sins.

After Jesus died He rose from the dead three days later
as He said He would. The Holy Bible also tells us that
Jesus Christ ascended into Heaven and that all who accept
Him as their Lord and Saviour will live forever with Him
in Heaven where there is no more death, sorrow, sickness
and pain.

The Holy Bible very clearly explains how simple it is
to be saved and on your way to Heaven, "For if you
confess with your mouth, "Jesus is Lord," and believe
in your heart that God raised him from the dead, you
WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if
you will open your heart to Jesus and pray the following
prayer:

Dear Jesus Christ, I want to be saved so that I can have
a home in Heaven when I die. I agree with You that I am a
sinner. I believe You love me and want to save me. I
believe that You bled and died on the cross to pay the
penalty for my sins. I believe that You rose from the dead.
Please forgive my sins and come into my heart and be my
Lord and Saviour. Thank You Lord Jesus Christ for
forgiving me and saving me through Your merciful grace.
Amen.
```

You are now a Christian if you said the prayer and allowed
God to save you. Welcome to the family of God.

Have a great day!

5 pins?
the diagram I have shows 4 smaller pins with
two larger "locater" pins.
Looking at it from the bottom with the pins away from you,
the ground pins are closet to the locator pins.
The input is on the left, the output is on the right.
This is based on the fitler having 6 pins, with two located
on either side in the middle viewed lenghtwise, and there
being 4 pins along one edge.
The YG-455C is a CW 500Hz BW
and the YG-455-CN is the narrow version.

This is all based on the assumption that a note I got from
Kewood 20 years ago is correct. The 250Hz BW filter will
work in a Kenwood R2000, but the BW was viewed as being
"too narrow" for a receiver with 50Hz tuning. They where
correct, I put a 160Hz Collins CW filter, and while it does
work very well, and tuning is very interesting.

Certainly is if you happen to be the publisher, as for readers, that
is a more difficult question.

Keep in mind that ebay fees are paid by sellers, not buyers, so it should come as no surprise that ebay policies strongly favor sellers. If you are a buyer and stiff two sellers, you get kicked off. If you are a seller, you can stiff hundreds and stick around. Anyone doubting that, I suggest you take a look at some feedback. One of my favorites is gadgetuniverse. They skewered literally hundreds of customers before they got tossed.

The short answer on copyright issues, is that unless the copyright holder complains, not much happens. If the Intellectual propery owner complains, the things tend to happen quickly, but not because they are protecting buyers, it is protecting themselves!

Also, early nightfall and the end of daylight saving time greatly
hurts the coverage and ratings (especially evening drive time) of
AM stations with marginal facilities during the fall and winter months.

Conversely, "heritage" AM stations with full power, enjoy BETTER coverage
during the fall and winter months due to reduced levels of atmoshpheric
noise.

Will most tabletop receivers have the power to drive such speakers without an amplifier? I'd worry that I wouldn't be able to get reasonable volume without some sort of amplicication.

Also, if no amplification is necessary, what sort of cable do you use to connect the speaker output of the receiver to the spring clips on the back of the speaker?

Here is another option.
http://www.target.com/gp/detail.html/ref=3430811_bxgy_cc_img_b/602-9361542-2442252?asin=B0002DG0YK

You can use the one speaker by itself. And have a standalone radio left over.

You can feed the output of your radio into the aux input and have an amplified speaker solution. You also add FM broadcast radio.

Not that it really matters in this context; but I have difficulty figuring out how one gets 22% Combined Canadian Sales Taxes unless they add an extra 7% or so for themselves. Maybe someone can enlighten me.

Taking it across the border personally is definitely the solution.

Just make sure the speakers are efficient. I use Sony's SS-MB100H and
usually have the volume control at 30%. At 50% even the RX-340 is as
loud as I like it and it has a weak output but that's all the drive it
has. Turning it up over 50% doesn't do much. The Drake R8B has a little
more audio power and can be a little louder. If you want to shake the
walls you will need an amplifier. Table top radios only put out a watt
on two so check the speaker efficiency before you buy.

The SS-MB100H are small bookshelf speakers about 10" tall by 6' wide
with two drivers, a small base reflex and tweeter.

I'm happy with the sound and volume but they don't get loud. They get to
a little over conversational level. If you want to listen to music then
you might want to consider amplification.

> Also, if no amplification is necessary, what sort of cable do you use
> to connect the speaker output of the receiver to the spring clips on
> the back of the speaker?

Just regular speaker wire to the appropriate connector on the back of
the radio, which may require you to wire a plug. In my case it's a 1/4"
phono type plug.

The YG-455C-1 are rated at 500Hz/6dB and 820Hz/60dB
The YG-455CN-1 are rated at 250Hz/6dB and 480Hz/60dB
Both are rated for guaranteed attenuation greater than 80dB

There is no polarity to the filters and they can be installed in either
direction.

Unfortunately that is all the information on the data sheet supplied
with mine. I thought I had seen a graph of the passband, but that must
have been for the 8MHz ones.

I guess this is the reason why books cost 20% more in Canada than the
US-the same book, with a US price on it that's 20% less than the
Canadian price listed right below the US price.

The only country on earth that's farther to the right than the US is
Iran and you're talking about Americans being in touch with reality?
Most of the world is liberal and nonreligious while Americans
overwhelmingly believe that the Biblical account of Creation is the
literal truth. Hell, not even the *JEWS* believe that anymore, and
they're the ones who came up with it! Social programs are being expanded
in Europe while they're being eliminated in the US. You want to talk
numbers? More people live in Europe than the US, and those Europeans are

overwhelmingly social democrat and atheist, while Americans are overwhelmingly far, far right, almost to the point of fascist, and evangelical Christian. Europeans work less and get more from their paycheck than Americans, who are increasingly forced to work for $8 an hour and pay exorbitant costs of living on their meager wages. Europe may be expensive, but Europeans can afford it. Americans, OTOH, face a chronic shortage of housing, driving up rent while their paychecks go down. Fuel costs are higher in Europe, but most Europeans don't have to drive two hours one way to work in a gas guzzling SUV. In fact, Europe is so compact that most Europeans don't have a need for a car, and when they do need a car they have many fuel efficient alternatives to choose from. Americans, however, have a choice between Gas Guzzling SUV #1 or Gas Guzzling SUV #2.

Don't think it couldn't happen here in America. All that's needed is another terrorist attack on the scale of 9-11, maybe even bigger, and Americans would practically be BEGGING Bush to take all their freedoms, take all their liberty, as long as it would save them from the evil terrorists. The problem is that trading freedom for security is a bargain with the devil, metaphorically speaking-you lose your freedom yet are no safer. Benjamin Franklin realized this when he said that those who trade essential liberty for temporary safety get neither liberty nor safety. Americans seem to have forgotten that-they'd willingly trade the Constitution for a police state in order to be saved from Osama, yet the terrorists would still attack and the only thing free about the US would be its rhetoric about preserving freedom. Coming soon to a newspaper in your town: editorials about clean socks.

Good News!

Do you know how simple it is to go to Heaven after this
life has ended?

The good news is that God came from Heaven to earth
in the person of Jesus Christ over 2000 years ago and
died for our past, present and future sins(misdeeds).
He was born in the land of Israel supernaturally to a
virgin Jewish woman named Mary. He lived a sinless life
for thirty-three years and then sacrificed His sinless
blood and died on a cross to pay the death penalty for
our sins.

After Jesus died He rose from the dead three days later
as He said He would. The Holy Bible also tells us that
Jesus Christ ascended into Heaven and that all who accept
Him as their Lord and Saviour will live forever with Him
in Heaven where there is no more death, sorrow, sickness
and pain.

The Holy Bible very clearly explains how simple it is
to be saved and on your way to Heaven, "For if you
confess with your mouth, "Jesus is Lord," and believe
in your heart that God raised him from the dead, you
WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if
you will open your heart to Jesus and pray the following
prayer:

Dear Jesus Christ, I want to be saved so that I can have
a home in Heaven when I die. I agree with You that I am a
sinner. I believe You love me and want to save me. I
believe that You bled and died on the cross to pay the
penalty for my sins. I believe that You rose from the dead.
Please forgive my sins and come into my heart and be my
Lord and Saviour. Thank You Lord Jesus Christ for
forgiving me and saving me through Your merciful grace.
Amen.

You are now a Christian if you said the prayer and allowed
God to save you. Welcome to the family of God.

Have a great day!

That's just plain dumb, unless you have a woody for 'liberal politicians'
whatever the horse feathers you think they are. It was a profit-oriented
corporation - you know the kind of rich conservatives that Bush calls "my
base" (that's Al Quaeda in Arabic just to tie in an equally silly
connection). I think these sorts of fees are more likely to give those
sort of Scrooge McDuck types of folks tingles in their naughty bits.

This is just silly. You might as well quote Jimmy Swaggert saying America should become a fundamentalist Christian republic. You are a spewer of nonsense.

> (if you remember the north World Trade Tower had transmitting
> facilities)

Actually, WBAI's transmitter has always been on the ESB, though their studios are in an overpriced space on the ass end of Wall Street.

But I'm really posting to let Shep fans know that I just finished posting a five-file copy of the fairly low-fi 2600.COM MP3 stream of the above-mentioned program (minus the inevitable begging segments -- trimming a six-hour program down to 4:54:09) in alt.binaries.sounds.radio.misc.

Go right to the series labeled [repost] -- during my initial attempt at a single-file post, my PC rebooted for still-mysterious reasons, aborting the process before its completion.

Enjoy.

Mine has two sockets on the PCB. The ground pins are easy to spot since they go the ground plane, and the signal pins have a fat trace that I assume is designed to have a certain impedance.

The two remaining pins on each side are a bit of a mystery. One pin on each side goes to a loading cap (i.e .two caps, one for each pin). The loading caps are already connected to the ground plane.

I think I have enough info to test the filter prior to opening up the radio. Wouldn't you know my RF generator doesn't go beneath 1Mhz (I need a different plug in) and my other function generator that would conver the range has the sine wave output blown. I'm going to pad down and cap couple the square wave output, which should be good enough for a quick visual test.

The AR7030 has a very fine step size of 2.655Hz, though it doesn't display that fine a step.

And a bunch of barefoot peasants with decayed teeth, spindly legs and bloated stomachs (due to starchy rice) drove the most powerful country out. "American woman get away from me ... momma let me be ... don't want your war machines" - ironically The Guess Who are singing this on the radio - CBC/RCI - as I type this.

No, that's because the two country's dollars aren't equal, and there
may be additional cost in getting it here. If a book has enough
demand in Canada, it's easier to add the Canadian price than require
someone to add a price sticker after the fact.

There is clearly quite a bit of cluelessness in this thread.

It really doesn't take very much power to drive a typical speaker to enough volume to fill a typical room.

Often, an external speaker will be more efficient than the one that's built into the radio.

On the wire - nothing special - the external speakers I use (Bose vs100) have the push in spring clips. I use 16 gauge speaker wire, and tin the wires on the end that goes into the speakers and the other end I put whatever connector the radio wants, or if it's a screw terminal or spring clip, I just tin that end too.

DE,
.
For "True Believers" Rush Limbaugh and many so called
Conservative Talk Radio Hosts are Entertainingand
Informative =Their Daily Dose of Reality / Truth !
.
The same 'potential' Over Time could be said for Air America
for "True Believers" they will be Fulfilled: Being both
Entertained and Informed. Yes - For them Air America will be :
Their Daily Dose of Reality / Truth !.
.
Forget the Idea that Liberals or Conservatives are being
'narrow' Minded by listening to either so called Left-Wing
or Right-Wing Talk Radio.
.
Instead "View" it as an Entertainment Choice; much like
they would choose 'their' Music Station on the Radio
. . . Hey It's Just "Chin Music" without the instruments ;-)
.
open your mind to the possibilities ~ RHF

Did you try Universal Radio ??? I think I remember reading a post on this ng about a year ago from some one that purchased one from them. I also saw one on E-bay a few months back and the auction ended early. The buyer must have contacted the seller and made him an offer.

I don't give a rats ass what site you went to 'tard boy... if you'd stick around long enough you might actually be able to ID the damn station... but no, little 'tard boys these days gotta have a great spinner dial on the radio because they have the attention span of a gnat.

Sheesh... the hobby is about 'listening' is it not?

As I've said, time and time again, this once great hobby is now filled with worthless 'tard boys.

And barring that, myself and others have posted material time and time again that would help you ID that station in a matter of minutes.

You, and many others just refuse to pay fucking attention, time after time.

Are you retarded, or what?

One thing for sure, you are far from being 'Lucky'.

3534. Alex Jones faints doing show

Newsgroup: rec.radio.shortwave
Date: 2005-02-09 05:26:48 UTC
From: So Lil A Kwe <Notgood@NotGood.com>
Message-ID: <Xns95F848AB435ESoliloquyTriesHarder@216.168.3.44>
Source record: 7482

XXX porn on the cable system in California, after all, this is what people want (I guess we'll eventually move on to pedophilia and snuff movies, if that is what the people want). God in schools, though entire schools at graduation ceremonies may support the students mentioning God, we need the courts to protect us from this. Rather odd isn't it? Freedom of speech only comes in support of porn, somehow it's missing when it comes to conservative causes.

Listening to an idiot on Alex Jones at the moment. (sorry, it's not Alex). A doctor (of something, likely not medical), advocating forced drugging of children, quoting the American Pediatric Society suggesting that perhaps 20% of American children would benefit by mandatory drugging.

Let me see how this works, if I am a conservative and I oppose abortion, I seek to determine what women can do with their bodies. But if I am a modern person, (Neo-Conservative or Liberal), they feel at ease with the idea of forcing children and adults to take medication, thereby violating the individual's control of their body. Ironic isn't it?

Incredibly, this stuff probably makes sense to many of you. How, I don't know? Alex's guest went on to discuss the Amish (I'm still looking for an Amish family to adopt me) in a deprecating way. He initially used the Amish as an example of how the government "tolerates" the Amish, but then went on to excoriate them as inter-breeders, and to claim that society shouldn't have to bend over backward to appease the Amish. How can the government be bending over backward to appease a group that shuns contact with the government? How many Amish are on welfare?

Here's the schmucks web site, and a link to his wife's photo talents:

http://www.changesurfer.com/

http://www.changesurfer.com/Art/Exhibitions.html

Monica Bock, Associate Professor
School of (Ahem) Fine Arts.

(P.S. save your vomit bags, you too can be an artist).

Well, what a fine world you pinheads are helping to gestate. LOL (the standard fair for the Modern American Brainless male). Laugh out loud, laugh so loud and so often that you fail to see what's going on around you. Watch them football (sic) games, sitting there with your hand part way down your pants, the other hand wielding a brew to nurse your already burgeoning gut. Grease stains on the TV control from the snacks that you consume while watching TV, crumbs asunder.

Have fun, you deserve it.

Soliloquy.

> similar behavior by those opposing Bush...

Firstly, the report includes data from Kerry supporters. While Kerry supporters do not represent all Bush opponents, you can hardly say that it ignores the beliefs of those opposing Bush.

Secondly, the issues weren't chosen to show Bush supporters in a bad light. They were key issues in the election campaign, like the WMD question: "Is it your belief that, just before the war, Iraq had a) WMD b) a major program?"

> How about the other poll that involved *far* more participants taking an
> active individual role in the polling -- the recent Presidential election?
> The one where the failed liberal point of view was soundly rejected
> (again)?

What does the presidential election have to do with it? We're not discussing the validity of the electoral process - that's another issue - we're discussing whether the beliefs of Bush supporters match reality.

> Your only recourse is to claim all those millions upon millions of polling
> participants in the Presidential election were (somehow) mentally
> deficient, misled, wrong, deluded, out-of-touch with reality when Democrats
> were tossed out of office in race after race after race... Go ahead - make
> the claim with a straight-face and then allow everyone else to see exactly
> who is out-of-touch with reality.
>

> There's far more to "reality" than sound-bites and news headlines,
> sunshine.

Your argument boils down to this: Bush won the election, so Bush supporters are correct. Sorry, but winning the election does not make incorrect beliefs correct.

"Reality" means the facts - there were no WMD and Iraq was not involved in 9/11. Bush supporters believe the opposite of these facts, therefore they are out of touch with reality.

Tuesday, February 08, 2005

Holy crap
by John in DC - 2/8/2005 07:03:51 PM

Update: He just resigned.

Let me say again, holy crap.

The blogosphere has dug up some really really really creepy stuff about that pseudo-reporter with the pseudonym who the White House lets ask all the softball questions about their briefings. His pseudonym is Jeff Gannon, and well, the folks at DailyKos, and Eschaton, have been doing a little digging around on him.

It's a long and sordid tale, but let me give it to you in a nutshell. Mr. Gannon's home page is JeffGannon.com. Well, JeffGannon.com is owned by a person and company that owns the following Web addresses as well:

Hotmilitarystud.com
Militaryescorts.com
Militaryescortsm4m.com
And for those of you who are really straight or really clueless, "m4m" is a gay online term for men who are looking to have sex with other men, and "escort" means prostitute. And being a military escort is also against the Uniform Code of Military Justice in at least two different ways, if not more.

Now, I'm not one to judge how folks like to get their jollies (assuming no children are involved and it's consensual), but then again, I don't suck up to the family values agenda like Mr. Gannon does. I've been through Gannon's archives, and it's a horrendous accumulation of religious right suck-up pieces on gay issues. Some are concerned that perhaps it's not fair to hit him with the gay card, if he is gay. Well, take a look at some of the stories from Gannon's Talon News Service: here, here, here Talon is promoting "ex-gays," defending Bush on gay marriage, and Gannon himself writing a story defending Santorum on his man-dog-sex commments about gays. There are lots more, you get the picture.

Oh, and speaking of pictures, they found photos too.

The big issue here is whether the White House has been knowingly opening its doors to a pseudonymous male hustler (or pimp) so he'll pose softball questions to the president. If that's the case here -

and in all fairness, we still need to hear from Gannon - it's not just creepy, it's outrageous and an incredible violation of the country's trust, and just as importantly, White House security. Do these people do a background check on anyone?

Just go and read it all for yourself.

I agree 100%. In fact I know of a couple of feral
neighborhood kids in this general area what should be chained
to their beds more often when they come home from skool.
Some of these little bastards think it's fun to tip trashcans and
hurl eggs at passing cars, even if it's not mischeif night in
October. No suprise as their parents are trailer trash also.

Yes, I say drug em. Drug the freakin crap outta them an
give em subliminal messages flashing on their computer screens
what tell them to go work at Mc Donalds or Walmart and be a
good little worker bee or join the military at 19 and go fight for
Big Oil to keep that sweet crude oil commin into the USA by the
tanker-full for the next 20 years also.

As for Alex Jones, I'm suprised he ain't had himself a stroke yet from
all his bombast and boilerplate he spouts daily thru his toilet microphone.
A true mentor to morons. Here's a listener of his' photoblog. Seems Alex
told his listeners that the "evil gubbimint" has been bombarding them
with microwaves and other e-vile electronic behaviour modification stuff.
So this guy asked his Magic 8-Ball what 2 do and here's what he came
up with: http://www.imagireal.com/gallery/foiled

"....and it served to remind me of just how fucking fast your average
American can go from being a socially pussywhipped, equal opportunity
lover of all races to a slathering racist, waiting for the triple
conditions of a dark alleyway, a baseball bat and a guy named Habib to
fall together." -- drdoody's entry for the MLK, Jr., Essay Contest

I suspect authority and am old enough to know that the people in power
tend to lie more than the loyal opposition. That being said, these
people in Washington who claim to be conservative are far from it. I
grew up conservative and hold conservative core beliefs, but I will
align with progressives/liberals right now because they are more
conservative than the socialist neocon corporatists running the
government now.

OK, call me a name...

1 out of every 4 Clear Channel talk stations will be ''Progressive
Talk'' by the end of the year. It is turning out to be an instant
winner every where they do it. They are totally pleased.

This points out that Americans are hungry for truly balanced
discussion.

NPR is from the middle 1970s. I think you may have them confused with Pacifica.

> Iran and you're talking about Americans being in touch with reality?

Riiiiiight. And all those dictatorships or civil wars
zones or monarchies or theocracies in Africa, Asia
and Oceania are all hotbeds of tolerance and liberalism?

> Most of the world is liberal and nonreligious while Americans
> overwhelmingly believe that the Biblical account of Creation is the
> literal truth.

Most of the world is Buddhist and Moslem, and is
definitely not liberal. Western Europe and Canada
might be more liberal in general, but most of the
rest of the world isn't. Western Europe may be more
secular than the US, but my company's European
office has an official holiday for All Saints Day and
Ascension Thursday, something that you'd never
see in the US.

> Hell, not even the *JEWS* believe that anymore, and
> they're the ones who came up with it! Social programs are being
expanded
> in Europe while they're being eliminated in the US. You want to talk
> numbers?

Cite, please?? Last I checked, Germany was looking
at cutting programs because they simply couldn't
afford them.

> More people live in Europe than the US, and those Europeans are
> overwhelmingly social democrat and atheist, while Americans are
> overwhelmingly far, far right, almost to the point of fascist, and
> evangelical Christian.

Western Europe is definitely more secular, but that does
not mean non-religious. Western Europe also tends to
be more left leaning in some ways, not in others. Class
still plays a big role over there, especially in the UK.
A British friend once told me that Bush (the current one)
would be too liberal to be a member of the Tories in
Britain. I found that rather hard to believe, but she
lives there, and I don't.

Eastern Europe is a completely different animal from
Western Europe, and don't mix the two.

> Europeans work less and get more from their
> paycheck than Americans, who are increasingly forced to work for $8
an
> hour and pay exorbitant costs of living on their meager wages.

Exorbitant?? Where do you live, the West Coast??

> Europe
> may be expensive, but Europeans can afford it.

That's because the government regulates things
far more over there. If someone over in Belgium
gets laid off, they get 80% of their salary for a year.
I've had some European co-workers tell me that if
they get laid off, they intend to go travel for half
a year before looking for a job. It's like a vacation
to them.

> Americans, OTOH, face a chronic shortage of
> housing, driving up rent while their paychecks go
> down.

Not in the Midwest. There's plenty of housing to
go around. The shortage is only in the areas in
the exurbs in high demand, not in most of the
other areas. I've heard about the housing bubble
on the West Coast, but that's not a national
phenomenon.

> Fuel costs are higher in Europe, but most Europeans don't have to
> drive two hours one way to work in a gas guzzling SUV.

SUV's (and cars in general) are gaining in popularity
in Europe. It's a big growth area over there.

> In fact, Europe
> is so compact that most Europeans don't have a need for a car, and
when
> they do need a car they have many fuel efficient alternatives to
choose
> from. Americans, however, have a choice between Gas Guzzling SUV #1
or
> Gas Guzzling SUV #2.

Yeah, right. And the fact that I drive a rather fuel efficient
sedan isn't an option, right?

The one big thing that Europe does have is the rail lines,
which would be nice here, if the infrastructure were
beefed up to handle high speed intercity rail. Then again,
rail is completely subsidized by the government over
there (as are the major air carriers, with the major exception
being Branson's Virgin Atlantic).

It's probably what's available. There are a whole lot of underperforming
AM stations around.

The Mic 92.1 in Madison, WI is the only FM AAR affiliate I know of. If
what I hear on their their stream is any indication, AAR is only offering a
mono feed, even for their music programming.

I was looking at the Spooks Digest list this morning and I noted a report that Yosemite Sam was operating again on 6500 so I decided to check that and the other frequencies that YS operated on at the same time 6500 was last used and found YS on 10500 at 1707.

I didn't hear YS on 6500, but that may be a propagation issue.

When YS last used 10500 and 6500 he was also using 3700, so that may bear watching later today when propagation will be favourable.

>
> How can you have entertainment without content? Just like a web site.

Content is secondary to the entertainment value of the personalities. Sure, they talk about stuff, but the same stuff talked about by uninteresting fools gets no ratings. So entertainment is 100% of the formula to win listeners.

I think it is more likely due to the difference in value of the Canadian
and U.S. dollars. Back when the Canadian dollar was equal to, or even a
little more valuable than, the U.S. dollar prices were about equal.

If it takes $12Can to purchase $10US one would expect a product selling
for $5US to cost $6Can. If it costs $6Can and is exported to the US I
would expect it to cost $5US - When I cross the toll bridge to or from
the US the fee depends on whether I pay in Canadian or US currency -

regardless of which I use the value is the same.

Federal Value Added Tax = GST
Provincial Sales Tax = PST (In some provinces)

Some provinces combine them into a Harmonized Sales Tax = HST

Maximum should be 15%

I don't know for certain, but I don't believe any cities have general
sales or value added taxes, although some have things like hotel taxes.

Bush's plant reporter "Jeff Gannon" poses in his
skivvies on some of these web pages. Apparently
the best reporter the White House could find was
a gay hustler with no journalistic background.

Re: Botswana 9885 0508

Grrr. I can't seem to pull in any African station. My setup is admittedly amateur, but I though I should be able to pull in one of the big ones.

I did hear what sounded like a traffic report and music from Accra, Ghana one morning (for them, anyway), but I lost the signal to rising noise. Must have been a lucky grey-line thing.

Sigh. I need to build a better antenna.

Thanks for the report, though. I'll give it a try tonight/tomorrow morning.

Just as long as I have an Uzi and enough ammo, I can protect myself. I
suppose that a good number of Americans feel the same way, although
admittedly fewer than there used to be.

DE,
.
" as shown by Clear Channel's commitment to a score of AA stations. "
.
Clear Channels 'commitment' in Markets where it owns several Radio
Stations is to offer a diversity of 'targeted' On-the-Air Products
to attract different demographics of that market. {Cover-the-Market}
.
For Clear Channel what goes On-the-Air is about Business and
Profitability: Having little to do with Politics.
.
In the end if it makes Business Sense for Clear Channel to 'move'
Air America to a better Radio Station to capture a 'potential'
Bigger Market Share -or- to Modify the Radio Stations FCC License
and/or Transmitter and Antenna : Then as a matter of Good Business
Clear Channel will act to improve it's bottom-line.
.
follow the money ~ RHF

I went down the local Radio Shack. They had a single, stand alone, discontinued, small but sturdy RCA bookshelf speaker, which they let me have for peanuts. I took it home, wired up a phone plug and it does sound pretty good...definitely better than the MS8 speaker I'd been using. And you're right: powering the speaker without an amp is no issue at all. There's plenty of volume.

Thanks guys.

Thanks for this - I would like to know (1) where you are, and (2) what time in UTC (GMT) or zulu you heard it.

Was it Botswana, or Voice of America relay?

Thanks,
Bruce Jensen

3605. ???????question of the day??????????

Newsgroup: rec.radio.shortwave
Date: 2005-02-09 19:12:05 UTC
From: mrspock_of_vulcan@hotmail.com
Message-ID: <1107976325.503628.279630@c13g2000cwb.googlegroups.com>
Source record: 7601

this is a serious question that I have wondered about for a while and don't have a good answer.

How do people lose a knob on their radio ????????

many times on ebay you will see someone selling a radio with an original knob missing. if the radio is a desktop unit, how did the knob get lost ??????????

3606. Re: ? ? ? Good News! -- Jesus Christ Went To The Cross So You Can Go To Heaven ? ? ?

3607. Re: ???????question of the day??????????

Message-ID: <RvtOd.29870$xt.27962@fed1read07>
Source record: 7603

Answer to the missing knob
1. It cracked - tossed it out
2. While disassembled for repair the dog ate it (happened to me)
3. While disassembled for repair the kids stole it - disappeared forever
(happened to me)
4. No one ever disassembled a radio for repair -- and could find all the
parts (happened to me)
5. The wife got tired of that mess on the kitchen table -- scooped it all
up -- knob fell into heating vent. (happened to me)
6. Bought a used rig -- some idiot replaced the original with his favorite
spinner
7. Disassembled radio in garage -- delayed project -- came back a year later
and the knob walked away, never to be seen again
8. Oppps - hit it with the soldering iron
9. The set screw(s) got stripped -- need a new one
10. The shiny insert fell off - disappeared -- need a new one.
11. Bought a garage sale boatanchor -- knob missing -- need a new one

Guess Folks are just plain careless

Not necessarily lost - it could break then you'd need a new knob. :)

Shep sends his amateur call by kazoo (Jan 6 1965)
http://rhhardin.home.mindspring.com/shep.code.ram

TEST CQ VV DE K2ORS

not a pretty fist though.

The significance is that he just told every ham in the audience his
home address, the CALLBOOK being a standard accessory for every ham;
but Shep liked hams.

I remember listening to a different show where he did the same thing,
call sent just so, fast and a single time, as I was falling asleep.

In the morning I looked it up and there he was in the book.

Easy to remember overnight because ORS was IBM7090 for ``OR to
storage.''

I am in Miami Florida. It was 0508 UTC time.

When I looked it up, it did say VOA, but under country it said "Botswanna"
and the broadcast was in a tribal type of language. So, how do I know if it
was relay or the real thing?? I went by country of origin.

Lucky

I suggest you do what I do when taking a radio apart. use several empty pill containers for different parts of the radio (label each container case or main board etc) and a small plastic box for the knobs and other large parts. this really helps keep things together

Sometimes that works. But sometimes the containers will also walk off all by themselves.

Then one doesn't lose just one knob but many, all at once!

I looked up "condescention" in the dictionary, and it does not have any
definition close to "reality."

If you are going to judge liberal talk, in NY or anywhere, you have to judge
it based on equivalent coverage. If that is too difficult a concept, then
that is your problem.

Bingo. From 0300-0430, he *would have* had VOA via Botswana in English (After I posted, I headed over to EiBi as well). Not yet knowing exactly where he was when his timer read "9:08 pm" made the report just mysterious enough to make me wonder, despite the 0508 title time. As it turns out, he is in Miami, FL - which means that the "9:08 pm" reading on his post does not accurately reflect his location (0908 is Pacific Standard time).

While being appreciative of luckydaze's tip, I was also hopefully making the point that to relay the most useful information, it is helpful if the reporter includes a few details about when and where he is. With worldwide subscription to this newgroup, these details can be important...but you knew that :-)

After all is said and done, it is cool that Botswana photons reached your radio, luckydaze. Here in California, Africa requently puts in a better signal than Europe, despite its greater distance. Those polar disturbances can raise havoc.

I've noticed that unlike other receivers I've had the R-8's BFO in the CW mode is not offset to produce a tone but is exactly on zero beat. Is it possible to adjust this for an offset that produces, say, a 600 or 700 Hz tone when you are dead nuts on the signal frequency? I don't have the service manual/schematic where I could figure this out.

Thanks,

Frank

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed
God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get
another chance to be saved because none of us knows
exactly when we will die.

Have a great day!

Thank you for making my point!

This liberal "condescention"

(FYI: Pronunciation: "k&#65533;n-di-'sen(t)-sh&n Function: noun Etymology: Late Latin condescension-, condescensio, from condescendere 1 : patronizing attitude or behavior)

Has no basis in "reality."

What does is the fact that WLIB is doing very well vs. WABC in the areas
where the coverage is usable.

And this is what you are refusing to see.

Oh I forgot one --- While disassembled for repair --- put all the parts (including the tuning knob) into muffin tins - (I did good)!

Wife wanted to make muffins - so scooped it all up -- tossed em in the garage and yep you guessed it -- the tuning knob and several other parts -- just vanished to the Bermuda triangle as some one noted. (She did bad)

Sidenote -- I once built a Heathkit color TV set with a zillion parts -- took 25 muffin tins -- hi hi
Bought two more tins for the wife in case she wanted to make muffins during the two months it took to build the Heathkit.
Great set BTW.

Case closed

No, I just say it's basically irrelevant. It's like saying some hobbyist with a low-power FM transmitter has a good following in a 4-block area of Manhattan, so he's a threat to WABC. He's a flea on an elephant.

And to wrestle this thing back to what we were talking about earlier, I pointed out that their ratings were stagnant (with some evidence of an actual fall in listenership). Then you came up with a bunch of irrelevant gobbledygook trying in vain to explain why that was a good thing. It's like trying to say the Philadelphia Eagles won the Super Bowl because they played a good game.

Deal with it.

The burden of proof is on those who would use *lack* of strong proof as reason to cluster-bomb people in their homes. It is a failure of logic, and worse - a profound moral failure.

How do you explain the fact that Bush supporters still believed in these falsehoods when the study was made during the last election? This was after the 9/11 Commission findings and after the resignation of CIA director George Tenet. Gullibility is perhaps too charitable an explanation.

You are one dense person. It is very common to compare lesser and greater signals based on usable coverage. This is why Arbitron issues "embedded market" reports so that smaller signal stations in distinct parts of a market can sell effectively in smaller geographies against the larger signal stations. In fact, no US market has more embeded markets inside it than the NY MSA.

> And to wrestle this thing back to what we were talking about earlier, I
> pointed out that their ratings were stagnant (with some evidence of an
> actual fall in listenership).

There is no statistical evidence of a fall in listenership. There is evidence that the listenrship is stable, and not in a growth pattern. when compared to WABC in 25-54, where the money is, the comparison is good and very salable.

> Then you came up with a bunch of irrelevant gobbledygook trying in vain
> to explain why that was a good thing.

I came up with the usable signal comparison which is a standard practice in the industry in evaluating signals.

> It's like trying to say the Philadelphia Eagles won the Super Bowl
> because they played a good game.

Unlike sports, where there is only one winner, in radio there are many winners. Stations way down in the 1-share range make excellent money. In fact, the third highest billing station in the market is 18th in ratings (nearly tied with WLIB) proving that rank alone has nothing to do with making money.

So, your sports comparison is invalid.

DE,
.
Considering the Market penetration ?saturation? of
Conservative Talk Radio in all major Metro Areas.
Then factoring in the large number of oh-so-bland
Public (NPR) Radio Stations. Plus a Nation Wide
Electorate that is 32% Republican; 32% Democrat
and 36% Independent.
.
Now a Program Format that features Air America's
Talk Radio Hosts with a winning personalities should
be a natural Market Leader in all those Urban Areas
that are surrounded by so called Blue Counties.
.
This could easily lead to having an Air America Radio
Network that has a 'featured' Liberal Talk Radio Station
in everyone of the Top 100 Metro Areas.
.
EXAMPLE :
Look at the SF Bay Area where Music Favorites Format
KABL 960 kHz was shuffled off to an FM Radio Station
as 92.1 MHz KABL with a limited signal.
http://www.kablradio.com/main.html
.
This free up the AM Radio Station License to be renamed
KQKE 960 kHz AM "The Quake" Liberal Talk Radio
with a signal that has good SF Bay Area wide coverage.
http://www.quakeradio.com/main.html
.
time will tell ~ RHF

Bob... arguing with you is fun, entertaining and educational. It is like debate in college, forcing you to research even if you do not agree with the position you must defend. Debating with these "experts" is like trying to sustain an intelligent conversation on the drive-through intercom at McDonalds.

For One and All,
.
Partial Listing of Receivers from the Collection of W3OG
http://www.home.earthlink.net/~selectvehicles/receiverlist.htm
.
Hammarlund HQ-140 Receiver
- Excellent appearance and working condition.
Aligned by Howard Mills in 2004.
.
Hammarlund HQ-180AC Receiver
- Nice. Excellent working order on all bands.
A few blemishes on the bezel around the faceplate.
Tubes checked and replaced as necessary.
.
Hammarlund HQ-170 Receiver - Mint condition
- Excellent working order also. 24-hour clock.
Aligned by Howard Mills in 2003.
.
Hammarlund HQ-110 Receiver
- Mint front panel. 24-hour clock. Good working order.
.
National NC-300 Receiver
- Nice appearance. Works very well on all bands.
Includes the crystal calibrator.
.
National NC-109 Receiver
- Good shape. Works well on all bands.
.
National NC -60 Receiver
- Very nice condition. Works well.
.
Hallicrafters SX-110 Receiver
- Average condition. Works in AM mode only.
.
Hallicrafters S40-B Receiver
- Nice condition, and works well.
.
Hallicrafters S-120 Receiver
- Fair condition.
Works as well as can be expected of this model.
.
.
for your information ~ RHF

Yes, indeed, David...I don't know why you try, although you deserve kudos for
a patience which rivals Job in doing so. But thank you for the compliments,
and most assuredly, even though we often disagree, I have often come away
with a better understanding of the issues at hand after engaging you (or
anyone else of sufficient intellect and integrity). What I fear for the U-S
is that this level of discussion has all but disappeared, whether it's in an
open forum such as this, or in the halls of government.
--

Men born to freedom are naturally alert to repel invasion of their liberty by
evil-minded rulers. The greatest dangers to liberty lurk in insidious
encroachment by men of zeal, well-meaning but without understanding." --

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed
God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get
another chance to be saved because none of us knows
exactly when we will die.

Have a great day!

Y'know, I'm not sure there any of those really left anymore, after all the keynesian economic theories were discreditted so thoroughly in the 1980's and 90's. All the so called 'socialist' gov'ts (except for a few anachronisms like N. Korea and Cuba) have jumped into the middle or what used to be the middle. I'm looking at balanced budgets in jurisdictions with definite and originally radical 'social democratic' gov'ts who've cut back on services just like prudent business people would consider when the bucks are there to pay for them. I live in a province in Canada with an NDP gov't (New Democratic Party). They spent the 60's and 70's buying up resource companies (mining, forestry, oil, etc), and have spent the past 10 years selling and privatising them. Taxes are down, cut backs are up. Though they are on the outs with the voters and will be turfed next election. I'm also thinking of the UK Labour party - Tony Blair's gang. Another party trying to hang on to the middle. I'm rambling a bit, but it used to be if a party was in the middle, it appealed to everyone. Now, it appears a middle party annoys everyone. From the outside, it looks to me that your Democratic party is a middle party. I've seen nothing that looks like true left wing from the US - as compared to the rest of the world. You want to see left, try this link:
www.arts.uwaterloo.ca/ECON/ needhdata/Regina_Manifesto.html

This is the founding document of the CCF, which renamed itself the NDP in
the 1960's. Now THAT'S left! (And frightening).

Not. No municipal or local sales taxes in Canada. They don't have the authority. Different provinces have difference sales taxes and different items are exempt depending on where they are from and whether the seller has a physical presence in the province (a province can't collect extra-territorially). The range of sales tax in Canada is from 0% to 15% depending on these factors. Items from out of the country usually have 7% GST (federal goods and services tax) on them if over certain declare value.

OCEAN CITY STATE PARK DXPEDITION - Feb. 7-8, 2005

What a difference a week makes! Seven days earlier, trans-Pacific MW reception was at the best level since the amazing reception of last September and October.

A few of us in the Pacific Northwest listen for TP hets or audio from our Victoria, BC and Tacoma, WA area homes for signs of Asian or Down-Under signals. Last week we were wishing we were at Grayland or another coastal DXpedition site, knowing that our good conditions inland were equivalent to excellent reception at the coast.

I couldn't get away until Sunday the 7th (UTC), and unfortunately the propagation conditions were degraded due to a recurring sunspot region and associated geostorms. Still it was an enjoyable trip, with sunny weather and spectacular ocean sunsets. The DX highlight was morning longpath African reception on 60 meters lasting far past local sunrise.

Mediumwave was almost entirely DU; the only Japanese station heard was JOAK Tokyo on 594. All signal levels were modest, without the strong, long reception that characterizes better openings. On this DXpedition, it was common for a station to rise above the noise for a half minute or less, and then fade back into the muck for long stretches of time.

Except for the longpath Africa reception, the tropical bands were below average. The Papua New Guinea regionals were at low levels on the 7th, and stronger the next night. However, the weaker Indonesian targets like RPDT2 Manggarai (2960) and RSPK Ngada (2899) were totally absent.

Ocean City State Park is north of the well-known Grayland DXpedition site, and across Grays Harbor on the sandy, flat Ocean Shores pennisula. Most visitors head straight for the resorts and casinos of the pennisula, but the smart ones do their gambling by stringing out a Beverage antenna and DXing! An empty logbook is cheaper than an empty wallet if things don't work out...

MEDIUMWAVE
---
558 FIJI R. Fiji One, Feb 7 1445 - Low level island music of acoustical guitar and choral singing; woman announcer in pres. Fijian. Noted parallel to 639 and 684, all with weak signals. I found it interesting that all three frequencies began and ended their long fades into the noise at the same time, and then rose again at 1454. More guitar and choral singing over the top of the hour. (Atkins-WA)

594 AUSTRALIA 3WV Horsham, Feb 8 1550 - Poor-fair, with woman announcer in English, and parallel to 738 2NR Grafton. (Atkins-WA)

594 JAPAN JOAK Tokyo, Feb 8 1523 - First and only Japanese MW station of the DXpedition, in at a poor-fair level. Man and woman with talk in Japanese interspersed with English comments; seemed to be discussing aviation or flight. Even without a northwest Beverage, the Japanese and other North Asian stations are usually heard on a west Beverage antenna also (although at weaker level) if propagation permits. (Atkins-WA)

639 AUSTRALIA 8RN Katherine, Feb 7 1502 - Two men with talk or interview in English, talking about movies and taking phone calls. Parallel to 4RN 792. Fair, and competing with Fiji R. One on the frequency. Also heard 2/8 at fair level. (Atkins-WA)

639 FIJI R. Fiji One, Feb 8 1505 - Better reception than last night 2/7, with a fair-good signal on peaks. Beautiful island vocals and instrumentals, and song introductions by man in Fijian, parallel to 558 and 684. Fiji giving way again to 8RN Katherine by 1515. (Atkins-WA)

684 FIJI R. Fiji One, Feb 8 1509 - Heard during a brief peak with island music and male announcer in Fijian, parallel to 639. Poor. (Atkins-WA)

729 AUSTRALIA 5RN Adelaide, Feb 7 1513 - Woman announcer with mention of 'ABC news and sports' at tune-in; advertisement or promo, and then signal took a nose dive. Poor-fair. (Atkins-WA)

738 AUSTRALIA 2NR Grafton, Feb 8 1544 - Woman announcer with talk in English, poor level, but clearly parallel to 594 3WV Horsham. (Atkins-WA)

738 TAHITI RFO Papeete, Feb 8 0500 - I checked a number of times for audio from this South Pacific regular, but never heard more than a strong het. This is unusual, given the presence of audio from other MW stations in the South Pacific region. (Atkins-WA)

774 AUSTRALIA 3LO Melbourne, Feb 8 1612 - Fair during very brief peaks, with man and woman announcers in English. Parallel to 891 5AN Adelaide. (Atkins-WA)

792 AUSTRALIA 4RN Brisbane, Feb 7 1519 - Aussie-accent announcers in English with talk, parallel to 639. Fair. (Atkins-WA)

846 AUSTRALIA 2RN Canberra, Feb 7 1525 - Briefly peaking above the slop, with a male announcer interviewing a woman, apparently about her visit to Africa. Parallel to 639. Fair signal. (Atkins-WA)

846 KIRIBATI T3K1 R. Kiribati, Feb 7 0950 - Old US country music at tune-in; female announcer in pres. I-Kiribati lang. with possible mention of 'frequency'. Into log drumming music with male choral vocals. A fair signal, but it took the inevitable nose dive before the top of the hour. (Atkins-WA)

891 AUSTRALIA 5AN Adelaide, Feb 7 1529 - Woman announcer with news updates, including Pope John Paul's health. Man with weather forecast, and ID as 'ABC Adelaide' at 1535. Adelaide faded down at 1540, to be replaced by an EZL music station (2XW The Breeze, Wellington?). Fair-good. (Atkins-WA)

891 UNIDENTIFIED , Feb 7 1540 - Fading up to replace 5AN Adelaide, with Beach Boys music and female announcer in English. Sounded Kiwi... perhaps

2XW The Breeze in Wellington, NZ? Fair signal before fading into noise. (Atkins-WA)

1098 MARSHALL ISLANDS V7AD Radio Marshalls, Feb 7 0940 - Nice island choral music fading up from the noise, with a few moments of a male announcer in pres. Marshallese before fading down again. Fair signal while it lasted. (Atkins-WA)

1548 AUSTRALIA 4QD Emerald, Feb 8 1602 - Woman announcer reading news items; poor level and frequent fades. However, during a short peak 1548 was found parallel 3WV Horsham on 594. 'ABC Radio...weeknights' heard at 1605. (Atkins-WA)

1575 THAILAND VOA Ayutthaya, Feb 7 1555 - Man and woman VOA announcers with special (slow) English. Very low level, but in the clear. Gone by 1558. I heard this station much better from home last week. At the coast, VOA 1575 is often a powerhouse. (Atkins-WA)

SHORTWAVE

AUSTRALIA 2310, 1012-1018, VL8A Alice Springs Feb 7 Bluesy country music and male vocals by Joe White to 1016 announcer in English. Into old British comedy routine. Fair-good signal, and parallel 2325 VL8T Tenant Creek (fair) and 2485 VL8K Katherine (fair). (Atkins-WA)

BOTSWANA 4930, 1709-1730, VOA Feb 7 Very good longpath signal at Botswana sunset. Man and woman announcers in African language giving news items from around Africa, and mentions of many regional locations. Brief mabira music selection 1711, and back to news or political talk. Woman with mention of 'Washington DC' at 1713, followed by '909 AM' and 'shortwave 11975 and 17895 kHz' , and what sounded like 'Voi Amerika' or similar at 1714. Man with 'Washington, DC' at 1729, and 'This is the Voice of America' by woman in English at 1730, and into English programming with mention of upcoming features and news. Surprisingly strong at more than two hours past local sunrise. Also heard VOA Botswana at a very good level on 2/8 at 1657 with VOA NewsNow report on human rights in Laos. (Atkins-WA)

BOTSWANA 4930, 0338-0346, VOA Feb 8 Various news items in English read by different male announcers, including a US envoy travels to Pakistan, fighting in Afghanistan, and others. 'VOA News' IDs 0343. Good signal as Botswana sunrise approaches. (Atkins-WA)

BRAZIL 4885, 0520-0531, R. Club do Para Feb 7 Brazilian music to 0529 ID by male announcer with promo and mentions of meter band and frequency. Good signal. (Atkins-WA)

CONGO 5985, 1713-1750, R. Congo Feb 8 Fair to good level at Brazzaville sunset (1715). Male announcer in African vernacular; into French at 1723 with 'Ici Brazzaville, Congo' ID at 1731. Enjoyable Soukous music selections starting at 1732, but unfortunately by 1740 the signal was weakening and getting noisy. However, Congo was still listenable with a fair signal even past 1800 (10am local time PST). Strongest on southwest Beverage. (Atkins-WA)

GABON 4777, 0538-0605, R. Diff. TV Gabonaise Feb 7 Very good signal of French pop music and male announcer in French. Fading considerably at 0550, and almost gone by 0555. However, signal improved somewhat at 0558. ID at 0600 and into presumed news, with mentions of Libreville and Gabon. (Atkins-WA)

INDIA 3223, 1611-1614, AIR Shimla Feb 7 Tentative; with woman in English. Barely above threshold level. (Atkins-WA)

INDIA 3315, 1615-1620, AIR Bhopal Feb 7 Noted in passing, with fair signal of woman and man announcers in Hindi. (Atkins-WA)

INDIA 3365, 1620-1633, AIR Delhi Feb 7 Presumed, with English announcers; orchestral music 1625, and woman with mention of India at 1632. Weak, noisy signal at 1+ hour past local sunrise. (Atkins-WA)

INDIA 4760, 1647-1653, AIR Port Blair Feb 8 Presumed, with sub-contintental vocals over/under TWR Swaziland. Good signal and best on west Beverage. (Atkins-WA)

INDIA 4920, 1702-1705, AIR Chennai Feb 8 Exotic subcontinental music, with male announcer in Hindi or Tamil at 1704. Much stronger than faint Xizang PBS (China) signal co-channel in background. (Atkins-WA)

INDONESIA 3976, 1120-1127, RRI Pontianak Feb 7 Male announcer with poss. talk of regional politics, with mentions of Indonesia and Pakistan. Female Indo vocals at 1127. Excellent signal, but some co-channel ham interference. (Atkins-WA)

INDONESIA 4000.1, 1125-1135, RRI Kendari Feb 7 Two Indonesian announcers with talk and occasional mentions of Kendari. Good signal. The notch filters on the 756Pro are the best I've ever encountered, and did a great job on the big het that's usually present on this frequency. (Atkins-WA)

INDONESIA 4604.95, 1135-1147, RRI Serui Feb 7 Male announcer with 'RRI Serui' ID at tune-in, followed by brief news items with mentions of Indonesian cities and pauses in-between. Orchestral anthem at 1142, and into C&W style Indonesian music and vocals. Excellent signal. (Atkins-WA)

INDONESIA 4925, 1145-1201, RRI Jambi Feb 7 Playing a mix of Indonesian pops and US music; male announcer with 'RRI Jambi' ID 1159 and into Love Ambon tune briefly, then more pop music at 1200. Good signal. (Atkins-WA)

MADAGASCAR 5010, 1617-1633, R. National Malagasy Feb 8 Probable. Man and woman with discussion or interview in heavily African accented English, over/under AIR Thiruvananthapuram in Hindi. Good signal, but very difficult to follow due to the Indian at equal level. Language changed to pres. Malagasy 1628 with announcements by a man; brief drumming, then woman in French at 1631with possible mention of 'Malagache' beneath AIR's subcontinental music. I was surprised to hear English on this frequency at tune-in; unfortunately the level was so low I couldn't make out the subject or topic. (Atkins-WA)

NEW ZEALAND 3935.07, 1116-1121, ZLXA Levin Feb 7 Tentative. Threshold level of female announcer in English (seemed Kiwi accent) with monotone talk. Very

weak with occasional ham QRM. Only audible on southwest Beverage antenna. (Atkins-WA)

NIGERIA 4770, 0510-0537, R. Nigeria Feb 7 Very tentative. I first tuned 4770 at 0510 and found a weak signal with threshold English language. Later checks revealed an African-sounding language as sunrise approached Lagos. The signal never improved, but stayed threshold. Gabon 4777 also in at a very good level. (Atkins-WA)

PAPUA NEW GUINEA 3205, 1018-1031, R. West Sepik Feb 7 Two men in English with a discussion on PNG economics; many mentions of 'Kina'. Poor to fair signal. (Atkins-WA)

PAPUA NEW GUINEA 3260, 1031-1034, R. Madang Feb 7 Male announcer in Pidgin with mentions of Madang at 1032 and 1035. Poor signal. (Atkins-WA)

PAPUA NEW GUINEA 3275, 1035-1039, R. Southern Highlands Feb 7 Enjoyable PNG sing-sing music with female chorus and guitars; announcer in Pidgin. Too bad the signal was such a low level; tonight is a poor PNG propagation evening. (Atkins-WA)

PAPUA NEW GUINEA 3315, 1041-1048, R. Manus Feb 7 Announcer in Pidgin with US pops tunes; seemed to be a music countdown program. 'R. Manus' ID noted at 1106 recheck. Fair. (Atkins-WA)

PAPUA NEW GUINEA 3355, 1057-1101, R. Simbu Feb 7 PNG pop music 1057; male announcer at 1059 with announcements in Pidgin; 'R. Simbu' ID at 1100 with mentions of 'province'. Suddenly off without fanfare at 1101*. Other PNG stations still on, though. Poor-fair signal. (Atkins-WA)

PAPUA NEW GUINEA 3385, 1048-, R. East New Britain Feb 7 Male announcer in Pidgin with slow, casual talk. Time check in English 'five minutes until 9 o'clock' at 1055; phone number and poss. quick ad for restaurant. Initially a poor-fair signal, but a recheck at 1107 revealed a good level with Pidgin language hymn and male chorus. (Atkins-WA)

PAPUA NEW GUINEA 3905, 1105-1111, R. New Ireland Feb 7 Presumed. Male announcer in Pidgin with mentions of 'tok tok' and 'come up long hearim...'. Poor level signal, with strong co-channel ham QRM from the New England Weather Net. No evidence of RRI Merauke on the frequency. (Atkins-WA)

PAPUA NEW GUINEA 4960, 1112-1116, Catholic Radio Network Feb 7 Talk or interview about Catholic and family planning issues. First noted at 1035 with Christian contemporary music. Poor-fair level, but seemed to be slowly improving. Also heard at 1707 on 2/8 with choir music; weak signal. (Atkins-WA)

SOLOMON ISLANDS 5019.9, 1737-1740, SIBC Feb 7 Honiara still in at a good level with BBC news relay in English, 2-1/2 hours past local sunrise. Panel discussion about economies of Middle Eastern countries. (Atkins-WA)

SOUTH AFRICA 3255, 0314-0318, BBC WS, Meyerton Feb 8 Two men with discussion in English about USA farm exports; fair signal and parallel to 5975 with a slight delay. Only audible via the backend of the southwest Beverage

antenna. (Atkins-WA)

SOUTH AFRICA 3320, 0303-0312, R. Sonder Grense Feb 8 Two men with lively discussion in Afrikaans. Fair to good, and improving as sunrise approaches South Africa. (Atkins-WA)

SWAZILAND 4760, 1647-1652, TWR Mpangela Ranch Feb 8 Male preacher in African vernacular, over/under AIR Port Blair's sub-contintental vocals. Fair-good level and best on southwest Beverage. (Atkins-WA)

SWAZILAND 4774.95, 0409-0420, TWR Mpangela Ranch Feb 8 African choral music that sounded like a hymn at tune-in; religious organ music 0413; brief talk or meditation by man in what sounded like the German language (per WRTH sked), and into a series of short hymns by choir with organ accompaniment. Language switched to English at 0430, also per schedule. Faint signal. (Atkins-WA)

TAJIKISTAN 4965, 1603-1612, V. of Russia, Yangiyul Feb 7 While searching for R. Christian Voice, Zambia, I came across Voice of Russia on the frequency. Female newscaster with world news, VOR ID at 1607, and into light jazz. 'VOR World service' ID again at 1609 and 1611 by male announcer. Good. (Atkins-WA)

ZAMBIA 4910, 1634-1708, ZNBC Radio One Feb 7 Male announcer in African language, with sermon; numerous mentions of 'Janni' or 'Juani' and 'Patmos', which was likely a Bible story relating to the apostle John who was imprisoned on the Island of Patmos. Announcer with voice-over organ music at 1656; hymn and choir 1658; 2+1 time pips at 1700. Female announcer with possible ID and mentions of Lusaka 1701, followed by news items read by a man, mentioning Zambia, Angola, Malawi, and other locations. Choral anthem or national song at 1704. Bassy modulation. Very good signal, with AIR Jaipur faintly in background 1634-1650 with sub-continental music. Surprisingly strong even at 1 hour 40 minutes past local sunrise and peaking at 1705, which is Lusaka sunset. Still in at a fair to good level at 1735 recheck, 2+ hours past SR with fast-paced advertisement mentioning many African music styles such as makossa, soukous, mbqanga, hilife, and others. Also heard 2/8 with a good signal. (Atkins-WA)

ZAMBIA 4910, 0327-0338, ZNBC Radio One Feb 8 Fading up nicely with Afropops music and cheery male announcer in vernacular at 0330; mentions of Zambia and 'ZNBC'. I heard a clear mention of 'Radio Three' just before 0333; perhaps a promo for another network (?). 2+1 time pips at 0400 and into short vocal selection by female chorus. Good signal. (Atkins-WA)

ZAMBIA 4965, 0346-0355, Radio Christian Voice Feb 8 Tentative. Weak signal of Black Gospel music; traditional African choral music (hymn?) at 0348, but signal lost to the noise by 0355. (Atkins-WA)

ZAMBIA 4965, 1706-1715, R. Christian Voice Feb 8 Presumed. Woman in English giving web address ('www..' something) at tune-in; Christian contemporary music 1707; short prayer or devotion 1712, and into Black Gospel music. Weak signal, nearly two hours past local sunrise. (Atkins-WA)

> get lost ??????????
>
>

My friend had to take the knobs off to fix a minor problem on his R71A,
and since the knobs were kinda funky, he put them in some cleaner and
worked on the radio for a while they soaked. He got a call or something
and left the PBT/NOTCH knob and collar soaking, the rest were done. When
he remembered to take them out, they weren't exactly in great shape. He
used some sort of cleaner that even ate the aluminum notch ring to the
point it wouldn't stay on anymore. DOH!!!

I asked him why he couldn't have used plain old dish soap. He never even
though about using that. He used some kind of car stuff...

I have the radio now, and trying to find that knob and collar is going
to take a long time. It works great, but that missing knob bugs me...

Edildo, you're so dense you actually bend light.

2.4 to 2.2 is a DECREASE, period. You can spin all you want, but it doesn't change that FACT. One book to the next they were at the best, flat, but probably lost listeners.

In a way, the pro sports metaphor is appropriate. Championship teams on the field are but a small percentage of the total, and they're not always profitable. True ROI comes to the teams that are managed well as businesses.

Also, because many teams bid for his services, a player's remuneration is overwhelmingly determined by individual performance, whether his team wins or loses.

Excellent "condescention" -- you had to work at it, Edildo, but you are
right in line for "A-list liberal twit status!" Congratulations!

Simple math: 2.2 < 2.4

Liberal math: 2.2 = Boo hoo! It's not fair!

2.4 to a 2.2 is not a STATISTICAL decrease. Statistically, using Arbitron's margin of error formula based on share, diaries and population, a 2.2 and a 2.4 are within margin of error and are, thus, the same number.

There is no way to know, at that level, whether the station gained, lost or stayed the same.

I have an LA station that has been in the 2.4 to 2.7 range for a year, with no competitive changes among P2 or P3 stations. We consider it to be flat. If you look at the individual months, the range is 1.9 to 3.1, which, given that each month has 1/3 the sample, is also flat. So flatness is a 1.2 share range.

No matter how you spin it, there is nothing that can be concluded from a 0.2 share difference from book to book.

I could care less about the content. I am focusing on the numbers, which are
statistically flat.

Display Stirs Controversy In Land Park
Soldier's Uniform Hangs From Noose In Front Of Home

POSTED: 7:58 am PST February 9, 2005
UPDATED: 1:43 pm PST February 9, 2005

SACRAMENTO, Calif. -- Nestled in a quiet Sacramento neighborhood is a very loud political statement that is testing the very foundation of the right to free speech.

Hanging from a house in Land Park, a soldier's uniform in a noose dangles from a rooftop. The words "your tax dollars at work" are scrolled across the chest.

In a community full of patriotism, this view of the war in Iraq has not gone unnoticed.

"I think it's the ultimate sign of disrespect. We have troops dying for us," Land Park resident Mark Cohen said.

"(I'm) annoyed and disgusted. I think if this is the way someone feels they can find a better way to vent their opinions," Land Park resident Pete Miles said.

The homeowners behind the controversy are Steve and Virginia Pearcy. They released a statement saying, "There will always be people who are offended by political speech, and the most important forum of all ... is one's own residence. The First Amendment is meaningless unless dissent is allowed."

Some neighbors agree.

"Even if you don't agree with it, he has the right to state his opinion. I don't find it offensive at all," Land Park resident Cece Williams said.

The tension in the neighborhood has escalated into more than just a political feud.

The matter has been reported to the police department and to the city attorney. The city council has even heard about it, but says they can't solve the problem.

"Unfortunately or fortunately this is protected speech by the First Amendment ... so there is nothing we can do about it," Sacramento City Councilman Rob Fong said.

KCRA 3 received a call late Wednesday morning from the homeowner saying that a group of people had torn down the display. He said that what he did was not illegal, but what was done by the people who removed the display was.

3703. ebay: devocom73 and dx-398's

Newsgroup: rec.radio.shortwave
Date: 2005-02-11 21:46:50 UTC
From: Conan Ford <conanford@com.hotmail>
Message-ID: <Xns95FA965D6EB45conanfordhotmailcom1@24.71.223.159>
Source record: 7703

Anyone else notice this seller who was selling a total of eight DX-398's, all miraculously new and in mint condition, in box?

First thing that got me wondering what was why anyone would have nine of these radios, The reason of "I am gradually quitting my radio collecting hobby to pursue my other passion in life which is vintage cars and trucks. Doing so is taking up all my free time which leaves me with no time with my radios anymore so all 8 of these Radio Shack units MUST GO NOW!!!" sounded rather bogus. Collecting eight identical radios and letting them sitting around is a hobby now? I suspect something else like customer returns that were liquidated at a high discount. The radios might be new and appear mint in appearance, but I bet something is wrong with them.

In addition, the seller uses a lot of private auctions. This leads me to think that something funny must have happened in the past. For reference, another user who uses many private auctions is radio-mart. Note a recent feedback comment, "NICE PACKING&SHIPPING JUST CAN'T GET THE RADIO TO WORK alan."

Another thing was, I emailed the seller asking for a picture of the radio on and tuned into a station. I suggested WWV(H). The seller angrily retorted that the radios simply "worked." The degree of functionality was not stated. I think this is a reasonable request for an E-bay auction--the single blurry picture provided, of just one of the eight original units, with just the clock functioning is not adequate. I've heard of radios that were broken except for the clock before.

Anyways, I'm steering clear for these reasons. If I was new to this newsgroup and to shortwave radios, I might have bit.

They get most of their money from contributions from listeners and unfortunately, corporations. Unfortunately, because it has led NPR to avoid offending any of their contributers by reporting news contrary to their interests.

Oh! Death to Nancy
What is this taht I can see
Cold icy hands taking hold of me
for Death has come, you all can see.
Hell has open it,s gate to trick me.
Oh! Death, Oh! Death, can't you spare
me, over for another year!
I'll stuff your jaws till you can't talk
I'll blind your leg's till you can't walk
I'll tie your hands till you can't make a
stand.
And finally I'll close your eyes so you
can't see
I'll bring sexual death unto you for me.

B.T.K.

Oh, Anna Why Didnï¿½t You Appear
Tï¿½ was perfect plan of deviant pleasure so bold on that Spring nite
My inner felling hot with propension of the new awakening season
Warn, wet with inner fear and rapture, my pleasure of entanglement, like
new vines at night
Oh, Anna, Why Didnï¿½t You Appear
Drop of fear fresh Spring rain would roll down from your nakedness to
scent to lofty fever that burns within,
In that small world of longing, fear, rapture, and desparation, the game
we play, fall on devil ears
Fantasy spring forth, mounts, to storm fury, then winter clam at the end.
Oh, Anna Why Didnï¿½t You Appear
Alone, now in another time span I lay with sweet enrapture garments

across most private thought
Bed of Spring moist grass, clean before the sun, enslaved with control,
warm wind scenting the air, sun light sparkle tears in eyes so deep and
clear.
Alone again I trod in pass memory of mirrors, and ponder why for number
eight was not.
Oh, Anna Why Didnï¿½t You Appear

Those radios take knowledge and work to bring them up to par. I have a SX-42
and 28 that have great ears. I've owned a lot of vintage gear that would
give modern rigs a run for their money.

3723. What if... The Roman Empire had short wave...

Newsgroup: rec.radio.shortwave
Date: 2005-02-12 02:24:42 UTC
From: Michael <md1966@optonline.net>
Message-ID: <ZQdPd.847$2M3.294@fe11.lga>
Source record: 7723

What if the Roman Empire had short wave before the end of the first century ???

If the Roman Imperial government had their own "Praetorian Short Wave Guards" that could get the point across quicker then the famed "Roman Roads", what kind world would we have today ??? Better or worse ??? As so many historians have said, the so called "fall" of the Roam Empire cost the world in general a few hundred years in social and technological evolution. IMO although the Romans had gladiatorial games (American football without regular mortalities) and slavery... (below poverty class but they actually had a fine Greek education open to them as well as a chance to break out and gain freedom), were by far and away the most socially advanced and religiously inclusive society that ever graced the planet.

I cant help thinking what might have been if they had the capability to get the message across the globe in seconds.

When Scipio Africanus pushed Hannibal Barca aside, and Julius Cesar corralled the Gauls, with a shortwave transmitter, we may have had world peace about 2,000 years ago.

Yes... A retarded but interesting question. IMO technology came a few thousand years too late.

Michael

For a bit of history, check out Cromwell.

The movie " A Man for all Seasons" with Paul Scofield is pretty good too.
His portrayal of Thomas More is excellent. It's worth watching.

Yeah, the norm for me is very strong signal S9 to +10dB on a folded
dipole and a flat horizontal loop. No amplifiers. When conditions are
right and the band is hot they can be as much as +30dB average.

3736. ABOUT - Sangean ATS-909 / RadioShack DX-398 'portable' AM/FM Shortwave Radio / Receiver

Newsgroup: rec.radio.shortwave
Date: 2005-02-12 04:02:18 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1108180938.368463.29370@z14g2000cwz.googlegroups.com>
Source record: 7736

CF & JD,
.
FWIW - A "New-in-the-Box" Sangean ATS-909 {RadioShack DX-398}
sells for $220 on Amazon.Com
http://www.amazon.com/exec/obidos/tg/detail/-/B0000228GG/104-7651851-7542315

.
The Shortwave Store has the Sangean ATS-909 for $240
http://usa.shortwavestore.com/sangean-ats909.html#order
.
C. Crane Co has the Sangean ATS-909 for $260
http://www.ccrane.com/sangean-ats909-shortwave-radio.aspx
.
Universal-Radio.Com has the Sangean ATS-909 for $240
http://www.universal-radio.com/catalog/portable/1909.html
.
USA Scan.Com has the Sangean ATS-909 for $250
http://www.usascan.com/files/ats909.html
.
Grove-Enterprise.Com has the Sangean ATS-909 for $240
http://www.grove-ent.com/ATS909.html
RadioLabs has the Sangean ATS-909 for $250
http://www.radiolabs.com/products/receivers/ats909.php
.
What he is trying to do is offer these older "?" Discontinued and
Out-of-Stock RadioShack DX-398s at a slightly lower Price-Point.
.
PRICE - From the Buyers Prespective the Price-Point should be about 70%

of the Average OnLine Discount Price {$245} roughly $170 for these "?"
Questionable New-in-the-Box Radios.
.
New & Mint Radio Shack DX-398 AM/FM LW Shortwave Radio
sold by "DevoCom73" on eBay
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5749557980
So a Starting Bid of $165 plus $15 for Shipping and Handling
is not bad: But I would NOT Bid any more than that [.]

Maybe he's not a fan and wants to make a dart board? A friend of mine
took a pic of a hated teacher in Jr High, and made her face into a
target in one version, and a dartboard in another. I bought several
dozen targets to use with my bb gun. Damn, she was an alkie witch..
and still is!

I confirmed the impedance requirements of this filter is suitable for the AR7030. Now looking at the filter and the AOR daughter board, I realize that the Kenwood crystal filter is in itself on a daughterboard. I can't put this filter/daughterboard combo on the AR daughter board as the connectors on the Kenwood daughter board hang out too far, blocking access to screws on the AR7030.

Now looking at the PCB pattern on the AR7030 filter board, it looks like there is a standard layout for these filters. That is, the PCB used on the Kenwood filter is similar to the pattern on the AR board. The screws line up as well.

So this leads to my question. Does anyone perceive a problem of removing the screws on the Kenwood PCB and then desoldering the Kenwood PCB. I would then solder the filter to the AOR daughterboard.

A good thing I'm only into this $10. ;-)

Forget radio, what if the Romans had thought of Semaphore? In the time of Napoleon, semaphore towers could convey official messages from Paris to Rome in 20 minutes. I imagine that a just-sent "The Huns are approching. We are burning all records," would bring help faster than a guy riding a horse as fast as possible. An elaborate system could even have had room for a newswire type of service, where space was available, with slaves copying down messages to be read to the masses.

There is a Canadian program called "History Bytes"
(http://www.historybites.com/) that is unknown and unseen in the US.

I don't believe any PBS station in the US will ever run it as it is
educational in nature.

The US upper and ruling class are terrified that any history might be
learned, as it allows them total freedom from precedence...

== www.ssp.ca publicity text ==

Why is it that most people can't list the first three leaders of their
country but can tell you the name of every contestant that appeared on
Survivor?

Because Survivor is on TV.

History Bites is a skit comedy show that explores the premise, "What if
television had been around for the past 5,000 years?" Each episode channel
surfs through a particular day in history and the result is a history lesson
hidden inside a clever spoof of TV.

Creator and host Rick Green takes the viewer on a journey with his trusty
remote, up and down the dial for a hilarious look at what Regis Philbin
might offer to a peasant during the reign of Vlad the Impaler, then what
pronouncements Judge Judy would have for blue collar Transylvanians and even
an in depth 20/20 interview with Vlad at home.

On History Bites, you might see Nero singing (badly) on Letterman or
explorer Henry Hudson taping his own version of the Blair Witch Project.

Queen Eleanor of Aquitaine as Madonna and Henry the VIII's wife Catherine
Howard as Princess Di - how easy could a history lesson be?

At the same time HB offers a wide look at the daily life concerns of the era
by spoofing hygiene commercials, Martha Stewart and sports with Don Cherry.

That's History Bites.
The past on the tube.
Channel surfing through the ages.
They say those who forget the past are destined to repeat it.
Well now, on History Bites, reality is in reruns.

3757. Technicians answer radio Vanuatu reception dilemma

Newsgroup: rec.radio.shortwave
Date: 2005-02-12 10:55:33 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cuknb5$81o$1@titan.btinternet.com>
Source record: 7758

Fred Vurobaravu - Vanuatu Daily Post
Friday, February 11, 2005

The management of the Vanuatu Broadcasting and Television Corporation has announced the resurrection of its short wave transmitter, which was fired up 4pm last Tuesday.

The people around the country who receive Radio Vanuatu services through the short wave frequency can now hear the station again on 7260 KHz.

Prime Minister and Minister responsible for media Ham Lini specially acknowledged the commitment and dedication of Radio Vanuatu senior technician Willie Daniel with the technical support of the consultant Hendrick Kettner to overcome the defaulted radio transmission wave link.

The transmitter went down during the week of Christmas. For seven weeks VBTC technicians, led by Acting Technician Manager Daniel, sweated to revive the transmitter.

Midway through January, Kettner was brought in to assist. At the same time spare parts supplied by Radio Australia boosted their repair efforts.

Mr Kettner said the problem was a series of faults in many areas of the transmitter, which took them time to identify and rectify.
He said the final answer to the puzzle was located Tuesday morning. In the afternoon it was fixed and at 4 pm the transmitter was successfully fired up.

The management has decided to allow the transmitter to run for a few weeks before work begins to fix the faulty component for switching from the daytime frequency of 7260 KHz to the night time frequency of 3940 KHz.

For now listeners in some parts of the country will experience loss of signal starting from 5 pm to 7 am the next day. But during the day, the signal should be clear.

The prime minister's office also thanked Rod Newel for the provision of the services of his company the Renerel Tech Ltd to VBTC when the short wave transmission was down for the last few months.

Radio reception in the islands is heavily reliant on the transmitter functioning well. The President of the Republic of Vanuatu Kalkot Mataskelekele has made repeated calls to have the radio transmissions in the islands reopened so that people can have access to news, information and entertainment.

3759. The DX Magazine Issues Most-Wanted DXCC Entities Survey Results

Newsgroup: rec.radio.shortwave
Date: 2005-02-12 11:00:23 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cuknk7$ra2$1@hercules.btinternet.com>
Source record: 7759

According to 2004 survey results published in the January/February issue of The DX Magazine http://www.dxpub.com/, North Korea (P5) remains atop DXers' "most-wanted" lists for DXCC.

"It was a real surprise to see North Korea at the top of the most-wanted list," commented The Daily DX http://www.dailydx.com/ Editor Bernie McClenny, W3UR. The most-recent P5 operation was by Ed Giorgadze, P5/4L4FN, in 2001 and 2002, during which he logged more than 16,000 QSOs.

Number two on the list is Andaman and Nicobar Islands (VU4), although a post-survey DXpedition in December likely diminished worldwide demand, despite being cut short by the tsunami.

In third place--but topping the list in four US time zones--was Scarborough Reef (BS7). Fourth is Lakshadweep (VU7), and fifth is Yemen (7O). A DXpedition set for this month from number six Peter Island (3Y/P) could blunt demand for that rare one. Rounding out the top 10 are Navassa Island (KP1) and Desecheo Island (KP5), both under jurisdiction of the US Fish and Wildlife Service which has denied visitation permission, Bouvet (3Y/B) and Kure Island (KH7K).

McClenny, who also edits "How's DX?" for QST, notes there's still a large demand for VU4, but he expressed guarded optimism that the VU4RBI/VU4NRO DXpedition's emergency communication operation following the December 29 earthquake and tsunami would make Indian authorities more willing to allow future DXpeditions. "Keep you fingers crossed," he said.

3760. BPL Legal Wrangles Continue in Austrian City

Newsgroup: rec.radio.shortwave
Date: 2005-02-12 11:02:58 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cuknp2rgk1@hercules.btinternet.com>
Source record: 7761

The ARRL Letter, Vol 24, No 06
Website: http://www.arrl.org/ on February 11, 2005

Local telecommunication authorities in Austria have sent a "first-step" legal notice to Linz Strom GmbH (Linz Power), calling on the utility to "take necessary technical measures" to operate its "Speed-Web" broadband over power line (BPL) system so it doesn't cause interference to other telecommunication equipment. Joseph Ibinger, who heads the Upper Austria-Salzburg field office for the Federal Ministry for Commerce, Innovation and Technology (BMVIT), told Linz Power in late December that interference mentioned in complaints is definitely coming from the utility's BPL system. From the time the BPL installation was a pilot project, radio amateurs have been among the most vocal in expressing their displeasure, blaming BPL for causing excessive interference on HF bands throughout the City of Linz. The Austrian Amateur Transmitter Federation (�sterreichischer Versuchssenderverband--�VSV), Austria's International Amateur Radio Union (IARU) member-society, praised the action, which the utility is very likely to appeal.

"The Austrian Amateur Radio Society applauds this decision of local authorities and notes that radio users have repeatedly indicated the problem of unwanted radiation from unshielded mains wiring," said �VSV President Michael Zwingl, OE3MZC. "The recent decision will be an example for authorities in other European countries facing similar problems in BPL trials."

In October 2003, Linz Power received a similar letter from local telecommunications authorities asking the utility to "remove the illegal interference" on the HF bands generated by the utility's BPL then-pilot project. As a result, Zwingl says, the utility took legal action against �VSV.

Assuming an appeal by Linz Power, the BMVIT must move Ibinger's initial response--essentially the equivalent of a warning notice or citation--up to the next level, and it could take up to six months to resolve the matter. Zwingl says if the federal authorities affirm the local decision, they could prohibit operation of the BPL system. As it now stands, the utility was given a month to resolve the interference.

Zwingl said �VSV has been unable to obtain a copy of the actual decision and was only able to obtain details of the document in January by working through a "peoples' lawyer," essentially a legal ombudsman who runs interference between the Austrian federal government and citizens.

According to legal ombudsman Peter Kostelka's report to Zwingl, the telecommunication authorities cited Linz Power's use of unshielded wiring to transport data signals, resulting in constant emissions that interfere with short wave bands as "an undesirable byproduct" of the system.

The Linz Power BPL system boasts upward of 4000 "satisfied customers" out of the 40,000 in its service area. It offers its basic service for ?24 a month; a faster version goes for ?42 a month, both less installation charges. Speed-Web uses Main.net BPL technology.

Zwingl said the recent official decree followed "some years of complaints and investigations" into the Linz Power BPL project.
"We put pressure on officials to not just take measurements but also to react by all legal means," he said. "It took us some time, but we never agreed with the opinion of some authorities who have made a judgment between the importance of ham radio and BPL." Zwingl maintains that Austria's telecommunication rules conform with International Telecommunication Union (ITU) regulations and "protect radio services and spectrum regardless of subjective importance."

Linz Power Executive Josef Heizinger reportedly reacted calmly to the field office decision. "We are absolutely in the right, legally, and will continue the BPL development according to plan," he's quoted in the media. In another interview, Heizinger declared that "simultaneous problem-free operation of BPL and Amateur Radio equipment is possible," and he blamed a small group of dissident radio amateurs for trying to discredit "this innovative and economical technology."

Linz Strom blames the few radio interference problems its system has caused on "defective equipment," and says it's resolved those cases promptly.

VSV continues to insist that in its current form BPL--also known in German-speaking countries as "Internet from the Electrical Outlet"--is incompatible with HF reception.

I am using Ham Scope and Mmtty to decode RTTY with my sound card. It works fine for hame radio operators but I have found RTTY on non-ham frquencies and all I get is garbage. For example, there is an RTTY signal at approximately 2.042 MHZ at 1100 UTC on the West Coast and all that displays is random characters. I suspect it has something to do with the protocol or baud rate settings. Anyone know what they might be? Not sure if this is maritime station or not. Thanks.

Much of the RTTY that you'll receive on non HAM frequencies will be encrypted.
That is probably why you'll receive the random characters even though you might
have the protocol and baud settings correct.

Most hams are received in the LSB mode. Comercial statisons usually are received in the USB mode or the reversed mark/space relationship. Also the speed (baud rate) and shift are usually differant than the normal ham 45 baud (60 wpm) and 170 Hz shift.

This is why shortwave sucks. Here is the break down.

10,000 shortwave broadcasters.

4000 foreign language
2000 too weak to hear
3000 religion
1000 boring shows

I hesitated on buying the 7600GR because it lacked a tuning knob. Now
that I have it, not only do I not miss the tuning knob, I wouldn't
want a radio with one. I like how I can just scan across the channels
with the touch of the button.

3768. OT The October surprise ... five months late (Bush knew)

The October surprise ... five months late

There are two scandals in today's NY Times story on just-declassified portions of the 9/11 Commission report that detail the many specific warnings about al Qaeda the FAA received:

The first is the dangerous incompetence of the FAA and of airport security in the months leading up to September 11th.

The second is that this was not released before the election. That feels, sounds, tastes, and smells like election fraud.

During the commission hearings and when its report was released, based on what we were told, I was one of those who said the blame for not stopping the attacks could not fall on one administration, neither Clinton nor Bush. But now we are told this:

The report discloses that the Federal Aviation Administration, despite being focused on risks of hijackings overseas, warned airports in the spring of 2001 that if "the intent of the hijacker is not to exchange hostages for prisoners, but to commit suicide in a spectacular explosion, a domestic hijacking would probably be preferable."

The report takes the F.A.A. to task for failing to pursue domestic security measures that could conceivably have altered the events of Sept. 11, 2001, like toughening airport screening procedures for weapons or expanding the use of on-flight air marshals. The report, completed last August, said officials appeared more concerned with reducing airline congestion, lessening delays, and easing airlines' financial woes than deterring a terrorist attack.

The Bush administration has blocked the public release of the full, classified version of the report for more than five months, officials said, much to the frustration of former commission members who say it provides a critical understanding of the failures of the civil aviation system. The administration provided both the classified report and a declassified, 120-page version to the National Archives two weeks ago and, even with heavy redactions in some areas, the declassified version provides the firmest evidence to date about the warnings that aviation officials received concerning the threat of an attack on airliners and the failure to take steps to deter it.

Among other things, the report says that leaders of the F.A.A. received 52 intelligence reports from their security branch that mentioned Mr. bin Laden or Al Qaeda from April to Sept. 10, 2001. That represented half of all the intelligence summaries in that time.

Five of the intelligence reports specifically mentioned Al Qaeda's training or capability to conduct hijackings, the report said. Two mentioned suicide operations, although not connected to aviation, the report said....

The F.A.A. did not see a need to increase the air marshal ranks because hijackings were seen as an overseas threat, and one aviation official told the commission said that airlines did not want to give up revenues by providing free seats to marshals.

The F.A.A. also made no concerted effort to expand their list of terror suspects, which included a dozen names on Sept. 11, the report said. The former head of the F.A.A.'s civil aviation security branch said he was not aware of the government's main watch list, called Tipoff, which included the names of two hijackers who were living in the San Diego area, the report said.

Nor was there evidence that a senior F.A.A. working group on security had ever met in 2001 to discuss "the high threat period that summer," the report said.

Now we must know who decided to classify this material and keep it from the nation before the election. Who and why?

Well, of COURSE you can't believe yourself! You KNOW you are morally
and intellectually incapable of reading the clear evidence I offered
you, thinking independently, and coming to a rational conclusion.

No, you are only capable of being a good little Bush-cultist sheep,
accepting whatever the Bush-designated authority tells you as gospel,
even when your own eyes would tell you otherwise.

Ignorance must truly be bliss for you to cling so fervently to it.

Okay, I have some questions about RTTY:

1. What unencrypted RTTY traffic is out there besides hams?

2. What sort of encoder would I need to read RTTY with my NRD-525 and what
do I need to know to get it functioning?

3. My receiver has an RTTY mode. What exactly does that do in my receiver?
Couldn't I just use USB or LSB?

Thanks,

Greg

I am not sure about RTTY that is not ham now. I doubt much is in use.
There used to be some using other shifts and upside down from the ham
standard.
You may find a list on rtty.com

> 2. What sort of encoder would I need to read RTTY with my NRD-525 and
what
> do I need to know to get it functioning?

YOu can use your computer with the built in sound card. There are several
free programs you can use . MMTTY is a good one to start with.

Go here to get the programs.

http://www.muenster.de/~welp/sb.htm

YOu just hook the sound card input to the speaker or output of the receiver.
Even a mic on the computer layed next to the speakers will work in a quiet
location.

> 3. My receiver has an RTTY mode. What exactly does that do in my
receiver?
> Couldn't I just use USB or LSB?
>

The reciever will go to either the LSB or USB mode but the filters will be
shifted so they will be centered at higher audio frequencies. The normal
ham rtty audio tones are 2125 hz and 2295 hz for the normal 170 hz shift.
In real use the receiver could be tuned so that almost any lower frequencies
are comming out of the speaker and the demodulator (converter or sound card
freqwuencies) set for the lower frequencies. The way it was done in the
precomputer days were with fixed filters and it was hard to change the
tuning of them. By using lsb and the mark tone of 2125 (think that was a
multple of some audio tuning fork but not sure) the tuning was simplified.

You can use LSB for most ham and USB for the comercial rtty. You may or may
not be able to use the narrow filters in the receiver. I don't know

exectally how that receiver switches the filers in and out.

IIRC it can. Grab the service manual to be sure, it can be found on the 'net. (I think I got mine from one of the 7600-related Yahoo! Groups.) It lists the voltages on various places depending on which band the receiver is tuned to when an external antenna is connected.

> Does sw07 with an-lp2 maintain a same gain over the entire sw

No idea. Maybe I'll get me an SW07 one day, currently it's still too expensive for my taste...

It's not that simple. Do a search on the Council of Whitby, 644 AD, if you're interested. The King of Northumbria decided in favour of the Roman versus indigenous Celtic church at that time. Archbishop Cranmer, when he wrote up the first Book of Common Prayer, specifically returned to the traditions of the ancient church of the British Isles. You could "spin" this and say that he only took advantage of Henry's marital issues, and you would be cozy with the Roman Catholic propaganda of many centuries. You can certainly denigrate a church if you promote that the founding of it was based on someone's desire for divorce. That would be like saying the Roman Catholic Church is based on Peter's three times denial of Christ in His our of need.

I've an R-75 with 100 m (330 feet or so) antenna. The signal has been quite
good for me. No fading at all last night here. Night still starts about
2300 UTC here, ending about 1430. RA this morning was excellent.

Okay, thanks for the info Ralph. I haven't gone to the links yes but I'm
betting there's not a lot of RTTY software for my Apple computer. That's
why I thought of a standalone decoder, like an MFJ or something. But it's
probably not worth the trouble if, as you say, there isn't much RTTY traffic
out there.

| Idiot alert. This news item is from 10 months ago.

You know, the fact that this is starting to look like an urban legend suggests (and, admittedly, can't prove) that the right-wingnuts we're seeing here have started to be a little concerned that Air America is making room for discussions on issues with a viewpoint contrary to their own. For a number of years, now, with the suspension of the Fairness Doctrine, this group has had unfettered confirmation of their flawed view of the world (this, consistent with my studies which show that the media can create a pseudoreality inconsistent with the real world, but functions as though real-world principles work...for a while) and now that there may be a chance that they might hear something which would shatter those misperceptions, they use any means possible, including lies and smears, to avoid having to confront those fears.

This is consistent with the manner in which the last Presidential campaign was executed...get a group who has no compulsion for the truth, and no inhibitions about sharing a lie, which undermined a challenger with once-strong chances to unseat the government in power through smears and vaguely-true references asserting that their claims must be true.

I meant to applaud you, by the way, when you revealed that you were a member, at some risk to your life, of a patriotic opposition to the government of Ecuador in the 70s. And this speaks volumes on why you think the U-S is a much freer society, with the sorts of constitutional protections which would make the sort of anti-democratic assumption of dictatorial powers impossible here. Yet I wonder...are you, possibly, like a frog in a kettle of water, being heated so slowly that you don't know you're getting cooked? I see it all around, but that's because I grew up at a time when the U-S was on a path to finally expanding the freedoms guaranteed in our Constitution, people were, voluntarily or through federal actions, becoming more tolerant and relativistic, and the nation as a whole was becoming more diverse through immigration and the attractiions of the American Dream. But the American Dream is gone, assailed as it is by efforts to restore the tax policies of the 1920s (remember those days and what it led to?) and destroying the middle class, whose previous contributions to the consumer society built in post war times made the U-S the economic powerhouse it was. The Constitution, and our system of government is broken, and I've jumped out of the pot. I encourage everyone who has been deluded into thinking that the United States is still

the best country in the world to do a reality check and get the heat turned off, or face the fate of the frog, too comfortably warm to realise that he won't survive the heat.

I remember seeing that exact artifact on a documentary I saw about three years ago on the Discovery Channel. No question about it, people were just as smart a few thousand years ago as they are today. Although there have been advances in technology, the human IQ has not increased at all since the days of the classical civilizations like the Romans or the ancient Greeks. I always get a kick out of how modern day man looks back on older civilizations and sums them up as backwards or superstitious because archeologists find the remains of their religious accoutrements, religious buildings or written accounts of their religious practices. At the same time we view ourselves as modern, enlightened and advanced. That reasoning is flawed. Say for instance, all the people on Earth now decided to leave for the stars or something like that. Then, ten thousand years later, a group of humans archeologists return to Earth to uncover how the civilizations of the 2000's lived their lives. No question that those future archeologists would find a church on every corner. They'd say... Hey, man.. Those guys were a bunch of superstitious nuts. These churches are everywhere. They used religion and superstition to explain everything that their meager level of scientific understanding couldn't figure out. And, hey... Look at this... There are these four wheeled things all over the place. And those maniacs burned fossil fuels to make them go. That's right, they poisoned their own planet. Those guys weren't smart, they were suppositious and destructive. No wonder they started to use radio signals to the stars until they got another raced to show up and get them out of this place :-)

(I got radio in there) :-)

Are you certain the signal even is RTTY? I've run across a number of signals that sound like RTTY, but are in reality anything but.

Also, as others have pointed out, you may be picking up an encrypted signal.

Keep the peace(es).

Kinda doubt that -- it would seem any civilization would have to go thru

many centuries of discovering knowledge and developing technology. And probably did things similar to us - cars - fossil fuel etc.

And I suspect intelligent beings will always seek the spiritual.

And I wonder if your advanced civilization still would have to eat other living things to survive (;-)

I have a conservative approach to liberties and freedoms. Having seen the worst, I realize that there is an extreme to the other side that is equally dangerous... an extreme where the tiny secondary interests are somehow elevated to the point of subjugating the majority ones:

Example:

I have had frequent discussions at airports on the need for a national ID card. Folks who have just been through the TSA security procedures seem ready to give a little to gain more perceived safety, while believing that identity theft, illegal immigration, fraud, etc. will be less prevalent. Yet there is strident opposition to this move (anyone who has been victim of identity theft is for it, of course=.

At the same time, in some areas of society we have made life so complex it is not enjoyable. The raw number of laws we must know and obey are staggering. Yet is this a result of a more regimented society... with the assumption that regimentation leads to abuse of power... or just a more complex, technological society?

Or, am I just the frog?

3813. Re: Lowe 150 Europa on Ebay

In article <1108144108.719133.294820@c13g2000cwb.googlegroups.com>,
sdaniel13@nyc.rr.com says...

Lowe stopped manufacturing the 150 for a while, they handed production
to SMC - many of those were the black case 150s with no Europa
identification - However they suffered QC problems in the early days,
and Lowe (apparently) took a load off them and tweaked them up to spec -
so for a while Lowe sold the 150 again....

Had a play with one once, knocked the living daylights out of my R-2000
- but that was only to be expected!

Compelling points. Though it is completely debatable that another civilization would go the same way we did. My primary point though, was to how people today have the flawed perception of intellectual superiority of contemporary man and civilizations over civilizations that were around two thousand years ago. When the "founding fathers" of America worked together to develop the political, legal and social framework of their new country, one of their favorite men to refer to was Cicero. The architecture of prominent buildings in the American Capitol is predominantly Romanesque.

Also... we don't need to eat other living things to survive. We choose to. I dont think I could ever give up things like Alaskan King Crab Legs :-)

Mmmmm... Tasty....

And speaking of fishing, I heard what I think may have been some ship to ship com on 18840 at about 17:35 UTC. It was very weak, but I heard one operator mention "Montauk", so I'm gathering it might have been some fishing boats off Long Island. Just a guess.

(I got radio in there)

Source record: 7914

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed
God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get
another chance to be saved because none of us knows
exactly when we will die.

Have a great day!

Indeed Michael -- the ancients were of great intelligence -- one only has to read of Pythagoras, Eratosthenes, Archimedes, and many others to realize this.

But the knowledge was not spread to the masses with compulsory education. So many who could have contributed had no foundation to build on. And many great discoveries were ignored for various reasons.

And celery and carrots are living things in my book. I am not fond of rocks and minerals.

>Okay, I have some questions about RTTY:
>
>1. What unencrypted RTTY traffic is out there besides hams?

For 5 bit asynch (start and stop bits using Murray code), not much.
There may still be some very cryptic weather reports, and maybe the
North Korean news service is still at it.

Ex-Soviet maritime traffic uses a code where the Cyrillic charaters are
mapped to their close Latin alphabet phonetic matches so you can sort
of read it.

TOR, (which is actually two different ways of packaging 5 bit RTTY with
some error correction), will have some maritime traffic. There are
probably FEC-TOR weather reports from the various coast guards around
the world on shortwave , and a system that runs down on 512? kHz for
maritime information. FEC-TOR is a 100 baud narrow shift continuous

transmission. ARQ-TOR is the dREEP-dREEP-dREEP of three character blocks or the 1? character reply from the other station. Hams use half duplex ARQ-TOR where the same frequency is used for both stations, maritime channels are full duplex.

>2. What sort of encoder would I need to read RTTY with my NRD-525 and what >do I need to know to get it functioning?

A lot of the 1980's vintage packet controllers had numerous monitoring modes. I built the Heathkit version of AEA's PK-232 and it will copy RTTY, TOR, AX.25, even weather fax if you have a graphics printer of that vintage.

>3. My receiver has an RTTY mode. What exactly does that do in my receiver? >Couldn't I just use USB or LSB?

Maritime RTTY channels are on .5 kHz spacing, a bit too narrow for a 2 kHz wide USB filter if the band is busy.

That ties into my original post about "What if the Romans had shortwave". Again... Although they take their lumps given to them by historians for having the defects of slavery and blood sports, they were quite advanced and structured. They were also socially and religiously inclusive to an extent that is not seen at all in our times. When the western empire came apart at the seams, it kicked off the dark ages. If they had any kind of electronic media like shortwave before the decay and collapse, they could have used it to readily spread their concepts of civilization, law and inclusive social structure. I know the "what if" questions are powerless to combat realities, but they are fun to ponder :-)

> And celery and carrots are living things in my book. I am not fond of
> rocks and minerals.
>

I would think that even fruits and vegetables could be substituted for with synthesized matter of one kind or another. Thoug, it would probably be worse then eating nothing but microwaved hot pockets all the time...

Good god what an unbearable whine. I listened to it for a few minutes
but it seemed it wasn't ever going to end and I had to turn it off.
What a totally clueless person. A big part of his complaints had to do
with the Condoleezza Rice being the new secretary of state and other
changes toward better agreement with France and Germany of middle
eastern relations. Imagine that, complaining about improving relations.
He even complained about Condoleezza's hair so I guess he thinks
himself a style critic now.

17,810 and 15,315 much weaker than usual out of the Neth antilles.
17,725 out of Neth antilles strong as usual.
17,875 out of Sackville as strong as usual.

I've seen instructions for changing audio related caps in the DE1102 on a Chinese page [1] (apparently tantalums have been used there, and these really suck in terms of linearity and should not be used for audio unless absolutely required by space constraints), but nothing for the 1101 so far.

Stephan

>there is strident opposition to this move (anyone who has been victim of
>identity theft is for it, of course=.

I see a couple of reasons,

1) Will it do any good? Unless it's backed up with a really orwellian
online system where any offical can swipe your card and get an online
display of ALL your details, it'll just be another piece of paper to forge.
The country is too big, too mobile, and too interested in getting cheap
illegal immigrant labor to make the system really work for any terrorist
threat. Too cheap, and probably too corrupt, too.

2) It conflicts with the American myth of being able to reinvent yourself
with a new life. One of the stupider myths, to tell the truth, but like
the "lone inventor making a fortune", it has a following.

I didn't hear him last week so it was a rare opportunity to listen to
the entire broadcast and enjoy it.

Green's segment is just a few minute monolog but the rant when longer
than I could tolerate. He gets stuck in between the usually excellent
programs but I have not paid attention to exactly when. Seems he is
usually heard around the hour or the half. Sorry about not being more
specific as I never want to hear him these days. He used to be funny
and self depreciating but now he's more strident and nasty and just
plain negative. He has the ability to find the bad anywhere he looks
appearently. In todays rant he even made reference to the holocaust in
a depreciating way and that's when I turned him off.

The week before last he was running down the new Air buss pointing out
the problems of moving ever larger groups through airports. Since this
was a rant on a product design instead of religion or politicks he
thinking process was a little more exposed. He does not check his
assumptions for one thing.

I think his commentary is basically uninformed and negative. It used to
be funny and in that way was entertaining. I make allowances for
material that is entertaining.

And here he is again at 20:53 UTC as I type this so I just turned the
radio off for the next few minutes.

That's just a spelling mistake.

He's in his own group "ultra-wrong-wing."

Betz- you *never* have much of a 'rational argument' -
Maybe that is why you are so sensitive to perceived
insults.

On the topic - it is true that Clarke "told the truth'
-- but which of his conflicting stories was the truth??

| 9 responses all metioning either 'tard or meds.
| Have you taken yours?

Three things....

1) It's time, don't you know, to killfile him. I have. As David Eduardo noted, dxAce hasn't added a single valuable comment in many, many days, and his retorts have become repetitive. He strikes me as being a child, since he really hasn't come up with anything novel in many weeks.

2) We really need, if we can't restrain ourselves, to omit the cross-post to rec.radio.shortwave. This is the last one I'll do, if only to apologise to the good folks there who wish we didn't know about them. If the nutbags are the ones cross-posting FROM rec.radio.shortwave, would the moderator (don't all rec.*'s have them?) suppress them, please?

3) HTML in a newsgroup is generally not recommended. I don't know if this group's charter prohibits it (or if this group even has a charter) but unless you see a lot of it in a newsgroup, it's best not to be the first.

Well, there aren't a whole lot of people in Vanuatu, so I suppose they
didn't have a lot of choice in technicians.

Re: JESUS CHRIST WENT TO THE CROSS SO YOU CAN GO TO HEAVEN - The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.....

FRANCIS1234,
.
"ZionNazi Right-Wingers" aka: NEUCON
= Openly Anti-Semitic "Hate Speech"
So is this the new In-Our-Face Buzz Word
>From the Democrat Party of the USA ? ? ?
.
Recently it has become evident that many so called Liberals in
the Democrat Party of the USA have been using a a new [Hidden]
'transformed' Meaning for the Political Hot Button Word "Neucon"
Morphing it into NEUCON as an Anti-Semitic {Those Jews} Hate Word.
.
Originally it was used by some Jewish Liberals to "Label" some
Jewish Conservatives who held certain World and Social Views.
Next "Neucon" was pick-up by the Liberal Press as a Political
Label for certain Highly Visible Conservatives who publicly
were promoting the so called "Neucon" Agenda. Then the Democrat
Party of the USA made "Neucon" a Political Buzz Word. Now most
recently Non-Jewish Political Cadre of the Democrat Party of the
USA are using the Word "Neucon" and been Morphed into NEUCON :
Meaning "Those Jews" showing the 'true' nature of the Anti-Semitic
Feelings within the Democrat Party of the USA.
.
So Now We Have You Stepping Right Out-There and cobbling a
New Word to be used to Label "Those-Jews" and showing the True
Colors of the Political Cadre and Leadership of Democrat Party of
the USA. And That Word Is "ZionNazi" which you identify as
'Ring-Wingers'.
.
Whether you or others use "ZionNazi" or NEUCON - We now know what
you really Mean and the True Intention of the Bias, Bigotry and
HATE in Your Words.
.
ZionNazi or NEUCON - Two Words That Can Be Viewed By All As :
Openly Anti-Semitic "Hate Speech" and Considered Overtly Bigoted [.]
[Some May Go So Far As To Call These Words "RACIST" !]
.
so say i - my opinions stated as facts ~ RHF
.

I figure that shortwave radio will be one of the next things they take away, right after they realize how people can get news and commentary and info from all over the world that isn't and can't be passed through the Bush propaganda machine. Shortwave radio has a small constituency, thus making us-vs-them demonization practical and possible. All they'll have to tell the sheep is that shortwave radio makes it possible to hear terrorist lies (Voice of the Islamic Republic of Iran and Voice of Korea, although I've never heard Iran in English) and the sheep will support mass jamming and/or BPL in order to eliminate the "threat". It's already next to impossible to get a shortwave radio from anywhere except the internet-I was recently in one of my area's largest Radio Shacks and the only SW capable radio they had was the Grundig Porsche radio, the rest were non-SW radios. You can still buy a SW radio at Fry's, but they don't have too many stores outside California. It would be relatively simple to shut down the few stores still selling SW radios exclusively (Universal Radio, for example) and order the rest not to sell them-I doubt many people would notice. Next they'd put in some sort of jamming (BPL?) to make the rest useless. Then it would be off to censor the internet, which is easy. At that point the only source of info people would have would be Bush propaganda, and the Project for a New American Century could proceed to conquer the world. And when the next terrorist attack happens, people would truly believe that they hate our efforts to bring freedom to the world (ha ha) despite what Osama himself has said and then Americans would invade even more countries, thus setting off more terrorist attacks...

Yes, but they will all be AM and/or FM radios, and most likely set to
receive just a handful of frequencies, like radios in North Korea.

But neither of those radios are 5 tube AC/DC radios. I think the poster might have had one of the S-38s. I also think the S-38s are very nice radios, within their limits. S-38s are best suited for listening to the high power SW broadcast stations in their target area. They had better sound than many of the more expensive communications receivers.

S-38s are poor DX radios and trying to demodulate SSB will be an exercise in frustration with one.

3874. Re: JESUS CHRIST WENT TO THE CROSS SO YOU CAN GO TO HEAVEN - The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.....

Radio is one of the best ways to reach a lot of people, in a lot of places. In the case of shortwave a broadcast just may reach people on several continents at (approximately) the same time. I expect this is one reason it is so popular with ministers.

[snip]

So why didn't the Romans develop shortwave?

The Romans were too busy accumulating wealth the old fashioned way. They were stealing it. They were stealing the lives of the Maxwells and Teslas of the day under slavery. The ancient EH Armstrong spend his life lugging some damn standard in a Roman Legion.

Technology developed at a glaical pace until the people had a chance to develop their own inventions and keep the rewards.

It's a fine thing the Roman Empire is gone.

Frank Dresser

SONY ICF-S10MK2 right? It appears to be so--these are the radios that
devocom73 is selling. He doesn't give the model number, probably so you
can't look it up on the internet as easy.

on ebay from devocom73 for $21 shipped
look around on google, $18 shipped
local Future shop (Canada), $19 Canadian.

A lot of E-Bay sellers are ripping people off.

3881. Re: JESUS CHRIST WENT TO THE CROSS SO YOU CAN GO TO HEAVEN - The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.....

It's my Loewe-Opta LO-50.
This a rare stereo-radio with tubes and transistores.
I found a picture on a web-page:
http://www.radiomuseum-bocket.de/u_loewe/images%20bilder/62091%20lo%2050%20ers.jpg

It is in a wooden cabinet with a front door to hide the dial plate.
Needs external speakers. Unfotunately I don't have the original speakers.

It has
LW 150-340khz
MW 490-1650khz
SW 5800-18300khz
FM-stereo 87,75-104Mhz

Everywhere the Romans went, they took technology with them. Without any question, the quality of life and the level of technology went up tremendously in the areas that they added to their empire. Paris, London and Cologne were all Roman cities that didn't have so much as a wading pool much less advanced stone architecture, running water and a sanitary system before the Romans got there.

As far as slavery goes... Yes.. Indeed... They had slavery. Was it a bad thing ??? Yes, it was terrible. Though, from my own studies, it would seem that the life of a Roman slave serving in a Roman house circa the first century had a better life then the average American slave serving on a plantation circa 1850. It is always good to remember that fact before writing them off as just a bunch of brutal and abusive animals. The point I was making was not to show how idea and desirable the Romans were, but to explore how the world might have evolved if they had some sort of broadcast technology. The way things went, slavery wasn't legally abolished in the US until 1863. It is more then entirely possible that slavery would have been abolished sooner had Rome not fell. All civilizations are open to change and social growth. Not just the US.

Also... If you think that Romans were all that bad, may be we should think about giving technology to the Huns, Vandals or even worse, some body of ethnocentric religious fanatics that have it all figured out.

Michael

DaviD,
.
The Last Line of the Article about Air America says it all:
" And I love saying bad shit about the president. "
.
Air America views it's JOB as 'destroying' American's "Faith" in
America's Leaders and the Institutions of Government of the USofA .
.
Air America hold to the Classic Liberal ELITIST Agenda :
America Must Be Destroyed - To Build A Better World !
.
DaviD - Your Masters at the Democrat Party of the USA must
be proud of you for all your dutiful work as a Political Cadre.
.
the truth shall set your free - be free ~ RHF

Yes... I'm a huge fan of the original Star Trek series. That was a second season episode called "Bread And Circuses". It was a depiction of exactly what this string has been about. Kirk, Spock and McCoy go to a planet to investigate the loss of a space ship and its crew. When they get to the planet they find a world where Rome never fell. It was Rome with 20th century technology. They had broadcast media, fire arms and the entire host of familiar 20th century devices. In the episode you even get to see modern media advertisements for products called "Neptune Bath Salts" and the "Jupiter 8" automobile. Although It was Rome with "modern" technology, they were no more socially advance then the Rome of antiquity that we know. They still had the defects of gladiatorial games and slavery. You got to watch Spock and McCoy fight in televised gladiatorial games with swords and shields while they were being covered off camera with Roman soldiers that had automatic machine guns. At the end of the episode, we learn that this particular Roman empire is also destine to take a fall due to the rise of a new theology that sounded conspicuously like Christianity. It wasn't one of the best Trek episodes, but it was a good concept to depict a Rome that never fell. Still... I dont see how a modern day Rome would have maintained arrested social development as was depicted in the episode. Thanx for pointing that Trek episode out. I wasn't even thinking of that :-)

Michael

I agree with you in that Robert Green used to be very funny with his weekly round-up of what happened in Europe and Holland during the previous week; it reminded me of Paul Harvey in this country (USA). I actually made a point of listening to RNW every Saturday night just to hear him.

It is unfortunate that now his weekly commentary is almost completely political, and all negative against the Bush administration. I wouldn't mind this anti-Bush approach if it were still in his old style, with clever sarcastic humor just poking fun at the events of the day.

What used to be a five minute segment of great radio is now nothing more than propoganda, and even if I were to agree with this anti-Bush approach, I couldn't enjoy it knowing that Mr. Green used to be so entertaining.

I am going to email RNW and send them a copy of this post. Its not that I expect them to pull the plug or even reign in Mr. Green, but hopefully they will understand that his weekly commentary had been a true gem in the world of radio, and that they should not just let it disappear into the ether simply because of politics.

Sunday 13 February 2005

Following on from the Spectrum Framework Review and the Annual Plan, the RSGB has learned that Ofcom plans to enter into a further consultation. The next consultation is aimed at the amateur radio community and will be entitled 'The Future of Amateur Radio Licensing'. The document is expected to be published towards the end of February and will lay out a number of proposals for consultation on the future shape of amateur radio licensing. Talks between Ofcom and the RSGB on the future direction of amateur radio in the UK continue with meetings scheduled to take place throughout February.

Asses like you remind me of the stupid caucasian Anglo/American that has lost his way on the x-way but keeps getting deeper into unknown territory but will not stop to ask directions.By the way I created the word zionazi to show the relationship of the zionist to the Faith Based Christian nazi mentality. And it has been nothing but down hill for zionists ever since. That was over 5 years ago, I believe I first used it on soc.culture.palestine or maybe it was ab.poliics. Use to be a bunch of cracked neo-cons that use to hang out there.
*The new Democratic party with a real Populist leader. Suck ass you blow hard neo-Republicans.

I just got a ATS 505 from c. crane and want to setup a long wire antena the informatin sheet they gave me says to keep it away from foil insualtion and things like that well i have a metal roof and i am sure that is afecting my reception i have tried a few things i have tried atached the end of a coax cable comming from the tv antena to the telescopic antena on the radio and that doesn to seam to do much but i want to know if i can run a whire along the tv antena towner that is metal and to my radio

what is the best way to seup an antena?

any help would be great thanks

So? My point was about the slow pace of technological development in slave
societies. Neither the slave nor the slave owner has any strong incentive
to create newer, better ways of doing things. The slave owner's surest way
to get richer is to buy more slaves. The slave risks punishment for
```

failure, but will won't much benefit from success.

More than that, freedom allows far more creative minds to work on a problem. I suppose the small percentage of free Roman elites might have someday devloped shortwave radio. Maybe by the year 3000 or something.

Had Rome remained strong, I doubt they ever would have abandoned slavery. More likely, Rome would have fallen technologically behind free societies and the Roman Empire would have fallen apart like the Soviet Union.

The technological and industrial advantages of the North had much to do with ending slavery in the US.

Yes, the Romans were bad. The other groups may have been even worse.

It's also entirely possible the common Vandal had more chance of having an enjoyable life than the common Roman.

Likely because he's made the too common error of thinking that because
this newsgroup has "shortwave" in the name, it covers amateur radio.

There is of course the whole rec.radio.amateur.* hierarchy for things
related to amateur radio.

This one is about listening, and while the "shortwave" is a tad of
a misnomer since it wasn't intended to just be about shortwave but
to include AM and FM broadcast DXing, as well as longwave listening,
the messages I've seen about the origins of this newsgroup did
specifically mention it wasn't supposed to be about amateur radio.

The times when amateur radio does fit in here is in the cases of
listeners wanting to talk about receiving the ham bands, or what
they hear. Once it's transmission related, there's a whole hierarchy
for that.

Message-ID: <32OPd.29674$wi2.7256@newssvr11.news.prodigy.com>
Source record: 7832

I was spinning the dial after midnight here in Missouri and found the same program on several freqs at once. It was sports talk with news at 0630UTC. I'm just curious why they would broadcast on so many at once? Three in the same band:

12080 Brandon 10KW
13630 Shepparton 100KW
15160 Shepparton 100KW
15240 Shepparton 100KW
15515 Shepparton 100KW
I can understand if they are aimed to different regions- but I was getting them all at a similar signal quality; although 15160 and 15515 were certainly best. The location and power info are from Passport. If the Brandon wattage is correct, I'm surprised I heard that at all!
Can anybody shed some light on why they go the expense on so much repetition? I'm sure not complaining- I really like to hear radio from Down Under. I hate to think that this could all be history if BPL comes to my town.

Thanks for posting this as now I know I'm not the only person that feels this way. You were also more descriptive about the past and present of Robert Green's monolog.

I used to like listening to him even though I rarely agreed with him because he was humorous.

For whatever reason today they are only on 17,875 out of Sackville.
Good signal from them but all the signals from the antilles are missing
on 17,725 and 17,810 and 15315. I was listening from 19:30 to 20:00 UTC.

You should endeavor to get the wire at least 5 to 10 feet off the roof.

Use a BALUN to connect the wire to the coax lead-in to your radio where
the BALUN ground is connected to the metal roof.

Conversely if raising the wire is a problem then keep it a few inches
off the roof and connect the wire directly to the coax center conductor
and the shield to the metal roof.

Couple of different target areas there, and with the multiple freq's they have a
better chance of being heard.

Brandon does apparently run 10kw, unless they've upgraded.

In order to accept that you would have to ignore the fact that the Romans reigned supreme as the masters of architecture and building materials. Although they get historic accolades for law and government, they were also the worlds master builders. Not of useless and hulking monuments, but of practical and powerful architecture. The stuff that lasting cultures and civilizations are built on. A simple example of their mastery: When new St Peters Basilica was built, the architects had to study the dome of the Pantheon to get their bearings.

Ancient Rome was far more then slavery. You have to admit that. Many historians feel that the Roman Empire was so successful in transmuting its positive components of law, government and civilization that it is legitimate to say that it didn't really fall. It just morphed. Fortunately, the components of slavery and blood sport didn't make it into Rome Mark Two; post imperial western civilization.

The ancient world could be brutal in general. What puts the Romans above their contemporaries is that despite the institution of slavery (and the US had it too !!!), they were by far the most socially, racially and religiously inclusive of any of the ancient civilizations. Not to mention, extremely well founded mechanisms of law and government. Add to that, they built buildings, public works and founded cites 2,000 years ago that are still functioning today.

> It's also entirely possible the common Vandal had more chance of having an
> enjoyable life than the common Roman.

Excellent point. IMO what spelled the end of the classical Roman Empire was corruption and greed. During the Roman Republic and the early part of the Imperial period, there were real benefits to be part of the Roman Empire. As it progressed, the true ideology of Pax Romana gave way to run away greed and corruption in both the political body and the military. In order to combat invasion and to satisfy the needs of the patricians, provinces were bled dry and starved. Greed and corruption got to be so bad during the decline of the Empire that those living in Roman holdings preferred "barbarian" life to that of what Rome had become. Regardless, Rome was the foundation for western civilization. Their basic legal structure did not vanish, their buildings and architecture did not vanish and thank goodness, their notions of a nation with social, ethnic and religious inclusion did not vanish.

If you are interested in detailed information regarding the mutual influence of the Romans and the so called "barbarians" of western Europe on each other, check out this book: "ROME AND THE BARBARIANS" by Thomas S. Burns. One of the better books I have read about how the Romans, Celts and Germanic Tribes mixed and morphed into modern day Western civilization.

Cosby has been hitting home with his message on morality and personal
responsibility, so the liberals are setting him up with all sorts of
vile bimbos saying he did immoral things with/to/on them, in order to
silence him.

Great thread Jerry.

My most "enjoyable" would have to be a Sony ICF-2003 purchased back in the late 80's. It was made in Japan from 1987-1991.

- SSB mode in addition to AM
- external antenna jack
- Continous coverage 153KHz - 30MHz

I received it as a birthday gift after much begging and pleading. Now I am using a professional receiver, however I still have that little Sony and it still works great after 15 years.

> what is the best way to seup an antena?

Well first of all your TV antenna will be too short to pick up shortwave signals very well. You might try connecting just the outer shield of the coax to the radio's antenna input and see if that works better.

I believe the ATS-505 is a portable radio, so you may want to construct something like the following: http://www.geocities.com/n2uhc/portablewire.html . All you need to do is wrap some wire around the radio's whip antenna, and get the other end of the wire up high somewhere. Or you may just want to get a wire antenna up high and attach it directly to the radio's whip, but this may cause overloading since most portables use a lot of preamplification to compensate for the relatively short whip.

Here's one question I've been unable to figure out myself:
When was the first dual conversion shortwave receiver made, and which model was that? The earliest model I could find so far via Google was a 1935 Tandberg Huldra 1B with a 2 MHz + 137 kHz config - not too bad for a start (I hadn't expected to find something that old), but was there anything yet earlier?

Source record: 8009

There are (at least) two different types of slas.
GellCells, and regular lead acid batteries that
are sealed.
I have only used the GellCell variety.
It is hard to get a AC mains powered supply really quite.
You can reduce maybe 99% of the noise.
Most of the time that is enough. Givent he local and worldwide
noise 99% is below the noise floor most of us deal with.
For me the biggest advantage to using a gellcell is for
emergencies. When the lights go out I an keep listening.
I have a Lamda 12V rated at 8Amp, but will deliver about 14A
before going into current limiting, power supply that I bought for
$10.00 from a local surplus dealer. Big ugly and heavy.
No meters and a barrior strip for the AC mains 120V and the
12V out. It was already wuite, but I added some more noise
suppression. A Coreman heavy duty double stage IEC female
power connector to help keep it's noise from getting back into the
AC mains. I bypassed all 8 of the bridge diodes with 0.001uF
mylar to help prevent IM via the diodes. I added several ferrite
cores to the +12V out. I drilled a lot of additonal holes to add
1 connector (more or less) to the case halves for better RFI
"containment". I added a 120V 60HZ relay to open the PS +DC
output and a connector for my gellcell, a 24A/Hr panasonic unit.
I replaced the single turn voltage adjust pot with a10 turn unit
that Imounted onthe case. I keep it adjusted to +13.69V, the
suggested "float" volatage for gellcells.
It has worked great for several years now.
I power all of my 12V equipment from this single supply.
The main advantage being that it is much quiter then the
built in supplis on my radio and scanners, and I only
had to cleanup one supply instead of five.
Does it make a dfference, yes. My shack is much quiter,
that is has much less RF noise and I can connect any of the five
receivers/scanners to 120 and use the built in supply and
the noise floor jumps over 10dB.
I have also added the best ground I can afford. Used double shielded
coax for all my receiving antennas and connected all my equipment
with 1/2" tinned braid to a single grounding point.

99% would mean you are left with 1 part in a hundred, or 20db reduction. I don't think it would make that much difference. At least, I never heard that much of a noise reduction.

I think everyone should have the means to run their rigs from an automobile, so instead of running out to buy a SLA , rig up a cigarete lighter interface for your radio. Run the radio from your car (engine NOT running) and see if you can hear the difference. Now that you can listen on your rig mobile, drive out to the middle of nowhere and compare the noise (assuming you don't already live in the middle of nowhere). I've found locally generated noise to be a bigger problem than my AC, though my radio uses a soap on a rope style power supply.

Once you have run your radio from the auto battery, if you think iti makes a difference, buy the gell cell. I pull two 12V 7AH Yuasa from my gate every other year just to be sure the thing doesn't fail when I don't have time to fix it. I use the old SLAs for radio power supplies, but only when camping. I notice no difference at the house.

If you really want less noise, get a Wellbrook loop. An added advantage is you no longer need a ground since the Wellbrook floats. I use the ALA 100 and a homemade loop. Mine is also set up to run from 12V, though you need to note that the power to the Wellbrook is positive ground. If you build your own cigarette lighter adapter, this is not a big deal, just make sure you label it so you don't blow up gear expecting negative ground.

They just gave a news briefing and they said they was NO gang related activity reported here as was reported earlier. I never said is was a terrorist attack anyway. I said possible. Again, NO report of gang activity from investigators.

JD,
.
Thank You for Sharing these Links with Us.
.
It should be noted that Bill Cosby is
NOT referring to All African-Americans.
.
- rant -
He is talking about a segment of the African-American 'community'
that in his words do not hold-up thier end of the Social Contract
with the rest of Society and the African-American Community.
But, he also Challenges the rest of the African-American 'community'
to be a "Community" and Act with Compassion and Understand to Help
Their Brothers and Sisters "To Be" All They Can Be.
.
His Primary Theme for the African-American Community is to :
* Educate-Yourself
* Educate-Your-Children
* Become-an-Educated-Community
* Respect-Yourself
* Respect-Your-Family.
Educated Yourself to replace 'hate-white' and 'blame-the-white-man'
with
* Black-Is-Beautiful
* Love-Yourself
* Love-Your-Family
* Love-Your-African-American-Brothers-and-Sisters.
Understand "Your" African-American History, Culture and Traditions,
the Strong Family Values of the African-American Community; and most
Importantly Teach-Your-Children all these things so that they can Live
Better Lives as Proud-and-Strong African-American Men and Women.
.
He gets Personal and Says : It All Begins with You(U) and Me(I)
for WE "Are" the African-American Community.
.
end-of-rant
.
I Am Proud-to-Say : Bill Cosby is an AMERICAN !
.
God Bless American - amen, Amen. and AMEN !
.
Proud-to-Say : I Am An American ~ RHF

I just posted what I saw on the news. At the time they were looking for 3
gunmen. You find it in print. All earlier reports were 3 people and still
are.

Meaning that if there was a terrorist attack, watch them try and cover up that fact to keep people calm. On Fox news they were asking the detective if this could be terrorism. He laughed and said no. They asked how could be know that? He said well it's still too early to tell. If it's too early to tell, how does he know it's not terrorism?

We still don't know the whole story.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4673&item=5751142933&rd=1

Not that this is one of the "later" Japanese Star Roamers......jap power transformer and jap electrolytic. I put one of these together in 1968 and was very disappointed at the lower quality of the components as compared to a "USA" Star Roamer. Soon afterward, we all know what happened to Allied Radio.

I sold my Star Roamer along with my Span Master to buy a brand new Allied A-2515 receiver....another mistake.

And FWIW, the Hartford Courant endorsed Bush in 2000, as most newspapers did.
So much for the theory of a monolithic liberal media.

Cite: http://www.gwu.edu/~action/natendorse5.html

I honestly have not seen a similar report for 2004. I expect most
papers endorsed Kerry because we've seen Bush's track record.

I actually use one of the Wellbrook loops, and they do help a lot with
noise reduction. However, as I learned when I attached ferrite cores to
a lot of the cables in my house, it's the noise you don't notice that
can get you. I had no idea ferrite cores would make a significant
difference in my noise level, but they did. Now I'm wondering if there
are other things I can do to bring the noise level down even lower,
like operate from a gel cell or regular sla battery.

This whole thread only proves the point that people are paranoid of terrorism. There have been whack cases in the US for decades popping off people at random. It's not terrorism, it's crazy bastards taking our societal lack or respect for others and for human life in general to it's most absurd conclusion. In a time when kids kill kids for their shoes, or just for the fun of it, it seems to me that we have a lot more to be concerned about.

I don't like it. I found the "dumb customers" forum offensive. After reading
through a few stories, I now realize that I've done every thing with those
credit card readers except try to use the stylus as an ink pen.

Oh, I see that you are talking about a wire along the TV mast. Depends
on how long the mast is if it worth doing. Chances are it is not long
enough. Better would be a horizontal wire across the roof.

3994. Going to Europe in June...

Newsgroup: rec.radio.shortwave
Date: 2005-02-14 02:55:48 UTC

Hey everyone. Happy to say I'll be going on vacation to Europe this summer. We will be spending most of our time in England and Germany, with a little bit in Amsterdam and possibly Prague. Anyway, I figured it would be a good opportunity to hear some exotic stations, and get a taste of European radio.

I'm wondering what to bring. I probably don't want to bring my YB-400, since I don't want to risk losing it. I have a Grundig Mini World 100, which is a small analog-dial handheld. Do you think this would suffice, or should I spring for something a little more advanced? Any recommendations for small but decent handhelds that will do well in Europe? Thanks.

Yeah, but the Egyptians reigned supreme as the masters of ancient
electronics. They had batteries and were electroplating. Big deal. The
art was lost and not rediscovered 'till the after the Romans left the scene.

The Greeks and Mayans made some impressive stoneworks, as well. If
shortwave radios could be made from piles of stone, they would have done it
first.

Do you honestly believe the pace of innovation of a slave society can
compete with the pace of innovation of a free society? If so, how? Where
is the evidence?

Slave societies hardly innovate in a technological way. Nearly every
worthwhile invention has come in the years since the common man has had a
chance to profit from his own labors.

> Although they get historic accolades for law and government, they were

> Rome Mark Two; post imperial western civilization.

Law and government isn't technological innovation. The greatest advance is civilization was the concept that all men are created equal.

> The ancient world could be brutal in general. What puts the Romans above

Looks like we can only expect you to make bad assumptions.

> a d y k e s @ p a n i x . c o m
>
> Don't blame me. I voted for Gore.

OK, I won't have any expectation that you are capable of making any
intelligent decisions in your life.

At the time of the Bush/Gore election I could understand a liberal vote
for Gore but after the last four years to continue to desire a Gore win
is just so wrong on so many levels that I can only classify you as a
regressive thinker and an anal one at that.

I just did a search on you and the result is about 8 anal regressive political posts to 2 radio related. Bad average.

If the Romans had short wave, they might have started an Empire
Service, to unite their far-flung territories. Or even a Roman Forces
Network, to provide entertainment and information to their legions.
The speculative possibilities are endless.

The most complex of Greek architecture does not equal the sophistication of the most complex of what the Romans built. Not even close. That is not to diminish the tremendous and positive influence that the Greeks had on the Romans and ultimately, the world. The Mayans could stack heavy blocks in nice tall pyramid shapes. There was no room in any of their large structures because they didn't have the arch or anything like it. They were hulking piles of stone blocks with tiny rooms at the top that weren't big enough to live in. The Mayans also out did the Romans in horrific and bizarre human sacrifices.

Yet another reference to slavery is pointless misdirection. I've already pointed out that the US had the institution of slavery. Do you know how many patentable inventions there were on the CSS Virginia and the Monitor ??? That was done in a slave country. Is a civilization without slavery better ??? Yes... Sure is... Does that mean the Romans were all bad ??? No.... Does that take away from what they accomplished and left for the world ??? According to you, yes. According to anyone else who studies history... No. Done waste your time arguing against that.

No, but the fact that they did study the Pantheon speaks volumes about the level of skill that the Romans had. It wasnt a pyramid shaped stack of blocks. It was and still is sophisticated archetecture.

All men are not created equal. No two living things have an equal chance. That is where law and government comes in. Law and government assures that all men will be given equal and fair treatment under the law. Human rights are cataloged and driven by law. Assured equality is ENTIRELY legal and

social, not natural.

DLEHMA,
.
Three Questions :
.
? Does your existing TV Antenna has three or more TV Guide
Wires to help support it ?
.
? How Tall (Long) is the Mast of your TV Antenna ?
.
? How Long are the Guide Wires that help to support the
TV Antenna and the Mast ?
.
THEN CONSIDER - Using these TV Guide Wires as the Elements
of a Shortwave Antenna on top of your Metal Roof.
.
READ - TV "Guide-Wires" as a Shortwave Antenne
- The [Hidden] Inverted 'V' Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1689
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/2264
.
1 - Use the TV Guide Wires as the Multi-Elements of a
Random Wire Antenna.
.
2 - Use a TV 300 Ohm to 75 Ohm Matching Transformer as a UnUn
between the Antenna Elements and the Coax Cable Feed-in-Line.
.
3 - Connect the the 300 Ohm Leads of the Matching Transformer
one to the Guide Wires and the other to the Grounded TV Mast.
.
4 - Use as 75 Ohm Coax Cable Feed-in-Line between the Antenna
and your Radio.
.
5 - Use a combination of a Right-Angle "F" Adapter and "F"
Jack to Mini-Phone Plug Adapter to connect the Coax Cable
to your Radio's External Antenna 1/8" Mono-Jack Input.
.
* Right-Angle "F" Adapter
RadioShack Catalog # 278-305

Good gun control requires two hands and a wide stance.

Semi-automatics are the most common type of gun sold.

If this guy tried this in a state with a liberal CCW policy this guy
would be dead right now instead of in custody.

Message-ID: <37an8mF5bkqpaU1@individual.net>
Source record: 8113

OK, I seem to understand better now, too. I used to have a random wire that was over 100' long and had the near end of it attached at the top of my VHF/UHF antenna mast. It came down next to the mast (lead in part) down to the radio, and I never had any problems with the mast affecting the signal. Of course the main part of the antenna was up & away horizontal with the mast with only 15' or so of the antenna running down the side of the mast.

If you think there might be problems with it, you could always put standoffs on the mast and run the lead in wire down through them.

> Just out of curiosity, how many addresses do you have in your killfile? Have
> you ever counted them?

Currently at 506 filter rules. About 20 rules are positive or in other words bring people or topics I care most about to the top of the current posting list and the rest are kill filters.

The kill filters ban anonymous news servers and / or domains Trolls like to use. I also ban any curse words, sexual anatomy type words, sexual verbs and religious topical words in subject lines.

Most filters are on individuals. Many are currently not active because once the Trolls figure out that they are not being read they either leave or change their handle. Then I have another entry on them. I have kill filed some people dozens of times and they are still here so I expect that I will be adding another filter when they change. It only takes seconds to create a filter and then I just re-filer the current list of articles and they go away.

I kill file on all aspects of the article headers but it often does not work due to my wonky news server that provides only some of the header information depending on the age of the post.

When things are bad I find the average of killed posts to be around 60%. Usually other people start complaining that the news group is unreadable around those times. I don't have that problem. The news group is always readable for me. I have noticed that the news group always gets worse around school vacation times, which leads me to believe that the trouble makers are juveniles and the rest are attention deficit disordered arrested thinkers.

Recently my filters have only been taking out 35 to 40% of the posts, which required new filters to make the news group more readable. Usually the right ratio is around 50% killed when things are good to more like 60% killed during school vacations or contentious events the last presidential election.

A couple weeks is a short time to build a shortwave radio. But hindsight is
20/20 so they say.

There aren't a great many SW receiver kits out there that I'm aware of. I
think TenTec makes one but it's a general coverage HF receiver and may be
kind of pricey and complicated for a science fair project.

You might try looking at one of the Ramsey kits at
www.ramseyelectronics.com. They have some amateur band receivers matching
their QRP transmitters, plus they also have AM, FM, and shortwave receiver
kits. It could probably be built & tested in a couple days, depending on
your kit building skill. URL is:
http://www.ramseyelectronics.com/cgi-bin/commerce.exe?preadd=action&key=SR2C

If you have some electronic background, you might just try building
from scratch. Charles Kitchin has done a fair amount of work on
regenerative receivers in the past decade, trying to make them good
rather than just translate tube designs to solid state.

Some of them have been specifically for beginners, which have the advantage
that he's used easy to come by parts. Variants of some of the designs
are all over the web.

One of his articles is online (well I did a search, and this one came up
early), is at http://www.arrl.org/tis/info/pdf/0009061.pdf I've not built,
but he knows what he's talking about, and I gather many have built this one.

The deadline is the problem. I could throw one together tomorrow, but then
I have tons of parts. All the parts, or suitable substitutes, could be
had by taking apart some junked consumer equipment, though I'd say two,
the germanium diode and a variable capacitor, might take a bit of looking.
And sadly, both may be harder to buy new locally.

This is a simple receiver, not just in terms of building but in terms of
perforamce. But that makes it a good science fair project, and it
makes room for a good sidebar. Howard Armstrong received the patent
for the regenerative receiver, US patent number 1,113,149 in 1914.
This provided a really useful receiving circuit at a time when
many were still using "crystal radios" (ie no amplification), or
at best tuned RF receivers. And it helped to explain electronic
oscillation, which was important for radio and electronics to advance.
In 1920, he received US patent number 1,342,885 for the superheterodyne
receiver, advancing the state of the art much further, and oddly,
freezing design to that early, since only variants of the superhet
have come along in the years since. And then received the patent
for the superregenerative receiver, US patent number 1,424,065
in 1922. You can see all these patents at the US Patent office
website at http://www.uspto.gov/patft

Howard Armstrong pretty much invented every type of receiver that
has seen common use in the past few decades.

No. Tandy briefly owned Allied, having already bought Radio Shack.
There was a brief time in 1971 (I seem to recall checking the magazines
once and it changed within that year) when Radio Shack was called "Allied
Radio Shack" but only briefly. From when this has come up before,
Radio Shack had to sell off Allied, because of conglomeration laws or
something like that, and it stood alone for some years/decades until
it was bought up by someone else, though it remained as Allied.

Everyone's reality is but a mere perception of what exists. Perhaps the
knobs are missing because the past has not produced a person able to observe
them. Doesn't say much for us does it? Obviously nothing exists if there is
not an observer. You know, like that cat in the box thing! Well, looks like
we might have exhausted the knob topic. whew!

"Allied Radio (now known as Allied Electronics) is a company with a long eight decade
history. It was founded in Chicago, IL. in 1928. Its purpose was to distribute radio parts for
Columbia Radio Corp. By 1932, Allied was selling electronic parts by catalog. Storefront sales
operations were established with the goal of selling to amateur radio operators and electronics
experimenters. During WWII, Allied devoted itself to the war effort by handling government
contracts and high-priority industrial needs. This was Allied's first real experience in industrial
electronics. After the war, Allied continued to sell to the consumer and industrial markets.
Sometime around 1962, Allied Electronics was created as a subsidiary of Allied Radio. In 1971,
Allied was acquired by Tandy (now Radio Shack Corp.) and moved its headquarters to Fort
Worth, Texas. Around 1981, Spartan Manufacturing acquired the company. In 1997, Avnet
took over ownership. In 1999, Allied Electronics was acquired by Electrocomponents plc of
the United Kingdom. Allied Electronics continues to sell electronic components by catalog and
Internet ordering.

Allied Radio produced a line of kits under the Knight label. They were called Knight-Kits.
Although not as extensive a line as Heathkit, they had many offerings in test equipment.
Amateur radio, SWL, audio, entertainment and educational/experimenter kits rounded out their
product line".

Hi.
I tell you to bring your YB-400 with you. Take the best you can!
You'll not having fun with your Grundig MiniWorld-100 especially if you
want to catch exotic stations.
I bet you'll have more luck with receiving exotic stations when sitting
in the prairie far away from any man-made noise and having enough space
for some real directional long wires of 1000ft or more just laying on
the ground....
You'll be wondering how much more crowded the SW-band are here in
Europe. Even my commonly high rated portable Sony ICF-2001D (2010) is
just good enough for some basic listening. So I go with my NRD-525.....

Stirring around in the mix of mankind has always been a dangerous
proposition from the beginning of time. It's just that now days we are so
damn rude and have a total lack of manners about everything we do. This
modern media with it's constant emphasis on the negative and split second
news coverage only makes the world smaller and more cramped. Anything

negative sells on TV. Hum? Why is that? There's just too damn many people and we are all getting tired of each other. I think we finally perfected our art of being a bunch of real selfish pricks. Poor f--kin me!

Tom Sevant [N2UHC] - YES :o) Guy Wires = Guide Wires ~ RHF
.
If you go to the 'original' Link :
TV "Guy {Guide} Wires" as a Shortwave Antenna
- The [Hidden] Inverted 'V' Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1689
.
In it I point out that Insulators or Nylon/Poly Rope should be
used at both ends of the Guy (Guide) Wires to insulated then
from Grounding where they attach to the structure; and Grounding
through the Mast.
.
The Guy (Guide) Wires can be Strung-Together at the Top and
used as a Multi-Element Random Wire Antenna and the Mast as a
Grounding-Point along with a TV 300 Ohm to 75 Ohm Matching
Transformer to connect it to a 75 Ohm Coax Cable Feed-in-Line.
Note - Three to Four 15 Feet Guy (Guide) Wires add-up to a
45 Foot to 60 Foot Long Random Wire Antenna.
.
Or the Guy (Guide) Wires can be Paired-Off (Two-by-Two) at the
Top and used basically as an Inverted "V" {Dipole} Antenna using
the TV 300 Ohm to 75 Ohm Matching Transformer to connect it to
a 75 Ohm Coax Cable Feed-in-Line.
Note - Two-by-Two 15 Feet Guy (Guide) Wires add-up to a 30 Foot
(60 Foot) Long (Dual) Inverted "V" Wire Antenna.
.
IMHO - This can be a very effective [Hidden] Shortwave Listeners
(SWL) Antenna where 'ground space' is limited and there already
is a TV Antenna with a Mast on-top of a Roof.
.
.
iane ~ RHF
.
All are WELCOME and "Invited to Join" the
Shortwave Listener (SWL) Antenna eGroup on YAHOO !
<http://groups.yahoo.com/group/Shortwave-SWL-Antenna/>

People that have had little or no contact with guns usually rely on the TV info they see to base their opinions. Us that have grown up with guns realize that guns have little to do with crime and that humans are the ultimate weapon and guns are only a tool. They have a hard time understanding why any one would need or want automatic firearms. I like all types of guns and collect them primarily because there neat and I collect a lot of other things to I find interesting including old radios, guitars, antiques and small handmade brass trains. I'm the type of person that loves mechanics and guns represent some of mans greatest achievements in mechanical design. Yes it's sad that some were designed to kill humans but war is a catalyst that pushes the envelope in technology and these thing are product of that. Is my collecting guns making the world a worse place? I don't think so and NO guns don't turn you into a killer.

The last non-ham RTTY station I remember receiving was a news service for North Korea, years ago.

I had a PK-232 TNC, with it's SIAM (signal identification) mode that would sniff out the parameters on a mystery signal and attempt to display it for you. It worked pretty well, I thought, decoding oddball digital stuff more often than I expected it to.

It was strange to see outdated old Soviet propaganda phrases about "imperialist capitalist dogs" and about how the standard of living in North Korea had gotten so good that they were having to turn Americans immigrants away from the border, seeking asylum.

I've looked for - but not found - anything quite so funny and tragic at the same time as that RTTY news service from "the people's democratic republic of Korea" or whatever it was called back then. - It's been a while, I can't remember for sure.

Show us the gun permits held by the shooters.

When it becomes obvious that you can't, because they didn't have permits,
then everyone with any intelligence will realize that the assault weapon
ban wouldn't have stopped these guys.

Source record: 8144

Hi Invader..
Congratulations on going to Europe, btw..
Bring a Good SWR (YB 400) and a bit of external antenna..

The SW reception in europe is generally good, but iff you're lying in
bed,
in a modern hotel..and theres 15 feet to the window
you might want a bit of co-ax lead-in from a funky window antenna to
your YB -400

I usually travel with a (double reduction) Sangean 606A
and a Sony AN-LP-1..
& extra batteries & headphones..

& if your out in the country at a " normal European Hotel"
(Think U.S. 1950's)
- You might be able to forgoe the Co-ax..

& HIDE your radio when your not in the room..
Hide it!
leave something else shiny around the room & see if it vanishes
mysteriously..

& buy some Euros before you depart..

Dan

are two provinces that have Holland in their names though.

dxAce
Michigan
USA <<

I would agree, basely on the fact that RN used to identify their
mailing adress as Holland.

I think, though, that the name "Holland" reflects a much older standard
that has, for practical purposes if not sentimental ones, been
superseded by the name "Netherlands."

About five years ago I mentioned a gadget I had bought at a local Radio Shack store to a lady in England.She said the Radio Shack stores in England are called Tandy stores.There is or used to be a Tandy Leather store here in Jackson at the old Zayre shopping center on Terry Road.I haven't been out that way in quite a while,so I don't know if the store is still there or not.Let me check my phone book right quick,,,,,,,,, I don't see the store listed in my phone book,so I guess it isn't there anymore.Didn't Tandy Leather used to have something to do with the Tandy electronics stores? I could be mistaken though.

Honestly, I have enjoyed listening to shortwave for a number of years, and still enjoy it very much. Radio Japan, BBC, Radio New Zealand, CBC, Radio Tiawan, CHina...etc.

Approxiately how much longer will broadcast shortwave, be around? I hear alot of people say its dying. And being an older technology, perhaps it is. I know that most people my age, don't even know what a shortwave radio is, or what it does. They have never even heard of shortwave.

How much longer does it have?

Source record: 8059

One of the big questions is will the diodes in a radio power supply
cause cross modulation. It doesn't happen all that often,
but when it does it is a nightmare. I prefferred to take my time and
do one supply right. I actually have 2, it is nice to have a spare,
just in case. On the R2000's and my Pro2004, the internal supply
always adds a little frying noise. Most of the time the residual
"background" noise swamps that minor noise.
But on nights when the band is quite, that little bit of noise is very
frustrating. I have used salvaged ferrite cores on the power, audio,
video, and RF cables going to EVERY piece of equipment
in our house. I took a bunch of GE MOVs, the kind that plug into the
AC outlet and have a female socket, added a 0.1uF cap between
both "hot" and "nuetral" to ground, and found it to help quiten the
house way down. While the nuetral and ground are connected in the
breaker box, it did help a great deal to quite the TV, alarm clock,
and microwave down. The microwave is still nasty, but my wife doesn't
like it or use it that much. I was goong to add them to the duplex
outlets
but the local electrical inspector nixed that idea. Getting all three
PCs,
my wifes, mine and the dedicated MP3 "juke box" PC, was the biggest
heartache. I had to put multiple ferrite cores on every cable that had
anything
to do with the PCs.
For my car Iused an unused power tap in the main fuse box, and routed
the wire through the firewall to a Cannon style 4pin female XLR. That
type
connector is often found on commercial TV field gear, so I decided to
standardise so I can hook my 12V devices up to the supplies at work.
I used a "bunch" of ferrite cores in a failed attempt to quiten my 1991
Civic.
It is much better then it was before, but it is still way to noisy to
even think
about adding a SW to use while driving. Thank God for MP3 players. I
get
to choose what music I listen to, with no DJs, ads or idiots.

Terry

Yep. And as the domain name suggests, the site sucks royally.
First, we get plastered with bullshit graphics and huge text.
After scrolling to the bottom of the page, we now get to enter the site and
are forced to read a court order no less.

IMNSHO, even though "radio shack" is a registered trademark, that does not
give exclusive rights to the words as the term "radio shack" had been around
and established well before the business came into existance.

Problem is, you apparently got nailed for copyright infringement.
Shouldn't be messin with companies who have high priced attorneys.

It all ends tomorrow at noon. Feel free to send me any and all of your shortwave gear and I will personally see that it gets a decent burial. It is an end to an era....my condolences to shortwave listening.

No, all kidding aside, shortwave radio is not coming to an end. As technology advances, so will monitoring equipment. Just as in digital scanners, the hobby will keep up with technology - it always has. There will be doomsayers and pessimists to argue the point, but just watch - shortwave radio isn't disappearing. If it were, there wouldn't be technical enginners at Icom and Yaesu right now developing next years' new top of the line transceivers and receivers. Hang on to your radios, and your wood-burning stoves. There is much to be said for tradition and simplicity.

OK, I don't seem to be making myself clear, so I'll restart from the get-go. Feel free to tell me where I'm wrong.

Slave states are just plain immoral. The fact that many nations accecpted the immorality of slavery doesn't make it less immoral. Yes, the US was part of that immoral group.

Slave states have slooooooooooow technological progress. Give the Romans a couple of hundred years and they ought to build better buildings than the Greeks. Big deal. No era in human history has learned as much and has had as much technological progress as the era which commenced with the beginning with the antislavery movement in the late 18th century. This movement was part of a larger movement which believed all people are equal in God's eyes. Am I wrong about any of that?

If I recall correctly the Confederacy's Virginia/Merrimac was a technologically simple, hulking ironclad. The Union's Monitor had most of the actual technological innovations, including a rotating turret. Am I wrong about that, as well?

Not much longer, because there's really only enough room in the world for a single information medium. Very shortly, television will cause all movie theaters to close and all newspapers to go out of business. After that, shortwave (and FM) will disappear. Satellite radio will also disappear because it doesn't have pictures. Then, in one final elimination round, television and the internet will have to duke it out. Then we'll be left with only one medium for information. My guess is that the internet will win, since it's more 'interactive'.

The question then is, will the internet render the spoken word obsolete? I say do all the jabbering you can now, because spoken English will soon be an anachronism.

Didn't say it was that simple, but it was a factor. Remember,
Henry had defended Catholicism rather eloquently before
this, so I don't believe it a simple conversion experience
that caused him to perform an abrupt 180.

Considering Henry's title of "Defender of the Faith", to turn
around quickly and reject the Roman Church at the specific
time when he felt he needed heirs, needed a divorce and
wanted to marry Anne smacks of a certain Machiavellian
style, not altruism. Certainly, Henry felt he could get away
with it and not have Civil War (that came later) and still do
with what he felt he needed to preserve the throne. It wasn't
all that long before that the Wars of the Roses had ended,
and he felt he needed to preserve the line and ensure a united
England.

the Roman

> Catholic Church is based on Peter's three times denial of Christ in
His our
> of need.

Did I say anything denigrating the CofE?? No. I just simply found it curious that everyone is up in arms over this, when a precendent has already been set. One, I might add, that was a bit more ruthless and Machiavellian than the current scenario. Considering that many of the German barons who supported Luther did so for both Machiavellian as well as altruistic reasons, I see no reason why that would denigrate what Luther accomplished. Nor the same for Henry; were it not for him, the Protestant Sects that helped to found the Colonies would probably not be around, nor would William Penn found Pennsylvania, nor would Maryland be founded as a haven for Catholics, nor Georgia as essentially a "reformatory" experiment. The Colonies might have turned out completely different, as might have England's relationship to it. Nor, I would argue, would England have become the power that it became without what Henry set in motion.

I should have known better than to ask....hehehehe

Personally I'm amazed at the sophisticated technology going into even the inexpensive shortwave receivers today.

I have two radios made in china, neither over $60. And they have the options only availble on the most expensive recievers of 10-15 years ago.

I certain have found alot of good broadcast content to enjoy, even though everyone says the sky is falling. I even have my wife listen over my should at night when I curl into bed. She'll say, "Take your headphones off and let me hear." Personally i think more people would be into shortwave, (especially the younger 35 and under group) if they just knew about it, and what it offers. I tell my friends I spent 50-50 bucks on a RADIO. And they think I'm crazy. Until I tell them I can hear Japan and China with it. Then their stunned, like its some kind of magic box. Even in this day and age of the internet, and cell phones. I think shortwave just doesn't get enough publicity.

Maybe if Grundig ran ads on MTV....hehehe. I'm just kidding of course.

Personally I don't see shortwave going anywhere any time soon either, especially with so much news out there about the Middle East, Aids in africa, North Korea, Nuclear Disarmement, and China's emerging role in the whole big mess... :) There is alot to monitor on the world scene today. And when I can take it anywhere I go for 60 bucks (for a life time subscription) I'm all about it!!!

We'll probably lose a couple stations a year for several years - but odds are
there will be plenty of kooks and crackpots to listen to for many years.

Tandy started as the leather company. In the sixties, they had comic
books about leather, the same way that Radio Shack had comics about
electronics.

Tandy bought Radio Shack, which had been a regional chain of electronic
stores in the Boston region, in the early sixties, and turned it into
the widespread chain we know today.

It's been a long time since I've seen mention of Tandy Leather, so I
wonder if it even exists anymore.

Who knows? But you do realize that the imminent "death of shortwave"
was around in the early seventies when I first learned about shortwave
radio.

I suspect it's as easy, or even easier, to find a shortwave receiver
today than it was back in 1971 when I bought my first shorwave receiver.
Back then, you either could get really cheap multiband radios (ie
am/fm/policeband/some shortwave) as generic imports at the corner store,
or go to a specialty store to buy a receiver from one of the traditional
shortwave receiver manufacturers. Even cheap receivers are now easier to
use with digital tuning (albeit they may not be better performers than
the cheap ones of decades ago), and I think you can get a better receiver
for less than what it used to cost. And you can get them at Radio Shack,
or since mainstream companies are making them, at various other places.
Sony, for instance, because it sells all kinds of consumer electronics,
is better placed to get shortwave receivers into stores than in the
days of Hammarlund and Hallicrafters when they basically only had shortwave
receivers.

I agree. I'm personally just now getting back into the hobby after a 14+
year absence. Sitting here one morning with a cup of coffee reading the news
on Yahoo, the thought just popped into my head that it would be fun to have
a shortwave radio again.

Right now I'm waiting for the radio to arrive on my doorstep. It's a heavily
modified DX-394 found on eBay - nothing really fantastic, but enough to get
my foot back in the door. :-)

I will argue Bush as murderer, makes my "threats" justified against his as the guilty.
No evidence to substantiate his accusation, makes the accused an innocent person,
straight across the board. Any laywers you know of who might provide some insight,
or tips on warrant challenges?

--

Release the Press

In regards to Johnny's criminal charges.

Being in possession of that I know not of until it reaches my computer, puts the onus on the distributor's server to be held in the same regard equally. To argue for criminalizing the possession of materials that are granted full legal rights to be propagated, as not for sure either way then, but now that they're multiplied to others, makes little sense. For, it only increases a problem that will end up costing the public a great deal more to deride, if the said material is found to be, without reasonable doubt, objectionable from a legal framework set of criteria. Instead, in my case, they've used every impractical assumption regarding the content of what I may have witnessed. I am beside myself dumfounded to learn a picture termed of a topless youth smiling, is a sight the officers involved wish to draw me with as evidenced pedophile. A term classified to include dehumanizing personal acts of sexual assault against the rights of actual children. This is unacceptable. And, I will not be found guilty of approving such conduct. As to other depictions of cruelty I've witnessed by information gathering, I can say without doubt to any as a seeker of injustice, has motivated me personally as a public figure, to take direct steps few others do in defense of the innocent. Unlike the two officers who are my public accusers, I don't believe indiscriminately murdering people by bombing a country brings about protections for those involved for example, and yet, my accusers proudly stated, they were supporters of such unprovoked, and unwarranted ILLEGAL criminal conduct against our children left undefended under their limited bushite haze.

Nothing will bottom this episode of my life, where as a lover of children everywhere, and a champion for human rights around the world, am judged not fit for freedom by a couple expert, pro-war "liberating" bushite bombers. [they both survived serving the

military before taking up this police business as Bush supporters for lawlessness - (they PUPOSEFULLY sabotaged, the planned video recording of public evidence against Bush, that I made to the National Security Division of the RCMP in writing, and in approximately, ten separate audio recordings. [Oops...])]

The bushite bombers searched for depictions of behavior sexually impressionable readers could arguably, lose their self respect or control over, but can be found by any desperate conniver, searching in depictions of a rape scene, naked people on a beach, or in a cloud storm. So, some guide lines on how best to stop their depictions of the rights of children being breached most definitely, should be handled where the questionable material emanates, not with the quester of good taste, out looking to see what is widely, and freely, publicly available by the thousands. Again, not perceived until within the possession of the observer to witness. The classifications of all that is accepted to include in the definition of "child pornography", should not include the beauty of what it is to be nakedly human, or normally affectionate. But that is being open, honest, and beautiful, traits an advocate of tyranny through censorship will run and hide from, for they fear the private human element in our public political affairs speaking freely. Bushitism. [Think of Life, a struggling to survive for better times profiteer, and ourselves, a distant relative nobody's ever heard of till now at most.]

I've been a widely published internet psychology columnist, almost since ideas have been broadly shared as such. And my writing testifies to the subject of human rights denied, as the struggles I attempt to find, real solutions for. The artistic impressions created by the artist, like the words defined within this sentence of words, is but streaming reference points to the larger unbound projections of the manifested mind. A defined, definite conclusion on it's meaning, loses it's truer state. Recognizing the subjective relationship on communicating through media, is ultimately the reader perceiving this conclusion. It is not therefore a conclusion the reader becomes for, but is held in consideration, when creating it's over all pretext, in the form of personal insight or imagination. An imaginative state of fiction, does not preclude it from still being, a shared artistic work suspended through disbelief. I can read a fictionally exciting murder mystery, all the while knowing, the characters who suffer misfortunes, are not living worse because of me, nor to learn the reasons someone is obtusely perverse, make me then, more inclined to disrespect real living, in a similar kind. [read anything from corporate media challenger, the lover, Johnny Wizard] The actions of a character in fiction, does not compel me to give up my own belief of reality, or a respect I grant in those who protect the rights of any child, or adult for that matter. I have many written works for example from those who accolade Bush as of unprecedented prowess when it comes to believing in the holy scriptures, but come

on, who believes that make believe horror show, and how did I get to know people could be so deceived without knowing the indisputable consequence of Bush's deliberate criminal actions? The opinions I hold in reference, are not opinions I just automatically except as my own without thinking for myself in other words. If America witnessed without censorship the vicious evil bombing of God's children in Fallujah or Samara, or the torture of innocent people to death by liar Bush's satanic sadomasochists, every bushite repuglicon who voiced political support for the irrational murderous acts, would be hunted down by millions of armed America men, tried, convicted, and executed in time square, that we all know for certain without room for question.

/ / Expression that degrades or dehumanizes is harmful in and of itself as all members of society suffer when harmful attitudes are reinforced. \ \

But does the witness of such a relationship, granted only to the mind of an officer? Harmful attitudes depicted in Nazi film archives, works of fiction, or artistic expression, does not every time, have us rooting on the bad guys. For if so, police officers investigating harmful child pornography possession, would be left without an ability to even discern a care for any one. But they would and do care. We can see a need, and a honor to defend the rights of children, and I can't think of a more noble police position, to try defending those principles to the best of our ability. Not infringing on free thought access of everyone because some are arguably, more impressionable to the false view of the bushite conspirator. DISTRIBUTERS of illegal material is where the law should not be denied a place to practice. Making criminals out of what someone picks out in coffee grounds, is to say, some thoughts considered, are thoughts better left alone as forbidden when alleged thought of. That is where no god or person should be allowed to falsely determine for our selves, with what words can be thought "about", and what words can not. Of course threatening the freedom of another living individual with the law, better be based on the tangible as documented offences, otherwise, our rights wouldn't be publicly challenged for protection, but of denial. So Hammurabi came up with: A person accused of a criminal offense without any evidence is innocent, and the accuser, especially when it comes to capital crimes, is the bad guy every time. And gee, if America does that, Mr. bush Jr. could go to jail from Canada, China, or perhaps somewhere off somewhere's else where they have laws enforced against the crime of murder.

I am a behavioral psychologist, who's not only written on psychology's pillars of understanding, but also on the struggles of lawless war committed by sexually dysfunctional sadomasochists. I was interested to watch The Learning Channel's special, The Meaning of Love, a four or five part series, hosted by "The Naked Ape"'s, Desmond Morris. This world's most recognized, widely publicized

human behaviorist, reporting on juvenile properties of mutual expression between lovers, lending well into nurturing a caring relationship for each other.

Therefore, is a reader of fiction regarding adult themes, going to read all about who get their toes piggy wiggled, or the professional accountant, who at spin the bottle, becomes the lucky "loser" of a sound deserved spank or two, secretly though, underneath it all, a pedophile who thinks unclean thoughts? Examples of sexual boundaries: Is not a heterosexual, secretly gay when they play with themselves that way? Perhaps a trans cross dresser? And some men may relate to this, but man, lesbians are a dream come true. But then... well, your a guy too right?

Such normal dynamics of continuous change through development within relationships, can not be denied a place, as being mutually beneficial as human in quality, (and maybe fun,) and being, private, none of our business, almost childhood like high jinx of that moment in time. But, leaves a, any person public view of definite acceptance, intolerably immature as inappropriate across the public spectrum. Publicly get into the intricacies of private relationships with your new book why don't you with the Court now John, you have all our ears a-flutter. Grandma doesn't need to know about your proficiency at.. and I'm not the same to Dick as I am to Jane, if you catch my drift.

While two male bushite, who are now helplessly stuck appearing plastered to protect Bush from arrest for mass murder through the advocation of censorship by tyranny, could quip to us being lovey dovey, means your ripe for picking on as, the soft and mushy easy push over in the corner they see. Me? This is why bushite think allowing brave men of our communities to speak openly as would be, calmly, against the criminal dictums of the demon anti-Christ, shouldn't be allowed, because they know, the world would then recognize them for the cowardice and betrayal they hold of our human spirit. A spirit that craves for all, the end to the continuing neo-con wars with the freedom to love Life for being truly ourselves. I see life everywhere, for trying to make some happiness and prosperity. If only we would listen to reasons for believing in creating a better world where life in cherished, is a world where bombs don't drop indiscriminately from the sky in God's name left for blame by the thieving liar bushite scoundrels.

The inner world of artistic creations by story line, is a world of pretend make belief, forwarded by the observer's conclusions. I am concerned to read struggles for entertainment, to include, cruelty against anyone for sexual gratification, but all literature regarding such, does not change my respect for the rights of others, especially those of children. If anything, it makes me more concerned on how respect for another can be better served by the powers and freedom of the unshackled word.

I've seen more child pornography on the television news regarding child pornography, than I've ever mistakenly got through the internet. Providing illegal depictions for public consumption, is where the law should be exercised, but it's often not on the grounds it doesn't prosecute as many. See my point? The FBI did an expensive child porn sting, running for two years in total I think it was, and in that time, they gave away tens of thousands of images to thousands of, who knows how to copy customers, that much later, the FBI would argue were illegal to have possession of. That is like a huge wasted effort OF OURS to distribute such offenseble materials, particularly if it was sold as, "teens in action", "youthful beauty", "buttercups", "a day at the dentist", or something of some sort to entrap more crime business. For our police agencies to set exact criteria on what would constitute child pornography, and scan internet traffic for such distributors, would be far more effective in halting such proliferations. They don't largely because, they'd have to be more precise in determinations, and therefore, many would lose their jobs as then redundant. By not doing so, we can pay billions to have people arrested, labeled pedophile for witnessing depictions of God's beautiful children being normal - while then pleading guilty to avoid the public tarnish such new bite revelations would bring. Destroying families, and future job prospects of individuals such as myself, who hate the thieving, murderous, ignorant as truly ungodly bushite liars to the core of my eternal being. Currently, our legal services, can't help but learn, bush did 9/11 with General Ahmad, and are left speaking "nothing" too - in news public suits regarding the injustice they're recorded not to answer about. Instead, a couple confessed bushite, will conclude who ever witnesses depictions they suggestively reach for as inappropriate, to not possibly also, hold children, and their rights, paramount. Well, that's just simply not true. I call for the arrest of those that ran d squads against only known as innocent families including children in Afghanistan, (Tenth Mountain Division), what do the, two self confessed once blind Bush worshipping police offers, who stand as my public accusers as job requirement, have to state on that denial of our rights to cherish life and liberty? As bushite bullshiters, they don't want to answer to not presently asked public media enquiries, because being "embarrassed" sadomasochists, they then may likewise, get off on accusing community members to be pedophiles, with flimsy examples of what, in their minds, in an insult to our sworn values. Children can be beautiful, but certainly aren't, as adults, interested in being so naked, on the six o'clock news. Do they care to make a scene bigger than it first appears? Imagine me hosting the evening news and the Johnny Jamboree, hashing it out with my opponents on the tough questions, rolling with the insults and the cash offerings, while taking time to sample the world's "best" pizza an beer joints?

Or, do they adroitly believe, they'll teach that Johnny image something or two on their own behalves for our Humanity?

George W. Bush is primarily motivated ultimately with how much they can sucker out of our public coffers, thereby in spirit, advocate censorship on my calls for traitor bush's capture for 9/11.

What they are doing is this:

My "official" court case, (Involving all good people I believe) is enforcing our Law by suggesting everything in my possession can be isolated, onto itself, and made into something I'm not of entirely. All the while pretending, we ain't at all aware of Usenet servers, or my, Johnny Wizard saves the World writings of DOCUMENTED CRIMES AGAINST YOUR HUMANITY. Writings that dominate the interest of the whole investigation, locally, and internationally. But gee, without your help, two bushite "coppers" are going to appear still pressing that bush not be arrested in their contempt of silence, while praying, I not be granted a moment in my trial to speak for my own defense literally. Well, maybe not, after all, we all change with the times. My last conversation with the said two, was quite a way back when they were asked to prosecute Johnny Wizard, and likely came back with the reply, Johnny Who? So, let's not kid ourselves, my words are quite amazing when you think about it. Well, I'd hope in these last days, before this coming media flop, they've taken it amongst themselves, to get together with the loving family to discuss anyone of the hundred or two, Johnny Wizard works of the world, and conclude, George W. Bush is truly bad news to their world's view too.

Even.

Well.. how a you been doing anyway? Are not these developing story lines to be something good going live mainstream... will we demonize the principles of Christ, in censoring ourselves like the individual person of Johnny Wizard is to be, as, being denied personal freedom by "unaccountable" George W. Bush's dictatorship of tyranny through enslavement of the human species, or, will You consider the equal freedom of a telephone call, a cassette tape recording, or perhaps, photo copier to bring us around this, we want our still living rights heard too man. Right now before we alls go it to the clink. Coast to Coast should be broadcasting for America's interest, by openly discussing the still paying costs of the bushite war crime business.

America! - bush's war is something you do not want to lose to in further dying silence. Take it from me. Be a hero. Dream of the babes! - Movie deals. Lives saved!!!

Business is business.

Look you might not care for me personally, okay, but this George W. Bush's treason of nine-eleven is an evil we together, will never, be too weak to stand against as. As indecisive humans without a leader, we will never be too few from demanding Justice be served

in respect of Humanity's interest.

In nabbing those who committed treason against our America's America on 9/11, needs to be completed by firstly, following the crime scene leads at the beginning with Bush's prior 9/11 plans worked with the ring leader's financier, General Ahmad, and how Condi, rumsfeld, and Cheney with Myers, fits in the picture together as likewise traitors. The Iraq war is also a crime against humanity. All stolen monies and property must be sought, then returned to a legitimized democratic government. Torture is outlawed, and finally, all innocent people held in prisons by bushite forces, held without out charge for trial, need to be released immediately as ourselves being denied liberation truly. Let common sense prevail.

Your Kingly King of a Dreamer's dream,

seriously considering prison time to be,
a major downer for my chances at partying,

Johnny Wizard

P.S. TELL SOMEBODY!

--

[I wrote this following Psycho paper a couple years ago.]

Psychodynamic Theory

Freud suggested that there were conflicts between conscious and unconscious forces that influence our feelings, thoughts, and behaviors, theorizing that conscious thoughts only comprise a fraction of mental activity, therefor concluding we, as individuals, are psychologically, more that we can speak as understood completely. Freud used the term unconscious motivation, to address that of which we dont consciously know of as elements of personality, to offer explanation and study of what can not be stated as direct awareness of the persons living relationship to existence with our infinite nature as. To reveal these hypothesized underling forces of personality, Freud developed three techniques: Free association, dream interpretation, and analysis of, slips of the tongue. By researching these areas of experience that are not direct results from conscious abstracts, or conclusions, Freud hoped to reveal an order to causes that reflected a hidden instigation of behavior included. (Freud was secretly a theologian). Freud, naturally, considered that our personalities begin at the start of development, so emphasized childhood experience as the foundation, or framework from where our personalities would be more so dependent upon. Freud formed his theory around divided states of mind: id, ego, and superego, along with 5 psychosexual stages to help structure an understanding of our progressions through human development.

Such wrestling with Freuds ideas, brought me to consider, are our deliberate actions not based on sound judgement? If there are unconscious motivations driving our will, where does that leave principles, as we measure ourselves in honesty? When things are uncertain, do unconscious motivations, gain decisiveness on our faulting conclusions? Can some forgotten childhood experience, unknowingly convince ourselves, one plus one equals something else?

Humanistic Theories

Humanistic Theories emphasize our capacity for personal growth, development of our potential, and freedom to change our destiny. Unlike more defined branches of Psychology that seek underlining hidden forces, Humanistic theories stress self realizations are ultimately, like plans, responsible for the directions we take in personal development, and through the motivations we have as the human species. The phenomenological perspective, speaks of our individual perceptions, be they accurate or otherwise, become our reality, while the Holistic view, speaks of the individual person, being more than individual parts described through divisions of statement, but of a unique entity that is, in part, identifiable to all things mentionable. It would be then right to say, Holistic is a definition that defines its own meaning, as something more than can be completed by its own explanation. Much like dancing poetry that holds lasting truths, or a leisurely good beer on some sunny afternoon. In the field of Humanistic Theory attributed to Maslow, we concede we have desires, that are framed in a hierarchical manner, where the basics for survival are primary, while social and personal needs ascend us through greater living by open communications with the Universe as ourselves. Social Cognitive Theory

The field of Social Cognitive Theory has categorized personality development, to be attributable through three wide based assertions: Environmental factors, cognitive-personal factors, and behavior, which in turn, interact to form everything. Bandura portrayed personality's development into four main processes: developing language ability, observational learning, purposeful behavior, and self-analysis. Bandura emphasized that our cognitive thought out conclusions, is our personality development. He too however, like his predecessors, also dealt with consequences we can attribute partly to forces we are not solely consciously responsible for, and the strengths of those forces upon our outcomes. The perceptions of where we are at succeeding, Bandura argued is a balance in our beliefs in what we are capable of, and so being, brought forward the outlining term, Locus of control. Internal Locus of control is dependant on how much we believe our particular actions can control some outcome for personal reward. While the designation of an external Locus of control, is a delegation to our self on some situations, as having little ability in our world as malleable to our own command for gratification, now, or in the future somewhere. Though, it should be remembered,

our living existence with nature, wouldnt be entirely hostile to the idea of bringing ourselves enjoyment by simply only trying to better ourselves, and the threat of law winning to protect the community serves better than chaotic anarchy. Not much would ever be gained, if failed attempts were concluded as complete failures of experience. Much of Bandura is widely correct as generalized statements about the human condition, so much so, that his, Self-Efficacy construct, regarding self confidence being crucial to succeeding, is as much a reiteration of his Locus of control theorem.

Trait Theory

Trait theory is an attempt to be more scientific regarding the sometimes, ambiguous nature of getting to the absolute truth of our universal condition as individuals. Trait theory's five-factor model classifies all personality traits to be associated into five categories: openness, conscientiousness, extraversion, agreeableness, and neuroticism. (OCEAN). With the theory parsed with a fluidity for change for an individuals classification as developing, while naturally becoming more stabilized as we grow older to our vises, and conceptions of conviction on who we figure we are. The designations, OCEAN, are almost arbitrary, and are prone to relative bias for conclusions. Objectivity in assessing ones agreeableness, regarding a mathematical certainty for example, only comes from whether the person understands how to formulate the answer. Perhaps it is insecurity of suffering ridicule for being stupid, that an individual would publicly argue with his calculator at the grocery store. Or in another way, ones agreeableness, without question, could lead to doing jumping jacks in Brookland if ones not careful. Now substitute agreeableness with openness, or conscientiousness.

An attempted, conscious or otherwise, confrontation to the limits of relative fallible human reason it would appear this is heading for in the field of psychology's relationship to the categories of philosophy, theology, and the true science of measurement. It is the explanation made through the divisive qualifications of language, that fall us to the deception that we are actually aware as could be of our infinite selves, a living part of existence. In the beginning was the Word, and only some super freaky God could figure out what it meant really, maybe. I could be right, to say I may be wrong on things that are not truly separate from everything else, as effects have causes, and no living thing is separate from existing. So, to successfully compartmentalize our identity, is to include our relationship to the winds on Jupiter, and the electromagnetic properties of consciousness being also timeless in nature. (Science teaches us that.)

Genetic factors are recognized to play a significant role in trait theory, particularly when looking at the comparisons of separated

at birth twins, who not only have commonalties in appearance, but occasionally, also in experience with our physical reality, with decisions made, as once thought completely independent, have shown through in life styles, such as employment choices, or naming a pet dog, Toy. Which would beckon to theorize DNA's multi-dimensional space-time design, such as with horizontal gene transfers, to not just a blueprint to making something else, but to some never understandable living holographic relationship to all things in this universe, as intelligence ourselves.

--

for all mankind...

The EVIL anti-Christ "un-accountable to American law cos hees duh president" demon bush Jr., has ordered the commitment of mass murder in our names, while his enemy bush bitch cult following in the corporate news establishments, have refused our communities to publicly address the DOCUMENTED evidence made public by the FBI. Alleging, General Ahmad, bush's business partner, was "secretly" responsible for a wire transfer of 100,000.00 to 9/11's "ring leader" Mohamed Atta, and in addition, that the demon anti-Christ, Our Mr. bush Jr,, had a top secret CRIMINAL war plan in place, worked on with condoleeza rice, and implemented in part by General Ahmad, to criminally invade Afghanistan signed September 9th, 2001, provided to and reported on by Jim at MSNBC. All centered on not apprehending bin Laden, (prior, during, or after) as a prerequisite to guarantee invasion. (, to secure a liquefied natural gas pipeline for pension thievers Enron.) THEREBY, forbidding the apprehension of the true culprits through following the crime scene leads at the real murder scene. See, with a talk radio program we could take calls and help any others who have some difficulty in understanding the logic of reason, as super simple thinking.

So, as many know, the bush regime is FOR REAL pushing still to have me incarcerated for speaking these truths, truths that stand irrespective of my personal opinion, or spin doctoring. Will you, as a complete stranger, but a fellow lover to life, help my cause by requesting also, I be allowed to face publicly my accusers on the, censorship for bushite tyranny radio networks Coast to Coast, or CBC national radio here in Canada? Before, god forbid, a couple, once self confessed bushite "police officers" of tyranny, (death squads against school kids, happy funders of heroin pushers, and who in silence, work getting un-informed soldier teen/bushite sacrificed as the bad guys for Bush's thieving. Done all to gloriously please the fabulously wealthy, safe at home from the clutches of power, neo-con "Cabal" of enemy traitors.) get lost in the translation. The fascist corporate interests are likely not

going to factually report on my trial, but attempt to demonize me with their falsehoods and betraytals against our communities, that is now presently on going without your voice also heard raised yet for objection. A trial, where the evidence that factually establishes bush guilt for treason against all the American People will be sought as immaterial. What the evil enemy as godless bushite dogma blindly hope for is, a silently feared coercion through suggestive threat against Our entire Justice system, leaving the court to have quoting perhaps, only one or two lines written by myself out of context from "The Trial and Conviction of Our Mr. bush Jr" to a jury, while disallowing the documented facts, surrounding my allegations to be refused as my defense. [the criminal leads end at the bush administration's door step with bush's own signature, but bush, as Presidente', can't be arrested under American law, only impeached by the majority of already bought out and sold whole repuglicons.] Counting that our community of peers will have not a inkling what is contained in the very first paragraph of "The Trial...". You my friend alone, you alone, could help US change all that. I, as a single person am trying to stand on the principle, that ANY individual, that is accused of a capital offense without evidence, is UNIVERSALLY INNOCENT, as they would be tomorrow, today, and way back in Hammurabi's day also. And that by reason, the false accuser, is the number one suspect to start with. The enemy bushite MURDERERS try to confuse this extremely simple matter with the powers of hypnosis, or suggestion through the dictate of "our" television and radio cult broadcasts that promote tyranny by fascist censorship.

The nature of hypnosis shouldn't be feared, but learned from to gain a better understanding of the true human condition. Something a bushite hates like our public education systems, is where we through improved communications, halt their criminal transgressions against our better selves.

In the warrant to take all my writings, and computer stuffs, (to begin on their fishing expedition to protect the war monger demon anti-Christ,) it was argued, that the information contained within their possession should remain TOP SECRET. The document has now been made available for my defense, and here is the reason it was argued THREE YEARS AGO, to not have the charges publicly heard.

/ / FROM TIME TO TIME, the NSIS section receives threats from members of the public who after investigation, turn out to be suffering from mental illness. On occasion, proceedings under the Mental Health Act as opposed to the Criminal Code may be more appropriate. In cases of a mental illness, the publicity and sensationalism of an incident such as this one may turn out to be negative to mentally ill persons. \ \

Yeah but, what about DEFENDING the FBI's findings "copper"? Is it that anyone who stands up for Justice in America, who asks loudly for a public platform in OUR media market place, should only be considered, top secretly, mentally ill to think they have a right to contribute on an equal basis, among the oh so lauded, intellectual power breaking crime pushers of our World? (The woman hating child killers, like naive bushite nazi demon liar Mattis wear badges too don't you know?) Are we crazies to want to defend our rights to be free of murderous tyranny? Are they secretly saying on behalf of the bushite: to speak out in praise of the good investigative work the FBI sometimes does, is a bad thing for their future top secret "investigations" on Our behalf? Or is it because, if we believe in doing what needs to be done to protect Humanity from tyranny, would truly mean, evil bushite wouldn't be able to rob further from dying sacrificed as the undefended America?, and soon, wisdom by communication through science and reason would rule our better stays? Would it surely drive me insane to have our public acknowledge our good deeds that work to have freedom really reign indivisibly through Justice supreme? Anyway, Jeeze, I'm already crazy.

The national security branches of all our governments need a major overhaul in protocols. (officers who are involved in uncovering a criminal conspiracy, a conspiracy involving the murder of thousands of now dead Americans, should receive the full support of every police unit this world over as a protective measure for fellow officers. After all, George W. Bush is an American cop killer too.)

Before my site "Wizard's World Wide Works of Wonder" was taken down, I had the center piece (still available in other places) "Stand Together or Don't" as a full page spread with graphics and everything. "Stand Together..." is an essay that only asks that our standing criminal code in Canada be enforced, when it comes to the documented thieving of our communities as committed with the notoriously miss reported workings of the "cheating at play" VLT machine. I also had "Johnny's Last Stand" take a prominent position at the web page, along with "The Alien's Take". So get this: another argument made for the warrant to confiscate my personal belongings and leave the FBI out to die, was attributed to only a single Cnst., who blanketed my entire site in reference as "anti-government". That statement was the only statement made by the officer in regards to her summation of my writing skills, and was made in argument to a Judge to obtain the Warrant, just before the site fell, so I'm now, suspecting, was likely responsible for complaining it should be shut down by maybe.. badge waving?) Strangely (unknown to me until just recently) as it would happen, this same individual I had contacted over the course of several months regarding the VLTs, (on how the DOCUMENTED crime is perpetrated, and on our communities TRUE monetary losses

(maths)) was the same who, top secretly claimed, my writing on Justice was "anti-government." See, I offered to come down to the station and assist with the maths if need be, (remember we're talking the thieving of literally billions and billions of dollars each year from mostly the poorest segments of our societies) to offer assistance in any way I could. (Or, to be told "fool, your mistaken".) But each and every time, I was denied access to have implemented, the protections of the criminal code here in Canada, (that usually makes our country greater than all others,) without a given reason why. [An aside: bushite irrationally hate science and reason because we're intelligent, while I, can't help but respect life by learning something from just about anyone.]

Here is what it further said in the warrant, that up until now was considered top secret. (without the warrant staying secret, the darkness can't stand the light of scrutiny, and I would be freed from the restraints of a bogus warrant to go on shouting for TRUE Justice by DEMANDING the arrest, trial, and subsequent execution of those responsible for the crimes of nine/eleven - bush, rumsfeld, Ahmad, and condoleezza rice. With cheney and myers running a close second.)

[...]

Count # 1: Between the 1st day of November A.D., 2001 and the 31st day of January A.D., 2002, both dates being inclusive, at or near the City of Winnipeg in the province of Manitoba, JOHN DOE aka "Johnny Wizard" did unlawfully threaten to commit the offence of murder, contrary to section 424 of the criminal code.

Count # 2: Between the 1st day of November A.D. 2001 and the 31st day of January A.D. 2002, both dates being inclusive, at or near the City of Winnipeg in the Province of Manitoba, JOHN DOE aka "Johnny Wizard" did unlawfully threaten to commit the offence of murder, contrary to section 235 of the Criminal code against an internationally protected person, contrary to section 424 of the criminal Code.

ORDER

-snpd-

AND UPON being satisfied that the ends of justice would most probably be subverted by access to and disclosure of information filed in the Information to Obtain the Search Warrant filed in support of the application to prohibit access and disclosure;

[Good guy police officers might get the public recognition they deserve in other words right?]

the Search Warrant;

AND UPON being satisfied that access to and disclosure to information filed in support of the Search Warrant referred to above might be used for an improper purpose;

[getting back stolen VLT revenues you mean?]

AND UPON being satisfied that it would be in the best interests of the administration of justice that access to and disclosure of information filed in support of the application for the Search Warrant referred to above should be prohibited to the public;

[What?, don't want US public to know bush, rumsfeld, and condi committed nine/eleven with General Ahmad? Well, now I can see why all the hush hush.]

AND UPON being satisfied that access to and disclosure of information filed 'in support of the Search Warrant referred to above might well pose a substantial threat to the interests of effective law enforcement;

[following crimes scene leads at real murder scenes not good enough for our police agencies? - US people backing up ourselves with as something worth reckoning a better future with?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above would compromise the nature and extent of an ongoing investigation;

[Well, it's only been years now. Let US ask you, have YOU called the news desks of CBC or CNN, about bush's prior plan also? Are sandwich boards, posters, and placards, a police union willing to truly get behind as the untold Justice struggle for our suffering Humanity?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above could conceivably compromise the health interests of a person;

[What about the health concerns of the hundreds of thousands of innocent people bush has since ordered murdered, along with the millions of others who will suffer the consequences of radio-active contaminations for the next few eons? National news coverage is not what I fear, I fear that no one on this lonely planet cares to hear the cries of my Humanity for mercy, or holds love for God as worth fighting for.

-snpd-

So, what now? Please don't leave ourselves undefended from the criminal dictums of the demon anti-Christ, Our Mr. bush Jr. Demon bush is not America, America is America. Look, we arrest those responsible, and we carry on, by firstly reversing almost every thing G.W. the traitor implemented. Look, when Clinton implemented change, he was able to turn the country around pretty quick. Just bring back some progressive ideas. Dump the Patriot Act, and those that voted for it, and truly bring back the Constitution with a respect granted to all Peoples regardless of nationality. Christian Palestinians are humans like US too don't you know? While fixing the neo-con war mess should start by making all co-habitants equal under the principles of fair judicial due process, meaning: freeing the innocent held captive, and arresting for war crimes among other things: bush and rumsfeld, myers and cheney, Allawi and Doud, Tommy Franks, Steven Russell, Saudi wahhabi Buford Blount, woman haters Sicko Sattler and mad dog Mattis, Batiste, Miller - along with all the rest of the rapists and torturers, and then, we.. seek out all the stolen assets taken in America's stolen name. Big job. But we can do it! God is on our side.

I was reading about "Jew Boy..." and I thought, perhaps some may misunderstand my position on Mr. Felton. When I said, "And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say." I was coming from a position that I felt, Greg's own superbly good and strong, intellectual arguments on the bigoted demonization of the innocent, would find himself! at fault with, by not looking for another's view regarding the label of "Zionist". Perhaps I was being too picky, but then, generally speaking, disputing the indefinable public's perception of the Holocaust is a loser抯 argument. Arguments, that generally, refuse to realize, soldiers like today's bushite, would as mindless droids, line innocent humans up next to a ditch, and shoot them all dead for no real reason in particular. [Nazis took film footage early on, then banned it, because it looked so completely insane.] Just like rumsfeld抯 blitzkrieg, or when enemy bushite thieves dropped thousands and thousands of land mine cluster duds in Iraqi school districts, threw grenades into Iraqi homes indiscriminately before entering with guns blaring, and true Americans, like Germans of yester year, still don't have it together as a freedom force worth reckoning with, to immediately destroy, the known of bushite with American law for criminally implementing the sadomasochistic torture of completely innocent people, and in some cases, tortured to death because maybe they finally then admitted, they were in cahoots with whomever as the "terrorist". Thereby, according to America's new Justice speaker, Gonzales, no longer was a human with rights to begin with anyway. A publicly expressed

contempt for US innocent, done in by the disfunctioning sub-human bushite traitors sitting in our office. I'm sure some might understand who the greatly knowledgeable Greg Felton was referring to when stating "Zionists", but just think of the Arab "Semite". Ariel Sharon will steal the definition to victimize innocent Jews with for the American tax payer to foot the bill as, but when an Iraqi Semite, new to English newscasts tells you he's a bonafide Semite really, can he therefore be completely wrong about his true identity? Or how about this: do you think, the persons never shown for public media interview as accepting to receive stolen property like completely furnished houses called those of "Jewish Settlements", contain anything but, bigots masked as religious observers? How else could they possibly live with themselves? Amongst US true believing Jews? What of Hillel do we fail to recognize in not condemning the brutalizing of the innocent in our own names left forsaken? A well entertained teen, growing up in dum-dum America, or here in Canada for that matter, will likely have little understanding of Palestinian Jews or "Zionism", (like we don't regarding regressive tax systems,) but for like a proud Catholic in Ireland, it's something stupid he's suppose to stand up and destroy himself about while in a drunken stupor turning orange regarding some ancient Roman history or earlier biblical teachings not ever comprehended entirely... But then, I thought, gee, I was the one being ignorantly stupid, because in that space where we were communicating during the recorded interview, we had just finished making the correlation of mutual racism/bigotry expressed between Hitler and Ariel Sharon. Sharon/Hitler steals/stole an innocent person's home, then throws/threw them into concentration camps to be victimized further because they抮e said to be inferior to the war funded as ungodly criminals, by the ignorant and stupider than ever American tax payers, again. [See "Trading with the Enemy"] And it was there where, Greg brought forward, that too, they are some of the very same Ideologs, of both scenes, who want always to divide the masses by intolerance, through racism or bigotry, to get ourselves to die at war with our/their ignorance, while the true 'hidden' instigators, (non-descript billionaire weapons dealing private bankers usually,) bask on some beach somewhere in our stolen luxuries, not having to lift a finger to command a full course dinner. That is why bushite are currently working to even further destroy America's public educational system which is already the very weakest of our developed world, and why it is preached on television in America non-stop, invest in deregulating the world market so you too, can rip someone off with slave labor conditions to compete your good for nothing son/father with. One out of three workers, officially, in America earn ten dollars or less an hour. And repuglicons hired near homeless people at 75 dollars a day in

Ohio to walk around carrying we vote repuglicon signs during the mock election. An informed populace, is a group of people growing tired of being taken for victims, who might wise up and stand for real Justice through the Freedoms of understanding. Can you imagine US speaking internationally? I can. If only You'll help me gain a platform to debate the facistic censorship deniers. The Coast to Coast radio netwrok don't want no Americans talking about why Americans are being asked to die for the bounty of, bad guy bushite war profiteering. The wealthy celebs don't have to risk their own lives, just the lives of other Americans denied a voice for representation. So, asking once or twice, and then fading away to give up ain't gonna do it. Coast to Coast only allows an intelectual one time a month to speak for maybe few seconds. That should change to weekly. And Americans should DEMAND America's serious political issues work to be addressed in an open forum like talk radio provides. I am open for challenging interviews. But again, bushite don't like free excange of ideas within our communities, for it puts their Satanic cult leader in a disfavorable light, who then wouldn't so easily, get away with committing mass murder in America, or allowing America's greatest pension thieves, to escape un-accounted.

So, I've been working on questions..

Do you not as an officer of our laws, require evidence to substantiate allegations of criminal impropriety against members of our community?

Would not allegations of murder substantiated without evidence, be false? And would not therefore, the slaughter of innocents, blamed for terrorism without a shred of evidence being known universally, be acts of mass murder committed against US interests? Or for the true believers, terrorism inflicted against G-d? (And, is this not why defining "Terrorism" was forbidden in the recent "Terrorism" conference in Saudi Arabia?)

To persecute an individual nation without a reason substantiated by evidence, would be then the persecution of our forsaken God as the innocent of US individually? Like Christ on a cross somewhere you'd be then right?

Come on, please, help yourself out man. This is Your world too you know,

King Johnny Wizard

"I share the belief of many of my contemporaries that the spiritual crisis pervading all spheres of Western industrial society can be remedied only by a change in our world view. We shall have to shift from the materialistic, dualistic belief

that people and their environment are separate, toward a new conciousness of an all-encompassing reality, which embraces the experiencing ego, a reality in which people feel their oneness with animate nature and all of creation."

-Dr. Albert Hoffman

I Stand Corrected

Okay, I'm sorry, I was wrong. After reviewing communications with my home planet, it seems I may have goofed on location. I wanted to go to Earth, but it seems we suffered a data mix up, and, well, this civilization isn't nowhere near, here where I thought I was. Oops. And.... a.... another slight mix up has me mistaken on another as well too, with an out of date computer malfunction, a glitch, set me back a hundred years, those idiots, and, a, hells bells, I, was... also suppose to praise the Republicans. Doh. Sorry bout dat. Bush, I lied, my fault, I'm an idiot. Please, I hope you can except me for being wrong like I was, an, maybe next time I come back, I'll do it right the way I should. Your not so bad, and I know you would want to do the right thing, if you knew how, like I wish I could be certain for myself sometimes. Maybe at some point we could be friends. Hm, it would seem you people haven't begun evolving just yet though. My mistake again. I suppose that explains allot about my vanishing thrills of excitement about prospects, and our unanticipated exhaustion without explanation. I thought you people would be smart enough to catch on as humans, with me being, you know, Jesus or Satan, Mithras, an immortal child of God, stand in maker of the universe and all that. So, hmm, I guess I'll be leaving shortly, to head out to my original destination, a developing planet I do understand to be years ahead older than your own, who already kinda have an inkling about not destroying life, and really have made themselves as the living, a must see destination. I was destined to a planet system revolving around who you would refer to as Bernards, being originally from deep within the supercluster you have labeled Perseus, as humans too, interestingly through God. It's a small universe after all. My transportation device is of a free energy nature, something much like you have already available, but refuse to implement. God knows why you don't, I mean doesn't. Know I mean. Ah.. No matter where you are in the universe though, as you may discover before destroying yourselves, if your

conscious, and sufficiently intelligent through life to recognize yourselves as a living part of the universes, you would come to the same conclusion, no matter where you do your thinking. They are us equally, and this is true, no matter where your from, stand, or hold. This concept represents the death of ego, but not really because your still the same, you just learn more about how to get around as best we can. The same as it ever was. We, an intergalactic federation, commandeers originally under the apices of the great, we never needed a world war, Sir Admiral General D. Wesley, who's responsibilities dictated, we recognized to be our own through his genius. After being the forerunner of the foundations beginnings, we gave us all an award, and helped many find themselves, comfortably in a state of semi-retirement of which us all, our truly grateful. We in total, so far, are the S.D.S.G., Super Duped Spacegirl Group, consisting of more than twenty thousand, distinct, well connected civilizations, (fiber optics is very popular as well as free solar powers) who through good times, have naturally become friends, in this amazing, got a have a care for yourself because we understand just how fantastic you all really is for benefits, and there are many. The Universe is compassion, love and understanding, but because we are of life, and as growed ups we can also, which includes me occasionally, be greedy, hateful, and stupid. But I guess for yourselves, because life is free, you've deemed it therefore, worthless, for the shortening time you believe you are here to take from yourselves. Survival of the fittest, we as the intelligent universe have surmised, and by you deeming yourselves consciously as obsoletes for profit politically, I guess is for the best, if you really can't figure out why you would. Hmm.. You mammals are dumb. So, I would now suggest all previous writing I've done as incorrect, and highly implausible on this matrix set. Private bankers in their private market on this planet, are clearly the best informed top secretly, Greenspan is who stands over and against our nature with his private plan is betterer, controls the world, and is in with the winners, because they own all you as money to hide from their manufactured fears of your adding abilities, because your really scared of yourself right, and that is what you are all about as them. Continue on as you were, pay no attention, it's just us losers here, take advantage of yourselves, continuing to treat the public like your, oops, I mean their corporations tell we, who you are. Continue to allow the corporations to destroy your living economy

and your souls with the VLTs, while they convince you to think your stronger for robbing the defenseless illegally, like this isn't you here along this reading rainbow. Be blind to the loss of 3 trillion dollars off the market, stolen in my mind, while private bankers continue to take out your interests, leveraged with our properties over a currency that doesn't exist, sending the nation into a depression, then a war to kill all the poor stupid people. Through who, as they say, "nobody", protects your laws, and your fears of being as stupid as they all are, finding yourself isolated in their noisy universe, as we are alone apart, of all that is here silently. Clowns to the left, jokers to the right, stuck here in the middle with a little story that never has been told outright. I love love love love, the sweet things in life! Growing improbable, but still possible. Rock on Art Bell! Okay now, let it ride. Hey boo-boo.

"The power to destroy a planet is insignificant when compared to the power of the Force."

"Profit means money. Money has no heart, no soul, no conscience, no homeland."

- Frank Stronach, Magna International Inc., a man with no heart or soul on his way to hell, announcing plans to move operations to Mexico, because the government has been made weaker by corruption to protect themselves as human, where labour can get as low as only $4 a twelve hour day for children, and where our competitor's average wage rate pay in manufacturing was $1.90, then. However, over the last decade during this NAFTA attack, against every living human being, wages

have fallen a further 50%. Hitler's dream coming through as republican commi swine! Petooie.

"I do not believe that this generation of Americans is willing to resign itself to going to bed each night by the light of a Communist moon..."

- Lyndon B. Johnson

"As Peter C. Newman puts it, "Americans are obsessed with their self-imposed burden of saving the world for democracy." Yet on a list of eighteen leading countries providing assistance to developing nations, as a percentage of the GNP the United States was eighteenth."

(As well as being the last in education and health care. Thanks Dad, thanks allot.)

An excerpt from the world wide best seller, "The Betrayal Of Canada" written by one of our most beloved authors, Mel Hurtig, published by Stoddart, recognized as one of Canada's finest, has ourselves left completely alone by all private lifeless news corporations as living human beings. Gods, if you will.

"I call that a bargain, the best I ever had."

- The Who

"Everyone is in the best seat."

-John Cage

"Please don't lie to me, unless you're absolutely sure Ill never find out the truth."

- Ashleigh Brilliant

"The real geniuses simply have their bright ideas closer together."

- Lichtenburg

A free of charge 17.33% increase: American right wing cowards also hide themselves as the world's biggest terrorist organization. They make us support military dictatorships with our capital and weapons against our wills, like the oppressors of the great Chinese people, or not demanding life term prison sentences of the current Dutch-Shell's board of murdering directors, and have the gaul to slander our hero, Castro, humanitarian of the millennia. The man the entire city of New York gave a party for, way back when they were actually

educated, and could read in their spare time, in
between working only one job, closer to earning a
living wage. But Americans aren't suppose to remember
that, to keep em' dumb. Like "The U.S." routinely
says, Castro's commitment to education and health of
people is not worth talking about, enof sed, get back
to work part time full time with no free time to care,
except of course for war against ourselves as the
losers everytime. One thing leads to another. So just
what am I trying to say? I've been to heavens and
hells and back, and... well... it ain't so bad, and
kinda fun. One and one and one is three dressed up
like a nine, that, well, could be a five, and, then
well, I know you like you know me, and one thing I can
tell you, is we must be free, to do our own things.
All mighty then!

My apologies,

J. Wizard - Demoted to 4th rank Scout

I wrote the letter following "Jew Boy..." the day a single
complaint arrived to the radio station, with the threat that
the ADL would soon be contacted. The letter was provided in
advance of the next day, of the time scheduled for the
complainant to return for a recording of the questionable
broadcast. The station manager refused to give the complainant
my letter, and insured me that I would no longer be allowed to
produce a show for our community. Is this fair to our Jewish
brothers and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong,
would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask
how my afternoon recorded broadcast went, and to discuss the new
week's tentative guest spot with an update regarding the falsely
maligned, Mr. And Mrs. Benderman. The station manager informed me

my phone number had been misplaced, and was managing with stress trying to put together an apology letter to a single individual, who came into the station, while the interview was still running, to demand action be taken regarding the anti-Semitic broadcast that he was certainly going to report to the ADL about. I told her the Felton interview itself was about bigotry through the demonization of the innocent, what the Jews of world war II suffered through, and, that I was a huge defender of religious Jewish teaching. I told her, to offer the individual a chance to publicly speak regarding the issue, with me, or by himself regarding Felton, to try getting specifically to what has got him so much, by himself, upset about allowing my voice heard defending Jewish rights within our community. She told me that she would likely, none the less, have to let me go to appease the sole complainant, for what if a lawsuit should result? I told her to consider her options, reminded her that it was only one single individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

<http://radio.indymedia.org/uploads/big-package.mp3>

Greg Felton : "The fear is necessary for two reasons. And the principle reason has nothing to do with Iraq. it has to do with the government itself. The bush government is criminal. [...] The problem is: how do you keep people from paying attention to this? You keep them focused on an external enemy. [..] so they forment this fascistic hatred of a definable group of people. So, the war on terrorism so called, is not much a way for the United States to protect itself against it's enemy, it is a way for it to create enemies, to justify the kind of repressive measures that would otherwise be intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment, in not allowing what I should have gave: an immediate re-dress regarding, 'who is the Zionist label?', or 'What Holocaust are you referring to?', during the broadcast of January 31st. (bet you we can't get two Christians that agree on everything.) However, I can offer perhaps a show centralized on a chance to exercise your personal views, be they pro or con on where you think we should go from here, or whatever may have you regarding said interview. Or, if you would like, you may wish to do only, or else include, a written work that I promise, will reach as far as the original broadcast. So, actually, this could be a prime moment to have a dialog regarding racism, bigotry, and intolerance. I confess, I may be unaware, and still have much to learn, when it comes to communicating well with all others. But, I know I'm getting better, and I'll tell you, the Justice-Freedom thing, sure seems to be our ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be considered controversial, (as every show I've ever done always has), although I wasn't prepared to hear criticism against the show as being defamatory to a group, or groups of people. As certainly that was not my intent, but however was the difficult subject addressed within the interview. The fundamental teachings of Law, as it pertains to justice and freedom, along with every legitimized religion, is that all free people should be thought of as equals to each other in vigilant protection. And by doing so, one would be serving G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could become a proponent by understanding Jihad). Thereby insuring\realizing that a just intelligent life force rules our chaotic timeless universe in service ultimately to ourselves individually. Giving us in the Torah of Moses, ``all people are created in God's image'' teaching all peoples are Sacred. And as such, would be so in God's interests to defend

as the innocent. While in eternal pursuit of happiness and prosperity for all through just means.

Under Greg's definition as being a "Zionist" conspiracy, negates the failure of himself personally to recognize the public connotation is too vague, and that Hitler's Nazi Germany, like Bush's America, is politically expressing an inability to represent ourselves with respect as truly worthy of fair deliberations amongst ourselves. Sacred, every-one. (Or as in, to rise to the defense of those we know to be irrationally victimized as the godly and innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk about because, it's not really understood. It's preached at us like a sermon. We're suppose to accept at face value what we're told about it, as if to, criticize it, is some how disrespectful. Much of what we know about the Holocaust has been propagated by the Zionists, and can be shown quite untrue"

I replied shortly later "One thing about the whole situation is that innocent people were targeted for murder. End of story. That's what the war was. All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an apparent bigotry expressed, and as such, was too narrowly defining the larger established history of the Holocaust, as being the struggle of the human species in halting, the demonization and then subjugation of the innocent millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg to blankly criticize Greg's false construct of what is publicly understood about the Holocaust, is to deny that much for sorrow and suffering took place against the whole of Humanity, especially, of those who held the practiced Jewish faith. To think the nazi regime would have the gas chambers and the ovens, while the whole of humanity were not strong enough to communicate the unjustness of it all to the German people while it was happening. I have read of a recent documentary that provides film footage of nazi soldiers committing the worst war crimes imaginable to god loving Jews, interspersed with film from the same dated period where, the German people were living civilized lives, left unaware of the atrocities that were being committed against God in their names. Same as America and Canada today, with Fallujah抯 300,000 People being, the undeniable example. Or, are you too,

a convinced denier of that which is fully documented? (Needless and irrational was the indiscriminate murder of the people of Fallujah, but for to have more American soldiers sacrificed in a conflict created by an unjust as immoral totalitarian dictate.) The Holocaust deniers are those the same of today, who refuse our Humanity to nationally communicate those screams of mercy, or for justice regarding the People of Iraq to be served in our true interests as legitimate. More than ten million Russians died fighting the evil eugenic scourge of the "superior" nazi regime, and like those in Poland, Britain and France, as elsewhere testified our established history, (albeit only later), the sadistic ungodly as lawless barbarity that Nazism inflicted upon the general masses, went largely undeterred from our "informative" television and radio broadcasts. The same, almost word for word, and action for action, can be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit, Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to accepting without our objection, to the victimizing of Iraqis collectively as an indiscriminate act of criminality, like murder. As like in the policies of Ariel Sharon, where an innocent, haven't committed an accused crime in their life Christian Palestinian, is denied the earned home they worked and paid for, on a parcel of land shared up until recent times for countless millennia. My personal struggle has been to inform the public on the "forgotten" importance of established evidence, being the only requirement to convince ourselves on who is a bigot, tyrant, a criminal, or a murderer. Will you not therefore, as a fellow humanitarian of this shared world, speak against those you know of, who victimize the innocent to thieve from? Sure you would, if you knew as much for certain about God and this universe, or the under reported, freed to go General Ahmad, funding the mastermind ring leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity ever learn? Well, my plan is to search for guests to speak with, that I'll try not to offend early on. Greg knows, like the Pope knows, as every legitimate police officer worth their grain of salt knows, as so too does include a great many Jewish Jews, George W. Bush used absolutely no evidence to substantiate his therefore, false accusations in our names against bin Laden, while then ardently with Cheney, worked to close outstanding criminal investigations regarding their extremely suspicious behavior. All according to his official publicly documented plan. And speaking the news as thus, does not make anyone anti-Semitic, anti-American, or anti-Human, but pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost wholely human like even. Not of a long gone as lost and forgotten religious dogma, but for now as it always has been found, a mutual

respect for all life as we find ourselves being part of. Or, so we would for Atheists, argue in all likelihood to get to the same reasoned to be, just political decision, to this or any another life and death matters matter.

Because the unjustified criminal war actions of George W. Bush are our shared documented history, others, with an ulterior agenda to propagate their weakness through bigotry or racism, will arbitrarily blame a subjective grouping of people, instead of demanding by godly individual might, the arrest of specific individuals who are actually responsible according to the established as public evidence. So, now who's fault is that? We live in difficult times. To admit weaknesses regarding our corporate news control content decisions, is to seek a better world for our lives through stronger open communications.

I believe the defense of the Jewish faith is found in the indivisible properties of Creation, and who's central belief is made simpler than any other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What is hateful to you do not do to your neighbor. That is the whole Torah. The rest is commentary -- go and learn it." So my challenge in defense of the Jewish faith during the interview, was that those who practice criminal misdeeds, are therefore found by the official definition taught by Hillel, to be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced by the religion's recognized ancient oratator.) By calling alleged criminal actions, the conduct of an entire people, faith, or branch thereof, is to fall into the fascist minutia of bigotry, or racism, held by those who judge us "others" unfairly. After re-hearing the interview, I did find the allegations made by Greg, regarding the Holocaust being blanketed by falsehoods, generally, a failure on his part to recognize the true horror of what that war wrought. And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say. While I, perhaps wasn't thinking along those conceived lines, where at that time, I had just left the thought of: the struggles of the Jewish faith, are the same struggles all young adults go through by naturally establishing our associative identities. Who are you I truly ask? How many news channels even allow us as Humanity to know about the absent reason for the bombing of the Jews of Samara? The Jews of Fallujah? The torturing of completely innocent People to death, as in Guantanamo? Or still unaddressed publicly: the willful lawless criminality implemented by the, therefore tyrannical Bush Administration in suffering God's Iraq? (See missing ``Development Fund of Iraq'', or private mercenaries discipling for Bush as deemed un-accountable to every conceived ``natural'' law? [see the entire Bible for the judgment call on that one...] or, Bush's declarative, he magically owns

everything in stolen Iraq now, [where did it go?] and I can't say anything because he signed his John to 13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview with me, along with your own impressions of our world. Or, if you prefer, you can do a solo written piece, or a recorded statement for the station. I look forward to finding common ground with your concerns. I hope I have got you wondering more, about what trying to save our world from injustice and slavery, in whatever way we can is all about for me really. In these words I can say, I apologize to you, for a resulted perception, that wasn't with better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the broadcast package. So I do thank you for bringing up your important view, that otherwise, would have gone farther without this opportunity, that I offer as a starting point for deliberation, or argument regarding my foolishness. Thanks for speaking, and I hope I have met most of your concerns with a positive light on where I'm trying to come from.

John.

<http://radio.indymedia.org/uploads/benderman.mp3>

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of suffering and misery against all of Humanity as US being the innocent. The innocent in our entirety, is my "God" that I love with all I can will. I am compelled as a living human being to defend America

to the last bush supporter praised if need be. I fight the enemy of God and Humanity with reason, understanding, Akeido, and a conviction that our justice system must prevail for me to be truly myself really.

"He explained to "60 Minutes," "I was told in basic training that, if I'm given an illegal or immoral order, it is my duty to disobey it. And I feel that invading and occupying Iraq is an illegal and immoral thing to do."

The war was declared "illegal" by the U.N.. Why? Because Saddam wasn't found in breach of the internationally agreed upon resolution 1441, (Saddam did EVERYTHING POSSIBLE that was asked of Iraq by the bush administration, and then some Mr. Bush refused to even take him up on. Like national Iraqi television broadcasts.) despite the lies quoted by corporate news America. There was no need for the conflict to begin with as was so reported internationally on march 7th, 2003. U.N. inspectors had complete unrestricted access to go anywhere without delay, and known stock piles of WMD were burned, so could not possibly be completely accounted for by evidential findings due to the fact that they were destroyed beyond recognition. American soldiers were put in harms way to be sacrificed for no better good, but for to allow as has happened, the misappropriation, or as some have alleged, the criminal theft of Iraqi resources, including monies of the Iraqi Development Funds through Presidential decree 13303. Which include the unappropriated, desperately needed, humanitarian aid provisions still denied innocent Iraqis, such as potable drinking water and food stuffs. Democratic principles are DENIED the Iraqis by the neo-con military forces, such as holding all individuals equally accountable to a rule of law. The outlawing of torture, or the outlawing of false imprisonment has not been professed as the action of the neo-con "liberating" force. Mercenaries are not obliged to obey any laws for example. And, "Dr. Germ", and "Dr. Anthrax" are held solely for the fact that they know of the scientific hazards of depleted uranium, and may have warned the uninformed sacrificing American GI, if not held illegally against their wills by the enemy. Commanders such as irrational war criminal Sattler, forbade all men and boys between 15 to 50 from leaving the city of Fallujah, while refusing to

negotiate with anyone, (because as so was openly
confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.
Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

--

I know we're all expected to be selfish, in helping out those others
who cry out for our help, but I beg you, I can't do this alone. My
show did make a positive difference. I need your help in asking I
face my accuser, and politely, with reason, using communication,
and understanding, bring about a better world.

World Productions.

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged only through the public witness of shared mutual experiences, simple, yet, the bushite strategy implemented continually on behalf of the enemy forces in Iraq have been to divide the nation's people with different "legal" definitions, while speaking for typical bushite bigotry, by then offering distinctions of human value between US some from "others". Not freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble

respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment, and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law. God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the

crimes scene leads for nine/eleven, arresting those responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege.

So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

Johnny Wizard

Chow.

/ / ``The Pentagon and the CIA have asked the White House to decide on a more permanent approach for potentially lifetime detentions, including for hundreds of people in military and CIA custody whom the government does not have enough evidence to charge in courts,'' the Post reported. \ \

Not enough for you?

--

/ / Is this satire? Or is this why the US has contracted to build massive prisons to house those they will never charge due to lack of evidence, but hold however long they please? See Dana Priest, Washington Post, January 2 \ \

--

/ / ..said William Winkenwerder Jr, assistant secretary of defence for health affairs "We have no evidence of maltreatment by physicians, or of physicians participating in torture or torturous activity," he said. "We just do not have evidence of that." \ \

What world does William Winkenwerder Jr think we live in anyway?

It was the revelations that the signed sqiggles on the bogus death cetificates weren't made by the actual medical practicioners on charge in Guantanamo. Now, there might have been one or two involved, as has been confessed, HOWEVER, we do know that the death certificates were forgeries to cover up the crimes of bushite nazi enemies. So, count the forgeries, and you'll count the actions of the truly unjust and evil.

--

/ / No one is able to define the mission of the troops in Iraq, or for how long this mission will last. No one at all, including George W. Bush, can explain the US strategy in Iraq. This is because there is no strategy. With the Iraqi resistance raging, it is not clear why the US is occupying this country and why the US is so willing to sacrifice its soldiers there. \ \

Well the strategy is to cash in on the bushite war criming thieves spree actually. Cowardly soldier's die in Iraq, and the bushite fat cats lounge in the lap of our stolen luxuries through the leverage of the mallable dying amerkan mind.

--

/ / U.S. troops targeted by a roadside bomb have
mistakenly killed two Iraqi policemen and two bystanders
hours after an American warplane bombed the wrong
house[..]

An unnamed bushite quote It expressed deep regret for
the "loss of possibly innocent lives". \ \

Wouldn't you kill the traitor who spoke such contempt
for Humanity? The rewards of indiscriminate murders
against the unknown innocents in bushite amerka's
ungodly name, gets yet another lowly forsaken bushite
rightly killed for bad wordcrafts on a make believe
sound stage they think they only have us party to.

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

<http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3>

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

<http://www.truthout.org/docs_04/printer_121004W.shtml>

/ / A sacked CIA official is reportedly suing the agency
for allegedly retaliating against him for refusing to
falsify his reports on Iraq's weapons of mass
destruction to support the White House's pre-war
position. \ \

--

/ / Ford describes incidents of asphyxiation, mock
executions, arms being pulled out of sockets, and lit
cigarettes forced into detainee's ears while they were
blindfolded and bound."

Ultimately, Ford was strapped down to a gurney and
literally shipped out of Iraq illegally on the basis of
non-existent mental problems - all because he had the
courage to speak out against abuses he personally
witnessed. \ \

--

/ / ``I was faced with being deployed to Iraq to do what
the infantry does, kill people, and I had no

justification for doing so,'' he testified. ``This was a criminal war. Any act of violence in an unjustified conflict is an atrocity.'' \ \

/ / He cited the case of five members in the Mississippi National Guard who had been wounded in a booby-trap bomb explosion. Incredibly, their injuries were listed by the military as "non combat." \ \

/ / Williams's squad stopped a dump truck, and an Iraqi climbed out. "Light him up!" the sergeant ordered, according to testimony, and the squad opened fire, killing the unarmed man. Williams and a squadmate reportedly got into an argument over which of them had scored Company C's first kill. \ \

--

<http://www.counterpunch.com/alam12132004.html>

/ / What becomes of those military veterans who undergo amputation? \ \

--

/ / What about the damning report of Charles Duelfer and his Iraqi Survey Group, which announced last month that Saddam Hussein destroyed all of his weapons of mass destruction and their programmes in 1991? \ \

--

/ / ...and we were yelling, 'Train to kill, kill we will,' over and over again. I kind of snuck a peek around me and saw all my colleagues getting the red in the face and hoarse yelling - and at that point a light went off in my head and said, 'You know, I made the wrong career decision.'" \ \

/ / Throughout the 12-year Vietnam War, for example, fewer than 100 Guard troops were killed, compared with the 145 who have died in less than two years in Iraq. \ \

/ / Greene County Director of Elections Carole Garman claimed that she had withdrawn access to the voting records at the direction of Secretary Blackwell. \ \

/ / Blackwell not only did not have the authority to take this action, he is actually in violation of the law. \ \

/ / Williams ordered that the Iraqi man, who had been handcuffed and was being held on his knees in front of the house, be brought inside...

William cut off the plastic handcuffs, laid the rifle near the Iraqi and said aloud to other soldiers in the room, 'I feel my life has been threatened.'

Williams then shot the man twice..." \ \

/ / That America has spent billions upon billions of dollars on the war and the occupation and hasn't even managed to provide sufficient armor to protect its own soldiers is a metaphor for the failure of the whole operation. \ \

/ / It is now estimated that more soldiers have been injured in Iraq than during the Revolutionary War, the War of 1812, or the first five years of the Vietnam conflict. \ \

/ / Webb reported that U.S. law enforcement agents complained that the CIA had squelched drug probes of Blandon and his partner Norwin Meneses in the name of "national security." Blandon's drugs flowed into L.A. and elsewhere thanks to the legendary "Freeway" Ricky Donnell Ross, a supplier of crack to the Crips and Bloods gangs. \ \

/ / The Press Release, just issued, headlined "Conyers Alarmed at Efforts to Obstruct Ohio Recount Effort, Calls Witness to Monday Hearing to Detail Such Efforts", outlines the troubling reports, discussed here yesterday, of Ohio Sec. of State J. Kenneth Blackwell (also Co-Chair of the Ohio Bush/Cheney Re-Elect Committee!) reportedly attempting to obstruct efforts by Green/Libertarian Recount Volunteers in Ohio over the last several days. \ \

--

/ / The "Texas Strike Force" members paid their way to Ohio, but their hotel accommodations were paid for by the Ohio Republican Party, whose headquarters is across the street. The hotel worker heard one caller threaten a likely voter with being reported to the FBI and returning to jail if he voted. \ \

/ / In a half-dozen precincts in Franklin County, people who were not inside polling places by 7:30 PM were told to leave - even if they had waited in line for hours. This is a violation of the Voting Rights Act. \ \

/ / In other words, the exit polls were made to conform to a political decision to declare Bush the victor. \ \

--

<http://www.whatdoesitmean.com/index575.htm>

/ / The massive US Intelligence Reform Bill weighed in at over 3,000 pages and though unread by individual Members of either the House or Senate nevertheless passed all of the legislative hurdles needed in order to become law. \ \

TREASON BIG TIME.

/ / The contract company blamed for the bad food is identified as a small, Qatar-based firm called American Service Center. \ \

/ / From snatch and grab operations to warantless searches, Patriot Act II is an Adolf Hitler wish list.

You can understand why President Bush, Dick Cheney and Dennis Hastert want to keep this legislation secret not just from Congress, but the American people as well. \ \

/ / MIT and the Pentagon have been involved in a fraud that has promoted a weapon system that will have little or no utility and could cost hundreds of billions of dollars. \ \

--
THE SON OF MAN

/ / Anybody who supports George W. Bush is my ENEMY. George W. Bush committed 9/11 with his buddy, General Ahmad who funded the mastermind ring leader. That's according to the FBI. Any bushite who gets in my way, who says that isn't the case,

I WILL KILL. \ \

<http://la.indymedia.org/uploads/son-of-man.mp3>

<http://jerusalem.indymedia.org/uploads/son-of-man.mp3>

<http://baltimore.indymedia.org/newswire/display/9099/index.php>

/ / Mr. Sattler, if you don't want US to arrest those responsible for 9/11, don't you think we Americans should kill you? \ \

/ / They got this plan, in it's final stages, just prior to 9/11, to invade Afghanistan. They couldn't invade Afghanistan, without some sort of attack occurring that would instigate an actual war. they got this plan, and it's all about accusing bin Laden for terrorist activities, and they've spent a year or more working on it, or more. And through all the time they put it together, they never thought to include, one single shred of evidence. Knowing already as Taliban fundamentalists, through an experience that Mr. Clinton

had, it is their fundamental religion not to persecute
the innocent. \ \

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our

Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
<http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml>

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

<http://billmon.org/archives/000172.html>

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind

control, who refuse to allow anyone to state THAT FACT,
for, the enemy bushite would be exposed, and America
would be hunting them down with the Law as the traitors
to freedom they clearly are.

--

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

<http://bellaciao.org/en/article.php3?id_article=4591>

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I
cannot understand at all, why the US Army soldiers speak
broken English!! \ \

/ / During the five days, while the count was yet
conducted, more than three thousand wounded passed
through our hospital. These were the people who lived
nearby. The people who could be delivered to us.
Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it
was an Iraqi town with its regular for centuries Arabic
life. Boling bazaars, noisy streets. And here I am
going through the empty dead city, between the ugly
"pyramids" of destroyed buildings, broken streets, whole
quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar
Nafaa, estimates that between 150 and 175 families are
left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar
Nafaa, "coordinator", should surely know, that it is 175
families that had requested for the help of Red Crescent
totaled several days previous, (without phones, nor
abilities to leave their homes (150?)), NOT, "left in
the city". [THINK: how could they possibly know?
(nazi bushite whores were ordered to murder innocents
indiscriminately as enemies to God)] Also, is "Jotiar
Nafaa", the same woman hater, who LIED in REUTER"S
anonymous hand previously, as the Red Cross, that the
women held illegally as hostages by the thieving evil
nazi bushite forces, didn't really exist? (and who the
"sovereign" Justice system of Iraq, along with World
opinion, God, and JOHNNY had demanded to be let go for
lack of any real criminal charges? (despite CNN and CBC
WILLFULLY refusing to report on the issue as important.
(You know, INNOCENT women held hostage by bushite goons
who acquiesce COWARDLY for rapists and torturers? (Just
like Jew killer Ariel Sharon never gets a fair mention
by "America", nor Zarqawi, as he was in the second
Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175
families stayed in Falluja after the start of the US-led
offensive on 8 November \ \

The organization does not estimate the incorrect fantasy
conclusion held by this pro-irrational Bush article from
Aljazeera.NET. By god Johnny, where tell us could such
lies begin at? Well, let's go investigate... If as it
is, a misrepresentation of Red Crescent's actual
findings, wouldn't you think "they" would put out a
press release to correct this falsehood of public
claim?, to suggest 150 remain in a city the size of
300,000+?, but no greater than 175? without access for

numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples

murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

<http://www.truthout.org/docs_04/112604I.shtml>

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

snpd

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade, complained that they had been "besmirched"

The soldiers said that the commander had fired two shots at the girl from close range as she lay on the ground.. \ \

Will all Jews join me in calling for the public World trial of crimes against God's Humanity, done by these truly godless fascist nazi enemies of the Holy Jewish faith? Or, will the anti-Jewish Ariel Sharon crowd again, march more Jews silently to their graves, refusing to speak for the Bible's Word that all people are created in God's loving image?

Victimizing the innocent to steal from, is not acts becoming of a religious person or a truly "democratic" government.

You was robbed!

They go for $139.00 NEW in the US About 74.00 of your money (don't
have one of those fancy "L" figures on my keyboard).

Sure it does -- its ascii 0163

See URL:
http://tlt.its.psu.edu/suggestions/international/accents/codealt.html

1.. Place your cursor in the location where you wish to insert a special
character.

2.. Activate the numeric key pad on the right of the keyboard by pressing
Num Lock (upper right of keyboard). The Num Lock light on the keyboard will
indicate that the numeric key pad is on.

NOTE: You must use the numeric key pad; if you use the number keys on the
top of the keyboard, the characters will not appear. If you are on a laptop
or computer without a separate numeric keypad one of the other methods is
recommended.

3.. While pressing down the ALT key, type the four-digit code on the
numeric key pad at the right edge of the keyboard. The codes are "case
sensitive." For instance, the code for lower-case &#65533; is ALT+0225, but capital
&#65533; is ALT+0193.

&#65533; Like so &#65533; &#65533;

Lets see if these go thru

Hi,

be happy to own a Grundig YB 400!!! Take only that radio to Europe, you will have real fun with that good radio - from longwave, interesting medium wave to so much to listen on shortwave!

Have a good time - and take a lot of Euros with you indeed!

Greetings from Germany, J�rgen

What I need to do is take out the street lights!

Since you have a Wellbrook, build the cables and do the car battery trick. You will probably need one of those cigarette lighter boxes that increase the number of outlets.

Be sure to check out the cables for shorts. I really don't like those coaxial connectors. You need to use heat shrink to make sure nothing shorts. What I do is get junk wall warts just for the cable and coaxial power connector, then solder the cigarette lighter connector. The cigarette lighter connectors are pretty foolproof.

Ferrite is good stuff, but one noise source are those cat5 cables which I beleive you can't use a ferrite without degrading the network. I know they sell shielded cat5, but I wonder if the extra capacitance will cause network problems.

The canon connectors sounds like a good idea. There are quite compact and very secure, i.e .the plug doesn't fall out.

It seems to me the MOVs provide protection, but I don't see why they would limit noise UNLESS they are preventing spikes from shooting through your power supply. Moto has a family of diodes used for snubbing spikes. These go on the DC path.

Yes, you are 100 % correct here. I'm with you all the way on that one.

> Slave states have slooooooooooow technological progress. Give the Romans a
> couple of hundred years and they ought to build better buildings than the
> Greeks. Big deal. No era in human history has learned as much and has

> with the antislavery movement in the late 18th century. This movement was
> part of a larger movement which believed all people are equal in God's
> eyes.
> Am I wrong about any of that?

I'm glad slavery is gone. 100 %. A slave state is a defective and immoral state. No question. But to deny the accomplishments of a state or culture because it had slavery is to murder the truth. When I speak of the ancient Romans, it is always nice to remember who their contemporaries were and who came before and after them. The Egyptians, Greeks, Romans, Parthian, Huns and the entire hose of other ancient cultures including just about every classic Mesoamerican civilization had slavery. Get it ??? We are talking about the ancient world. They all had slavery. The Romans also happened to have a lot of positive and influential components to their civilization.

> If I recall correctly the Confederacy's Virginia/Merrimac was a
> technologically simple, hulking ironclad. The Union's Monitor had most of
> the actual technological innovations, including a rotating turret. Am I
> wrong about that, as well?

Your correct about that. The Monitor was by far the more innovative and technical of the two. The revolving turret was the primary innovation. I'm also going to point out, that the south developed the first "modern" submarine called the CSS Hunley. May naval historians consider the Hunley to be the most remarkable naval weapons development of the entire war. Sure it killed everyone that served on it, but it was a remarkable piece of technology. Please done insinuate me into the position of being pro slavery. That is as far from the truth as is possible. My point is that

you cant write off chunks of history just because they came from cultures or states that were defective. Yes, they were defective, indeed, but in the case of the Romans, remember the times they came from and dont bother trying to burry volumes of recorded history.

Slavery is not good. It never was and never will be. Free societies are more conducive to technological growth. Regardless, the Romans made a huge contribution to the future. If they never fell, it is likely that they would have abolished slavery. During that later part of the empire, blood sports were banned, slavery would have been too. The US abolished slavery. Do you think that all other cultures are arrested and incapable of positive social growth ???

Now, let me ask you.... Should we just burry the accomplishments and influences of the Roman Republic/Empire ??? If we did that, Europe as we know it would be a totally different place. There would be no French language, no Italian language, no Spanish.. etc. There would also be no USA without the Roman Republic/Empire to precede it.

And, no, I dont like slavery.

Michael

Among other things, it depends on whether or not the stories about satellite radio being replaced with pretty much nationwide wi-fi broadcast antennas by, say, 2015 are accurate. If the stations you mention are available to pretty much anyone with a digital receiver, or even a cell phone, then shortwave's low point gets closer and closer. (I won't say "demise" because it won't die out entirely, unless broadcasting is legislated out of business for some incredibly strange reason.) Until then, there will always be a need for alternative voices to be heard, and shortwave seems to be the only medium with anything resembling "open availability".

(On the other hand, some organizations may feel that replacing shortwave with "local rebroadcasting" is a good thing, especially when it includes the occasional "signal failure" when somebody is saying something that somebody in the USA doesn't want Joe Lunchpail and Sally Soapopera to hear...)

Radio Shack has a bunch of simple project books that may be what you
are looking for and of course they'll sell you all the parts for the
projects.

--

a d y k e s @ p a n i x . c o m

Don't blame me. I voted for Gore.

That's really amazing.
But I have a problem with one thing. Where do these people get all this
money if they are that stupid? I could never figure that out...

Lucky

I understand it's Steve doing exploratory work on something he's always been prone to. The use of alter egos to experiment with deviation is quite common...and NO, I didn't mean to imply being *Canadian* is in any way deviant.

He's been fascinated with both Canada and the homosexual lifestyle ever since his stint in the US Navy. He developed his trademark " 'tard " affliction while enlisted.

It would appear that trying to yell "GUARD" while your palate is otherwise employed is almost impossible, resulting in the muffled, almost illegible sounding 'tard he now subconsciously uses.

I've stopped noticing it because he is unaware he's doing it. It's a subliminal effort to get help for urges he knows he can no longer control. Living in the Tulip Capital of the US doesn't help matters much.

Poor Steve.

mike

Im tellin yah it workx and its so worth it

Turn $5.00 into $50,000...read this to find out how!!!
READING THIS COULD CHANGE YOUR LIFE!!!
I found this on a bulletin board like this one and decided to try it.
A little while back, I was browsing through a newsgroup, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $5.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading... I also did an internet search and found nothing but success stories.

Anyway, it said that you need to send $1.00 to each of the 5 names and address stated in the article. You then place your own name and address in the bottom of the list at ..5, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured "what have I got to lose except 5 stamps and $5.00, right?"

Then I invested the measly $5.00 (I use the word "measly" because $5 really is measly compared to the money I have made through the initial investment). Well GUESS WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in.
In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing.

This is now my fourth week and I have made just over $42,000.00 and it's still coming in rapidly. It's certainly worth $5.00, and 5 stamps, I have spent more than that on the lottery!!
Let me tell you how this works and most importantly, why it works....
Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it.
I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy!

Suggestion:
Read this entire message carefully! (print it out or download it.)
Follow the simple directions and watch the money come in! It's easy.
It's legal. And, your investment is only $5.00 (Plus postage)

IMPORTANT:
This is not a rip-off; it is not indecent; it is not illegal; and it is

virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends.
PLEASE NOTE:
Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days.
This program remains successful because of the honesty and integrity of the participants. Please continue it's success by carefully adhering to the instructions.
You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists.
Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list.
Here are the 4 easy steps to success:

STEP 1:
Get 5 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST."
Now get 5 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery).
Next, place one paper in each of the 5 envelopes and seal them. You should now have 5 sealed envelopes, each with a piece of paper stating the phrase "PLEASE
PUT ME ON YOUR MAILING LIST.", your name and address, and a $1.00 bill.
What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL!
You are requesting a legitimate service and you are paying for it!
Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal!
Mail the 5 envelopes to the following addresses:

..1) Jason R
3702 Werner Ave.
Austin, TX 78722

..2) J Arenas
1600 Malibu
Carrollton, TX 75006

..3) Richonda S
CMR 402 BOX 274
APO, AE 09180

..4) J Roth
2901 Barton Skyway ..3406
Austin, TX 78746

..5)Jesse James
1778 Swift Ave.

Ventura, Ca 93003

STEP 2: Now take the ..1 name off the list that you see above, move the other names up (5 becomes 4, 4 becomes 3, etc...) and add YOUR Name as number 5 on the list.

STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 32,000+) All you need is 200, but remember, the more you post, the more money you make!

This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again.

PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions.
Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way.

NOTE:
You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.)
So, as each post is downloaded and the directions carefully followed, five members will be reimbursed for their participation as a List Developer with one dollar each.
Your name will move up the list geometrically so that when your name reaches the ..1 position you will be receiving thousands of dollars in CASH!!!
What an opportunity for only $5.00 ($1.00 for each of the first five people listed above)
Send it now, add your own name to the list and you're in business!

---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS----------
Step 1)
You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the
entire letter into the computer's memory.
Step 2)
Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list.
Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to.
Step 4)
Use Netscape or Internet explorer and try searching for various

newsgroups (on-line forums, message boards, chat sites, discussions, etc.)
Step 5)
Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this
will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button.
You're done with your first one!
Congratulations...THAT'S IT!
All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup!
REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200
That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.
JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.
Now the WHY part:
Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at ..5 on the letter.
Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at ..5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at ..4 and only 5 replies each, I will bring in an additional $125.00!
Now, those 125 persons turn around and post the MINIMUM 200 with my name at ..3 and only receive 5 replies each, I will make an additional $626.00!
OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at ..2 and they each only receive 5 replies, that just made me $3,125.00!!!
Those 3,125 persons will all deliver this message to 200 newsgroups with my name at ..1 and if still ONLY 5 persons per 200 newsgroups react I will receive $15,625,00!
With an original investment of only $5.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $5.00 to names on the list, putting your name at number 5 again. And start posting again.
The thing to remember is do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!!
So, can you afford $5.00 and see if it really works?? I think so...
People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try?
Estimates are at 20,000 to 50,000 new users, every day, with thousands

of those joining the actual internet.
Remember, play FAIRLY and HONESTLY and this will really work!!!

I heard this on SW radio today and decided to look it up on the net
tonight. So to make it available on the fur end of Valentine's Day,
but I guess that's better than you not getting it at all. :-)

Al

==========

Redneck Valentine Poem

Collards is green
my dog's name is Blue
and I'm so lucky
to have a sweet thang like you.

Yore hair is like cornsilk
a-flapping in the breeze
Softer than Blue's
and without all them fleas.

You move like the bass,
which excite me in May.
You ain't got no scales
but I luv you anyway.

Yo're as satisfy'n as okry
jist a-fry'n in the pan.
Yo're as fragrant as "snuff"
right out of the can.

You have som'a yore teeth,
for which I am proud;
I hold my head high
when we're in a crowd.

On special occasions,
when you shave under yore arms,
well, I'm in hawg heaven,
and awed by yore charms.

Still them fellers at work,
they all want to know,
what I did to deserve
such a purdy, young doe.

Like a good roll of duct tape
yo're there fer yore man,
to patch up life's troubles

and fix what you can.

Yo're as cute as a junebug
a-buzzin' overhead.
You ain't mean like those far ants
I found in my bed.

Cut from the best cloth
like a plaid flannel shirt,
you spark up my life
more than a fresh load of dirt.

When you hold me real tight
like a padded gunrack,
my life is complete;
Ain't nuttin' I lack.

Yore complexion, it's perfection,
like the best vinyl sidin'.
despite all the years,
yore age, it keeps hidin'.

Me 'n' you's like a Moon Pie
with a RC cold drank,
we go together
like a skunk goes with stank.

Some men, they buy chocolate
for Valentine's Day;
They git it at Wal-Mart,
it's romantic that way.

Some men buy fine diamonds
from a flea market booth.
"Diamonds are forever,"
they explain, suave and couth.

But for this man, honey,
these won't do.
Cause yo're too special,
you sweet thang you.

I got you a gift,
without taste nor odor,
more useful than diamonds...
IT'S A NEW TROLLIN' MOTOR!!!

Inheritance would be my guess. Or drug dealing. Those are about the only ways you can get a lot of money without having a lot of brains. The really rich heirs, like Paris Hilton, have professional money managers handle their financial affairs so they can party all the time. The money managers take their fees out of the estate's profits. This is also a way that really rich families ensure that the assets aren't blown by really stupid offspring, they just put the money into a perpetual trust (therefore the "trust fund") and require that it be managed professionally. That's how the idle rich get that way-they're born into the right beds and their parents have "old money" and are probably idle rich themselves. The du Pont fortune goes back 200 years, the Rockefeller fortune almost 150.

4131. antenna expirement flops

Newsgroup: rec.radio.shortwave
Date: 2005-02-15 03:56:01 UTC
From: Michael <md1966@optonline.net>
Message-ID: <VseQd.3598$sb1.1079@fe11.lga>
Source record: 7981

I just wanted to share the results an antenna experiment I did tonight. In the rain, no less.

The antenna was simple. 300 feet of solid core 20 gauge copper wire. I ran it from the 500 ohm connector of my R-75, out of the shack and all the way into the back yard. The yard extends about 200 feet, so I had to double the wire back in the direction of the shack for 100 feet.

No mater what I tune the dial to, I'm getting splashed from the local 50 kilowatt am stations. The preselector doesn't clean it up either.

Every time I exceed 200 feet of wire, I have the same problem.

Weird...

Michael

I have both (have the very early one) and don't blame him for not wanting to trade. Found my one at an estate sale. It was sitting in the garage with an inch of dust on it and a $2 price tag on it. I assumed it had problems but thought I would "take a chance". I got it home and blew off the dust and cleaned it up and it looked like some one bought it and never used it, not a flaw or scratch on it, antenna (original fake loading coil) straight as an arrow and don't believe it ever had batteries in it. RM~

PS, It has batteries in it now. ;)

I pretty much ignore the links king, since much of the time he seems
to be interested in promoting "groups" rather than actually saying
anything, so I don't know if he included this.

David Moisan, who I've not seen here in some time, put together a
faq years back about the GE Superradio, and it has nothing to do
with dummies or idiots. It's probably on various places, but
the first result with a websearch is:
http://mysite.verizon.net/vze20h45/radio/superadio/gesr_faq.html

I have a GE AM/FM table model transistor radio (actually,I own about 200 old radios) here that says on the lower part of the dial,LONG RANGE HIGH SELECTIVITY.MODEL NO.7-2880B.It used to have a push button switch on top to turn it on and off but the push buttom quit working about ten years ago so I cut a little hole in the back of the radio and I hooked up an old toggle switch I had laying around to turn the radio on and off.The radio can run on batteries too.

Yes, I think a crystal radio would be far more interesting for a science
fair project, since a crystal radio does not need batteries or any form of
power other than the radio signals it receives.

I have a crystal set book in .pdf form on my webpage at
http://www.geocities.com/n2uhc/homebrew.html . I plan to build one but just
haven't had the time to sit down and work on it lately.

Sounds like your front end is being overloaded by the AM stations. I guess
the simple solution would be to not exceed 200 feet of wire. A 200' random
wire should work well, I'd think. But if you have local 50 KW stations,
then it's not unusual to get a lot of imaging and intermod with a long
antenna.

What do you mean by "splash"?

I have Beverage antennas of 450 and 700 feet, oriented toward my desired targets *and* (unfortunately) a number of 50kw MW stations in the Seattle/Tacoma area. I also have a 1 kw station 1.4 miles off the end of one of the antennas. I have a number of S-9+65db stations on the dial, but my R-75 and IC-756Pro handle them well. However, I'm not using the hi-Z input but the 50-ohm unbalanced input via a Beverage matching transformer and grounded, double-shielded coax.

Have you tried adding a transformer and the 50-ohm input?

But it may work badly, or practically not at all, without a decent antenna.
Especially if the antenna is inside, and the building may have a lot of metal
to block the radio waves.

With something using gain elements can at least make an attempt at
compensating for both these factors.

I have listened to the 11,655 frequency in the past. Generally fairly
weak signal but listen-able. Since I'm going to be home a few more days
from work now that my flu has turned into an ear infection I'll have to
listen to it with my remaining good ear.

Radio Netherlands 11,655 18:00-21:00 UTC all days of the week from
Madagascar 250 kW to africa in english. Prior broadcasts on this
frequency are in Dutch.

From ILG it looks like:
Radio Netherlands 9,345 14:00-16:00 UTC all days of the week from
Uzbekistan to Asia in English.

It's not a flop if you learned something.

Could be overload problem with a longer wire.

How about using that 300 foot wire for a three sided loop? 100 feet
toward the back, then 100 across the back of the yard and 100 feet back
where you started. Connect one end to shield and the other to the center
conductor of a coax lead-in.

> compensating for both these factors.

Yeah I didn't think about that... you'd need a good outdoor antenna and a
good ground, niether of which would be practical inside a high school
building. A SW receiver may or may not work poorly under the same
conditions, though.

On the other hand, the crystal set could be constructed and tested, with the
results reported in the report or thesis or whatever, but wouldn't work well
for a live demonstration.

Yes, at 0600Z she's still repeating SYN2Z58. I'm sure you're probably
correct about it being important as usually she only transmits SYN2 (2
meaning no traffic) for a few minutes and then stops. I don't think I've
ever heard one transmit this long.

I bought the radio brand new.I used to work at a factory (the factory closed down years ago) in Florence,Mississippi that manufactured auto/truck/lawnmower batteries and once in a while some six volt batteries for the older model MG cars.I used to take the radio to work with me and listen to talk radio stations.There was a married woman there and we used to cuss each other out all the time and she would run over and unplug my radio so she could hear her loud ass boombox radio better.It got to where the push button switch on my radio wouldn't latch down in the on position so I replaced it with an old toggle switch,it works fine now.I am listening to the radio right now.All of the chrome looking paint or whatever it was that the GE factory used to put on those radios is long since gone because of battery acid that used to get on my radio.

I have a modded 394....that I modded myself. It was my first
experiment with modding. (not including my old COBY...hehehe) I got
it about a year or so ago. I luv mine. Especially with the simple mod
that removed the chuff chuff noise when tuning. Now it tunes just like
an analog radio. I'm sure you'll enjoy yours. Make sure you set up a
nice external antenna if you can....100 ft of wire does wonders.

But have you looked? Here, the ham clubs are lousy about promotion
of the hamfests beyond ham circles, despite it being a means of reaching
a new audience, and even keeping the hamfests going when the buyers
and sellers come from a bigger pool.

In other words, a hamfest could happen locally and you'd never know it.

Be sure to check http://www.arrl.org if you're in North America for
upcoming hamfests. there may be a local one, or one within reasonable
distance.

If in other countries, chances are good that there is a national group
that similarly keeps track of such events in that country.

Michael

DRM -- if it had a 7 bit ASCII teletype 'subchannel' type added to it, could eliminate numbers stations...
Binary files can be transmitted using only 7 bit ASCII chars, preferably with a little error correction.
There is a LINUX program that can convert binary files into alphanumeric telegram format, similar to VENONA.

This would be most true if layered AES + modified (A5/1) or Blowfish + (MD5 + SH1) encryption and digital signatures were supported in some way.

AES (inner layer) : http://en.wikipedia.org/wiki/Rijndael
A5/1 (outer layer) : http://en.wikipedia.org/wiki/A5/1
Blowfish : http://en.wikipedia.org/wiki/Blowfish_(cipher)

REDNECK
Defined by Merriam-Webster.

n. red-"nek

Sometimes disparaging: a white member of the Southern rural laboring
class.
Often disparaging: a person whose behavior and opinions are similar to
those attributed to rednecks.
-rednecked

The term redneck has taken several forms over the course and
development of the civilized world.

The term Afrikaans Rooinek, which translated literally means redneck,
is a disparaging term the Boers used to apply to the British and later
became associated with any European immigrant to South Africa as

detailed by David Wilton at UselessKnowledge.com. Wilton also states there is a tale in which it referred to striking coal miners who wore red bandannas as a means of group identification. The Anglo-Boer War was a conflict between British Imperialists and the Afrikaner Nationalists at the turn of the 19th Century. The British wanted to unite all of South Africa. There were two main Boer states, the South African Republic(Transvaal), and the Orange Free State. The war escalated soon after gold was found in the land. One of the more formal definitions, a reference to pellagra, a disease caused by vitamin deficiency, may have been the true meaning for the term redneck. More can be found at http://www.anglo-boer.co.za/.

Another cause for the evolution of the term may come from those who had sunburned necks from working in the fields all day. That term also became a loose fitting term for the Native American who had a darker complexion than the Europeans who colonized America.

Whatever the case, the more modern term redneck has evolved into the more Southern, rural, white member of the laboring class and a disparaging reference to the dialect. Often called Slack jawed or a Yokel, the person often is associated with non-traditional behavior and opinions that may be outdated or modifications to more traditional language or terms.

The redneck is often portrayed as slow, shallow in thought, and regulated to the rural areas, often out of their element when introduced to new concepts or ideas.

Media stereotypes include certain types of country music, commedians, television shows

4170. Re: antenna expirement flops

Source record: 8169

MICHAEL,
.
First make sure that you have both of your
Icom IC-R75's Pre-Amplifiers turned OFF.
.
TRY A LOOP ANTENNA :
Re-run the Wire as a Loop-On-the-Ground (LOG) Antenna.
Try to have the Out-Leg of the Loop separated as
much as possible from the Back-Leg of the Loop.
Use the Two HI-Z Terminals of your Icom IC-R75
for the input for this Loop Antenna.
.
USE AN "EXTERNAL" ATTENUATOR :
Build the GIZMO Box and use the built-in Attenuator
to reduce the Signal Levels.
READ - Portable AM/FM Shortwave Radio-to-Antenna
"GIZMOE" Connector Box
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/2070
NOTE - If you use the NE-2 Lite-Bulb and on a 'normal day'
the Bulb is always Glowing or Blinking; then Trim your
Antenna by 25 Feet and check it again - repeat as needed.
.
USE A MATCHING TRANSFORMER AND GROUND :
Continue to use your 200+ Feet Long Wire Antenna
and Build a Voltage Step-Down Transformer :
Use a Ferrite Core with a 25:1 or 36:1 Turns Ratio.
* 25:1 Ratio = Thirty-Five (35) Turns and Seven (7) Turns
* 36:1 Ratio = Thirty-Six (36) Turns and Six (6) Turns
Use a Ground Rod and Wire with this Matching Transformer.
.
CUT THE SIZE OF THE ANTENNA DOWN BY . . . . . .
* Cut the Size of the Antenna from 300 Feet to 250 Feet
and use 50 Feet of Coax Cable as a Feed-in-Line.
* Cut the Size of the Antenna from 300 Feet to 200 Feet
and use 100 Feet of Coax Cable as a Feed-in-Line.
Plus use a Matching Transformer and a Ground Rod at the
junction of the Antenna Wire Element and the Coax Cable.
.
TIP - In the Future - Pick a Dry and Warm Sunny Day 'to do'
your Out-Side Antenna Work :o)
.
.
iane ~ RHF

BTW, RadioMart had an R-5000 for sale that was running
~$127 or so when I checked last night. Considering the
quality of things that he says is immaculate, he downplayed
the quality of this R-5000. Makes you wonder what the
real quality is, eh?

Another quick way to search is to use Google and search
"hamfest" and "LOCATION", where LOCATION is where
you're at. Some of the hamfests don't show up on the
ARRL site.

I was talking about rednecks (by the way,I am not a redneck) as pertains to Americans.Most people believe all that stuff that hollyweird shoves out and that stuff printed in those fiction books,gone with the wind books and that fiction hollyweird gone with the wind movie comes to mind.Hollyweird loves to steriotype the South.There was slavery as far North to the State of Maine,but do ever hear about that? People are People and there is no difference at all between People in the South and People in the North.I was born on November 5,1941 in Carthage,Mississippi. www.thecarthaginian.com I lived in Martinsville,Indiana in 1947,I lived there for one year.I lived in Bozeman,Montana in 1956 for about six months.I lived in Salina,Kansas in 1957 for about four months.(My Dad was a Supervisor for Michael Baker Engineers Company home based here in the Jackson,Mississippi area and my family lived in a few States) After I finished my two months of boot camp at Fort Gordon,Georgia in December 1962,I was in ARADCOM (Army Air Defense Command) at Scott Air Force Base,Illinois from January 1963 through October 1963.I have lived in several Northern States before and I could see no difference between People in the North and People in the South.Some People believe Southerns are slow,dull,rednecks or whatever,Visit the South and make up your own opinions. www.visitmississippi.org Order a Vacation Guide,it is free.

You might want to put a high pass filter in place between
the longwire and the preselector, nulling out the AM band
as much as possible before the preselector. When I lived
closer to the antenna for WCKY 1530, I homebrewed one
that got rid of the AM BCB band. You can find the schematics
for one in the ARRL handbook or one of Joe Carr's Tech Notes
on DXing.com: http://www.dxing.com/tnotes/tnote06.pdf

> with the hobby.

The Lib Net are a bunch of aging lightweight crackerheads compared
to something called The Eastern Regional Patriot Net.
You can catch these ultra-goofballs right now, every evening at
7:00 PM Central Time (8 PM Eastern) on 3.860 LSB.
This bunch is your genuine core-group of ultra-paranoid misfits
what seems to believes in chemtrails, colloidal-silver, the Protocols of
Zion, Planet X and Aryan purity among other such longtime short-wave
radio crapola, what everyone else knows is both pure bullshit and
the rantings of screwballs. The ERPN itself was started by noneother
than famous UPR Radio goofball Steve Anderson (..currently incarcerated
for firing a fully automatic AK-47 at a Kentucky State Police
officer during a MVA stop) who once broadcast from his home in
Northern Kentucky. Steve's eventual arrest and conviction has
not stopped these fruits and nuts which still meet nightly on 3.860 for
passing of Militia-related "traffic" on a nightly basis, some check-in's
of which have included known Militia members and several others
using both bootleg or invalid made-up ham callsigns. Of late however
check-in's to the ERPN have been sparse or made up of valid ham
radio callsign holders, as the word was out that both RH and a certain
"Homeland Security" type Agency of the US Govt. (hint) has taken recent
'interest' in some of the traffic being passed on this so-called net, or so
it was alleged at a midwestern ham club recently.....

Then again, that's is the consistent & nice thing about your average
right-wing Domestic Kookinschlong...every one of em LOVES to blabber
their openly Seditious and Insurrectionist incitement either thru a
telephone
to a kook call-in short-wave radio show, (..like Alex Jones' daily hit
parade
of paranoia) or from behind a ham radio microphone live and nightly like
they've been doing on the ERPN for several years now. What a bunch
of sloop head dopes, poebuckers and moe-rons! SWL them now boys while
you can, before they operate "dx" later at Guatananamo Bay or some
other similar 'amusing' place. ;)

Not to mention the black market trade in all countries of all nations of the world. There's knockoff weapons being made all the time too in clandestine factories that resemble Mac 10s and AKs etc... We have major countries like Russia that have people in military supply strapped for cash letting things slip by. There are arms dealers running around all over the globe pawning this stuff.

I bought one of those ccrane radios about six years ago that Art Bell and George Noory (are y'all listening,Art Bell and George Noory?) tout so much.Believe me,they are way over rated and over priced and that ccrane radio wouldn't pick up any better than any of my old ratty tatty radios I own and the sound quality of that ccrane radio they tout about isn't anywhere as good as the sound quality of many of my old radios.I sent that ccrane radio back withing the week,back to ccrane in Fortuna,California.But it is your money,go ahead and buy one of those radios if you want to.

I have been fortunate to hear this frequency for years in English here near San Francisco. Of the nearly antipodal transmissions, this one clearly reaches west coast USA the best. During winter local middays, it is almost as clear as their simultaneous Bonaire transmission (!). No QRM either.

>>From ILG it looks like:
Radio Netherlands 9,345 14:00-16:00 UTC all days of the week from Uzbekistan to Asia in English. <<

I have not been able to nab this one yet, at least clearly enough to ID. Have heard weakly, I believe, using SSB.

Try here:

http://www.arrl.org/hamfests.html

...usually at any given hamfest, there are people from the next one
handing out flyers for it and its location.

For $100, I bought an R-392 (Plus Lambda power supply) and a FRG-7 at
a fest. There often are receivers there at bargain prices. Because
of money concerns I recently had to pass up a mint-condition HRO for
$100. (I cried. A lot.) That one sold within the first 5 minutes of
the fest.

We try to help the less fortunate <g>

An early reference to 'redneck' may be found almost four hundred years
ago. The word 'hill-billy' is, surprisingly, not limited to dxAce
type characters.

A good read:

==========
The origins of this term are Scottish and refer to supporters of the
National Covenant and The Solemn League and Covenant, or
"Covenanters", largely Lowland Presbyterians, many of whom would flee
Scotland for Ulster (Northern Ireland) during persecutions by the
British Crown. The Covenanters of 1638 and 1641 signed the documents
that stated that Scotland desired the Presbyterian form of church
government and would not accept the Church of England as its official
state church.

Many Covenanters signed in their own blood and wore red pieces of
cloth around their necks as distinctive insignia; hence the term "Red
neck", which became slang for a Scottish dissenter*. One Scottish
immigrant, interviewed by the author, remembered a Presbyterian
minister, one Dr. Coulter, in Glasgow in the 1940's wearing a red

clerical collar -- is this symbolic of the "rednecks"?

Radio Australia said that it's a Category 5, with 300 KmPH winds.
There probably won't be too many antenna towers left up if they
get a direct hit.

A week or two ago, when a cyclone was going to hit the Cook Islands,
RNZI said that communications were down at one location because they
took down their tower in advance of that storm.

Yea, one of the problems with this broadcast is waking up enough to
actually listen to it. (There's also PM on Radio Aus, and Newshour on
BBC which can be more interesting). It's also repeated at least 3 times
for North America, so there's not that much incentive.

Last week while tuning around, I ran across a US "buy by the hour"
station (WWCR? in the 9 MHz band?) where the topic was largely DX and
Radio, but the host was talking about the Mayo-ists in Nepal and the way
he pronouced Mao Tze Tung was in the most amazing fashion. It's a pity
I didn't take note of the program details, as it be fun to send him an
email asking about the differences between the Mayo-ists and the Salad
Dressing tendency.

Actually many plants have evolved responses to dangerous situations.
Some close up or fold in response to cold and heat, some curl when cut,
and many move in reaction to sunlight or darkness. Those are responses
to stimuli that in some cases are akin to what we generalize as pain.
So again, why are you concerned only about animals experiencing pain
when it is clear that plant life responds to dangerous or painful
situations too. I think you should exhibit the same level of
compassion for the carrot that you have for the sheepshead. Don't you?

Ah, but PETA does not stop there, which is why I said what I said. Relying on PETA for data means that you are opening yourself up to criticism about the source, and allow your argument to be lumped in with the extreme, rather than the mean. I may not like sprawl very much myself, but I do not in any way, shape or form want to associate myself with the eco-terrorists (the Earth First! people, for instance) who will destroy property in the name of the environment. That only provides sympathy for the property owners, and in effect encourages the very thing that the eco-terrorists don't want.

My thinking is that if you're interested in a big spaced radio for something like legal blindness but not total blindness, you can use a Grundig Sat 800, because it has wide spacings between buttons and good sized knobs to work with.

If you pretty much require a computer to work with the radio, go for one with an advanced instruction set. The older Icom IC-R71A and Kenwood R-5000 don't have the instruction sets that the newer models do. Aside from that, I'd not be much help with computer control of a shortwave, since I don't use one that way.

You misread me. I am concerned about all living things, down to microbes.

>> I think you should exhibit the same level of
compassion for the carrot that you have for the sheepshead. Don't you?
<<

As I said before, I will eat and live my life so as to avoid as much as possible causing grief to other living things. For now, and until I am shown something like proof (internet assertions do not fill this void), I am going to have to assume that animals have the most developed nervous systems and greatest potential for feeling pain...and that they will get first consideration. That represents the best information I have.

All of life is a compromise...it is unavoidable. What we can avoid is doing any more damage than we must to survive. That is what I do when I choose not to harm animals. I also try to use products with minimal packaging, recycle as much as possible, work to preserve natural areas and give other living things the best shot I can. You can argue it any way you want - but when it comes down to it, I am acting on my conscience and the best information I have. As one who apparently requires not as much from yourself, you may wish to consider whether you have a leg to stand upon when lecturing someone else when he is trying to do what is morally right.

Bruce Jensen

4215. PETE [KE9OA] 'status report' on the AM/MW Receiver Project

You really have no idea what you're talking about. The so-called "assault rifle" is just a plain old semi-auto that looks scary to liberals. They work EXACTLY the same. A true assault rifle, fully automatic, has been extremely regulated since 1934. I have a .22 rifle that is semi-auto and tube fed, it holds 18 rounds. Is this also an "assault rifle" The rifles you speak of as being "highly prized" are also highly expensive and have been found to be used in less that 1% of all firearms crimes. There basically a non-issue, well, to rational thinking people that is.

cuhulin <<

This is just silly. People do what they must to survive. If you and your eskimo friends need to fish, then fish. If you need to pollute your lungs with tobacco to survive, then puff away. I, too, will continue to do what I must to survive - but since that does not include eating animals, then by my conscience and sense of justice, I will not eat animals.

Be assured, my comments are not designed to lecture anyone, and each person's set of morals is his own. You do what you think is right and necessary. If you like my comments, then think some more on them. If you don't like them, then reject them. Know, however, that when someone takes me to task for trying to do what I believe is right and compassionate, I will defend my point of view. I am secure in my belief that I do the right thing, and will stand up for that belief.

4225. Older Shortwave Radios - Worth repairing?

Newsgroup: rec.radio.shortwave
Date: 2005-02-17 19:52:52 UTC
From: Kurt <candybar4u@yahoo.com>
Message-ID: <FNidnaU1R9CIa4nfRVn-uA@comcast.com>
Source record: 8225

Hi everyone. I enjoy listening to shortwave but I've lately been unlucky trying to keep them in one piece!

I just bought a Sony 7600GR a few months ago because my favourite radio - the Panasonic RF-2600 - was bumped and it fell off a shelf onto the floor. It broke the antenna which I could deal with, but afterwards to found out that it had no AM/SW sound, yet the FM band worked fine. I took iit apart to see if I could see if there was anything on the circuit board that was physically broken or loose, but I couldn't find anything so it's either a) try to find somebody with the proper schematics and equipment to repair it or b) get rid of it.
What do you think? Is it a good enough radio to get repaired or should I maybe just sell it for parts and save up for a decent modern tabletop shortwave radio? I see from ebay that there is still a large demand for older shortwaves which I find perplexing. Is it more of a collecting thing or are they really better radios in so far as their signals go, their analog dials, or do they just sound better because of their larger speakers, etc? I'm happy with everything about my 7600GR with the exception of the sound quality, which could be better and would still like to have a good reciever with big speakers and nice, crisp sound. The FM discrimation on the RF-2600 is better than ANY radio I have ever used.and listened to SW on it for many hours, I hate to see it go, but maybe I can get a few unbiased 'expert' opinons here on what you would recommend?!

Other woes: I lost the large band changing knob for a heavily used Zenith TransOceanic Royal 5000. Anybody know where I can find one? I can barely turn it using pliers now. Is there still a demand for these?

I also have a Panasonic RF-5000 which also was hit and which feel on the floor which broke one of the antennas and bent the case. Luckily, the circuitry wasn't hurt but it's just too large and bulky and don't have the room for it. How good is this radio relative to a others of the same period and can I get an antenna for it anywhere?

Do you think it might be best to try to sell these and use to money to buy a Satellite 800 or something comparable..... or which ones are worth saving/repairing?

Thanks for all your time!

Source record: 8232

It really depends what is wrong with the 2600. The fall may have jarred something loose that can be easily reconnected. OTOH it might be more serious. It would probably cost $35.00 for an estimate if you don't get the work done. To be honest you can pick them up for well under $200.00 on Ebay. I don't think I would put the money into it.

The 5000 was a really nice sounding and good looking radio. I owned one and absolutely loved the full and slightly mellow audio. It is a radio with 30 year old components, so it's performance (other than good audio) will not come close to that offered by say a Degen DE1103. In it's time, it compared well with Zenith TO's and the equivalent sized Sony...Globetraveller(?) It never was meant to be a DX machine, just a big, heavy, good sounding radio. Because it doesn't have a bandspread, critical tuning is touchy and identifying a SSB frequency all but impossible.

>>Yeah, but it's conservative opression, so it's ok. Right?<<

No oppression is good oppression. Exercising responsibility is one thing, and the basic reason for rational laws (to help people along); exercising influence is debatable; but oppression simply is untenable.

BJ

4238. Old DX-160 - basic alignment and recapping (if necessary)

Newsgroup: rec.radio.shortwave
Date: 2005-02-17 20:44:23 UTC
From: bpnjensen <bpnjensen@yahoo.com>
Message-ID: <1108673063.148006.231280@c13g2000cwb.googlegroups.com>
Source record: 8238

Folks - I have an old DX-160 in decent shape with plenty of sensitivity (except on AM, but I think I can remedy that) and fair selectivity. It gets its share of IM junk, but this is the big city after all, so what the heck...it's still a fun radio, even if its frequency is off a bit.

Anyone have a fair idea about the typical cost for alignment and recapping of this beastie? I am willing to hire it out for a fair price...

Thanks,
Bruce Jensen

4239. Re: Older Shortwave Radios - Worth repairing?

Newsgroup: rec.radio.shortwave
Date: 2005-02-17 20:46:46 UTC
From: Pete KE9OA <p.gianako@worldnet.att.net>

Source record: 8239

Although all of your radios are pretty good, the Sat 800 would be better. The RF2600 shouldn't be too hard to repair. Probably either a cracked circuit board or a broken connection to the regulator that supplies V+ to the AM/SW sections. Hopefully, the bandswitch isn't damaged. Your best bet is to put them on eBay, but they would need to be repaired first, unless you represent them as "needing repair". If I didn't have so many kettles on the fire, I would be able to repair them for you, but unfortunately, I've got two new designs in the works.
As far as analog vs. digital tuning, there isn't any difference in the perceived sound unless the digital synthesizer has a high amount of phase noise. Fortunately, the later versions of PLL have improved over past designs. Exceptions are the synthesizers used in some of the premium receivers such as the Collins 651S-1, HF2050, HF8050, etc.
The larger speakers, along with the audio chain help the sound somewhat, but if you really want to hear good portable sound, try to get ahold of one of the older made in Germany Grundig portables, such as the Satellit 210 (TR6005). A dual-conversion unit on the SW bands, with 3-gang tuning on all ranges, including MW/LW. In direct comparison with a Sony 2010 on the MW band, the Grundig unit was better, with none of the 2nd order IM products that the '2010 had. Of course, no Sync detection, no digital readout, but the best portable sound. Some of the upper end Nordmende and Philips units were also good. Nobody makes portables the way the Germans did in the 60s and 70s. A lost art.

4241. ARRL February 17: Anticipated Peter I Island DXpedition Postponed Until 2006

Newsgroup: rec.radio.shortwave
Date: 2005-02-17 21:05:36 UTC
From: dxAce <ChernobyI@RottenToTheCore.com>
Message-ID: <42150720.6CC63F6C@RottenToTheCore.com>
Source record: 8241

Bad news for anyone who had hoped to hear or work this station:

** PETER I ISLAND. Anticipated Peter I
Island DXpedition postponed
until 2006 (Feb 17, 2005) --- The
anticipated Peter I Island
(Antarctica) 3Y0X DXpedition has been
called off at the eleventh
hour. The DXpedition team announced
February 17 that its charter
vessel, the Cavendish Sea, has been
delayed until February 20 instead
of the hoped-for February 18. With a
projected February 21 departure,
the DXpedition ran out of time. "This
latest delay, on top of
numerous previous delays, simply makes
it impossible for us to spend
a sufficient amount of time on Peter I
to justify the DXpedition this
year," said the announcement from Bob Allphin, K4UEE, and Ralph
Fedor, K0IR. "So, we have no choice but to postpone the DXpedition
until 2006." The DXpedition`s first vessel and helicopter backed out
at the last minute, forcing the team to quickly regroup with a new
vessel and helicopter earlier this week. All 20 3Y0X team members had

assembled earlier this month in Ushuaia, Argentina.--The Daily DX
(via ARRL web main page via John Norfolk, dxldyg)

I heard that the Mayo-ists only eat sandwiches. It's a different bunch
of revolutionaries who do Salad dressing. And then there's the
Mustardites...

WBCQ has a couple frequencies around 9330 or so, right at the bottom of
the 31m band. Maybe this is who you heard talking about Mayo.

I meant rights of others, not yourself. If you're invulnerable,
then you don't need rights. But others do to protect them
from you. If everyone's invulnerable, then someone needs
to protect things that aren't invulnerable, like the environment.
(I suppose you couldn't really call them "rights," since in a
larger sense, it's not rights as thinking beings grant to each
other.)

> I don't need meat to survive, therefore I

Nah, I may be an omnivore, but I don't believe in needless
cruelty, either. I'm just not fond of PETA, who probably
does more harm than good to it's cause.

Islam has its various Jesus on a taco type beliefs, for example a Muslim
in alt.atheism once said that the Arabic script for Allah appears on the
human lung. Then there's the fish whose markings supposedly resembled
said script...

It would be funny if the Muslims weren't trying to blow up anybody who
thinks otherwise.

You could just buy another radio off eBay, and
practice on it first. That way, if something
happens, you won't have lost your good model.

I should have done that with the old Sky Champion
years ago, rather than play Dr. Frankenstein with
it.

Come on...the "science" in this is -so- bad that I can't help but think that it was produced by someone who merely wanted to make a certain group of people look really, really dumb. But then, a google search of the name Dr. Abd Al-Baset Al-Sayyed -did- turn up this same transcript on a Muslim site. So...

Maybe it was written to make them look stupid, but they really -are- so stupid that they couldn't see that fact, and posted it as if it were true. It's a funny thought.

For a few years I had a web site devoted to that stuff. It's presently being re-done...but I am -so- tempted to put up the old pages just so everyone can see what you're talking about. It's funny stuff!

This is a dx440, fairly decent except for the whine of the circuitry
and a little drift on ssb. I'd really like to have better
selectivity, though. If I tune in wwv on 10mhz, I can hear the
station on 9.885 enough to be annoying.

Own a bunch of Halliburton stock do we? The sad fact is they could still make a good living doing it right. So, that means they're financing a bunch of "other" stuff with the grotesque profit margin as well.

Best regards,

John Halliburton-yes one of those Halliburtons, just too many branches over in the family tree.

You have a local noise problem. Something near you in your neighborhood
or in your house is generating this noise. It might have something to
do with a light or lamp controlled with a dimer switch.

It is typical that the noise gets worse at lower frequencies as
electronic devices are allowed to generate more noise at lower
frequencies.

In a cave in Afghanistan US troops found a copy of the Homemade H Bomb
hoax that has been going around for years, you know the one where you
turn an Electrolux into a WMD. Apparently the Al Qaeda blockheads
thought it was real and were trying to assemble one. Also found were
various weapons and bomb designs taken off the internet. I don't know if
they had an Arabic translation of The Anarchist's Cookbook, but it
wouldn't surprise me.

Drake advertises the R8 and R8A as having 'sideband selectable sync' but you have to use the passband offset to select one side or the other. Certainly not as good as the R8B detector. Interestingly the RX-350 (and some other receivers) give you the choice of both sides, lsb or usb. I guess if there is no adjacent interference, the 'both' choice is OK but I still don't see what the benefit is over a choosing the sync with one sideband.

The R-5000 also emits a morse code beep for each key press. This can be very handy for the sight impaired. I think this receiver may be the best choice here.

THIS,
.
Find a 'friend' in the USofA.
.
Send 'the friend' two $150 USD Money Orders
that are mailed seven days apart.
.
Mark one of the $150 USD Money Orders
"Payment for USED Shortwave Radio"
.
Have 'the friend' buy the Grundig Satellit 800-M
from Amazon.Com and Shipped to their home
address in the USA.
.
When the Radio arrives at 'the friends' home;
have them remove the Radio from the Box and
Test the Radio on both AC & Batteries.
.
Then have 'the friend' prepare a Receipt for a
"Used Shortwave Radio" Price $150 along with
Three Copies.
- Original Receipt is sent separately to you
via First Class Mail.
- One Copy is Attached to the Outer Shipping Documents.
- Another Copy is Enclosed inside the Shipping Box.
- The Last Copy is retained by 'the friend'.
.
Next 'the friend' reboxes the Radio in the original Box
and Outer Shipping Box with a Copy of the Receipt for
the $150 Used Shortwave Radio inside.
.
Determine the best method of Shipping for you and
'the friend' from the USA to the UK. Send 'the friend'
Payment for the Shipping Cost.
.
yes it is... as easy as that ~ RHF

photos and full description.

PANASONIC RF-3100 Portable Communications Receiver. Pre owned, this

item has been tested and is in EXCELLENT working condition. Minimal

wear cosmetically, still has the tag on the front.

Here is some dadta from the sw web

General Coverage Portable Communications Receiver Rating (1-5): HHH

(3)

Made In: Japan 1982-1985 Voltages: 120 VAC

Coverage: 525-30000 kHz +FM Readout: Digital Fluor. 1.

Modes: AM/SSB Selectivity: 7/3 kHz

Circuit: Double Conversion

Physical: 14.6x4.8x9.5" 8 Lbs.

Features: ¼" Head. Jack, S-Meter, S-Meter Lamp, S-Meter Lamp Switch,

RF Gain, BFO, ANL, Tilt Bar, Bass, Treble, Record Jack, Speaker Jack,

External Antenna Jack.

Source record: 8338

Recapping? My old DX 160 is still playing away nicely. I bought it new around 1976 and haven't noticed its performance is degrading. I am not a tech so I can't say for sure but I don't think that the caps in this radio are the kind that need replacing. They still look nice and shiny unlike the big waxy cardboard ones in the old Hallicrafters rig.
Experiment awhile with the fine tuning and main tuning. You will reach a point where one or the other will show the correct freq. for the band you are on. Note the "log " numbers on a piece of paper and you should be able to get pretty darn close to a freq. when you want to. If you have a digital radio you can use that to help point the way.
Enjoy the radio. They are a lot of fun. I don't use it as my main radio but enjoy dragging it out and using it from time to time. I have been using it lately to listen to some 120 meter ham ragchews and setting the BFO pitch to certain levels can overcome some local noise. It is a bit like a poor man's passband tuning.
Regard, Bob

WORLD WIDE DX CLUB [WWDXC]
WWDXC => http://www.wwdxc.de/wwdxc.htm
WWDXC is a non-political DX organization, founded in 1966.
Its aims are to strengthen this fascinating and scientific
hobby as well as the international DX movement for better
understanding and friendship among nations.
.
FWIW - Anyone can become a member of WORLDWIDE DX CLUB
regardless of nationality and political belief.
The WORLDWIDE DX CLUB does not claim to be the biggest or
best DX club in the world. Nevertheless, it offers its
members and subscribers a rather good monthly bulletin
(mainly in English) entitled "DX MAGAZINE" with
up-to-date information on most aspects of DX'ing.
MEMBERSHIP APPLICATION => http://www.wwdxc.de/
Each member is given a membership call in accordance with
the international amateur radio prefixes and receives our
multicoloured membership certificate.
.
NOTE - Members of WORLDWIDE DX CLUB will receive "Top News"
regularly by E-Mail, if they fill in the Form below and
submit it to us (or just send an E-Mail To : mail@wwdxc.de)
eMAIL REQUREST FORM => http://www.wwdxc.de/topnews.htm

DX'ing aside I can't imagine buying a radio that does not have a sync detector. Conditions may be different elsewhere but here on the west coast where nighttime sky-wave competes with ground wave from BCB stations one to several hundred miles away sync detection makes listening possible on some nights. I have had the destructive interference last for a minute or two at a time.

I wish the car radio had sync detection after missing a 30 to 90 seconds of a talk program.

Even distant SW signals beamed here that are fairly strong usually have some periodic fading. I use the sync detector most of the time I'm listening to the radio either BCB or SW.

You are correct.....we need something like this radio to fill this niche. Up until now, I haven't seen any MW receivers that had what I would call "lab standard" performance. That is why I have been building my own MW receivers for the last ten years. I think that LW reception is a good bonus. I was talking to Dale W4OP yesterday, and he suggested that an SSB detector would be better for the transcontinental DXers because they would be able to hear the hets better. I just am not sure yet.
So anyway.....this unit would have separate bass and treble controls, with a good quality audio section and a good internal speaker. It will have line level output, for those who would like to hook it up to their stereo system. It's that spectrum analyzer display that is slowing this whole project down.
As far as performance, it is the most amazing radio that I have ever played with. If only we could get it into production by the summer.....

Pete

Being able to pick the sideband to lock to makes a big difference in
eliminating adjacent channel interference. I traded my R8 for an R8B
and it was a big improvement. This choice is not the same thing as
adjusting the passband control. The R8B also allows you to listen to a
ISB broadcast very effectively.

4299. ? Why is eBay 'Better Than' Gambling ?

Newsgroup: rec.radio.shortwave
Date: 2005-02-18 08:15:22 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1108714522.801424.122110@z14g2000cwz.googlegroups.com>
Source record: 8349

BAD,
.
This sort of Public 'Visible' Bidding is called Ladder Bidding.
[Just How High Do You Want To Climb "The Ladder" With Me ?]
.
It says that not only did I "Bid Up" the Item : but there are
Several Bids so you can not come in at the Last Minute
(or as little as 6 Seconds) and Steal the Auction
{aka : Snipers} = A Form of Bidder Intimidation.
.
Some times the Series of Ladder Bids are a Bluff and some times
they are a Series of Quantum Leeps.
.
A Last-Minute Mega "Hail Mary" Bid could Leap-Frog a Series of Ladder
Bids. Example : $596(4X) Ladder Bid might be Leaped by a Last-Minute
Mega "Hail Mary" Bid of $1357 !
.
Or a Bidder might try Nibbling : A series of small Bids to find out
what the first three bids of the four were without exceeding the four
and last bid. Nibbing is also used by some Bidders to find out the
"Reserve Price" of an Auction.
.
and now you know ~ RHF
.
.
FOR ME THE QUESTION IS : WHY IS eBAY 'BETTER THAN' GAMBLING ?
http://groups-beta.google.com/group/rec.radio.shortwave/msg/0db1557fdbe77b70

http://groups-beta.google.com/group/rec.radio.shortwave/msg/5d81ab8f5c1d6063

[Because Gambling is Win-&-Lose and eBay is Win-&-Win.]
.
In Gambling - You Place Your Bet :
- Sometimes You Win The Money.
- - Then again many times You Lose Your Money.
.
On eBay Auctions - You Place Your Bid (Bet).
- Sometimes You Win Your eBay Item.
- - Then Again - You Never Lose Your Money.
.
NOTE: On eBay Auctions - You Always Get Something of Value
- - - The ITEM -or- Your MONEY !
.
When It Comes to 'Bidding' on eBay: To Me Its Like Playing Cards.
The Excitement can be Being-In-the-Game.

Peeking at the Sellers Hold Card (Reserve Price) and Calling
the Other Guys Bluff.
However, If I Want the Item {I Can Taste the "BUY" Coming On} :
With Two Minutes to Go - Then It IS A Different Ball Game :
Throw One Big Bomb (Hail Mary Pass)
- and Score a Touch Down
- - and Win the Game.
(If Not... Oh Well there is Always the Next Auction).
- - - Smell That BUY !
.
Maximum Bid Reality Check for eBAYers:
- If the Item is still available commercially.
- - Then the 70% of MSRP Rule should apply.
- - - It is Truly Sad to See Someone Bid More Than Retail.
- - - - For Non-Collectibles With NO Manufactures Warranty or
Product Guaranty.
.
Zero (0) Bidders Warning and Low eBay Member's Score Caution for
eBayers: If you are Bidding in an eBay Auction Against a 'New' eBayer:

With -O^O- 30 Day Marker and a Zero (0) Score.
Be Advised and Warned - They Want to Make 'their' Mark and
Win an Auction. They Will Bid High and Often Over Bid an Item
To Bid Against Them Is a Fools Game [.]
This Caution generally Applies to eBayers with a
Score Under Ten (10) Too !
.
As Always - The Best of Good Buys ~ RHF
{Retired-Healthy-and-Free}
.
.
The-Bottom-Line "Beware Of" : Oh No... I Paid Too Much !
.
.

I bought a brand new one from Gilfer, modified by them. I loved that BIG radio, but I could let it warm up for over an hour and it would still drift nearly 2 kHz in less than an hour. It was tough trying to record something unless I sat right with it.

"This sort of Public 'Visible' Bidding is called Ladder Bidding.
[Just How High Do You Want To Climb "The Ladder" With Me ?]"

It's just an attempt to discourage anyone else from trying a bid. The potential bidder is suppposed to interpret that series of bids as having an impossibly high ceiling. In reality the current bidder's the last bid takes precedence over all the others he made. The only way to find out how serious the first bidder really is would be to put in a proxy bid for your maximum price.

"It says that not only did I "Bid Up" the Item : but there are
Several Bids so you can not come in at the Last Minute
(or as little as 6 Seconds) and Steal the Auction"

I think it is also an example of a bidder incrementally increasing his proxy bid. There is only one bid in force and that is the current bidder's last bid. His last bid is the one you will be bidding against should you decide to join the battle.

It doesn't appear consistently, which is strange.

I do have to give Google credit for listening to the users of their free news group service. When the Beta version was available to all there were several bugs. I sent at least three emails and received a cordial response that addressed the specific problem and assured that they were working on the bugs. And those bugs are now gone.

I have found Google to be far more responsive to user problems than the fee-based services like AOL or Compuserve ever were. And Google is free.

Wanted: An Investigative Reporter to Break Open the Explosive Story of a Mainstream Press that Betrays America

The White House apologist mainstream press corps is now flagellating the Internet blogs and news services, such as BuzzFlash, claiming that writers on the net are fast with the truth.

What the reality is is this: sites like BuzzFlash.com are fast, fast in telling the truth. The New York Times and Washington Post are so interested in protecting the status quo that they are now the tail end of breaking White House scandal stories, rather than breaking them. They can lay claim to be 12th and 13th to publishing hot news stories, two weeks after they've hit the Internet.

You've got White House protectors like Howard Kurtz, who is laughably called a media reporter for the Post. If Kurtz saw Karl Rove drop Howard Dean's body over the White House fence, he'd call his good buddy, Scottie McClellan, the White House Press Secretary, and ask him what happened.

Scottie, 'ol chap, would tell Howard that it was only Karl tossing out an old rug. Kurtz would tell him, "good to go," and the story next day in the style section of the Post would be, "I called Scottie McClellan and he assured me that Karl Rove was doing some late evening cleaning of his office and decided to throw out an old rug himself. That's all it amounts to." Oh, yeah, and on page A16 of the Post, there would be a small article, below an add for Filene's Bargain Basement, "DNC Chair Howard Dean Reported Missing."

The layer of editors at the Post only ensures that no story will end up in the news section that will bring down Rove's wrath. That's the definition of "truth" in contemporary Washington journalism. The recent Wolf Blitzer-Howard Kurtz CNN program blowing off of the Gannon/Guckert scandal as a "piffle" was a mindboggling, specious, unprofessional effort to come to the defense of the indefensible: a White House that manipulates the press like marionettes.

Besides which, during the Clinton impeachment, the mainstream press gravitated to every salacious detail leaked by Matt Drudge (illegally secreted to him by Ken Starr's staff), like flies to excrement -- and nary a complaint was heard. The New York Times and Washington Post were among the lead flies circling the Drudge dung.

As we noted when we recently named Howard Kurtz, our BuzzFlash GOP Hypocrite of the Week:

Following the Gannon story, anyone with half a brain cell realizes that Kurtz's comments are simply damage control bullet points from or for the White House. The blogging world did what the lackey mainstream press will no longer do, expose a story that is at the epicenter of the deceit and propaganda media campaign central to how the Bush Cartel continues to control America. The Gannon story touches upon everything from manufactured news to manufactured "reporters" to the Valerie Plame affair to websites that have a connection to the White House, but appear independent, to a Bush Cartel hypocrisy about gays, to payola, to scripted Bush news conferences, to who knows what. This is a BIG media story that should be on the cover of the New York Times and Post.

But it isn't, is it? The real investigative news story that needs to happen is not in the mainstream press; it is about the mainstream press.

It has been a mindboggling Orwellian week when a Capital Hill/White House Press Corps that couldn't stop salivating 24/7 over a blow job dismisses a non-journalist getting access to CIA documents and questioning the President of the United States, while he moonlights as a gay military hooker, dismisses the story as nothing, even as untold numbers of questions are raised about the White House credentialing process, with enormous implications for potential lapses in national security.

Hey, Scott McClellan admitted that he knew Gannon was operating under a pseudonym, but that didn't seem to disturb him, until he later qualified his story. In fact, there is so much damage control going on at the White House now, you would think that the White House Press Corps would be popping out with revelations of improprieties; that is, if they were doing their jobs. But that would be too much to ask. No one wants to rock the boat there, even when a mega-scandal is sitting right next to them.

Okay, so let's get Republican here. It's not the seedy sex and whether or not Gannon/Guckert was "servicing" anybody at the White House; it's the lying. But the White House Press Corps long ago stopped caring about Bush White House duplicity. Lying is the coin of the realm at 1600 Pennsylvania Avenue. Gannon/Guckert wasn't the only one to transmit White House press releases without any serious questioning of their veracity.

There are a thousand and one questions that can and should be raised about the White House stonewalling and lies about the Gannon/Guckert affair. And the only reason you will see them on the net is because it can get a reporter fired to bring them up fairly in the mainstream press (with the exception of columnists).

It's got nothing to do with credentials. You can report a Pentagon news release, get two people in the Pentagon to say it's true, and still be writing up a lie. It's who you ask, what you ask, and how vigorously you pursue the story. Most mainstream reporters can

telephone in their stories nowadays after getting news releases from the Bush Administration.

Sure, there are some decent, honest journalists chafing at the restrictions placed upon them not to expose the truth about the White House chronic lying and media manipulation. And there are some swell columnists in the New York Times and Washington Post, but the accomplices to the White House are the news editors. Everyday they choose what is considered news and what is not considered news. It is a highly subjective process, subject to White House pressure and influence.

Recently, New York Times Executive Editor Bill Keller wouldn't even tell his own ombudsman why the controversial Judith Miller went on television to discuss how the infamous source of many of her misleading pre-Iraq leaks, Chalabi, was now on the insider's list of the Bush Cartel again. You see, Miller revealed this on cable TV, in the newspaper's name, several days before it appeared in the NYT under another byline. And Miller was one of the people whose pre-Iraq war reporting the NYT apologized for. But nothing's changed.

Which brings us to the Valerie Plame, Jeff Gannon/Guckert, Judith Miller, Bob Novak, and Patrick Fitzgerald axis of "six degrees of separation." Just a few of the mainstream press dots that connect one to the other. You see, Gannon/Guckert tried to nail Joe Wilson by saying that he, Gannon/Guckert, was shown a classified CIA document (but Kurtz, Blitzer and the like seem to care little about such violations of national security). And Miller, ostensibly, faces going to jail for not revealing her knowledge about the Plame leak, while Novak blissfully continues to get paid to shill for the Republicans and the White House in particular, even though he was the one who outed Plame.

So Bill Keller is getting all indignant that Miller might go to jail and is making the Plame matter an issue of the right of a reporter to maintain confidential sources. But, here is where it gets interesting. Just the other day, a Federal judicial panel including David Sentelle (who exonerated Ollie North, appointed Ken Starr, approved secret activities by the FBI, and countless other decisions for the GOP), approved sending Miller to jail if she didn't talk.

Well, why would a right wing lackey like Sentelle side with the Bush administration on forcing a reporter (Judith Miller) who is a propaganda conduit for them to go to jail? (Miller wrote stories without naming sources that Cheney then used to create "factoids" to justify the Iraq War.)

Here's why. Because the purpose of the so-called Fitzgerald "Plame Investigation" is not to charge anyone at the White House; it is to find a reason NOT to charge anyone at the White House. If the U.S. Attorney can prove that there was general knowledge among a certain group of reporters in D.C. that Plame was a CIA operative, then no

crime was committed. And that is where, in the end, trust us, the go-to-girl for the White House, Judy Miller, will assist them. Alberto Gonzales brought the two key lawyers who were representing Bush in the Plame case to the Justice Department. So are you getting the picture now?

And what better way to bollix up an investigation than not to subpoena Novak, and, instead, subpoena secondary reporters to the investigation and get the media to denounce the threats being placed on their reporters? Ingenious.

Are you starting to connect the dots? The mainstream press should be connecting the dots, except for the fact that they are the dots.

Bill Keller recently bemoaned to the New Yorker that Karl Rove had berated him for not being fair to Bush. We were laughing so hard when we read that, we fell off our barstool. The New York Times political coverage (as distinct from its editorial page) is so innocuous and unwilling to connect the dots of the Bush administration, it would be useless without all of its supplementary sections, such as the editorial section and book review. It's Karl Rove's dream "liberal paper," because its news section is not liberal politically in the least in terms of news judgment.

It's had a little run on torture stories, and printed an Iraq munitions theft piece before the election because it was going to come out anyway, but it accepts the administration as if it is an honest one. If the role of journalism is to challenge authority by seeking out the truth behind the official statements, the New York Times fails miserably, with a few exceptions here and there. It in no way conveys the radicalism of the people in the White House, nor runs longer investigative pieces on their chronic deceptions and dishonesty. It pretty much accepts their news handouts at face value.

Which returns us to Gannon/Guckert. Here was a shill for the White House literally sitting amongst the mainstream reporters. A faux reporter by day and gay prostitute for Marines by night. A man who passed White House security using a pseudonym. A man the White House Press Secretary says that he was aware was not using his real name. A man who had access to at least one confidential CIA memorandum. And that's only the beginning of the unfolding story. The latest is that Dana Milbank, one of the reporters at the Post, says he believes Gannon/Guckert had a "hard pass" (no pun intended), not a day pass, as Scott McClellan has assured everyone. Gannon/Guckert couldn't even get accredited by the Capitol Hill Press Corps, but he got to ask questions of the President of the United States, as Helen Thomas was banished to a back seat.

Any journalism school graduate, untainted by the corruption of a mainstream press corps that is co-opted by the White House, would have pursued the Gannon/Guckert story as did the bloggers and BuzzFlash.

When you are young and well-trained in a good journalism school, your goal is the pursuit of the truth. Your concern is your professional ethics and credibility. Your loyalty is to your country.

That's before you get corrupted.

A BUZZFLASH EDITORIAL

No. I like some of what these guys say:

http://www.mises.org/

http://www.amconmag.com/

I like Ron Paul a whole bunch:

http://www.lewrockwell.com/paul/paul-arch.html

If you ever manage to shake off your demons you'll find that the
classical conservatives/civil libertarians and a lot of
''progressive/liberals'' share much common ground and that the
Neocon/Neorepublicans are pretty much by themselves out in
Neosocialist left field.

It's a new paradigm, Brother. You'd do yourself a big favor if you'd
quit reacting like Pavlov's dog. And quit watching the news on
television.

>
Radical centrists are related to what is sometimes called the Vital Center in American politics, and similarly claim to be drawing on the best of both sides. However, they differ significantly from traditional centrism, which prides itself on moderation and seeking political consensus amongst the parties; radical centrists, for example, are quite radical and populist in their stated policies. Radical centrists also can be divisive, as opposed to the non-partisan approach of traditional centrism. This leads to many moderates questioning whether radical centrism deserves to be called centrist at all (perhaps analogous to how the Left and Right often distance themselves from their respective radical wings). For their part, radical centrists are quick to dissociate themselves from traditional moderates, whom they often contrast as the "sensible center", or deride as the "squishy center."

Radical centrists can be found in both left-wing and right-wing political parties, but (like other centrists and independents) are usually penalized for being out of step with that party's dominant ideology. This leads to tension between what might be called separatist factions, who want to shed an unhelpful party label in order to run as independents, and puritans who want to reform (or take over) the party from within. This tension is particularly acute in countries with strong two-party traditions, since it is difficult for third-party candidates to win office or create governable coalitions absent significant electoral reform.

Radical centrists see themselves as building majority consensus for radical reforms by sidestepping (or confronting) what they consider the obsolete, polarized and non-productive ideologies of (social Conservatism/economic Liberalism) and (social Liberalism/economic Conservatism). Radical centrists assert that their principles represent the fusion of the best aspects of Conservatism and Liberalism, and thus interpolate at the level of philosophy rather than policy. They claim these ideological moorings (the 'root' behind their sociological use of the term 'radical') provide the basis for their critique of society, government and other political movements.

Agreed. I pulled out mine and attached it to my 50'
inverted L, and I didn't have that problem. The old
whine of the circuitry is still there, but considering
everything else about it, I don't mind. That said, I
guess you'd have to have it aligned by someone
to fix it.

Well, I did say I wouldn't buy a *new* receiver that lacked sync detection, but that's not to say that there aren't lots of older receivers (like the Drake R7) that are worth acquiring. If I saw a good deal on an R7, I'd be tempted. However, if I were buying a brand spanking new receiver, I would not consider buying one without sync detection. Especially in the case of tabletops, there's simply *no excuse* for them not to have sync detection now. It'd be like buying a new Mercedes sedan that lacks power steering.

>>Recapping? My old DX 160 is still playing away nicely. I bought it new around 1976 and haven't noticed its performance is degrading. <<

The reason I mention this is because my radio has a pretty good hum to it on certain freqs; maybe that's not a symptom of what I think it is (I know that a certian dimmer switch we have inserts a pretty good hum, too, unless it is turned all the way on). If I could talk to someone with some firsthand practical knowledge, I might be able to sort it (maybe even here). I do know that the thing needs alignment (no doubt I can get to and identify a frequency when I want to - I'd just like everything to be working right).

I like the radio - it's fun to play with when I'm not after any special weak station. If I decide to use it for this, I may add a frequency counter.

From: sdaniel13@nyc.rr.com
Message-ID: <1108742826.358481.272960@f14g2000cwb.googlegroups.com>
Source record: 8294

I have a remote control that I sometimes use with my R8B. It's a great accessory, so I use it a lot. However, I've noticed something strange. If I turn the receiver off with the remote and then turn it on using the front panel power button, the receiver powers up but the signal meter just sits there and the needle doesn't move. No other aspect of the receiver's functioning seems unusual--only the signal meter. Likewise, if I power the receiver off using the front panel button and then turn it on using the remote, the same thing happens.

On the other hand, if I use only the front panel button or remote to turn the receiver off and then on, there's no problem. The signal meter works as usual.

This makes zero sense to me. Any thoughts about what explains this weird phenomenon?

Thanks,

Steve

I didn't hear him say anything about it, don't listen to him that regularly. However, Steve Quayle mentioned something about the fault that runs from about Newfoundland, I think, all the way to Antarctica. (? the longest fault in the world - about 8800 miles long?) He mentioned ** the possibility ** of a tsunami occurring. I don't know that he mentioned the speed, height, devastation or when it MIGHT occur.

I have yet to see an automated translation program
that can cope with any technical topic. The results can
be fun to view, but I feel sorry for anyone who attemtps
to understand such a translation.
I was given a German WEFAX receiver, with all the
manuals, in German. After a few funny attempts to
run it through the translation services, I gave up and
bought a good Geramn to English dictionary.
Then after about 6 weeks of frustration met a German
ham who was at the university for a season. It took him
5 minutes to read the manaul, and another 5 minutes to
translat it for me. The electronic part was a breeze to
translat with a dictionary, but the meterology was a bear,
because I know next to nothing about formal weather
forcasting. While he didn't know anymore then me, he
knew the idioms and was able to make sense of it.

What you really need is to find someone who is bilingual,
who at least reads Italian and English. It wold be even better
to if they were techs. I can now "read" technical German, but
can speak none, and understand no(or so little as to equal none)
spoken German. While I can speek and understand a little Spanish,
I can read and understand a lot more. I fell in love with Cervantes
works and while the translations are OK, reading them in the orignal
Spanish is much better. It is fairly easy to learn to read a another
language, at least it is much easier then learning to speak another
one!

I have frineds who work in the IT universe
who hold the individual from who the
spam comes from responsable.
Their viewpoint, rather hars but with
some logic, is that it is each users
responsability to keep their PC
patched and up to date, and to
be aware neough to prevent such
"hijackings".
I don't know if their viewpoint is
reasoable, but I do know that the
place I work hold each person
completley responsable for
their work computr. Several people
have lost their network connection
as a direct result of having their PC
hacked. Makes me damn carefull about
where I visist and what Emails I open.
And we have a interprise wide ban on
IE and Outlook. And inspite of what Microsoft
says, both can be removed from 98SE, ME,
w000, and EX pro. The techs bring up "your"
work computer, aplly patches to remove
IE/Outlook and hand it over to to the end user.
Tough but we don't have many viri floating around
our intranet. And they fired some clown who
thought he was too cool for the rules when he
installed a peer to peer client on his work PC.
Took them less then 20 minutes to nail him,
another 20 to walk him trough the exit paper
work and an addional 90 seconds to walk him
to his car. And we don't let anyone else use or
work PCs. Kind of strict, but we have very few
problems.
If you don't donwload crap from the net, avoid
bait sites, don't use ie or outlook, don't open
"stange" email, you as a rule, don't get hacked.
Terry

Hello all, I want to buy one of these two portables:
sony icf-sw11
panasonic rfb11
I have tried a lot to find a comparison between the two on the net..
but couldn't find. If any of you have experiences with either or both
of these two radios.. please share it with me...
Thanks in advance.
Shams

Apparently, you aren't too familiar with how spammers "hijack" e-mail addresses.
When they "hijack" an e-mail address, it is just the address that they use and put as the sender and reply-to. They don't actually use your computer. If they were to be using your computer, then it would show up in the IP addresses that are in the message source. I have a couple of Yahoo accounts that happens to all the time. I receive a message stating that an e-mail was undeliverable, but obviously wasn't sent by me or from my actual account. When you look at the message source of the e-mail, it is often times originating in Korea or China. That is why a lot of spam blocking software, automatically block everything from those two countries.

ZCZC AP07
QST de W1AW
Propagation Forecast Bulletin 7 ARLP007
>From Tad Cook, K7RA
Seattle, WA February 18, 2005
To all radio amateurs

SB PROP ARL ARLP007
ARLP007 Propagation de K7RA

Conditions improved this week over last. The average daily sunspot number rose nearly 34 points to 75.1, and the geomagnetic indices were down over the week. The geomagnetic field may become more active, and for February 18-20 the planetary A index is predicted at 20, 20 and 15. The major sunspot group affecting us this week will soon move off the visible solar disk, but there is a small sunspot group on the other side of the sun. Conditions should be fair to good for the ARRL International DX CW Contest this weekend.

Carl Luetzelschwab, K9LA has an interesting and useful propagation column in the March 2005 issue of WorldRadio. With ionosonde data he demonstrates how daily variations in solar flux have little effect on the MUF. Instead, propagation is better predicted with a smoothed sunspot number applied to seasonal variations.

For instance, this afternoon when I wanted a feeling for when 15 and 17 meters would still be open toward various locations, it was better to use W6ELprop with an average of sunspot numbers for the previous five days rather than today's solar flux. You can get the recent sunspot numbers from http://www.sec.noaa.gov/ftpdir/indices/DSD.txt, and download W6ELprop from http://www.qsl.net/w6elprop/.

This afternoon I went out to the car to do some 17 meter mobile work. Geomagnetic indices were low and the band was good. I had a nice CW chat with KG0TS in Des Moines, Iowa, and then worked 9Y4/YL2GM in Tobago on SSB. Juris was in the Caribbean getting ready for the DX contest from 9Y4W this weekend.

If you would like to comment or have a tip, email the author at, k7ra@arrl.net.

For more information concerning propagation and an explanation of the numbers used in this bulletin see the ARRL Technical Information Service propagation page at, http://www.arrl.org/tis/info/propagation.html.

Sunspot numbers for February 10 through 16 were 63, 73, 72, 73, 115, 69 and 61 with a mean of 75.1. 10.7 cm flux was 114.1, 114.1, 116.4, 115.5, 118.1, 121.7 and 112.8, with a mean of 116.1. Estimated planetary A indices were 17, 11, 5, 4, 5, 5 and 13 with a mean of 8.6. Estimated mid-latitude A indices were 11, 7, 3, 2, 4, 1 and 8, with a mean of 5.1.

This is absolutely correct.
I have 2 companies that hijackers have used to make it look as the email originates from us but that is not the case. In fact we have posted notices of this problem on our websites to let users know that we do not send out any email unsolicited.
Best Regards,
Ted

4360. Re: Odd signal meter phenomenon

Newsgroup: rec.radio.shortwave
Date: 2005-02-18 18:25:18 UTC
From: ShortwaveMan <no@body.com>
Message-ID: <iqqRd.302$MY6.208@newsread1.news.pas.earthlink.net>
Source record: 8359

This may seem obvious so I hope no one will snort at me <s>, but the mechanisms for starting the meter are diffierent. If you use the remote the programming responds differently to the action. It would appear that there is no connection between operations using the remote and a manual action. Evidently the operation is not complete if you switch between manual and remote modes, so the code does not run its usual course and therefor does not start up again because it was never finished.

God gives Peace not war +
<sdaniel13@nyc.rr.com> wrote in message
news:1108742826.358481.272960@f14g2000cwb.googlegroups.com...
I have a remote control that I sometimes use with my R8B. It's a great accessory, so I use it a lot. However, I've noticed something strange. If I turn the receiver off with the remote and then turn it on using the front panel power button, the receiver powers up but the signal meter just sits there and the needle doesn't move. No other aspect of the receiver's functioning seems unusual--only the signal meter. Likewise, if I power the receiver off using the front panel button and then turn it on using the remote, the same thing happens.

On the other hand, if I use only the front panel button or remote to turn the receiver off and then on, there's no problem. The signal meter works as usual.

This makes zero sense to me. Any thoughts about what explains this weird phenomenon?

Thanks,

Steve

If it helps, you can find the ICF-SW11 service manual on the 'net. I used to think that the RF-B11 is the same as the Sangean SG-622 (given they're selling ATS-606s as RF-B55), but the dimensions, weight and speaker specs seem to differ. In any case, don't expect either to be a DX machine. Value for money is frequently not exactly outstanding either.

You were saying that you'd out dx the person
with an R7 in most situations, so I was curious
if the R-5000 was worth it to hang onto for DXing for a
long enough time considering you had an R7
and an R8 (and later, an R8B).

I might be worth replacing the power supply filter cap' but otherwise
the caps' should be alright. I aligned mine without any test equipment
other than a voltmeter. Works fine.

Maybe there's nothing odd here...I don't have a lot of technical expertise. It just seemed funny that the "connection between operations" would be incomplete in so particular and well-defined a way, where the ONLY thing affected is the signal meter. But hey...maybe this happens all the time.

Plain ol' 1st mixer nonlinearity, leading to the generation of harmonics. (Quite the equivalent of audio harmonic distortion.) Signal levels on MW can be very high. BTW that is one reason why several Japanese tabletop receivers have reduced sensitivity on MW. For another interesting (but inflexible) solution, the Kenwood R-5000 has several MW frequencies belonging to strong Japanese stations (at least back in '87) notched out.

> For the DE-1103, I know there is some filtering switching in for SW
> frequencies, in particular a lowpass filter for 1700 khz or so, and a

I assume you meant this vice versa (i.e. 1700 kHz highpass, 30 MHz lowpass)? Would make more sense that way.

> This gets rid of the MW band bleeding

> much care or concern about the LW band when these radios were designed.

Well, LW isn't really all that exciting. The band fits no more than a handful of stations, but propagation typically varies little and transmitter power ranges from high to gigantic, yielding good reception in distances of hundreds of kilometers and more. If you're hunting for utes in that area, MW images are pretty deadly of course... but the kind of receivers we're talking about isn't exactly suited for this purpose anyway. Personally, 49m images on 60m and 19m images on 20m have annoyed me more in the past (the AN-LP1 fixed the former but not the latter).

Similar ideas have led to the current Winradio receivers (e.g. G303i).
However, what you've overlooked is that you cannot do everything in
software. A receiver needs to be designed for the frequency ranges it's
supposed to receive - from input filters, mixer concepts (shortwave with
its higher natural noise levels allows mixer concepts that may be
noisier but have better strong signal handling), oscillator frequencies
ranges to IF filtering (you do need some bandpass filtering prior to A/D
conversion). Really good receivers for both below and above 30 MHz
aren't expensive for no reason. The pro way of expanding receiver
capabilities, BTW, is going modular. I assume a VHF module would contain
a separate frontend, synthesizer, ï¿½P and IF strip, with the signals
being merged with the others at IF level (or even AF level). Not
entirely trivial and certainly not cheap.

If the *mainstream news providers have betrayed the people*, then the people, sitting on their living room couches, will not be happy with the newscast they are now watching. And so they will simply pick up the handy clicker and change the channel !!

So not to worry, David, America is free to watch what we want, and free to give poor viewer ratings to any news outlet which we distrust. Which will cause their advertisers to start sponsoring other media channels whose excellent ratings indicate the people are well pleased with their content quality.

So really, David, thanks to capitalism and individual freedom, as opposed to Government ownership and control, the problem you report is (at least in America) automatically self correcting.

God bless America!.

Pete KE9OA schrieb:

> Another thing that can cause that (2 X 2nd I.F.) image is
> 2nd LO leakage coming back into the input of the 1st mixer.

Happen to have a little example with numbers? I still have difficulty
imagining this.

Let's take a typical rx with 55.845 MHz 1st IF and 455 kHz 2nd IF, plus
a desired frequency of 10.000 MHz. Furthermore, 1st IF filtering be
perfect in suppressing 910 kHz images and a SW lowpass be present.
1st LO = 65.845 MHz.
2nd LO = 55.390 MHz = const.

Even if there is some 2nd LO leakage into the 1st mixer input, it should
be treated exactly like any other ordinary signal (with a signal level
much smaller than that of the 1st LO), i.e. mixed to an unexciting
10.455 MHz. Obviously for another signal to be observed as a +910 kHz
image we need to have it on 54935 kHz, after the roofing filter, but I
assumed this would be perfect. Alternatively, we'd need to generate a
10910 kHz signal in the 1st mixer and leak that back to the 1st mixer's
input (but how likely is that?). I guess I'll grab a piece of paper
now...

Most radios have a bit higher distortion when using sync, plus there is always going to be a slight frequency offset. Some radios will growl trying to get the sycn. Throw the audio out on a spectrum analyzer and you might spot a weak tone artifact due to the sync. Use it when it sounds better, otherwise leave it off.

Sometimes there is more noise "under" one sideband than the other, so you might use sync and pick the quieter sideband. Adjacent channel splatter would be a good example of noise under one sideband and not the other.

I probably use sync a few percent of the time.

That was one of the most painful threads I have ever read.

I was excited to find out that the 1108 was going to become a reality. I am a big fan of Degen and I hope to place my order for this radio the very first day it goes on sale.

I was even more excited (or even awed) to see that the engineer who was responsible for two of the best radios this decade (Sat 800 and DE1103) was actually sharing his time and energy with us, and was even letting us, the listening and buying public, to help him design the best radio possible.

But then the xenophobic ranting started. I was shocked at first, but I hoped that it was just a poorly executed cute remark that fell flat. But the rantings continued. And there was definitely nothing cute about it. It was intentionally mean, and I was horrified to realize that a fellow American and dxer would stoop to such ignorant and mean-spirited rantings.

The thread then got too painful to read. I immediately blocked the offending poster, but the memory of his ignorant ranting still sticks in my craw. In fact, looking back, I can't even remember exactly who that hateful poster was. I think he was a regular here, but his postings no longer appear on my computer, so I can't be sure.

I hope that wonderful engineer is able to forgive that crude offender, and that he doesn't hold all of us responsible for such horrible and unacceptable behavior.

I guess all you'd have to do would be to look at your kill file to get an idea
of who it was then. Seems pretty darn simple to me.

And according to something I heard on the radio in the last day or two,
a lot of that money was funds from the "Oil for Food" program that were
turned over to the Coalition Provisional Authority after the takeover.

So those guys are no better than Saddam.

I still don't under why Lowe used even implemented double sideband sync in
the HF-150 if it doesn't do anything over single sync. Why add this feature?
For what kind of scenerios??

Lucky

4390. average CEO makes $10.7 million dollars per year !!

In essence though, isn't it single sync anyway? Versus the selectable sideband sync that is in the R8B?

Can you choose which sideband you will use the sync in on the HF-150?

They're not necessarily getting paid for sending jobs overseas, they are
generally being paid for generating income for the company.

If all you are doing is putting a screw into something all day long then perhaps
that's all that job is worth, $8 per hour.

Maybe there's nothing odd here...I don't have a lot of technical
expertise. It just seemed funny that the "connection between
operations" would be incomplete in so particular and well-defined a
way, where the ONLY thing affected is the signal meter. But hey...maybe
this happens all the time.

Children starving? In the USA? Where? Last I heard all the darn kids are fat.

If anyone is indeed starving in the USA it is not the fault of some CEO, nor is
it the fault of government.

>
> If you ever manage to shake off your demons you'll find that the
> classical conservatives/civil libertarians and a lot of
> ''progressive/liberals'' share much common ground

MOST ORDINARY PEOPLE do not fit very neatly into any political category and may hold to a mix of views that include what would usually be seen as both Leftist and Rightist ideas. Among professional politicians and academics, however, there is generally a clearer polarization. So what is it that makes any given view "Rightist" or "Leftist"? In contemporary North American terms, what is it that makes one an archetypical "liberal" or an archetypical "conservative"? What is a Leftist or a Rightist position on any issue?

The division obviously is real and the demise of the great icon of Leftism -- the Soviet Union -- seems to have had little impact on its intensity. Leftists may no longer have Communism to point to as a possible alternative system but they remain Leftists all the same. The banner cause of Leftists since Karl Marx -- State ownership of the means of production or "socialism" no longer seems reasonable to all but a handful of diehards but Leftists are still Leftists and Rightists are still Rightists and never, it seems, the twain shall meet.

The great rubric of "conservative" long fastened on Rightists seems equally moribund. "Conservative" is generally amplified as meaning "opposed to change" or "favoring the status quo" but from the Reagan/Thatcher years onward, Rightists have been the great advocates and practitioners of social and political change. Rightists have been almost revolutionary in tearing down the proud edifices of the Left -- with privatization, deregulation, welfare cutbacks, tax reductions etc. Judging by the politics of the last 20 years, Rightists love change! Certainly, they have clearly and energetically changed what was once the status quo.

So what is going on? What is Leftism/liberalism and why are people Leftist/liberal? What, if anything, do people have in common who describe themselves (and are described by others) as "Leftists", "socialists", "social democrats", "Communists" and (in North America) "liberals"?... http://frontpagemag.com/Articles/ReadArticle.asp?ID=1226

Shocked you were? And your memory is too painful for you?
Hmmm, perhaps you should read more, or better yet, live in China for a
while.
Then and only then will you understand the "horror" that the WWII generation
that can no longer pass on to your memory. Perhaps Tianamen Square will
refresh your ailing synapses. No? Well, here is something very recent for
you
to be shocked about:

http://www.geocities.com/china_e_lobby/17November2004.html
http://www.geocities.com/china_e_lobby/24November2004.html
http://www.geocities.com/china_e_lobby/01December2004.html

Keep up to date about your engineer Komrade here:
http://english.epochtimes.com/category.asp?id=92
Especially noteworthy today: http://china-e-lobby.blogspot.com/

By the way let me give you a bit of advice. If your email to the Degen
engineer doesn't bounce these days it is a sure bet he is very well
connected with the Chinese Communist Party. The CCP are currently in the
Blocking All Foreign Email mode! They tend to do this during times when
they feel threatened by "unsanitary information" penetrating their bamboo
curtain.

Now, if you heard this on Radio Havana, it MIGHT be considered at least
tangentially shortwave related. But this is just an internet article
with your opinion tacked on. You're as bad as David.

By the way, Radio Havana had a "news item" a couple months ago that
compared the number of hungry children in the US to the number of people
who are obese. They made it sound like the rich were porking out while
the poor were starving (unlike Cuba where EVERYBODY is starving except
Fidel) when in reality the poor are more likely to be fat than the rich
because the only food the poor can afford is junk and fast food.

A lot of old Dxers use R-5000s including me. You won't be disapointed. Some have complained about key bounce on the newmeric pads but I've never seen it in the three I've owned. The one I have now has seen service daily for three years. There one of the best radios ever made. Theres alot of good radios out there now days. I like the NRD-525 too with an extension speaker of good quality and the Icom R-75 is a good bang for the buck. Some R-8s are out there for around four bills that are great performers. All these radios I've mentioned are under $500. Good luck.

If this is directed at me, you've misunderstood me. I should have been more clear, and I'll take the blame for the misunderstanding. My machine wasn't compromised in any way. Someone merely used my e-mail address for their entry in the "from" field. Nothing came from my machine; the headers were spoofed.

Yeah, that's what the page says. And I know that's what Memri does. But it's -so- wrong! But then when I think of it, it sounds an awful lot like Christian creationism, and so I really shouldn't be so surprised when some other religion's fundamentalists (with an emphasis on the "mental") come up with zingers like these.

4416. Degen DE-1103 batteries too short / instability / lockup

Newsgroup: rec.radio.shortwave

Source record: 8414

Hello,

I know most of the regulars in this are very partial to large rigs, but also a lot of people bought small cheap portables off of E-Bay. Anyways, the Degen DE-1103 is know for having some stability problems. I've found out that the batteries supplied with it (at least with mine) are about 0.7 mm too short each. Since they are used in pairs, this is 1.4 mm per battery chamber. The springs look kind of weak, so I wouldn't be surprised if poor contact because of the shorter length leads to instability, lock-ups, etc. So, try longer batteries, it worked for me.

At the mid-atlantic ridge, the plates are moving apart and new crust is
being created. This is different from, say, the San Andreas fault, where
plates are scraping each other in a shearing motion and creating many
earthquakes, or the thrust faults around the Indian subcontinent, where
where mountains are slowly being uplifted due to the collision of two
plates (and generating many earthquakes). I believe since there is not
much stress at the mid-Atlantic ridge (relatively) the change of major
earthquakes is small.

Get this straight. Buying a Degen or Tecsun or any other Chinese made product does NOT constitute de facto endorsement of the Chinese Communist Party! You, apparently, are too dense to grasp this simple fact. Listening to CRI, and/or receiving a QSL from them, does NOT constitute endorsement of the CCP. I listen to Radio Havana all the time, but I'm no fan of Fidel or his regime. I enjoy Cuba's perspective on events, especially the Israeli-Palestinian war-they're the only SW station that I can regularly receive that reports the Palestinian side, a useful counterbalance to American domestic news, which reports the Israeli side, when they report on it at all. Anyway, listening to a certain SW station or buying products from a certain country does not endorse that country's regime. All the Degen engineer was trying to do was get feedback on his designs, and YOU GUYS turned it into a political battle, when it shouldn't have been. Your blind hatred of all things Chinese is as bad as Roedy Green's blind hatred of all things US, and dxAce's blind hatred of, well, everything. Get a clue already!

Yes, he is a nuisance, and I think that even though I agree with some of
the stuff he posts. But it's still off topic. I don't think I've EVER
seen David post something SW related. He says that his views are more
important than SW, which is fine for him to think that, but then he
should go to talk.politics.misc and leave us alone.

" There are 2 major geological faults in southwestern Newfoundland. The Cape Ray Fault is about 1 km wide and crosses the Trans-Canada Highway (TCH) between the entrance to John T Cheeseman Provincial Park and Barachois Brook. This fault extends for about 100kms (60 miles) and eventually crosses the Burgeo Highway.

The largest and most important fault in the area is the Long Range Fault (Cabot Fault) which runs from the bridge crossing the TCH at McDougall's Brook to the northeast coast of Newfoundland at the Baie Verte Peninsula. This fault also runs through Nova Scotia and New Brunswick. The Long Range Fault once marked the boundary between North America and Europe before the two continents separated about 200 million years ago.

Neither one of these faults is active. "

Chris:
The R-5000 is just as sensitive as any of the newer receivers. It has a very good notch filter and a very good noise blanker. It doesn not have a sync detector but it is very stable so it does ECSS well. The audio is flat but clear.

The RX-320D is the best radio out there for the price: very sensitive, stable but also lack a sycn detector. It does have the 12 Khz IF output so you can use it for DRM reception. There are many excellent software programs available. Several are free. The audio is as good as your computer sound system.

Although I use a R-75 now, the KW 5000 I used to have was wonderful.

Glorious audio, stable, sensitive, fewer images and BCB interference than even the R75.

It also had an excellent working NB, its adjustable too. The notch filter worked OK but only manual and single. But you could take out WEAK tones which were barely above the desired program level, something autonotches apparently can't do.

The standard 6 KHz filter was too wide, but the optional 6KHz filter (same bandwidth but steeper skirts) was as fine a SW AM filter I ever heard, or ever will, perfect fidelity.

I also used an 1.8 KHz filter (for crowded HAM SSB bands) and 500 Hz for CW, RTTY.

Prices aren't bad for the filters because they are at the 9MHz IF, instead of the lower IF, so they are smaller in size and thus cheaper...

Somewhere in QST mag back issue was a mod for making a spinner for the main knob, and that worked very well...

The sad part is that it was a group with such a narrow view of the world that different cultures are threatening. Someone told me the trolls have morphed into gangs on some of the news groups. This news group is not there yet, but it is getting closer. That was probably the first and last time someone from the radio manufacturing industry will ask this group for their opinions on the design of a new radio. It was truly a unique opportunity to actually have some input into the features we would like to see on a radio. And we collectively blew it because of the immature behavior and xenophobic attitude of a few.

Congratulations guys. You accomplished something that I'm sure you are proud of and will take home and brag about to your family.

Dear Chris,

Piece of advice based on many, many years of experience:

DON'T BUY USED! Repeat: DON'T BUY USED!

Why is the seller getting rid of the unit? NOT BECAUSE HE LIKES IT!

It is ALWAYS better to buy a relatively inexpensive NEW item rather
than some dude's cast-off finery!

I have no experience with the Ten-Tec RX-320D. However it does get a
very nice review in the new PASSPORT, which I recommend you buy if you
haven't already.

Best,

Joe

Dear Brian,

There's nothing wrong with someone trying to sell an unwanted radio (or any other unwanted item). eBay and similar places are excellent for collectors trying to buy a missing piece of their collection, or for a person who wants to re-buy a radio he/she had years ago.

But a person looking to buy a primary receiver for daily use should, in my opinion, ALWAYS buy NEW, even if the new unit is of a somewhat lesser "caliber" than a used unit. A reputable dealer will offer a US warranty and will show interest in your satisfaction with your purchase.

"The bitterness of poor quality lasts far longer than the sweetness of low price."

Best,

Joe

P.S. Why WOULD you sell a perfectly good radio? I have never sold ANY of mine. I wouldn't even CONSIDER selling a poorly-performing or broken unit. I have, indeed, thrown them out!

I don't own an audio spectrum analyzer so I'll have to stick to my
ears. Using my ears I don't notice any additional distortion from using
the sync. I own four different makes of radios that have sync and have
not noticed the additional distortion of which you speak. The default
for me is to leave it on. Usually I only turn it off for band scanning
or seeking because I don't want to wait for it to lock.

Sounds like your radio needs adjustment or you are just hearing an
interfering signals heterodyne made apparent by the injected carrier.

Absolutely right. It no more makes a radio consumer an endorser or support
of communism than the companies who are outsourcing their production to
China and elsewhere while making contributions to both political parties.

Anyone remember what propagation was like on 27 December?

http://news.bbc.co.uk/2/hi/science/nature/4278005.stm

Huge 'star-quake' rocks Milky Way

Astronomers say they have been stunned by the amount of energy released in a star explosion on the far side of our galaxy, 50,000 light-years away.

The flash of radiation on 27 December was so powerful that it bounced off the Moon and lit up the Earth's atmosphere.

....

The initial burst of high-energy radiation subsided quickly but there continues to be an afterglow at longer radio wavelengths.

4469. Finland: The situation at Radio Finland - clarification

Newsgroup: rec.radio.shortwave
Date: 2005-02-19 08:39:18 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cv6tvm$r2a$1@hercules.btinternet.com>
Source record: 8517

Juhani Niinisto, head of Radio Finland, has contacted Radio Netherlands to correct a story about possible cuts in the mediumwave/shortwave services published on the web site of the Finnish national newspaper Helsingin Sanomat on 10 February. The information in the newspaper report, which was also published on BBC Monitoring's Media File on 10 February, was in fact based on an old story from June 2004, Mr Niinisto pointed out.

He provided the following new details:

"Since June 2004 there has been public discussion about the future of international free-to-air radio in Finland. The major organization representing Finnish nationals abroad (Suomi-Seura, Finland Society) has underlined the view that reception of free-to-air radio from Finland is a "subjective" right of the expats. The organization, headed by former foreign minister and Labour Party chairman, Mr Pertti Paasio, has worked intensely on the matter. For example, they had some 30,000 copies of a leaflet printed focusing on the cost to the consumer of a) SW b) mobile phone internet and c) satellite services.

"Last week, Finland Society handed in a petition representing some 15,000 Finnish expatriates, to the chairman of the parliamentary controllers of YLE, MP Mika Lintila. In public, the issue has become mainly a discussion of the high cost to the consumer of the use of mobile internet. Commenting on the matter on air (YLE Radio News, in Finnish, 8 Feb 2005, 1400 gmt) Mr Lintila said that mobile phone internet, in its present form, probably cannot replace radio via shortwave.

"YLE has taken so far no decisions about the future of its SW. The current agreement concerning distribution with Digita/TDF runs out at the end of 2006. The popularity of Radio Finland amongst expats may be attributed to the fact that in the early 90 Radio Finland broke away from the traditional international broadcasting formats and introduced continuous all-day flows of programming. Live domestic and international sports is a key attraction.

"Within YLE, the future of SW and MW is an issue at the corporate level, and not a matter handled within the external broadcasting branch only. As stated, no decisions have so far been taken.

"In 2002 YLE closed all foreign language external services, except Russian and some small languages spoken in Russia. The closures did not arouse much protest, except to some extent from the German area. The reaction to the possibility of closing now Finnish and Swedish has been suprisingly vast and intense, and may be unique in recent expatriate media discussions, internationally. Radio Finland has not, repeat, not, been involved in these campaigns."

Let me remind you that no one has 'stopped' anyone from posting here regarding radio, the design of a radio, etc.

If the fellow from China wants to post here (or not) and read responses (or not) that apparently is his choice (or his governments choice).

Please bear that in mind.

| Get over it, the next election is 2008.

Here's the irony....the "winners" here are the real losers, for you'll be getting exactly the opposite of what you've been told is coming your way. The fact that you don't even see it coming is what makes it all the more hilarious. Sortof like the sitcom, where we in the audience know what's in store, but the Clueless Dad walks right into it.

Interestingly, the KWM-1 transceiver, not exactly cheap in its day
either, has the reputation of being rather noisy.

> The larger speakers, along with the audio chain help the sound somewhat, but

That would be a "Transistor 6001". The 5000 was the Sat 205, the 6000
the 208.

> A dual-conversion unit on the SW bands, with 3-gang tuning on all

Not too surprising considering the '2010 does not have front-end tuning.
The dynamic range even of a balanced FET mixer is finite after all.

> Of course, no Sync detection, no digital readout, but
> the best portable sound. Some of the upper end Nordmende and Philips units
> were also good. Nobody makes portables the way the Germans did in the 60s
> and 70s. A lost art.

If I ever get into the position to do something about the audio quality
issue, I'll see what I can do. It's a shame when a newfangled Sony
ICF-M60SRDS cannot keep up with a 30 year old Grundig Signal 700 sound
wise and is somewhat but not dramatically better than a Philips D1835
with a much smaller speaker (8 cm vs. 12 cm). (BTW, Philips is a Dutch
company. They had their '80s portables made in Hong Kong (e.g. D1835,
D29xx) or China (e.g. AE3405), but then Grundig's Yacht Boys of the time
like the 700 were made in Singapore, too. Grundig(Europe)'s later
portables usually came from the factory in Portugal.)

I own a Grundig radio that has shortwave bands and AM/FM bands and it has a phonograph/record player in the top of the radio which has a lid that is hinged at the back and folds down to cover the phonograph/record player.The radio does work but it needs some repair work to make it work like it is suppose to work properly,seems that it doesn't put out much sound/audio.The phonograph/record player works too.The radio has a wood cabinet.I bought the radio for $14.00 at a Goodwill thrift store about seven years ago.Right now I am useing the radio as a tv stand for a tv set I don't use anymore and my stupid webtv set top box is sitting on top of that old tv set.The owners manual is in the top of the radio where the phonograph/record player is and I am not going to the trouble to get it out to see what model of radio it is till I damn well feel like it.I think the radio dates back to the 1950's but I don't remember exactly.If some of y'all will throw up some websites with some pictures/thumbnails (I like them thumb nail pics of them pretty naked wimmins too) of those old radios,maybe there might be a picture of the make and model radio I own.I also own a big Telefunken shortwave AM/FM wooden case table model (good "yum yum" is called Table Grade) radio that I bought at a Goodwill thrifstore about six years ago but that radio does not work because some of the tubes are missing and I don't know whatever else/work it needs to get it working.There is NO such thing nowdays as new radios of any kind that comes anywhere near looking as good as those old radios of many years ago,I don't care what anybody says.Damn F..King cheap ass plastic radios nowdays look like shit!

Only reason I'm considering it is because a dealer is selling it and
they guarantee it'll work. If it does work well, I can probably
resell it without taking near as much of a hit if I grow tired of it.

I've bought and sold many radios over the years, and there was only one
that I sold was due to problems, I traded it in on a new one.

Of all the SW receivers I have bought, only one had any problems, and it
turned out the seller was famous for this.

I have sold radio because:

I just wanted a better one.
I didn't like something about it.
I didn't like the audio.
I wanted to buy something else (needed the $$$
I had too many and wasn't using it much...

I would always recommend going with a decent used radio, like a NRD 525
over a POS portable like a lot of people do..

Wow, this thread is almost on-topic!

But the flag-waver needs a reality check. Unless he's a frequent listener of news sources outside of the U-S (my favourite is the CBC, but the Beeb will do) the idea that market forces will "correct" this oversight fails to realise that market forces have created this problem in the first place.

The first thing I'd do, if I were running things, is oblige licencees to run a minimum amount of news sustaining (although I'm not sure what I'd do with all-news stations) as a condition of licence. By taking out the financial segment of the equation we might get the real news once again. As with everything else in America, the money has corrupted the process to the point where it's unrecognisable from the industry of the past, where true investigative journalism overturned administrations, corrected social imbalances and played a role in making the U-S the beacon of freedom it once was. But of course, it's the flag-wavers who don't really want it that way, anyway, just so long as things stay the same for them. And (it's worth noting, not that you don't already know) there are plenty of countries where government "ownership" does not come with government control....often, in truly free societies, it's the government-owned media that is the biggest critic of its government. But the flag-wavers don't know that, either.

Weren't you experimenting with crystal radios a year or two ago? Generally, repair is easier than homebrew.

Nearly all single conversion superhets align using the same simple procedures. I think the DX-160 service manual is online, and the ARRL handbooks have some good straightforward alignment instructions.

You can even do excellent alignments without a signal generator, if you have digital readout receiver to read the radio's local oscillator frequency.

However, the radio may be aligned about as well as it can be. Generally, the dial readout is exactly correct at two or three points on the dial, at best. There are usually areas in which the dial readout doesn't perfectly track with the received frequency probably because the tuning capacitor/ coils don't exactly match the prototype they developed the original dial from.

Anyway, if you want to give it a try, I'm sure you can get some help here.

Note that the MAP on Ebay right now is missing the direct pickup attachment, AC adapter, and manual, and has some cosmetic flaws.

FYI, I will soon be auctioning a MAP unit for a friend of mine. It has the manual, the pickup, the AC adapter, and is in very nice shape. Watch Ebay for this one... I'll post the Ebay item number here, too.

I might be selling my own Kiwa MAP sometime, as my current main receiver (IC-756Pro) is all DSP and a 455 kHz I.F. hookup is not possible.

24 November 2004 - Voice of America News
China's Sichuan Province Tense in Aftermath of Violent Anti-Dam Protests
By Luis Ramirez
Hanyuan, China
...
This man, who did not want his name used, saw the confrontation and says it is impossible to know exactly how many people were killed. "People died," he said. "Maybe more than 10,000 died. It cannot be estimated."

Others in Hanyuan give accounts of staggering death tolls. But it is impossible to independently verify. The government promptly sealed off the entire region surrounding the dam, and banned all news media from entering. Witnesses cautioned that if journalists were discovered in the area, authorities would detain and expel them.

In a car with tinted windows, this reporter anonymously slipped into the gorge along the Dadu River - past heavily armed soldiers and police, to catch a glimpse of the gigantic dam project and the towns of villages that are to be flooded.

Nov 10, 2004 - COMMUNIST POLICE BEAT SICHUAN PROTESTERS

Tens of thousands marched in Hanyuan County to protest a forced relocation that included "tearing down their homes under orders issued by corrupt officials" who lied about the compensation value of the land seized. In response to the protest, the cadres sent in the police, who "injured several dozen people and beat one man to death."

Nov 17, 2004 - SICHUAN PROTESTS ENDS WITH COMMUNIST POLICE SHOOTING

The farmers and others protesting a mass forced relocation in Hanyuan County, Sichuan Province, were met with a hail of bullets from Communist police. An activist in communication with the farmers during the shooting told the Epoch Times that the police killed seventeen protestors and wounded at least forty others.

Luo Gan, head of security for the People's Republic of China, flew in himself to supervise the crackdown. Luo, a prot&#65533;g&#65533; of Tiananmen Square butcher Li Peng, may have been driven to follow in Li's bloody footsteps by the recent reports tallying the number of protests in Communist China at more than three million.

Nov 24, 2004 - SICHUAN DAM HALTED, CADRE FIRED AFTER PROTEST
BUT THE KILLING CONTINUES AS MORE COMMUNIST MILITARY IS SENT IN

The massive protests against relocation forced by cadres building a dam in Sichuan has led the Communists to fire one unnamed cadre and promise suspension of construction. Left unmentioned by the BBC report of the "riot" was the fact that Communist police shot at least seventeen protestors dead.

In fact, the PRC has sent in the military to "put down the 'rebellion' of the unarmed peasants", through, among other things, the use of tear gas - "many people have been wounded and some killed." Of course, local cadres are insisting "there is no gathering of armed forces and no conflict between the government and local residents."

Dec 1, 2004 - DEATH TOLL IN HANYUAN COUNTY "CANNOT BE ESTIMATED"
"STAGGERING" SLAUGHTER BY MILITARY TERRORIZES ANTI-DAM LOCALS INTO SILENCE;
CONSTURCTION OF DAM CONTINUES DESPITE PRC PLEDGE TO SUSPEND IT

The Epoch Times managed to get Luis Ramirez (VOA) into Hanyuan County, where the military forces of the People's Republic crushed a massive protest against land seizures by local cadres to build a power dam. One local, who wisely "did not want his name used," guessed the number of protestors killed by the Communist military to be "more than 10,000".

While such a number - or any number - was "impossible to independently verify," other locals gave "accounts of staggering death tolls." If the number is even remotely accurate, it would be three times the estimated number killed in Tiananmen Square in 1989; as on that fateful June 4, "troops fired on the unarmed demonstrators."

The dam "will force 100,000 people from their homes." A roughly equal number of protestors filled the streets of Hanyuan County and tried to shut down dam construction. The Communists pledged to halt said construction, but according to this report, "it is apparent that work on the dam has in fact continued."

It should be noted that the decision to send in the military was made by "both the central government and the Sichuan provincial authorities," meaning that the Hanyuan November massacre can be laid at the feet of "reformer" Hu Jintao.

You must be new to Usenet. When a thread goes off on such a tangent that it has nothing to do with the original post, the polite thing to do is rename the thread...preferably with a Was: in front of the old name. That way people who want to follow the original, on-topic discussion can do so without wading through all of the other, unrelated crap. Let's say we're discussing images, and cuhulin chimes in that his dog Blueberry www.cattledog.com just farted in his open mouth. That leads off to a thread of discussion that has nothing to do with images, like why is his open mouth so close to Blueberry's ass in the first place? Anyone who wants to follow the images conversation has to wade through the farting cattledog replies. Not good.

So then someone renames the thread "Cuhulin sucks dog farts Was: images".

That's good. See, when the replies aren't to the original thread, they don't belong in the thread they originated in. ;)

When did you get out of therapy? I'm guessing you went there after Kerry lost.

You did disappear for quite a while. Was that the reason?
